

Dear Commissioners:

As a long time La Jolla Resident who previously lived in University City, I support I-5 being the western boundary of District 6, the way it is in the Preliminary Map submitted to the City Clerk and maintained that way through the requests to HaystaqDNA made on November 23. This keeps the La Jolla area connected to northern areas of District One by a wide corridor with thousands of residents.

I am generally in favor of the changes that the Commission asked Haystaq DNA to vet for the December 1st meeting.

Torrey Hills belongs with its longtime neighbor Carmel Valley in District 1. The Canyon is a natural southern boundary separating it from the proposed District 6.

I suggest that you include Los Penasquitos Canyon Preserve in District 1 as well. It is in District 1 now and since it has a relatively low population, there is no reason to move this natural resource and its connection to the watershed into District Six. Please add it and the rest of the watershed in the Torrey Pines area back into District 1.

I note that in addition to moving Torrey Highlands into District 5, the HaystaqDNA map and report moved the Del Mar Mesa Preserve into District Five. Please put it back into District 1 as the rest of the Preserve is there now.

Thank you for your consideration

Helen Boyden
