Water Main Replacement Group Job 3008: E-Newsletter #12

This is the 12th e-newsletter for Water Main Replacement Group Job 3008. The e-newsletter will be distributed bi-weekly for the remainder of the project to keep the community informed about construction progress. The next e-newsletter will be distributed the week of September 14, 2009.

Project Description

The water main replacement work for Group Job 3008 is well underway. Group Job 3008 consists of two sections - Group Job 532 and 533. Construction crews are now replacing the existing cast-iron mains that are nearly 60-years old and are at the end of their service life.

The project will:

- replace 17,979 feet of 16" cast iron water mains
- improve service reliability
- minimize future water main breaks caused by aging pipes
- increase the size of existing pipes to better serve the area

Total project cost is \$5,777,000.

Construction crews are digging a trench for the installation of the 16" diameter pipe.

Upcoming Construction Activities

Currently, construction crews are working on Group Job 532 (see Orange dotted line on map below).

During the weeks of Aug 31 & Sept 7, crews will:

- Work during the day, there will be no night work.
- Install 16" diameter pipe beginning at Grape Street going south along N. Harbor Drive to Pacific Highway.
- Begin lateral installations for water services and City connections at the intersection of Pacific Highway and W. Harbor Drive.

Traffic Control:

During construction work hours, occasional road closures will occur within the current construction activity area.

Please note, occasional unplanned and unforeseen conditions may occur that could prolong or result in additional construction noise.
