

I would appreciate it if all Commissioners would read the following commentary before taking action today: <http://NumbersRunner.blogspot.com>

The gist of these comments is: **We must insist that the clout of private industry is not a valid or legal tool for determining City Council districts or for carving out political advantage in the redistricting process. That's the only message the Redistricting Commission needs to heed.**

Thank you for your public service as Redistricting Commissioners.
