CADILLAC  
MOTOR CARS

SAN DIEGO, CALIFORNIA, April 20th 1916

Board of Health  
City of San Diego  
San Diego, California

Gentlemen;—

Attention Dr Banks.

Enclosed please find photographs of a new ambulance that the Cadillac Motor Car Company is putting out on a special 145" wheel base chassis, equipped with their famous eight cylinder motor. This ambulance has immediately become popular where it has been shown, in the east on account of the easy riding qualities of this long chassis and the absolute lack of vibration of the eight cylinder motor.

The Cadillac Motor Car Company have spent a great deal of time and money in making this job up to the minute in every detail, which adds to the comfort of the patients and the convenience of the attendants, and the body is superior in every way to any that could be built here and placed on the same chassis.

We know that you have always had excellent service, from the old make shift ambulance which was built from an old discarded Cadillac that the Police Department used from 1911 to 1914, and a body from an old horse drawn vehicle. We are always ready and willing to give you the services of our Cadillac experts to keep this old car on its feet; but we believe that the time has arrived when it would be advisable, from a point of economy for the city to purchase a new and strictly modern car.

A new car would be guaranteed for one year and about the only cost of operation would be for gasoline and oil.

If you are interested in this car we will be glad to furnish complete specifications and details, and also the details of a plan that we have to dispose of your old car.

Trusting that this matter may interest you and awaiting your reply, we remain,

Yours very truly,

J. A. McCaddon
