

Hello,

I was very disappointed by the comments of some of the commissioners and chair this past meeting.

For those complaining about not having time because holidays are coming up or that it is extremely late (Fred Kosmo and Thomas Hebrank), or those not having enough time to focus on the maps due to other obligations (Val Hoy), please know you signed up for this role.

If you are going to treat important matters that impact people and communities for 10 years as an inconvenience, release your role and allow others who have time and actually care about getting right take your role. Your path was clear to community members... you prefer to choose what's most convenient and easiest for you and your timeline, not what communities are asking for.

This world is run by mediocre men. Please do not be one of them. Do better.

Best Wishes,  
Van Pham (she/hers)
