## Background

The North Park Maintenance Assessment District (District), originally known as the “North Park Lighting and Landscape Maintenance District,” was established by the City of San Diego (City) on July 30, 1996 by City Council Resolution R-287697. The District was subsequently re-formed on May 4, 1998 by City Council Resolution R-290404 primarily for purposes of compliance with Proposition 218 and to permit future cost-indexing. The purpose of the District was, and still is, to fund specifically identified improvements and activities within the boundary of the District.

In conformity with §65.0221 of the “San Diego Maintenance Assessment District Procedural Ordinance,” the City adopted Resolution No. R-310618 on July 22, 2016, approving the annual budget and assessments for Fiscal Year 2017, and authorizing the levy of the assessments for the life of the District, consistent with the benefit findings and assessment apportionment method contained in the approved formational and all subsequently updated Engineer’s Reports (Engineer’s Reports). The Engineer’s Reports are on file with the City Clerk, and incorporated herein by reference.

The District is authorized and administered under the provisions of the “San Diego Maintenance Assessment District Procedural Ordinance.” This annual report has been prepared pursuant to the requirements of §65.0220 of the “San Diego Maintenance Assessment District Procedural Ordinance.”

---

## District Boundary

The District boundary is generally depicted in **Exhibit A**. The District Boundary Map and Assessment Diagram are on file in the Maintenance Assessment Districts section of the Parks and Recreation Department of the City, and, by reference, are made a part of this annual report.

---

## Project Description

The authorized assessments will be used to fund specifically identified improvements and activities within the District. The District improvements and activities generally consist of maintenance and servicing of street lighting, median and right-of-way landscaping, streetscapes, community identification signs, and cleaning and repair of sidewalks along the major streets in the District. The approximate location of the improvements is generally shown on **Exhibit A**.

For additional detail as to the location, type of improvements, and

activities performed by the District, please refer to the maps, improvement plans, engineering drawings, maintenance specifications, the Engineer's Reports and other associated documents on file with the Maintenance Assessment Districts section of the Parks and Recreation Department of the City. These documents, collectively, are incorporated herein by reference and made part of this annual report.

---

## Separation of General and Special Benefits

The identified improvements and activities provide benefits to the parcels located within the District. These benefits are “special benefits” to the extent that they are above and beyond the City’s standard level of service, and exclusive of those “general benefits” provided to the public at large or properties located outside the District. By law, only “special benefits” are assessable.

The assessments presented in this annual report are based on the cost of improvements and activities determined to provide “special benefits” in accordance with the Engineer’s Reports. For additional detail relative to the separation and quantification of general and special benefits for the District, please refer to the Engineer’s Reports, on file with the Maintenance Assessment Districts section of the Parks and Recreation Department of the City.

---

## Cost Estimate

The estimated annual budget (Revenue & Expense Statement) is included as **Exhibit B**. The “Other Contributions (Non Assessment Source)” revenue contained in the budget includes the value of improvements and activities determined to provide “general benefits.” The District budget with full detail is available for public reference in the Maintenance Assessment Districts section of the Parks and Recreation Department of the City.

### Annual Cost-Indexing

The maximum authorized assessment set forth in the Engineer’s Reports is permitted to increase annually based on the published change in the “San Diego Consumer Price Index for Urban Consumers” (SDCPI-U). The annual change in second half SDCPI-U values, as compiled by the *U.S. Bureau of Labor Statistics* (see [www.bls.gov](http://www.bls.gov)), for the prior year period was from 325.241 to 348.945 (a 7.29% increase). In accordance with the approved cost-indexing provisions, the maximum authorized assessment rate has been increased by 7.29%.

---

## Method of Apportionment

### Estimated Benefit of Improvements

The North Park Maintenance Assessment District improvements and activities are specified in the “Project Description” section above. In general, the improvements and activities consist of street lighting, median and right-of-way landscaping, streetscape, community identification signs, and cleaning and repair of sidewalks along the major streets in the District. The improvements lie along the primary access routes used for inter-community and intra-community trips. Parcels within the District benefit from the improvements and activities in terms of enhanced public safety, community image, and aesthetics.

