

Page Intentionally Left Blank

Department Description

Public Utilities is composed of four branches: Business Support, Water, Wastewater, and Strategic Programs. Each branch performs distinct functions as outlined below.

The Business Support Branch is comprised of the following divisions:

Long-Range Planning and Water Resources – This division provides long-range water resources planning and development, watershed and resources protection, water and wastewater legislation and policy analysis, and management of the City's recycled water and water conservation programs. The Division is also responsible for the management of the Water Purification Demonstration Project, a test project examining the use of water purification technology to provide safe, reliable water.

Finance and Information Technology – This division provides administrative support for the Water and Wastewater Enterprise Funds including: Information Systems, Budget Development and Monitoring, Accounts Payable, Rate Setting and Finance, and the Administration of Contracts, Grants, and State Revolving Fund (SRF) Loans.

Customer Support – This division provides high quality customer-focused care and service to Public Utility Department patrons. The Division handles and responds to more than 390,000 customer phone calls and emails annually including account/billing inquiries, water conservation information, water waste complaints, and general water/sewer utility information. In addition, the Division is responsible for customer billing and payment processing, meter reading and code enforcement, ensuring customer compliance with State backflow device requirements, and providing public information.

Employee Services and Quality Assurance – This division provides employee and management services in the areas of human resources management, payroll, strategic support services, safety, training and quality assurance. The Employee Services and Quality Assurance Division is also involved in various internal business support services including contract formulation and administration, optimization projects, leadership development programs, internal audit support, management of Public Records Act requests, and records management.

The Water Branch is comprised of the following divisions:

Construction and Maintenance – This division provides construction, maintenance, and emergency response for the potable water system. The Division maintains approximately 274,000 metered service connections, approximately 25,000 fire hydrants, and more than 47,000 isolation valves. The Division maintains the recycled distribution system citywide and provides 24 hour emergency response, new service installation, water main repair, Capital Improvement Program (CIP) support, and the maintenance, installation, and replacement of water meters throughout the City.

System Operations – This division provides operations and maintenance of the City's potable and recycled water systems. The Division operates and maintains three water treatment plants, 49 water pump stations, 29 treated water reservoirs, and more than 950 water pressure regulators. In addition, the Division provides operational engineering support for the Water Branch, as well as corrosion engineering support and water supply management for the Department.

The Wastewater Branch is comprised of the following divisions:

Engineering and Program Management – This division provides engineering services for Water, Wastewater, and Reclaimed Water Systems to ensure new facilities, repairs, and upgrades are planned and implemented in a fiscally-sound manner to meet regulatory and environmental standards. This division also provides long-range master planning, development review, condition assessment, water and sewer modeling, planning and pre-design for infrastructure, energy management, environmental support, and oversight of the implementation of the Water, Wastewater, and Reclaimed Water System's CIP.

Environmental Monitoring and Technical Services – This division provides permit compliance and monitoring services for the Water and Wastewater Systems to ensure water quality standards are maintained to meet regulatory and environmental standards. This division also administers the Industrial Wastewater Control Program which permits and monitors industrial businesses to minimize toxic discharges into the sewer system.

Wastewater Collection – This division provides efficient operations and maintenance of the wastewater collection system which consists of 3,017 miles of sewer mains and 75 sewer pump stations, as well as the Mission Bay and Coastal Low-flow system consisting of 24 interceptor pump stations and 50 diversion structures. The Division also administers the Food Establishment Wastewater Discharge Permitting Program which permits and monitors food establishments to minimize the discharge of fats, oils, and grease into the wastewater collection system.

Wastewater Treatment and Disposal – This division operates and maintains a wastewater treatment plant, two water reclamation plants, a bio-solids processing facility, and eight large wastewater pump stations. With these facilities, the Division provides regional wastewater treatment and disposal services to the City of San Diego, as well as 15 surrounding cities and special districts.

The Strategic Programs Branch responsibilities are as follows:

Asset Management – This section serves as the coordinator for Department activities which contribute to a unified methodology for asset management providing oversight, direction, and integration of activities to promote Public Utilities' goal of providing cost-effective water, recycled water, and wastewater services.

Strategic Business Planning – This team develops the five year strategic business plan and coordinates the development and tracking of the annual initiatives throughout the Department. Quarterly progress reports are coordinated and a final report is published for stakeholders and ratepayers.

Efficiency Initiatives – This team assists with, and tracks progress on, various consolidation and efficiency initiatives throughout the Department. Progress reports are coordinated and a final report is published for stakeholders and ratepayers.

- 452 -

Oversight

The Independent Rates Oversight Committee (IROC) was established by ordinance in 2007 to serve as an official advisory body to the Mayor, the City Council, and Department management on policy issues relating to the oversight of Public Utilities Department operations including, but not limited to, resource management, planned expenditures, service delivery methods, public awareness and outreach efforts, and efforts to achieve high quality, affordable utility services.

There are 11 voting members on the IROC, all of whom are appointed by the Mayor and confirmed by the City Council. The membership of IROC consists of representatives of each rate class and professional experts in such fields as finance, engineering, construction, and the environment. IROC meets monthly to review activities and issues for the Public Utilities Department. In addition, IROC has three subcommittees focused on public outreach, education and customer service finances, as well as engineering and technical issues.

