Brown, Red, Black | Wood Chips

Ingredients

Untreated lumber
Non-toxic Dye

Product Uses & Specifications

Colored wood chips are a beautiful, effective ground cover for weed suppression, water retention, and landscape decoration. Colored wood chips are made from source-separated, untreated lumber and pallets. Iron-oxide dye is applied with specialized equipment that guarantees consistent and thorough coloring. Please use care if applying during wet weather as dye may transfer. Simply spray any color transfer with water to remove.

Manufacturing Description

- Colored woodchips are slowly ground to achieve size consistence
- Standard sizing is 3 ” and under
- Chips are dyed using a water based certified non-toxic dye and dried for at least 24 hours prior to sale.
