Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes:

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes:

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes:

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

The meters normally operate in a traffic responsive mode.
There are 15 separate rates or steps between the slowest and the fastest discharge rate that depend on the mainlane volumes.

PASSENGERS WITH DISABILITIES / Pasajeros con incapacidades

The SVCC is a demand-response service that will provide a route deviation of up to 3/4 of a mile off an operating SVCC route for passengers with disabilities traveling to or from the Sorrento Valley COASTER Station. This service is provided anywhere in the SVCC service area during the corresponding hours that the SVCC service operates. Lift-equipped buses are available. To ensure availability, please call (877) 841-3278 at least one hour before your trip to schedule a curb-to-curb trip in a wheelchair-equipped vehicle.

El SVCC es un servicio de demanda-respuesta que proveerá una desviación de ruta de hasta 3/4 de milla de una ruta SVCC operativa a pasajeros con incapacidades que viajen a y de Sorrento Valley COASTER Station. Este servicio es proveído en cualquier parte del la área de servicio del SVCC, durante las horas correspondientes a al servicio que SVCC opera. Autobuses equipados para levantar sillas también están disponibles. Para asegurarse de su disponibilidad, por favor hable al (877) 841-3278 por lo menos una hora antes de su viaje para fijar el horario de su viaje de banqueta-a-banqueta o de un vehículo equipado para sillas de ruedas.

COMMUTER TAX BENEFIT PROGRAM FOR EMPLOYERS / Programa de Asistencia de Tránsito del Empleador

Employers can provide their employees a payroll tax deduction for riding transit to work of up to $125 per month. Employers benefit from this program through reduced payroll taxes and other business deductions. For more information about this and other free commuter services for employers visit iCommuteSD.com or call 511 and say "iCommute."

Los empleadores pueden proporcionar a sus empleados una deducción de los impuestos sobre nóminas de hasta $125 dólares al mes por trasladarse al trabajo usando el transporte interurbano. Los empleadores sacan provecho de este programa mediante menores impuestos sobre nómina y otras deducciones empresariales. Para mayores informes sobre éste y otros servicios gratuitos para pasajeros interurbanos para los empleadores, favor de visitar iCommuteSD.com o llamar al 511 y decir 'iCommute'.

Effective April 6, 2015

Amtrak.com | Amtrak California AmtrakCalifornia.com | COASTER GoNCTD.com | METROLINK. metrolinktrains.com

Amtrak Coast Starlight®

Amtrak long distance train service between Los Angeles,Oakland, Portland, Seattle and intermediate stations.

Amtrak Ticket Information

Advanced reservations required. Tickets may be purchased by visiting Amtrak.com, by calling 1-800-USA-RAIL, or by visiting any staffed Amtrak station.

Amtrak accepts cash, MasterCard, Visa, American Express, Discover, and debit cards with a credit card logo at all staffed ticket offices. Debit cards requiring a PIN are not accepted.

Amtrak Coast Starlight Holiday Service

The Amtrak Coast Starlight operates daily including all holidays.

Amtrak routes, schedules and services subject to change without notice. Amtrak, Pacific Surfliner, Coast Starlight, Sunset Limited and Southwest Chief are service marks of the National Railroad Passenger Corporation.

Amtrak Pacific Surfliner®

Amtrak intercity train service between San Diego, Los Angeles, Santa Barbara, San Luis Obispo and intermediate stations.

Amtrak Ticket Information

Amtrak tickets may be purchased by visiting Amtrak.com, at Amtrak Quik-Trak™ self-serve kiosks, Metrolink/Amtrak ticket vending machines (for Pacific Surfliner only, advance reservations required for all other Amtrak trains), by calling 1-800-USA-RAIL, or by visiting any staffed Amtrak station.

Amtrak accepts cash, MasterCard, Visa, American Express, Discover and debit cards with a credit card logo at all staffed ticket offices. Debit cards requiring a PIN are not accepted. Credit cards are also accepted at Quik-Trak™ kiosks and by Metrolink/Amtrak ticket vending machines.

