Subject: flawed, tampered with traffic control study you bravely initiated

Dear Mayor Faulconer,

The entire Chargers debacle and rip-off is so typical of both Spanos-Fabiani and the latest city "sports" rip-offs around the country; e.g., in Ohio, Miami, Dallas, etc.--as well as Sandy Eggo--as depicted in an HBO John Oliver weekly special.

On top off all this, the recent traffic-environmental "study" initiated by the mayor was seriously flawed. I live on Rancho Mission Road, right near the rear entry to the stadium. A Charger fan kept moving the car counter on my street, continuously so that car traffic could not be counted. What a hypocrisy. It has to be done all over, increasing the cost to taxpayers. Enough is enough. Let them go, good riddance, and take those brain-dead fans with you.
