Re: Regional Energy [illegible] Study [illegible]

Dear Sir or Madam:

I have the following comments on the study.

1. The Southern Power Plant should be torn down and replaced by a plant in more appropriate location. South San Diego Bay is overburdened and inappropriate for the region. Several municipalities and agencies are currently involved in long-term planning to create a [illegible] park in the area. There is no [illegible] and it would be more appropriate to locate the power plant elsewhere.

2. For similar reasons, the power lines along the eastern side of the south bay should be underground. They are [illegible], [illegible] and [illegible] in a highly [illegible] area.

Sincerely,

[signature]