Amtrak eTickets

eTickets offer Amtrak passengers the convenience of skipping the ticket line and going straight to the gate by printing tickets anytime, anywhere or by using a smartphone to present the eTicket to the conductor. eTickets also can be printed at Amtrak ticket offices and Quik-Trak™ kiosks. Passengers purchasing group tickets will continue to receive paper value tickets.

Amtrak Pacific Surfliner Holiday Service

Trains 790 and 761 will not operate on May 25, 2015, July 3, 2015 and September 7, 2015. Instead, trains 1790 and 1761 will operate on these holidays.

COASTER

Commuter train service between Oceanside and San Diego and intermediate stations.

COASTER Ticket Information

Passengers must have a valid ticket prior to boarding the train. Tickets may be purchased at Oceanside Transit Center Customer Service, or at vending machines located at each station with cash, credit or debit card.

COASTER E-Ticketing

Avoid the lines on the platform by purchasing your COASTER tickets ahead of time! NCTD offers two easy ways to buy your COASTER tickets before you ride; online or with the NCTD mobile app. Use your credit or debit card and pay the same fare you would pay at a ticket vending machine. Store your payment information and your tickets – you can purchase up to two months in advance! It's the easiest way to beat the lines. Round trip, one way and special event tickets are now available for online and mobile purchasing. To purchase online visit GoNCTD.com/eticket and to download the mobile app visit the iTunes store or Google Play and search for NCTD.

COASTER Holiday Service

COASTER operates on a holiday (Sunday) schedule on the following dates: May 25, 2015 and September 7, 2015. A Saturday schedule will be operated on July 3, 2015.

Metrolink

Commuter train service with seven routes serving Los Angeles, Orange, Ventura, Riverside, San Bernardino, and San Diego counties.

100 series trains travel via the Ventura County Line.

200 series trains travel via the Antelope Valley Line.

600 series trains travel via the Orange County Line.

700 series trains travel via the 91 Line.

800 series trains travel via the Inland Empire-Orange County Line.

900 series trains travel via between L.A. Union Station and Burbank-Bob Hope Airport.

Metrolink Ticket Information

Passengers must have a valid ticket prior to boarding the train. Tickets may be purchased at the vending machines located at each station with cash, debit card, Visa®, MasterCard®, American Express®, or Discover®, or at the ticket window at L.A. Union Station.

Use your Metrolink ticket to transfer to most connecting buses, shuttles, or rail lines for free. Metrolink tickets are valid on most connecting transit services at Metrolink Stations.

Metrolink Holiday Service

Limited service will be operated on May 25, 2015, July 3, 2015 and September 7, 2015.

RAIL 2 RAIL® PROGRAM – Amtrak/Metrolink

The Rail 2 Rail® program allows Metrolink Monthly Pass holders along the Orange and Ventura County corridors to travel on Amtrak Pacific Surfliner trains within the station pairs of their pass at no additional charge, including Saturday and Sunday. Metrolink passengers simply show their Monthly Pass and board any Amtrak Pacific Surfliner train or bus to their destination. These additional trains are not available to holders of One-Way and Round-Trip tickets or 7-Day Passes. The Rail 2 Rail® program does NOT include travel on Coast Starlight trains.

All Metrolink ticket types are accepted on Amtrak trains between Burbank-Bob Hope Airport and Los Angeles Union Station.

Amtrak Pacific Surfliner Monthly Pass holders may ride any Metrolink train within the station pairs on their pass at no additional charge. Amtrak 10-Trip tickets are not accepted on Metrolink trains effective July 1, 2012.

LOSSAN Rail Corridor Agency

The Los Angeles-San Diego-San Luis Obispo (LOSSAN) Rail Corridor Agency seeks to increase ridership, revenue, capacity, reliability, and safety on the coastal rail corridor from San Diego to Los Angeles and San Luis Obispo. LOSSAN members include the rail owners and operators and regional transportation planning agencies along the six-county 351 mile corridor. Visit **www.lossan.org** for more information about LOSSAN.

LOSSAN

RAIL 2 RAIL® PROGRAM – Amtrak/COASTER

All valid COASTER fare media will be accepted on board Pacific Surfliner trains 784, 790/1790, 796, 567, 573, and 595. These six select Pacific Surfliner trains operate every day and will stop at all eight COASTER stations. This special 'all stop' service is not available on the Wednesday through Sunday of Thanksgiving week or the Friday, Saturday, and Sunday of Del Mar Races Opening Week.