### Apportionment Methodology

The total cost associated with District improvement and activities will be assessed to the various parcels in proportion to the estimated Equivalent Benefit Units (EBUs) assigned to a parcel, in relationship to the total EBUs of all the parcels in the District.

EBUs for each parcel have been determined as a function of three factors: Parcel Acreage or Number of Dwelling Units, a Land Use Factor, and a Benefit Factor, related as shown in the following equation:

$$\text{EBUs} = (\text{Acres or Units}) \times \text{Land Use Factor} \times \text{Benefit Factor}$$

Each of these factors is discussed below. Parcels determined to receive no benefit District improvements and activities have been assigned zero (0) EBUs.

### Land Use Factor

The District improvements and activities are primarily associated with the Transportation Element of the General and Community Plans. Accordingly, trip generation rates for various land use categories (as previously established by the City’s Transportation Planning Section) have been used as the primary basis for the development of Land Use Factors. While these trip generation rates strictly address only vehicular trips, they are also considered to approximately reflect relative trip generation for other modes of transportation (e.g., pedestrian trips, bicycle trips, etc.), and are considered the best available information for these other transportation modes.

The special benefits of street lighting and landscape improvements and activities are linked to trip generation primarily by the public safety and aesthetic enhancement enjoyed by travelers through the community. Trip generation rates provide the required nexus and basis for assigning ratios of maximum potential benefit to the various land use/zoning classifications as defined by the City’s Municipal Code.

Land use/zoning classifications have been grouped with averaged trip generation rates assigned to establish the Land Use as shown in **Table 1**.

**TABLE 1: Land Use Factors**

Land Use/Zoning	Code	Land Use Factor <sup>(1)(2)</sup>
Residential – Single Family (detached)	SFD	1.0 per dwelling unit
Residential – Condominium	CND	0.7 per dwelling unit
Residential – Duplex	DUP	0.7 per dwelling unit
Residential – Multi-Family & Apartment	MFR	0.7 per dwelling unit
Church & House of Worship	CRH	2.8 per acre
Commercial – Office & Retail	COM	45.0 per acre
Educational – Primary & Secondary	EPS	5.0 per acre
Fire/Police Station	FPS	15.0 per acre
Industrial & Institutional	IND	15.0 per acre
Library	LIB	40.0 per acre
Open Space (designated)	OSP	0.0 per acre
Park – Developed	PKD	5.0 per acre
Street/Roadway	STR	0.0 per acre
Undevelopable	UND	0.0 per acre
Utility Facility	UTL	3.0 per acre

<sup>(1)</sup> Proportional to vehicle trip generation per the City’s Transportation Element.

<sup>(2)</sup> For vacant properties zoned residential, benefit units were estimated based on allowable density.

Designated Open Space serves primarily to preserve natural landscape and habitat. While access for study and passive recreation is sometimes permitted, these activities are usually allowed only to the limited extent consistent with the primary purpose of natural preservation. Since this land is essentially “unused” in the customary terms of land use (which relate to human use, not use by nature), the trip generation rate is zero. Therefore, the designated Open Space receives no benefit from the Transportation Element and has been assigned a Land Use Factor of zero.

While those traveling streets and roadways enjoy the District improvements and activities during their travel, the actual benefit of this enjoyment accrues to the lands at the origins and destinations of their trips, not to the lands of the streets and roadways, themselves. Accordingly, the Street/Roadway category receives no benefit and has been assigned a Land Use Factor of zero.

### **Benefit Factor**

The Land Use Factor described above reflects the relative intensity of use (or potential use) of the various parcels of land to be assessed. It does not address the relationship of this use to the specific District improvements and activities. This relationship is reflected in the Benefit Factor utilized in the assessment methodology.

