Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes:

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes:

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.

Notes: (a) Travel time in miles per hour (mph).

(b) The arterial LOS is based on average through-vehicle travel speed for the segment or for the entire street under consideration and is influenced both by the number of signals per mile and by the intersection control delay.

(c) A significant impact resulted in a change from LOS D or better to LOS E or LOS F, or a decrease of speeds of more than 1.0 mph at LOS E and LOS F.