Amtrak tickets must be purchased for travel north of Oceanside.

Bikes on Board

Bike reservations are required on the Pacific Surfliner. Bike reservations may be booked at Amtrak.com by clicking the "Add Bike to Trip" tab after selecting your departure and class of service. Passengers are required to properly secure bicycles on bike racks. Book early as reserved bike space is limited and may not be available on all trains or departures. Bikes are allowed without a reservation on all Metrolink and COASTER trains.

Amtrak Thruway Bus Connections

Amtrak Thruway buses are convenient, dedicated motor coaches designed exclusively for Amtrak train passengers with connections to more than 175 additional destinations in California and Nevada that are not served by rail. For more information visit Amtrak.com.

Amtrak Pacific Surfliner Del Mar Service

Effective weekends (Saturdays and Sundays) starting July 18, 2015 through September 7, 2015, trains 768, 572, 583, and 591 will run on adjusted schedules to better serve passengers throughout the Del Mar Racing Season.

For more information and adjusted schedules visit Amtrak.com.

APPENDIX N

ALTERNATIVES COMPARISON

INTERSECTIONS

Genesee Avenue & John Hopkins Drive (Intersection 2):

- Alternatives B, C and D compared to Alternative A: No significant impact. This improvement project is not identified in the NUC PFFP or Public Facility Summary (PFS). The project would be added to the NUC PFFP or PFS for each of these alternatives.

Genesee Avenue & Scripps Hospital (Intersection 6):

- Alternatives B, C and D compared to Alternative A: No significant impact. This improvement project is not identified in the NUC PFFP or PFS and would not be added for any of these alternatives.

Genesee Avenue & La Jolla Village Drive (Intersection 12):

- Alternative B compared to Alternative A: No significant impact. This improvement project is not identified in the NUC PFFP or PFS and would not be added for this alternative.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D may be considered a significant (new) impact. This improvement project is not identified in the NUC PFFP or PFS and would not be added for any of these alternatives.

Genesee Avenue & Esplanade Court (Intersection 13):

- Alternatives B, C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives B, C or D may be considered a significant impact. This improvement project is not identified in the NUC PFFP or PFS and would not be added for any of these alternatives.

Genesee Avenue & Nobel Drive (Intersection 14):

- Alternative B compared to Alternative A: No significant impact. Constructing a third westbound through-lane along Nobel Drive is not identified in the NUC PFFP or PFS and would not be added for either of these alternatives. Construct a third northbound and southbound lane on Genesee Avenue is identified in the University PFFP (NUC-A) and would be implemented either as is (Alternative C) or in a modified format (Alternative B). As a result, the significant traffic impacts to this intersection would be partially mitigated with the implementation of these measures and; therefore, impact to this intersection would remain significant and unmitigated.

- Alternative C compared to Alternative A: No significant impact. Constructing a third westbound through-lane along Nobel Drive is not identified in the NUC PFFP or PFS and would not be added for either of these alternatives. As a result, the significant traffic impacts to this intersection would be partially mitigated and; therefore, impact to this intersection would remain significant and unmitigated.

- Alternative D compared to Alternative A: In comparison to Alternative A, the implementation of Alternative B may be considered a significant impact. Constructing a third westbound through-lane along Nobel Drive is not identified in the NUC PFFP or PFS and would not be added for either of these alternatives. Addition of a third northbound through lane is included in the NUC PFFP; however, Alternative D analyzes the network without that project in place. As a result, under Alternative D the significant traffic impact to this intersection would remain significant and unmitigated.

Genesee Avenue & Decoro Street (Intersection 15):

- Alternatives B and C compared to Alternative A: No significant impact. Stripe eastbound and westbound right-turn lanes on Decoro Street is not identified in the University PFFP or FBA and would be added under these alternatives. Construct a third northbound and southbound lane on Genesee Avenue is identified in the University PFFP (NUC-A) and would be implemented either as is (Alternative C) or in a modified format (Alternative B). As a result, the significant traffic impacts to this intersection would be fully mitigated.