The Department's mission is:

To ensure quality, reliability, and sustainability of water, wastewater, and recycled water services for the benefit of the ratepayers and citizens served

Goals and Objectives

The following goals and objectives represent the Public Utilities Department's Fiscal Year 2013 Strategic Plan:

Goal 1: Safe, reliable, and efficient, water, wastewater, and recycled water services

The Public Utilities Department is dedicated to its public health responsibilities of providing safe and reliable water and efficient wastewater and recycled water services. The Department strives to exceed all federal and State water quality standards, maintain and build needed infrastructure, and deliver water and wastewater services to customers efficiently and reliably. The Department will move toward accomplishing this goal by focusing on the following objectives and initiatives:

- Expand and optimize the Asset Management Program
- Finalize the Water and Wastewater 10-year CIP plan
- Implement Department-wide enhanced monitoring and assessment programs
- Use technology to improve core business activities

Goal 2: Fiscally-sound and effective public utility

The Public Utilities Department utilizes strategic financial planning to ensure financial viability to operate and maintain the water and wastewater systems. The Department provides a fiscally-sound, efficient organization that is responsive and dependable, enhancing its long-term viability, accountability, ethics, and transparency as cornerstones upon which to build trust with customers. The Department will move toward accomplishing this goal by focusing on the following objectives and initiatives:

- Proactively evaluate customer satisfaction and respond to contacts and referrals
- Provide annual training for those with direct customer contact
- Continue to conduct effectiveness and efficiency studies
- Implement approved efficiency study recommendations
- Properly manage finance and control costs
- Evaluate five-year strategic financing plan
- Continue the Internal Controls Program
- Maximize grant and SRF Loan funding opportunities

Goal 3: Sustainable growth and economic viability

The Department recognizes that water supplies are critical to preserving the quality of life, economic prosperity, and growth of the City. The Department identifies, evaluates, and plans short- and long-term water demand and supply reliability options. The Department will move toward accomplishing this goal by focusing on the following objectives and initiatives:

- Complete the Water Purification Demonstration Project
- Execute the Groundwater Asset Development Program
- Complete the Recycled Water Study
- Implement high return Department-wide energy management projects
- Develop a strategy to comply with the Clean Water Act and future regulatory requirements

Goal 4: Responsive, safe, committed, and innovative workforce

The Public Utilities Department is proud of its professional, technically-proficient, and diverse workforce. The Department is dedicated to ensuring its employees have the training and equipment necessary to provide safe, reliable water, wastewater, and recycled services in a customer-friendly manner. The Department will continue to meet its goal of being a service-oriented and innovative utility through strategic workforce planning and by providing employees the knowledge, skills, and abilities necessary to perform their jobs safely. The Department will move toward accomplishing this goal by focusing on the following objectives and initiatives:

- Implement a health and safety awareness plan that responds to injury trends
- Manage the hiring process to minimize vacancies
- Execute the Employee Leadership Development Academy
- Optimize the use of the Public Utility Employee Recognition Program
- Conduct a comprehensive review and update of all service level agreements

Service Efforts and Accomplishments

Asset Management

The Asset Management Program has begun the process of evaluating and preparing for an asset management IT solution to serve the needs of the entire Department. A Business Case Evaluation has been prepared evaluating the various options for the Department-wide software. The Business Case has been approved through governance and the AM Program is in the initial stages of this project. The Asset Management Program has been developing a Department-wide condition assessment plan which will document the many condition assessment efforts applied to the various asset classes.

Long-Range Planning and Water Resources

The Water Conservation Section received a Proposition 50 Integrated Regional Water Management Plan (IRWMP) grant in the amount of \$1.1 million for the City's "Irrigation Hardware Giveaway and Cash for Plants" Project. Local matching funding of \$0.2 million was provided by the City's Stormwater Pollution Prevention Program and \$178,000 of in-kind services from the Water Conservation Section. Titled "Outdoor Water Conservation Rebates," this grant project provided commercial and residential customers with three rebates to promote outdoor water conservation: Smart Controllers (weather-based irrigation controllers), Micro-Irrigation, and Sustainable Landscape-Turf Replacement. The goal was to conserve potable water while also reducing pollutant-laden dry weather urban runoff flows into sensitive receiving waters. Through February 2012, the grant project provided rebates for the installation of 82 smart controllers and 136 micro-irrigation systems, as well as the replacement of 160 high water use turf areas with sustainable low water use landscapes. The rebates were available to eligible single family, multi-family, and commercial customers on a first-come, first-served basis.

Proactive Recycled Water marketing activities targeting existing irrigation customers to encourage them to convert their cooling systems to recycled water, coupled with outreach efforts to connect new customers, have been successful. As of December 2011, the City's recycled water distribution system served 528 retail customers and four wholesale customers. The recycled water pipelines were expanded to serve five homeowners associations and the City's Westview Park in Mira Mesa freeing up approximately 105 acre-feet per year of potable water. In addition, two irrigation systems serving City medians and adjacent landscaping were retrofitted and connected to the recycled water system (Penasquitos East and northeast Mira Mesa). A total of twenty-five percent of the eligible retrofit costs were covered by Bureau of Reclamation grant funds.

