Inspection Status of Engineering Permit

FORM
DS-901
May 2019

The Resident Engineers (RE) in the City of San Diego Public Works Department conduct inspections for grading on private property and the construction, reconstruction, or repair of improvements within the public right-of-way. Those permits are issued by the Development Services Department (DSD).

The purpose of this form is to confirm the inspection status of drawings signed by the City Engineer for grading on private property and the construction, reconstruction, or repair of improvements within the public right-of-way.

The information provided by the City's RE for the project will be used by DSD to determine appropriate actions. The top portion of this completed form must be submitted to the RE by the Applicant. The RE will confirm the inspection status and email the fully completed form to the Applicant and to DSD via DSDBondRelease@sanidiego.gov for review. DSD will determine appropriate actions and/or eligibility after review of the completed form and notify the Applicant's designated Point of Contact.

NOTE: Insufficient or incomplete inspections will result in the requirement of a new permit or a Completion of Work permit.