- Alternative D compared to Alternative A: In comparison to Alternative A, the implementation of Alternative D may be considered a significant (new) impact. Stripe eastbound and westbound right-turn lanes on Decoro Street is not identified in the University PFFP or FBA and would be added under these alternatives. Construct a third northbound and southbound lane on Genesee Avenue is identified in the University PFFP (NUC-A) and will no longer be applicable under this alternative. As a result, the significant traffic impacts to this intersection would be partially mitigated with the implementation of these measures and; therefore, impact to this segment would remain significant and unmitigated.

Genesee Avenue & Centurion Square (Intersection 16):

- Alternative C compared to Alternative A: In comparison to Alternative A, the implementation of Alternative C may be considered a significant (new) impact. Addition of a second westbound left-turn lane would be required to address this plan-to-plan impact but is not recommended. Addition of a second westbound left-turn lane is not identified in the University PFFP or FBA and would not be included in the University PFFP or FBA for this alternative.

- Alternative D compared to Alternative A: In comparison to Alternative A, the implementation of Alternative D may be considered a significant (new) impact. Construct a third northbound and southbound lane on Genesee Avenue is identified in the University PFFP (NUC-A) and will no longer be applicable. As a result, the significant traffic impacts to this intersection would remain significant and unmitigated.

Genesee Avenue & Governor Drive (Intersection 17):

- Alternative B compared to Alternative A: No significant impact. Addition of a third northbound and southbound through-lane is identified in the University PFFP or FBA under NUC-A and would be modified for this alternative.

- Alternatives C and D compared to Alternative A: No significant impact. Construct a grade separated intersection (removing northbound and southbound through-movements), with one northbound and southbound through-lane required in the undercrossing is not identified in the University PFFP or FBA and would be added under these alternatives.

Genesee Avenue & SR-52 Westbound Ramps (Intersection 18):

- Alternatives B, C and D compared to Alternative A: No significant impact. Signalize the intersection and square up ramps, adding a protected phase for northbound left-turns from Genesee Avenue to the SR-52 ramp, and add a second right-turn lane on the exit ramp is not identified in the University PFFP or FBA and would not be added under these alternatives since it's a State facility under Caltrans District 11 jurisdiction.

Genesee Avenue & SR-52 Eastbound Ramps (Intersection 19):

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D may be considered a significant (new) impact. Construct a second southbound left-turn lane from Genesee Avenue to the eastbound SR-52 entrance ramp is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Genesee Avenue & Appleton Street/Lehrer Drive (Intersection 20):

- Alternatives B, C and D compared to Alternative A: No significant impact. This intersection is outside of the University community and no project would be included in the University PFFP or FBA for any of these alternatives.

La Jolla Village Drive & Torrey Pines Road (Intersection 21):

- Alternatives B, C and D compared to Alternative A: No significant impact. Relocate the pedestrian crossing from the east leg to the west leg of the intersection and implement signal phasing modification to improve operation is not identified in the University PFFP or FBA and would be added for any of these alternatives.

La Jolla Village Drive Eastbound Ramps & Gilman Drive (Intersection 23b):

- Alternatives B, C and D compared to Alternative A: No significant impact. Signalize the intersection and install a protected southbound left turn phase, re-stripe eastbound ramp approach to have a shared left-right lane, and an exclusive right-turn lane is not identified in the University PFFP or FBA and would be added for any of these alternatives.

La Jolla Village Drive & Villa La Jolla Drive (Intersection 24):

- Alternatives C and D compared to Alternative A: No significant impact. Construct a second westbound right-turn lane from La Jolla Village Drive to Villa La Jolla Drive is not identified in the University PFFP or FBA and would be added for any of these alternatives.

La Jolla Village Drive & I-5 Southbound Off-Ramps (Intersection 25):

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D may be considered a significant (new) impact. Modify one of the westbound through lanes to be a shared through-right lane, creating dual right-turns is not identified in the University PFFP or FBA and would not be added under either of these alternatives.

