

SD redistricting group,

This is very disturbing news to see how you are planning to separate the south east sector of UTC from the rest of our community.

Why have the lines been drawn as such to split off the south west from the remaining community? The 52 and 805 freeways surely make the correct boundaries to follow?

This fails to meet 5 of your 6 guiding rules for redistricting, i.e.

- Contiguity, you are proposing to split a small section of a Mesa from its existing geography.

- Geographically compact, we have no connection whatsoever with district 6

- Preserving our community, we'd be split and isolated from the rest of UC

- Reasonable access, again totally separated from the rest of the proposed district

- Natural boundaries, no natural boundary sits on Genesee, at least the 805 and 52 were built within canyons, which qualify again using these natural boundaries which already bounds the SE University City to the rest of UC.

I'm very concerned. Please give me a call to explain these actions.

Jason Cox
