STREET TREE SELECTION GUIDE

This guide provides information for selecting street trees. Trees are vital part of San Diego's infrastructure, contributing energy savings, filtering Stormwater runoff and enhancing property values. This guide encourages choices compatible with the planting locations, minimizing damage to public improvements and promotes species diversity. Read all notes thoroughly prior to making any selection.

A Few Tree FAQs

Q. What if I want to select a tree that's not on the list?

A. You may select a tree that's not on the list, with written approval from the Street Division Urban Forestry Section. Email dpotocki@sandiego.gov with your proposed selection.

Q. What about native trees?

A. The City of San Diego encourages the use native trees and highly recommends them for areas where growing space and soil type are conducive to healthy native tree development.

Q. My neighborhood has a Master Street Tree Plan. Does this affect my choice?

A. Tree species must be consistent with the approved Master Street Tree Plans or other applicable documents. These plans have been developed for many communities. Check in the Landscape Standards of the Land Development Code from City of San Diego Development Services before making your selection.

Q. Do I need a permit to plant a tree?

A. All Street Tree plantings require a "NO FEE Street Tree Permit" prior to planting. Call Street Division at (619) 527-7500 to request a permit application.

Q. Who decides what trees go into the Tree Selection Guide

A. Tree selection criteria is developed by the City's Urban Forestry Section with input from the City's Community Forest Advisory Board.

Q. How can I find out what a tree will look like before I select it?

A. You can go to selecttree.cagr.calpoly.edu for an online guide complete with photos or you can visit your local nursery to take a first hand look at the tree and get planting tips.

If you have more questions about selecting the right tree for your location, call **(619) 527-7500**.