La Jolla Village Drive & Regents Road (Intersection 28):

- Alternatives B, C and D compared to Alternative A: No significant impact. Constructing a fourth eastbound and westbound through lane along La Jolla Village Drive and a second southbound left turn lane from Regents Road to La Jolla Village Drive are not identified in the University PFFP or FBA and would not be added under any of these alternatives.

La Jolla Village Drive & Executive Way (Intersection 29):

- Alternatives B, C and D compared to Alternative A: No significant impact. Constructing a fourth eastbound and westbound through lane along La Jolla Village Drive and modifying the northbound and southbound approach of Executive Way to have two left-turn lanes, one through lane, and one right-turn lane with an overlap phase are not identified in the University PFFP or FBA and would not be added under any of these alternatives.

La Jolla Village Drive & Towne Centre Drive (Intersection 30):

- Alternatives B, C and D compared to Alternative A: No significant impact. Constructing a fourth eastbound through lane on La Jolla Village Drive (maintaining the exclusive right turn lane), converting westbound right-turn lane to a shared through-right lane, add an exclusive southbound right-turn lane, and removing the pedestrian crossing on the east leg are not identified in the University PFFP or FBA and would not be added under any of these alternatives.

La Jolla Village Drive & I-805 Southbound Ramps (Intersection 31):

- Alternatives B, C and D compared to Alternative A: No significant impact. Constructing a fourth eastbound and westbound through lane along La Jolla Village Drive and modifying the ramp to provide a third southbound right-turn lane is not identified in the University PFFP or FBA and would not be added under any of these alternatives.

Miramar Road & Eastgate Mall (Intersection 34):

- Alternatives B, C and D compared to Alternative A: No significant impact. Modify the southbound Eastgate Mall approach to have two left-turn lanes and one right-turn lane is not identified in the University PFFP or FBA and would be added under each of these alternatives.

Miramar Road & Camino Santa Fe (Intersection 37):

- Alternatives B, C and D compared to Alternative A: No significant impact. Construct a fourth eastbound and westbound through lane along Miramar Road, re-stripe the southbound leg to have a left-turn lane, shared left-through-right, and two exclusive rights, and maintain a right-turn overlap is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Nobel Drive & La Jolla Village Square Driveway (Intersection 39):

- Alternatives B, C and D compared to Alternative A: No significant impact. Construct a second northbound right-turn lane from La Jolla Village Square to Nobel Drive and a third westbound left-turn lane from Nobel Drive to La Jolla Village Square is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Nobel Drive & I-5 Southbound On-Ramp (Intersection 40):

- Alternatives B, C and D compared to Alternative A: No significant impact. Construct an exclusive eastbound right-turn lane on Nobel Drive is not identified in the University PFFP or FBA and would not be added under these alternatives.

Nobel Drive & Regents Road (Intersection 44):

- Alternatives B, C and D compared to Alternative A: No significant impact. Restripe to add a third westbound through lane on Nobel Drive, add an eastbound right-turn lane on Nobel Drive, and remove the pedestrian crossing on the east leg is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Regents Road & Arriba Street (Intersection 59):

- Alternative B compared to Alternative A: No significant impact. Construct a second northbound left-turn lane on Regents Road is not identified in the University PFFP or FBA and would be added under both of these alternatives.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D would avoid an impact at this intersection. No project related improvements would be required under these two alternatives.

Regents Road & Governor Drive (Intersection 60):

- Alternative B compared to Alternative A: No significant impact. Construct a second southbound left-turn lane on Regents Road and add a second westbound left-turn lane on Governor Drive is not identified in the University PFFP or FBA and would be added under both of these alternatives.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D would avoid an impact at this intersection. No project related improvements would be required under these two alternatives.

Regents Road & Luna Avenue (Intersection 63):

- Alternatives B, C and D compared to Alternative A: No significant impact. This intersection is outside of the University community and no project would be included in the University PFFP or FBA for any of these alternatives.

