APPENDIX HE-D - ADEQUATE SITES INVENTORY

INVENTORY REPORT

INTRODUCTION

In this inventory report portion of the Adequate Sites Inventory, you will find the draft inventory of sites within the City of San Diego that have potential for the development of new housing units during the 2021-2029 Housing Element period. Inclusion of a site on this list does not indicate that a site will be developed or redeveloped, or will be required by the City to develop or redevelop. Rather, it indicates that the site has unrealized capacity for housing, based on its zoning and/or land use designation in the applicable community plan, that could reasonably be realized during the 2021-2029 period. See the accompanying methodology portion of Appendix HE-D for a detailed discussion on how these sites were identified and how their housing capacity was assessed.

GLOSSARY

Site Categories

- **Potential Future Infill (Non-Vacant):** Non-vacant sites, i.e. sites with existing development.
- **Potential Future Infill – CPU In Process:** Non-vacant sites that are within communities currently undergoing a community plan update that will be adopted prior to April 2021. The housing capacity for these sites is based on the draft updated plan land use map rather than the existing plan land use map or zoning.
- **Vacant:** Sites with no or minimal existing development.
- **Vacant – CPA in Process:** Sites with no or minimal existing development for which a community plan amendment has been applied in order to change the land use designation and/or zoning. The housing capacity for these sites is based on the proposed amended land use designation rather than the existing land use or zoning.

Site Information

- **Community:** The name of the community plan area in which the site is located.
- **Site ID:** A unique identification code assigned to the site for the purpose of the site inventory.
- **8-Digit APN:** First eight digits of the site's Assessor's Parcel Number.

- **Site Area (AC):** The size (area) of the site, expressed in acres (AC).
- **Zone:** Existing zoning for the site.
- **Land Use Designation:** Planned land use for the site found in the relevant adopted community plan (or, in the case of sites in the "Potential Future Infill – CPU In Process" category, in the relevant draft community plan).
- **Existing Land Use:** The existing use of the site, as categorized into standardized land use types.
- **Subject to AB 1397 Review:** "Yes" in this column indicates a non-vacant sites that was identified in the adequate site inventory of the 2013 5th Cycle Housing Element or a vacant site that was identified in the adequate site inventories of the City of San Diego's 2013 5th Cycle Housing Element and 2005 4th Cycle Housing Element; and indicates that the site is therefore subject to a suitability review under Assembly Bill 1397 in order to be eligible to be counted toward the City's lower income housing capacity.
- **Meets AB 1397 Suitability Criteria:** For sites with "Yes" in the "Subject to AB 1397 Review" column, a "Yes" in this column indicates that the site meets the AB 1397 criteria to be included in the City's lower income housing capacity, and a "No" indicates that the site does not meet the criteria. The criteria are: 1) zoned to allow a maximum residential density consistent with the City's default residential density of 30 dwelling units per acre (or the substantially equivalent density of 29 dwelling units per acre for the City of San Diego), and 2) allows residential use by right for housing developments in which at least 20 percent of the units are affordable to lower income households.
- **Net Potential Units:** The potential housing units developable on a site under the zoning and/or land use designation minus the existing housing units on the site. The Net Potential Units shown for a site in the inventory is based on 90 percent of the maximum permitted under the zoning or land use designation as a conservative estimate of the site's development potential. All of the sites with a figure in this column are considered suitable for the development of above moderate or moderate income housing.
- **Net Potential Units (Lower Inc.):** The number of net potential lower income housing units developable on a site that is considered suitable for lower income development, based on the criteria in California Government Code Section 65583.2. See the Suitability of Sites for Lower Income Housing section in the methodology portion of Appendix HE-D for more information.
- **Lower Income Housing Units:** Housing units that are affordable (rent-restricted) to households of extremely low, very low, or low income.
- **Max. Density:** The maximum housing density permitted on the site under the existing zoning and/or land use designation.

- **DU/AC:** Dwelling Units per Acre. This is a measure of the potential density of housing units on a site.
- **FAR:** Floor Area Ratio. This is a measure of total building floor area (i.e. the sum of the amount of floor space on all floors of the building) as a ratio of the total site area. When “FAR” is show in the “Max. Density (DU/AC)” column or field, it Indicates that the amount of residential development permitted on the site is governed by Floor Area Ratio rather than Dwelling Units per Acre.
