

It has come to my attention that there will be a vote possibly splitting University City into two different districts. This will be horrible for our community. University City has been a thriving community since the 1960s. Our schools work together to help all students in the UC Cluster. The University City Community Association (UCCA) works hard to make our large neighborhood feel like a small community.

As a resident of East University City, I feel if we are split into two separate districts, I would have very little say in changes in West University City even though they are less than a quarter mile away such the current discussion of narrowing Governor Drive or the project at Standley Park (major infrastructure with no parking). Other things that are considered West University City, but would affect my life are developments at UCSD, Costa Verde, possible development in Rose Canyon (west of Genesee), etc.

If you split us into two districts, it will devastate this area for many years to come. What happens to our tax structure, businesses; how will it impact our police and fire/rescue departments?

Please think of all the consequences and vote to keep University City in one district!

Thank you,
Heather Ray
East UC Resident