North Torrey Pines Road & La Jolla Shores Drive (Intersection 66):

- Alternatives B, C and D compared to Alternative A: No significant impact. Restriping to add a third southbound through lane on North Torrey Pines Road, modify eastbound and westbound La Jolla Shores Drive approaches to utilize “protected left-turn” phasing instead of “split phasing” in the traffic signal, and remove the pedestrian crossing on the north leg is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Gilman Drive & I-5 Southbound Ramps (Intersection 69):

- Alternative B compared to Alternative A: No significant impact. No project is identified as a need since operations are expected to operate at acceptable levels.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D may be considered a significant (new) impact. To improve operations to acceptable conditions during all peak periods, convert one westbound through lane to a left-turn lane, creating dual left-turns at this intersection. This improvement project is not identified in the University PFFP or FBA and would not be added for either of these alternatives.

Towne Center Drive & Eastgate Mall (Intersection 73):

- Alternatives B, C and D compared to Alternative A: No significant impact. Construct a second westbound left-turn lane from Eastgate Mall to Towne Centre Drive is not identified in the University PFFP or FBA and would be added under these alternatives.

Executive Way & Executive Drive (Intersection 76):

- Alternatives B, C and D compared to Alternative A: No significant impact. This traffic signal improvement project is not identified in the University PFFP or FBA and would be added under these alternatives.

Judicial Drive & Eastgate Mall (Intersection 77):

- Alternatives B, C and D compared to Alternative A: No significant impact. This traffic signal improvement project is not identified in the University PFFP or FBA and would be added under these alternatives.

Governor Drive and I-805 Northbound Ramps (Intersection 79):

- Alternatives B, C and D compared to Alternative A: No significant impact. Install roundabout control at this roadway intersection is not identified in the University PFFP or FBA and would not be added under these alternatives since it's a State facility under Caltrans District 11 jurisdiction.

SEGMENTS

Eastgate Mall from Genesee Avenue to Easter Way:

- Alternatives B and C compared to Alternative A: No significant impact. This improvement project is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Eastgate Mall from Judicial Drive to Eastgate Drive (Freeway Overpass):

- Alternatives B, C, and D compared to Alternative A: No significant impact. This improvement project is identified in the University FBA (NUC-34a and NUC-34b) and would remain in the University FBA.

Eastgate Mall from Eastgate Drive to Miramar Road:

- Alternatives B, C and D compared to Alternative A: No significant impact. This improvement project is identified in the University FBA (NUC-34) and would be updated to extend to Miramar Road.

Genesee Avenue from La Jolla Village Drive to Esplanade Court:

- Alternative B compared to Alternative A: No significant impact. No project is identified as a need since operations are expected to operate at acceptable levels.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D may be considered a significant (new) impact. Repurposing the right-of-way to provide for a 6-lane Prime arterial with Class II bike facility with buffers is not identified in the University PFFP or FBA and would be added.

Genesee Avenue from Nobel Drive to Centurion Square:

- Alternative B compared to Alternative A: No significant impact. NUC-A project will modified to repurpose the existing right-of-way to provide a modified 6 lane major between Nobel Drive and Decoro Street and modified 6 lane prime between Decoro Street and Centurion Square with bike facilities that include a shared pedestrian bicycle facility accommodated on widened sidewalks or Class II bicycle facility as right-of-way permits.

- Alternative C compared to Alternative A: No significant impact. NUC-A project will be modified to repurpose the existing right-of-way to provide a modified 6 lane major between Nobel Drive and Centurion Square with bike facilities that include a shared pedestrian bicycle facility accommodated on widened sidewalks or Class II bicycle facility as right-of-way permits.

- Alternative D compared to Alternative A: In comparison to Alternative A, the implementation of Alternative D may be considered a significant (new) impact. No proposed mitigation is recommended as part of the University Community Plan Amendment under this alternative. As a result, NUC-A project will be removed from University FBA.

Genesee Avenue from Centurion Square to Governor Drive:

- Alternative B compared to Alternative A: No significant impact. NUC-A project will modified to repurpose the existing right-of-way to provide a modified 6 lane major between Centurion Square and Governor Drive with bike facilities that include a shared pedestrian bicycle facility accommodated on widened sidewalks or Class II bicycle facility as right-of-way permits.

- Alternative C compared to Alternative A: In comparison to Alternative A, the implementation of Alternative C may be considered a significant (new) impact. No mitigation is proposed for the impacts to this roadway segment under Alternative C. Implementing NUC-A project currently included in University FBA is recommended and included as a baseline condition for this alternative; therefore, would still be included in the University FBA.

