# Commercial Rates

Sonoma Clean Power > For My Business > Commercial Rates

## Commercial Rates

SCP offers competitive rates for cleaner power.

We buy power from cleaner sources for our customers and fill PG&E's wires.

PG&E continues to do all the billing for everything. They simply replace their charges for power generation with ours.

Full details on rates are available below.

## Santa Rosa joins Sonoma Clean Power

Decision is huge boost to customer base

By Eric Gneckow, Business Journal Staff Reporter

Share this item

SANTA ROSA — After months of debate concerning Santa Rosa's say in the governance of a renewable energy-focused public power agency under development in Sonoma County, representatives of the county's largest city voted Tuesday to become the latest municipality to allow the agency to serve its residents and businesses.

Representing nearly 34 percent of power customers countywide, the Santa Rosa decision marks what many consider to be a significant advancement of Sonoma Clean Power's goal to ultimately displace Pacific Gas & Electric Co. as the predominant supplier of electricity to

Customers enrolled next year with Sonoma County's startup public power agency could see some savings on their electricity compared to rates proposed by PG&E for 2014.

The lower cost for customers would amount to a 5 percent reduction on rates for power generation, resulting in a projected 2 to 3 percent savings on the overall electrical bill for businesses and homes, officials with Sonoma Clean Power said this week. The smaller total savings reflects delivery charges that would still be controlled by PG&E.

Sonoma County's startup public power agency is poised to enter into a secondary energy supply contract with the company that operates The Geysers geothermal field on the Sonoma-Lake county border.

Sonoma Clean Power officials say the proposed 10-year deal with a subsidiary of Calpine Corp. fulfills their promise to spur local green energy generation and support local jobs. The power venture's political standing, if not its business future, depends on staying true to that mission, they have said.

## Starts in Phases

2014 Phase 1 is 20,000 customers

2015 Phase 2 adds half of remaining customers

2016 Phase 3 adds all remaining customers

## Timeline