The Recycled Water Cross-Connection staff completed all Calendar Year 2011 scheduled annual inspections and quadrennial shutdowns as required under the City's Regional Water Quality Control Board master reclamation permit and State regulations. In Calendar Year 2011, 450 annual inspections and 100 quadrennial shutdowns were successfully completed. In addition, 776 random or new development inspections of current or planned recycled water sites were completed.

In Fiscal Year 2011 sales of recycled water resulted in more than \$2.3 million in financial incentives from the Metropolitan Water District of Southern California and San Diego County Water Authority through local water resource development programs. During the first six months of Fiscal Year 2012, over \$1.6 million in financial incentives were credited to the City.

The Water Reliability Section completed ten Water Supply Assessments (WSAs) in Fiscal Year 2012, double its typical average.

The biennial San Pasqual State of the Basin Report was completed documenting the groundwater management activities, as well as the hydrologic conditions in the basin over the reporting period.

In April 2011, the Water Reliability Section began work on the 2012 Long-Range Water Resources Plan which updates the 2002 Plan. The City has convened an 11-member stakeholder committee that is providing guidance and input on alternative strategies for meeting San Diego's water needs through 2035. The 2012 Plan will address population growth, water resource diversification, climate change, and other issues affecting water reliability. The 2012 Plan is anticipated to be completed in the summer of 2012.

The Water Reliability Section is responsible for managing the Groundwater Asset Development Program which includes the following completed or ongoing projects:

- Drilled three U.S. Geological Survey multi-depth completion monitoring wells. It is also expected that one
 additional groundwater monitoring well will be drilled in the San Diego Formation in Fiscal Year 2012.
 The City was successful in securing grant funding from the Bureau of Reclamation for the Pilot
 Production Well Project to cover 25 percent of the eligible project costs.
- Work continues on an environmental baseline study of the upper San Diego River system. This study involved the installation of monitoring wells, collection of groundwater levels, surface water gauging, sensitive species surveys, and vegetation-mapping and monitoring to establish baseline habitat along the upper San Diego River riparian corridor. This study supported the Groundwater Asset Development Program by establishing habitat baseline data prior to groundwater extraction and pumping so the environment may be adaptively managed.
- A dam seepage recovery system at El Capitan Reservoir's hydraulic fill dam received a new pump replacing an installation that had been in disuse for over ten years. The new pump is pumping about 100 gallons per minute saving the Public Utilities Department 52 million gallons of water a year (161 acrefeet) or approximately \$97,000 (raw water at \$600 acre-foot).

The Recycled Water Study will be completed and the final report ready for release by the end of Fiscal Year 2012. The Study includes recycled water alternatives that were developed for minimizing flows to Point Loma and maximizing the amount of recycling through both potable and non-potable reuse. Grant funding from the Bureau of Reclamation covered 25 percent of the eligible project costs.

The 2010 Recycled Water Master Plan Update was completed as a fulfillment of the elements outlined in the San Diego Municipal Code. The 2010 Update, developed in conjunction with the Recycled Water Study, evaluated opportunities to maximize non-potable reuse if indirect-potable reuse projects are not pursued.

Work continued on the SANDAG Environmental Mitigation Program for the Integrated Weed Management Plan for San Pasqual Valley which included the development of a Weed Management Plan for the entire San Pasqual Valley and eradicating target plant species along Santa Maria Creek.

At San Vicente Reservoir, 425 acres of land were added to the source water protection buffer around the reservoir. These additions were needed due to reservoir expansion and the acquisitions were funded by a \$1.0 million State Proposition 50 grant and up to \$4.0 million from the County Water Authority. The newly acquired lands will be conveyed to the Water Fund and managed by Public Utilities.

Under the Water Purification Demonstration Project, the 1 million-gallon-per-day Advanced Water Purification Facility was completed in June 2011 and began operations. Following a mayoral press conference on June 30, 2011, the Advanced Water Purification Facility opened for tours to the general public; since that time, it has hosted 138 tours with 1,783 participants. In an effort to accommodate all guests, a virtual tour video was developed to reach those that cannot tour in person. The video may be seen on the project website, CityTV, and YouTube. In addition to tours, the Speakers Bureau is active and has completed 102 presentations to date.

The 12-month testing period for the Demonstration Project will be complete in July 2012. Modeling of the San Vicente Reservoir continues and all results to date have been presented to the Independent Advisory Panel, the California Department of Health, and the Regional Water Quality Control Board. Results related to both the test facility, as well as the reservoir modeling will be presented in the Final Project Report which is scheduled to be completed in December 2012. The Demonstration Project was funded in part by grants received from the Bureau of Reclamation and the State of California Proposition 50 IRWMP Grant.

The Demonstration Project utilizes a Facebook page, a Twitter presence, and a YouTube channel to engage a technologically-advanced demographic. Recognizing the Demonstration Project's strong outreach and education campaign, the WateReuse Association honored it with the 2011 WateReuse Public Education Program of the Year Award. This award recognizes education programs whose outreach enhances a better appreciation of water resources, management, and conservation.