- Alternative D compared to Alternative A: In comparison to Alternative A, the implementation of Alternative D may be considered a significant (new) impact. No proposed mitigation is recommended as part of the University Community Plan Amendment under this alternative. As a result, NUC-A project will be removed from University FBA.

Genesee Avenue from Governor Drive to SR-52 Westbound Ramps:

- Alternative B compared to Alternative A: No significant impact. NUC-A project will be modified to include the repurposing of the existing right-of-way along this segment to provide a modified 6 lane major between Governor Drive and SR-52 Westbound Ramps with bike facilities that include a shared pedestrian bicycle facility accommodated on widened sidewalks or Class II bicycle facility as right-of-way permits.

- Alternative C compared to Alternative A: No significant impact. Implementing NUC-A project currently included in University FBA is recommended and included as a baseline condition for this alternative; therefore, would still be included in the University FBA.

- Alternative D compared to Alternative A: In comparison to Alternative A, the implementation of Alternative D may be considered a significant (new) impact. No proposed mitigation is recommended as part of the University Community Plan Amendment under this alternative. As a result, NUC-A project will be removed from University FBA.

Genesee Avenue from SR-52 Westbound Ramps to SR-52 Eastbound Ramps:

- Alternatives B, C and D compared to Alternative A: No significant impact. This roadway segment is outside of the University Community Planning Area and no project would be included in the University PFFP or FBA for any of these alternatives.

Genesee Avenue from SR-52 Eastbound Ramps to Lehrer Drive:

- Alternatives B, C and D compared to Alternative A: No significant impact. This roadway segment is outside of the University Community Planning Area and no project would be included in the University PFFP or FBA for any of these alternatives.

La Jolla Village Drive from Revelle College Drive to Villa La Jolla Drive:

- Alternative B compared to Alternative A: No significant impact. No project is identified as a need since operations are expected to operate at acceptable levels.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D may be considered a significant (new) impact. Widening the roadway to an 8-lane Prime arterial is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

La Jolla Village Drive from Villa La Jolla Drive to I-5 Northbound Ramps:

- Alternatives B, C, and D compared to Alternative A: No significant impact. Widening the roadway to an 8-lane Prime arterial is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

La Jolla Village Drive from I-5 Northbound Ramps to Towne Centre Drive:

- Alternatives B, C and D compared to Alternative A: No significant impact. Repurposing to a 6-lane Prime arterial is not identified in the University PFFP or FBA and would be added under these alternatives.

Miramar Road from Miramar Mall to Camino Santa Fe:

- Alternatives B, C and D compared to Alternative A: No significant impact. Widening to an 8-lane Prime arterial is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Nobel Drive from Villa La Jolla Drive to I-5 Southbound On-Ramp:

- Alternatives B, C and D compared to Alternative A: No significant impact. Widening to a 6-lane Prime arterial is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Nobel Drive from I-5 Southbound On-Ramp to I-5 Northbound Off-Ramp/University Center Lane:

- Alternatives B, C and D compared to Alternative A: No significant impact. Widening to a 6-lane Major arterial is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

Regents Road from SR-52 Westbound Ramps to SR-52 Eastbound Ramps:

- Alternative B compared to Alternative A: No significant impact. Widening to a 6-lane Major arterial is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D would avoid an impact at this roadway location. No project related improvements would be required under these two alternatives.

Regents Road from SR-52 Eastbound Ramps to Luna Avenue:

- Alternative B compared to Alternative A: No significant impact. This roadway segment is outside of the University community and no project would be included in the University PFFP or FBA for any of these alternatives.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D would avoid an impact at this roadway location. No project related improvements would be required under these two alternatives.

Torrey Pines Road from La Jolla Village Drive to Community Boundary:

- Alternatives B, C and D compared to Alternative A: No significant impact. Widening to a 6-lane Major arterial is not identified in the University PFFP or FBA and would not be added for any of these alternatives.

