

Hello Commissioners,

Thank you again for the space to present our revised Unity Map to you. We have submitted the map through the online tool, as well.

Link to Revised Unity Map: <https://districtr.org/plan/62498>

Based on the numerous community input received by the coalition, changes were made to the original unity map where we remained intentional about keeping neighborhoods that wanted to stay together whole, as best as possible. Here's how and why we moved the following neighborhoods into these districts.

- **Golden Hill in D3:** Residents from Golden Hill have provided feedback that they'd like to stay in District 3.
- **Adams North in D9:** This is to keep the Normal Heights community united in one district.
- **Shelltown and Southcrest in D8.** *We also received feedback from Shelltown and Southcrest residents who would like to be in the same district and to be in District 8.*
- **All of Mount Hope in D9:** It makes sense to unite Mount Hope in the same district and to be in District 9.

The updated proposed map that we worked on with over 20 organizations throughout San Diego from Districts 3, 4, 8 and 9. We have the following organizations who have officially endorsed this map so far: Alliance San Diego, Asian Solidarity Collective, BAPAC, Karen Organization of San Diego, Mid-City CAN, Partnership for the Advancement of New Americans and The Urban Collaborative Project. Together, along with the rest of the coalition, we were able to draw 4 districts with less than **3.62% deviation**.

- This map maintains D4 as the Black empowerment district with 16.1% Black CVAP in D4.
- This map maintains D8 as the Latinx empowerment district with 72.1% Latinx CVAP in D8.
