- ▲ Street Improvements
- ▲ Street Lights
- ▲ Traffic Signals
- ▲ Utilities Undergrounding
- ▲ Water Facilities
- ▲ Sewer Facilities
- ▲ Water Pipelines
- ▲ Sewer Pipelines

## SEWER PIPELINE REHABILITATION W-1

### Background

The City of San Diego has more 3,000 miles of wastewater pipelines that help dispose of sewage for more than 2 million residents of San Diego County. Some pipelines are more than 100 years old, are deteriorating and are in need of replacement, repair and upgrades. To avoid future service disruptions, such as sewer main stoppages and spills, the aging pipelines are replaced or rehabilitated. The new pipelines will bring the existing sewer mains up to modern standards, accommodate community growth and reduce maintenance requirements.

### Project Overview

Sewer Pipeline Rehabilitation W-1 is located within Council District 1, specifically within the community of La Jolla. The project will rehabilitate approximately 4.12 miles (21,731 linear feet) of sewer main within the City's right of way utilizing trenchless technology. It will also reconnect existing laterals to the newly rehabilitated mains; rehabilitate or replace manholes and laterals where required; conduct external spot repairs to existing sewer mains and laterals on an as-needed basis; and if required, install curb ramps that facilitate access for persons with disabilities.

### Project Schedule

Completion of Project Design: Summer 2013\*

Construction: Fall 2013 through Spring 2014\*

\*All dates are approximate and subject to change.

### Project Budget

The estimated cost of the project is \$5,034,830.

July 2013