The Water Purification Demonstration Project has received a steady cycle of news coverage including stories in TIME Magazine's blog, the Huffington Post, NBC San Diego, Channel 10 (ABC affiliate), San Diego U-T, the Voice of San Diego, KPBS radio, and most notably, the lead story on the cover of the New York Times on February 10, 2012.

Financial and Information Technology. This year, the IT Program migrated historical CIS and IOS data to the Public Utilities Department data warehouse as part of the mainframe retirement project. The Program refreshed data center equipment that was beyond useful life to sustain the production environment for at least five years. The Program also led the implementation of a new Enterprise Daily Operations reporting system containing plant operational data from the Distributed Control System and Laboratory Information Management System. In addition, the Program led the implementation of the Work Order Cost Capture application which will generate and complete work orders and continuously track costs associated with water/sewer repairs and maintenance.

The Budget Section continues to provide service to other PUD divisions and programs, as well as the Independent Rates Oversight Committee. The Section has refined financial reporting practices and continually monitors the budget to assist in identifying opportunities to achieve Department savings.

The Grants & Loans Section obtained fully-executed funding agreements to receive grant funding for the Alvarado (\$20.0 million), Miramar (\$20.0 million), and Otay (\$7.7 million) Water Treatment Plants. In addition, the Section fully executed funding agreements to secure low interest State Revolving Fund Loans totaling \$50.0 million for the Alvarado (\$12.0 million), Miramar (\$20.0 million), and Otay (\$18.0 million) Water Treatment Plants. By actively

pursuing these three SRF Loans, the Section will save the Public Utilities Department and ratepayers approximately \$40.0 million when compared to traditional 30 year bond funding.

Customer Support. The Customer Support Division responded to more than 311,000 water and sewer utility customer phone calls in the past year. Customer contacts included inquiries regarding customer billing and payment, service turn-on/turn-off, emergency services and repairs, water conservation, and general utility service questions. The Division also produced and sent more than 2 million water/sewer utility bills and processed 1.9 million customer payments totaling \$718.0 million.

The Division read more than 270,000 monthly/bi-monthly water meters, performed 30,000 shut-offs and service restorations, and continued rigorous efforts to protect the public water system by adding more than 1,000 maintained backflow devices to its monitoring and annual testing program.

The Department is moving forward with a project to streamline meter reading and customer service operations, reduce non-revenue water, and enhance customer service by obtaining near real-time wireless electronic access to water meter information using Advanced Metering Infrastructure (AMI) technology. The planned AMI implementation will include approximately 10,000 of the total meter population including all monthly read meters, all meters three inches and above, and one bi-monthly read route. Large meters that can no longer be maintained reliably will be replaced with newer meters fitted with AMI compatible registers. Once implemented, the Department can continue adding new devices in a steady, cost-effective manner. This project is scheduled to be completed within two years.

The Division completed the Customer Care Solutions (CCS) project and successfully replaced the legacy Customer Information System (CIS) and the Installation Order System (IOS) on July 5, 2011. This strategic 18-month undertaking implemented the new, integrated, real-time enterprise customer service information and billing system consistent with the roadmap for the citywide SAP Enterprise Resource Planning (ERP) System. The new CCS system provides utility billing and payment processing, customer account management, and a new online customer billing and payment portal. More than just a system replacement, this business transformation effort has improved existing business processes, leveraged industry best practices, and provided customers access to additional customer self-service options.

A Managed Competition Pre-Competition Assessment (PCA) of the Customer Service Office Section of the Division was completed last year. The Section provides key utility customer services including customer information (call center), utility billing and exception handling, collections, and payment processing. The assessment concluded that the function and services provided by the Section were appropriate for Managed Competition; a Preliminary Statement of Work (PSOW) was subsequently approved by the City Council. The effort was placed on hold temporarily due to conflicts with the CCS project implementation, impacts, and system stabilization. In Fiscal Year 2013, the effort will continue and the Section's City employees will compete with private sector contractors to provide these services.

Employee Services and Quality Assurance. The Strategic Support Services Section coordinated development of the Public Utilities Department Fiscal Year 2013 Strategic Initiatives and continued to monitor the status of Fiscal Year 2012 Strategic Initiatives. This section also conducted in the fall and spring Field and Management Academies and developed an Employee Opinion Survey to be administered to all Public Utilities employees in spring of Fiscal Year 2012. The Human Resources team continued to support and lead the Department in four major service areas: performance management, employee health and wellness, hiring, and payroll. This section also implemented improvements to the departmental occupational health management program so that injured employees were transitioned back to productive work appropriately and expediently.

The Training Section conducted the first Wastewater Branch "Fall Classic" training course and continued to conduct the Water Branch "Spring Training" courses. Both of these programs have been designed to ensure that all Water and Wastewater Branch employees complete required annual training, thereby ensuring compliance with OSHA and other regulatory requirements.