CORRIDORS

Genesee Avenue between SR-52 and North Torrey Pines Road

- Alternatives B, C and D compared to Alternative A: No significant impact. No specific improvement project is identified for corridor improvements in the University PFFP or FBA. Implementation of adaptive traffic control and transit signal priority measures would be added for these alternatives.

La Jolla Village Drive between Torrey Pines Road and Interstate 805

- Alternatives B, C and D compared to Alternative A: No significant impact. No specific improvement project is identified for corridor improvements in the University PFFP or FBA. Implementation of adaptive traffic control and transit signal priority measures would be added for these alternatives.

Nobel Drive between La Jolla Village Square and Miramar Road

- Alternatives B, C and D compared to Alternative A: No significant impact. No specific improvement project is identified for corridor improvements in the University PFFP or FBA. Implementation of adaptive traffic control and transit signal priority measures would be added for these alternatives.

Regents Road between Luna Avenue and Genesee Avenue

- Alternative B compared to Alternative A: No significant impact. No specific improvement project is identified for corridor improvements in the University PFFP or FBA. Implementation of adaptive traffic control and transit signal priority measures would be added for these alternatives.

- Alternatives C and D compared to Alternative A: In comparison to Alternative A, the implementation of Alternatives C or D would avoid an impact at this roadway location. No project related improvements would be required under these two alternatives.

FREEWAY

Interstate 5, between SR-52 and Gilman Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Widen Interstate 5 to have five lanes in each direction is an improvement identified in the SANDAG RTP and would not be included in the University PFFP or FBA.

Interstate 805, between SR-52 and Mira Mesa Boulevard

- Alternatives B, C and D compared to Alternative A: No significant impact. Widen Interstate 805 to have five lanes in each direction is an improvement identified in the SANDAG RTP and would not be included in the University PFFP or FBA.

State Route 52, between I-5 and I-805

- Alternatives B, C and D compared to Alternative A: No significant impact. Widen State Route 52 to have three lanes in each direction is an improvement identified in the SANDAG RTP and would not be included in the University PFFP or FBA.

Interstate 5 Southbound Entrance Ramp from Gilman Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Interstate 5 Southbound Entrance Ramp from Nobel Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Interstate 5 Northbound Entrance Ramp from Westbound La Jolla Village Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Interstate 5 Northbound Entrance Ramp from Eastbound La Jolla Village Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Interstate 5 Southbound Entrance Ramp from Westbound La Jolla Village Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Interstate 5 Southbound Entrance Ramp from Eastbound La Jolla Village Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Interstate 5 Northbound Entrance Ramp from Genesee Avenue

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Interstate 805 Southbound Entrance Ramp from Nobel Drive

- Alternatives B, C and D compared to Alternative A: No significant impact. Adjust ramp meter rate to process more vehicles is an operational improvement made by Caltrans and would not be included in the University PFFP or FBA.

Notes:

Bold values indicate intersections operating at LOS E or F.

(a) Delay refers to the average control delay for the entire intersection, measured in seconds per vehicle. At a two-way stop-controlled intersection, delay refers to the worst movement.

(b) LOS calculations are based on the methodology outlined in the *2010 Highway Capacity Manual* and performed using Synchro 9.0

Notes:

Bold values indicate intersections operating at LOS E or F.

ECL = Exceeds Calculable Limit. Reported when delay exceeds 180 seconds.

SSSC = Side Street Stop Control

(a) Delay refers to the average control delay for the entire intersection, measured in seconds per vehicle. At a two-way stop-controlled intersection, delay refers to the worst movement.

(b) LOS calculations are based on the methodology outlined in the *2010 Highway Capacity Manual* and performed using Synchro 9.0

Notes:

Bold values indicate roadway segments operating at LOS E or F.

(a) Road classifications are based on existing conditions or changes identified in the FFP

(b) Average Daily Traffic (ADT) volumes for the roadway segments were determined from SANDAG Modeling

(c) The v/c Ratio is calculated by dividing the ADT volume by each respective roadway segment's capacity.

Notes:

(a) The ramp meter rate are based on the most restrictive rate obtained from Caltrans and assumed to be the same under the Future Year scenarios.

(b) A significant impact resulted in an increase in delay of more than 2 min with ramp delays less than 15 minutes or more than 1 min with ramp delays greater than 15 minutes.
