

Dear San Diego Redistricting Commission Members,

Ten years ago, the Asian Pacific American Coalition submitted a proposed map that would be an Asian influenced district, with communities of interest (specifically the Asian American community) being kept together for purposes of language, business, ethnic, and cultural similarities. The proposed map from 2011 was aiming for 39% Asian population. APAC continues to work for an Asian influenced district and will ensure the commission will receive public comment about recommendations for the new lines for District 6.

Please see attachment for APAC proposed map 2011.

Sincerely,

Steve Hsieh
Chair, APAC San Diego
