

Dear Commissioners,

The new districts map came to our attention and I can't make sense of it and was hoping you could shed some light on it reasoning and reconsider it.

We live on 4655 Vereda Luz Del Sol, San Diego, CA 92130 and it sounds like our neighbors in front of us would be in district 1 and we would be in district 9.

The boundaries appear to be illogical and random, we have a canyon a few hundred feet away which seems a perfect, clear and logical separation between districts. Why don't we use that instead?

We don't agree with this map. Could we make sure to include all of Torrey hills in district 1?

Best regards.

Benoît L'Herron