The Safety Section successfully completed the first year of the Safety Awards Program designed to reward and reinforce safe behavior and practices in the workplace. This section also conducted over 700 field and facility visits and over 90 safety tailgate training sessions for field and facility employees. The Quality Assurance Section coordinated Department responses to the "Public Utilities Capital Improvement Program" audit which was performed by the Office of the City Auditor. This section continues to track and monitor audit recommendations from this, as well as previous internal and external audits to ensure recommendations are implemented in a timely manner and satisfy the audit recommendations. The Quality Assurance Section also continues to support the Independent Rates Oversight Committee through meeting preparation, coordination of information requests, and facilitating the interface of the Committee and the City. In addition, this section provides contract management support to other Public Utilities divisions; Records Management; Service Level Agreement review, maintenance and administration; and special projects.

Water Construction and Maintenance. The Water Operations Branch continues to reduce the use of the Miramar Landfill through recycling and reusing material wherever possible in an effort to replicate the success of Fiscal Year 2010 when the Public Utilities Department was selected by the City of San Diego's Environmental Services Department as one of the Recycler of the Year for Waste Reduction and Recycling Awards Program. The Capital Improvement Programs Construction Section completed fifteen water groups' jobs throughout the City.

System Operations. The System Operations Division (System Operations) continues to improve the water quality delivered to the Department's customers through both water treatment plant and potable water distribution system improvements. System Operations has set and met challenging water quality goals at its three water treatment plants which exceed current water quality regulatory standards for turbidity. The set goal is to achieve a maximum effluent turbidity of 0.10 Nephelometric Turbidity Units (NTU) or less, 95 percent of the time, at the three water treatment plants. This goal exceeds the regulatory limit of 0.30 NTU and is indicative of a highly-performing water treatment plant. All three City water treatment plants have achieved this 0.10 NTU goal for the past 12 months. The goal for Fiscal Year 2013 is to continue to achieve this level at all three water treatment plants and further decrease turbidity levels.

Throughout this past year, all three water treatment plants have delivered safe and reliable potable water while completing significant capital improvement projects/upgrades. Maintaining water treatment plant service during construction of major CIP projects has been a significant challenge to plant operations. Plant operations and engineering staff have worked diligently to ensure the continuous and seamless delivery of safe potable water at all times. All three water treatment plants implemented new disinfection processes (Ozone and Chlorine Dioxide) which has improved the water quality delivered to the Department's customers. Completion of the projects has also provided the plants with an opportunity to further optimize plant operation.

In addition, the City continues to actively participate with the American Water Works Association's (AWWA) Partnership for Safe Water Program (Program). The Partnership Program's mission is to improve the quality of drinking water delivered to customers of public water supplies by optimizing system operations. The City's Otay Water Treatment Plant received the Director's Award of Recognition for the fourth consecutive year in 2011 from the Program. This was obtained while treating more challenging source water quality from local reservoirs. In addition, both the City's Miramar Water Treatment Plant and the City's Potable Water Distribution System Section began active participation with AWWA's Partnership for Safe Water Program in Fiscal Year 2011 and are working towards improving water quality through optimized and customized performance improvements via this program. The Alvarado Water Treatment Plant is also preparing to start the Partnership for Safe Water Program in Fiscal Year 2013 and has already implemented several optimizing projects. Overall, System Operations staff continues to optimize the water treatment plants and water distribution system while providing drinking water quality that surpasses the required federal standards. This is an indicator of the staffs' commitment to excellence in treatment and distribution system process optimization.

The System Operations Division also continues to work closely with the San Diego County Water Authority (SDCWA) on a variety of projects, programs, and agreements involving and/or impacting City water supply operations and water storage facilities. For example, SDCWA's San Vicente Dam Raise Project, which will raise the City's existing dam by 117 feet and increase local water storage in San Vicente by over 150,000 acre feet, requires

critical coordination and review to ensure that City water supply operations are not impacted during construction. The Division's operations and engineering staff will be challenged to continue this effort as construction progresses over the next two years.

Engineering and Program Management. The Engineering and Program Management Division (EPM) continued its support of the efforts of the Department to reduce sewer spills and meet the requirements of the Final Consent Decree with the Environmental Protection Agency and to the Department of Health Services requirements for the water system.

Sewer Modeling. The Division completed Closed Circuit Television (CCTV) inspection of 43.6 miles of sewer mains and 1,848 manholes and completed condition assessment analysis of 62.4 miles of sewer mains and 1,444 manholes to determine the sewer mains that require replacement, rehabilitation, or maintenance. For large diameter pipelines, the Division conducted sonar inspection of 12.8 miles and cleaning of 1.8 miles. As part of the Inflow and Infiltration (I/I) evaluation, the Division analyzed 157 flow meters and prepared an annual report identifying the potential sources of I/I.

Program Management. The Division worked with the Public Works – Engineering & Capital Projects (E&CP) Division to oversee the completion of 24.1 replacement/rehabilitation/repair sewer miles and the replacement of 11.8 miles of water mains between July 1, 2011 and January 1, 2012. In addition, the Division oversaw the completion of the Pipeline Rehab H-1 project; the installation of the North City Water Reclamation Plant (NCWRP) electro-dialysis reversal (EDR) 6; the repair of the Point Loma Digester 8 Roof Repair project; the assessment of three rehabilitation packages R-1, S-1, and T-1, a total of 24.3 miles; a total of 32 plan reviews for sewer and water group jobs; and a total of eight cost estimates for the City workforce's work on water group jobs.

