Debt Obligations

Under the direction of the Chief Financial Officer, with attention to current economic and municipal bond market conditions and funding needs, the City executes debt instruments, administers debt proceeds, manages ongoing disclosure and debt compliance, and makes timely debt service payments. Reliance on short term and long-term financing instruments can facilitate better allocation of resources and increased financial flexibility and represents an important component of the City's Five-Year Financial Outlook for the General Fund and the Public Utilities Department's capital planning for meeting the City's infrastructure needs.

City of San Diego's Outstanding Long-Term Debt Obligations¹ *Outstanding Principal as of June 30, 2019*

- General Fund backed Lease-Revenue Bonds: \$523.7 million
- Public Utilities - Wastewater (Sewer) System Bonds and Loans: \$824.4 million
- Public Utilities - Water System Bonds and Loans: \$928.8 million

Long Term Bond Obligations

Lease Revenue Bonds are lease obligations secured by a lease-back arrangement with a public entity, where the general operating revenues are pledged to pay the lease payments, and in turn are used to pay debt service on the bonds. These obligations do not constitute indebtedness under the State constitutional debt limitation and are not subject to voter approval. Payments to be made under valid financing leases are payable only in the year in which usage and occupancy of the leased property is available, and lease payments may not be accelerated. The governmental lessee is obligated to place in its annual budget the rentals that are due and payable during each fiscal year the lessee has use of the leased property.

¹ Does not reflect debt obligations of City Agencies (including City as the Successor Agency to the Redevelopment Agency), Community Facilities Districts or Special Assessment Districts. See the City's Fiscal Year 2018 Comprehensive Annual Financial Report for a complete list of outstanding liabilities of the City and its related agencies.

Revenue Bonds are obligations payable from revenues generated by an enterprise, such as water or wastewater utilities, public golf courses or parking facilities. The City's outstanding utility Revenue Bonds are payable solely from the City's Water or Wastewater Enterprise Funds and are not secured by any pledge of ad valorem taxes or General Fund revenues by the City.

Other Short and Long-Term Debt Instruments

Federal and State Infrastructure Loans are an important funding source for capital projects in addition to the bond proceeds. State Revolving Funds (SRFs) and the Water Infrastructure Finance and Innovation Act (WIFIA) program make low cost loans available to local agencies to fund certain public infrastructure projects. The City has utilized low cost SRF funding for various water and wastewater projects. In November 2018, the City secured the WIFIA Loan in an amount totaling \$614.0 million for the Water Utility portion of Phase I of the Pure Water Program. The repayment terms of the loans range from 20 to 40 years depending on the loan criteria and useful life of the projects receiving funding.

Commercial Paper Notes provide an as needed borrowing tool to meet the cash flow needs of capital improvement projects. Commercial paper notes are issued on a short-term basis as capital project spending occurs. Note maturity ranges between one and six months and up to 270 days, and the notes hold short-term rates of interest. Commercial Paper obligations are ultimately refinanced with long term debt.

- Water Commercial Paper Note Program (not-to-exceed \$250.0 million at any time) – In 2017, the City established a Water Revenue Commercial Paper Notes Program, which is utilized to finance Water Utility capital projects. The program costs and issuance expenses are paid by the Water Utility Fund.
- General Fund Commercial Paper Note Program (not-to-exceed \$88.5 million at any time) – In 2018, the City established a General Fund Lease Revenue Commercial Paper Note Program. This program is utilized to finance General Fund capital projects and program costs, and interest expenses are paid by the General Fund.

Capital Leases are utilized by the City to finance various equipment and projects via lease-to-own or lease purchase agreements. The City's Equipment and Vehicle Financing Program (EVFP) provides a mechanism for the lease purchase of essential equipment/vehicles in addition to pay-as-you-go funding. The repayment terms of the lease purchases or capital leases are typically five to ten years and based on the useful life expectancy of the equipment/vehicles. These purchases include a variety of essential assets and span various lease terms. Examples include fire trucks, refuse packers, service trucks, Information Technology (IT) projects and equipment, and public safety helicopters. In addition, the City from time to time will enter into capital leases via equipment vendors to finance eligible projects, and lease-to-own agreements to acquire buildings for City operations.

Table 2: Summary of Debt Obligations summarizes the City's outstanding debt obligations as of June 30, 2019, and the projected bond debt/lease payment for each outstanding issuance for Fiscal Year 2020.