In determining the Benefit Factor for each land use category, the subcomponents of the benefits of District improvements and activities considered may include some or all of the following: public safety, view corridors, aesthetics, enhancement of community identity, drainage corridors, and recreational potential. These are the components used for this District: public safety and aesthetics/community identity.

As Benefit Factors and their subcomponents are intended to reflect the particular relationships between specific land uses within a district and the specific District improvements and activities, Benefit Factors will generally vary from one district to another, based on the specific character and nature of the applicable land uses and improvements and activities.

For a given land use, the composite Benefit Factor is equal to the sum of the subcomponent values. If a land use category receives no benefit from a subcomponent, then a value of zero is assigned to that subcomponent. A composite Benefit Factor of 1.0 indicates

that full benefit is received. A decimal fraction indicates that less than full benefit is received.

The applicable benefit subcomponents and resultant composite Benefit Factors determined for the various land use/zoning categories within this District are as shown in **Table 2**.

**TABLE 2: Benefit Factors by Land Use**

<b>Land Use/Zoning</b>	<b>Public Safety (max. 0.4)</b>	<b>Aesthetics (max. 0.6)</b>	<b>Composite Benefit Factor (max. 1.0)</b>
Residential – Single Family (detached)	0.4	0.6	1.0
Residential – Condominium	0.4	0.6	1.0
Residential – Duplex	0.4	0.6	1.0
Residential – Multi-Family & Apartment	0.4	0.6	1.0
Church & House of Worship	0.4	0.6	1.0
Commercial – Office & Retail	0.4	0.6	1.0
Educational – Primary & Secondary	0.4	0.6	1.0
Fire/Police Station	0.4	0.6	1.0
Industrial & Institutional	0.4	0.6	1.0
Library	0.4	0.6	1.0
Open Space (designated)	0.4	0.0	0.4
Park – Developed	0.4	0.0	0.4
Street/Roadway	0.4	0.0	0.4
Undevelopable	0.4	0.0	0.4
Utility Facility	0.4	0.0	0.4

**Public Safety.** All land uses are considered to receive the maximum available benefit from the public safety element of District improvements and activities (street lighting and landscape improvements). Public safety is essential to all land uses, and even to lands, such as designated Open Space, held in stewardship with only incidental human use.

**Aesthetics.** The degree of benefit received from the aesthetic qualities of District improvements and activities (street lighting and landscape improvements) varies among land use categories. Due to the highly urbanized character of this District, residential land uses are closely interspersed with commercial, institutional, and industrial land uses. All share a common urban environment, and accordingly, all receive comparable benefit from the aesthetic elements of District improvements.

Lands in the Open Space, Parks, Streets, Undevelopable, and

Utility Facility categories are considered to receive no significant benefit from the aesthetic elements of District improvements and activities, as enhanced aesthetic quality of other lands in their vicinity does not affect their function, use, or value.

### Sample Calculations

As described above, the number of Equivalent Benefit Units (EBUs) assigned to each parcel in the District has been calculated based on each parcel's land use and the identified apportionment factors, as shown in the following equation:

$$\text{EBUs} = (\text{Acres or Units}) \times \text{Land Use Factor} \times \text{Benefit Factor}$$

Shown below are sample EBU calculations for several common land uses found in the District.

- **1 Single-Family Residence**  
EBUs = 1 unit x 1.00 x 1.00 = 1.00 EBUs
- **1 Condominium**  
EBUs = 1 unit x 0.70 x 1.00 = 0.70 EBUs
- **10-unit Apartment Complex**  
EBUs = 10 units x 0.70 x 1.00 = 7.00 EBUs
- **½-acre Commercial Property**  
EBUs = 0.50 acres x 45.00 x 1.00 = 22.50 EBUs

The total assessment for each parcel in the District is based on the calculated EBUs for the parcel and the applicable unit assessment rate, as shown in the following equation:

$$\text{Total Assessment} = \text{Total EBUs} \times \text{Unit Assessment Rate}$$

The EBUs calculated for each property, based on the above formula, are provided in the Assessment Roll (**Exhibit C**).