Water Master Planning and 10% Design. The Division completed the Asbestos Cement (AC) Water Main Replacement Planning Study, AC Service Life Study, and is developing the first phase of the AC Pipe Replacement Program which will guide the AC main replacement projects from Fiscal Year 2017-Fiscal Year 2019. The Division also completed an Addendum to Otay Master Plan for the replacement of the Otay Second Pipeline Steel Sections. In addition, the Division prepared a total of 13 10% design reports and managed a consultant contract to complete the Mid-City Pipeline Phase II 10 Percent Design Report.

Wastewater Master Planning and Condition Assessment. The Division is managing condition assessment studies performed by consultants for several major water pipelines. The field inspections for the assessment of the Miramar Phase III and IV pipeline which conveys up to one-third of San Diego's potable water have been completed and preparation of the report is underway. The inspection of the Pump Station 65 force main was completed, and identified the presence of air bubbles and debris along certain sections of the pipeline which impede the operation of the pump station. The Division is proceeding to institute improvements in the operation and maintenance of the pump station and pipeline that will result in a 5 percent savings in energy costs or approximately \$260,000 over 20 years. In the past year, the Division preformed assessments of five water pump stations and 13 Municipal wastewater pump stations, thereby completing 13 Municipal pump stations. All available Municipal pump stations have been assessed within the past three years.

Environmental and Canyon Access. The Division has continued to successfully complete the mitigation program and mitigation projects in compliance with all local, State, and federal environmental regulations allowing the Public Utilities Department to use these sites as mitigation for all water and sewer projects. The Division has continued to initiate and complete various habitat re-vegetation projects associated with operations and maintenance for the pipeline and long-term access projects related to the Canyon Sewer and Long Term Access Program. Two Long Term Access projects have been designed and constructed including the installation of two permanent bridges to facilitate access for sewer maintenance and provide convenient stream bed crossings for the general public in local canyons.

Energy Management. The Division successfully completed numerous activities related to energy conservation including the completion of the Phase III of California Center for Sustainable Energy conservation contract. The 1.4MW South Bay Fuel Cell project was completed in October 2011 and is saving the South Bay Water Reclamation

Plan approximately \$75,000 per year. Its related project, the Beneficial Use of Digester Gas Project at the Point Loma Waste Water Treatment Plant, became the first bio-methane source of natural gas in the State of California to use the utility natural gas piping network for transportation. This project is projected to generate \$260,000 per year in revenues for the Department.

Environmental Monitoring and Technical Services. The Division completed the application to renew the National Pollution Discharge Elimination System (NPDES) permit for the South Bay Water Reclamation Plant and Ocean Outfall. This ensures that all requirements have been met to allow continued operation of this valuable regional asset into the future. A new NPDES permit is expected by August 2012.

The Division successfully executed the NPDES-mandated ocean-monitoring program for the Point Loma and South Bay ocean outfall regions which encompasses a coastal water area greater than 340 square miles and includes the collection and analysis of thousands of samples of ocean water, sediments, and marine life, and required more than 200 days of boat operations. The program also provides ocean-monitoring services to the International Boundary and Water Commission and recovered approximately \$1.5 million in Fiscal Year 2012.

The Division completed work on the execution of a scientific grant project with the Scripps Institution of Oceanography (SIO) to develop models of ocean circulation and wastewater plume dispersion off Point Loma (Point Loma Ocean Outfall Plume Behavior Study). The project was funded by a federal grant from the National Oceanic and Atmospheric Administration worth approximately \$0.8 million; a final report is expected to be completed by SIO and submitted to the City by June 30, 2012. The Division also completed the second of a four-year agreement with the SIO to monitor the health of the San Diego region's kelp forest ecosystem. This long-term project is critical in order to achieve the City's enhanced ocean monitoring objectives to ensure the protection of San Diego's coastal marine environment.

The Division completed the 2011 Lead and Copper Rule Study and Report, an investigation that required collaboration with ratepayers to monitor the levels of lead and copper emerging from sources within residences. This study is required by the California Department of Public Health every three years.

The State of California re-certified the Marine Microbiology laboratory to perform microbiological analysis of drinking water. The Department now has two separate facilities certified which allows the Department to be better prepared to handle public health or natural disaster emergencies impacting the drinking water system. The Division also maintained U.S. Environmental Protection Agency certification for Cryptosporidium Analysis (a microscopic parasite that causes the diarrheal disease). The staff and laboratory continues to be one of only four in Southern California and the only laboratory in the San Diego area with this certification.

The Division absorbed stormwater and air quality regulatory compliance duties for the Water Branch. This effort will help the Department better comply with the complex air quality regulations without increasing staffing costs.

The Division regulates sewer discharges not originating from metered potable water connections. Conveyance and treatment of these flows, such as seawater and extracted groundwater from remediation and construction projects, would otherwise be borne by sewer ratepayers. The Division recovered approximately \$2.4 million in Fiscal Year 2012. Additionally, the EMTS Division recovered approximately \$2.3 million in Fiscal Year 2012 from the continued operation of the dump site for hauled liquid waste from septic systems and specifically permitted industrial liquid wastes. This highly valued service provided to the San Diego area is the only industrial liquid waste dump station in San Diego County.

Wastewater Collection. The Division continued its success as the leader among large cities in the nation in reducing the number of sanitary sewer overflows (SSOs). There were 40 SSOs in Fiscal Year 2011 which represents an 87 percent reduction from the level experienced in Fiscal Year 2001 for an SSO ratio of 1.33 per 100 miles of sewer main. For the first half of Fiscal Year 2012, there have been 14 SSOs, a number similar to the first half of Fiscal Year 2011 during which there were 16 SSOs.

The Main Cleaning Section also cleaned a total of 1,964 miles of sewer main in Fiscal Year 2011, which exceeds the EPA Consent Decree requirement by 464 miles and the Division's performance metric goal by 264 miles. For the first half of Fiscal Year 2012, the Section has cleaned more than 1,052 miles of sewer main, compared to the same period in Fiscal Year 2011, during which crews cleaned 920 miles. This puts the Section on-track to exceed last year's main cleaning productivity by 14 percent with the same staffing levels as in Fiscal Year 2011.

The Division also successfully completed International Standardization Organization (ISO) audits with no major non-conformities, thus retaining its ISO 14001 certification.

A notable accomplishment during 2011 was the Division's recognition as Large Collection System of the Year by the California Water Environment Association. This award exemplifies the Division's status as a statewide and national leader in the wastewater collection industry.

Wastewater Treatment and Disposal. The North City and South Bay Water Reclamation Plants refined operations practices at the plants to minimize overproduction of recycled water by matching production to customer demands. This effort is challenging because customer demand can change faster than plant treatment processes can be altered. Control system strategies and operation attention will reduce operations costs by approximately \$0.2 million per facility per year.

The Division continues software upgrades to the distributed control system at the treatment plants and pump stations. The upgrades, which are set to continue at the Point Loma Wastewater Treatment Plant (PLWTP), will improve the reliability of the treatment system and will improve the efficiency of plant operations staff.

The Division continues to generate revenue through its renewable energy portfolio. Three co-generation facilities at wastewater treatment plants generate electric energy fueled by digester gas and landfill gas. These efforts save the Department approximately \$5.0 million each year in operating costs. The Beneficial Use of Digester Gas project at the PLWTP will generate revenue via the sale of excess digester gas. This excess gas will be used to provide electric energy at the South Bay Water Reclamation Plant.

The Division's performance was again recognized by the National Association of Clean Water Agencies Gold and Platinum Awards. The awards went to the PLWTP for the 17th consecutive year and the SBWRP for the eighth consecutive year.

Key Performance Indicators

| | Performance Measure | Actual FY2011 | Estimated FY2012 | Target FY2013 |
|----|---|------------------|---------------------|------------------|
| 1. | Average number of days to respond to and resolve customer- initiated service investigations (G2/O1) | 7.09 | 7.00 | 7.00 |
| 2. | Miles of sewer mains replaced, repaired, and rehabilitated (G1) | 46.5 | 60.0 | 45.0 |
| 3. | Miles of water mains replaced (G1) | 29 | 20 | 20 |
| 4. | Number of Primary Maximum Contaminant Level (MCL) violations as a result of potable water quality sampling (G1) | 0 | 0 | 0 |
| 5. | Number of sanitary sewer overflows (SSOs) (G1) | 40 | 35 | 35 |
| 6. | Number of water main breaks (G1) | 117 | 115 | 115 |

Managed Competition – Public Utilities Customer Service

| | Performance Measure | Actual FY2011 | Estimated FY2012 | Target FY2013 |
|-----|---|------------------|---------------------|------------------|
| 1. | Average number of days to complete customer-requested investigations including notification back to the customer | 6.7 | 10.0 ¹ | 6.5 ² |
| 2. | Percentage of Call Center and Water Repair staff availability | 85% | 85% | 85% |
| 3. | Percentage of incoming U.S. mailed remittances processed within the same business day | 96% | 96% | 96% |
| 4. | Percentage of customer complaints resolved in ≤ 13 business days | 79% | 75% ¹ | 92% |
| 5. | Percentage of bills issued within 3 business days of receipt of actual read | 98% | 98% | 100% |
| 6. | Process and deposit customer payments to the City's bank within the same business day of receipt | 96% | 96% | 96% |
| 7. | Percentage of electronic copies made of checks and payment stubs received from customers and retained for 3 years | 100% | 100% | 100% |
| 8. | Percentage of water repair and emergency phone calls responded to within 30 seconds of receipt during business hours | 73% | 56% ¹ | 85% |
| 9. | Answer customer information calls within 60 seconds of receipt | 48% ³ | 49%³ | 75% ³ |
| 10. | Percentage of payments collected on outstanding bills within 2 years of billing | 98% | 98% | 98% |
| 11. | Percentage of value of service billed collected within 12 months | 96% | 96% | 96% |
| 12. | Percentage of Business & Rental Unit Business Tax and SAP AR Invoice remittances processed within one business day of receipt | 98% | 99% | 100% |
| 13. | CSO Post-Call Survey customer satisfaction rate | 90% | 50%1 | 95% |
| 14. | Percentage of average amount collected in 30 days | N/A ⁴ | 90% | 90% |
| 15. | Percentage of average amount collected in 60 days | N/A ⁴ | 98% | 98% |
| 16. | Percentage of average amount collected in 90 days | N/A ⁴ | 99% | 99% |

The implementation of the new SAP Customer Care Solutions customer information and billing system on July 5, 2011 impacted service levels temporarily for some activities in Fiscal Year 2012. The system is now stabilized and service levels in these areas are expected to return to normal in Fiscal Year 2012.

The target of 6.5 days is intended to continue to drive improvement in this area towards the utility industry benchmark of 5 days. The implementation of the new SAP Customer Care Solutions customer information and billing system, process improvements, and meter reading quality control efforts will improve results sufficient to meet this target.

Resource constraints have limited the department's ability to meet the target of 75 percent in the past. The implementation of the new SAP Customer Care Solutions customer information and billing system, process improvements, expanded self-service options and other customer call reduction efforts will improve results sufficient to meet this target which is consistent with utility best practices and customer expectations.

⁴ This performance measure was not tracked at this time, therefore no data is available.

Department Summary

| | FY2011 | FY2012 | FY2013 | FY2012-2013 |
|-------------------------------|----------------|----------------|----------------|-----------------|
| | Actual | Budget | Proposed | Change |

Significant Budget Adjustments

| | FTE | Expenditures | Revenue |
|---|------|-----------------|---------|
| Non-Discretionary Adjustment Adjustment to expenditure allocations that are determined outside of the department's direct control. These allocations are generally based on prior year expenditure trends and examples of these include utilities, insurance, and rent. | 0.00 | \$ 1,941,165 | \$ - |
| State Revolving Fund (SRF) Adjustment Addition of funding to contracts to cover the minimum reserve amount per the funding agreement. | 0.00 | 1,699,809 | - |
| CIP Upgrades Contract Addition of expenditures for a contract with the City of Escondido to perform CIP upgrades. | 0.00 | 800,000 | - |
| Emergency Repair Addition of contract expenditures related to an emergency repair at Pump Station 64. | 0.00 | 774,559 | - |
| Equipment/Support for Information Technology Adjustment to expenditure allocations according to a zero- based annual review of information technology funding requirements and priority analyses. | 0.00 | 474,676 | - |
| Support for Equipment and Maintenance Addition of expenditures for the replacement and cleaning of motors and other equipment. | 0.00 | 400,000 | - |

Significant Budget Adjustments (Cont'd)

| Significant Budget Adjustments (Cont'd) | FTE | Expenditures | Revenue |
|---|---------|--------------|-----------------|
| Moving Expenditures Addition of expenditures for moving and the building of cubicles. | 0.00 | 190,000 | - |
| Support for Strategic Planning Adjustment reflects an increase in expenditures across the Sewer Funds and the Water Utility Operating Fund for the addition of 0.50 Accountant 3, 1.00 Organization Effectiveness Specialist 2, 0.98 Management Interns, and contracts needed to support the strategic planning and management academies. | 0.47 | 160,919 | - |
| Copier Savings Adjustment to reflect savings resulting from the new convenience copier contract. | 0.00 | (26,306) | - |
| One-Time Reductions and Annualizations Adjustment to reflect the removal of one-time revenues and expenditures, and the annualization of revenues and expenditures, implemented in Fiscal Year 2012. | 0.00 | (66,706) | - |
| Environment Impact Services Reduction in contracts related to environmental impact services. | 0.00 | (90,195) | - |
| Customer Care Solution Project Reduction of 10.00 FTE positions across the Sewer Funds and the Water Utility Operating Fund due to the completion of the Customer Care Solution Project. | (1.50) | (108,839) | - |
| Reduction of CIP Contingency Adjustment reflects a reduction of CIP contingency based on projected Fiscal Year 2013 operating reserve levels. | 0.00 | (158,001) | - |
| Non-Standard Hour Personnel Funding Adjustment to expenditures according to a zero-based annual review of non-standard hour personnel funding requirements. | (1.35) | (191,257) | - |
| Reduction of Contingency Reserve Reduction of the Contigency Reserve as it is no longer needed in Fiscal Year 2013 or future years. | 0.00 | (832,304) | - |
| Salary and Benefit Adjustments Adjustments to reflect the annualization of the Fiscal Year 2012 negotiated salary compensation schedule, changes to savings resulting from positions to be vacant for any period of the fiscal year, retirement contributions, retiree health contributions, and labor negotiation adjustments. | (1.03) | (867,087) | - |
| Public Utilities Restructure Reallocation among funds to more accurately reflect operational expenditures as well as an adjustment due to efficiencies realized. | (9.79) | (2,704,189) | - |
| Revised Revenue Adjustment to reflect Fiscal Year 2013 revenue projections. | 0.00 | - | (61,367,000) |
| Total | (13.20) | \$ 1,396,244 | \$ (61,367,000) |
