

Commissioners,

Please note that Haystaqdna does not necessarily follow your directives, and you need to check their maps since you bear ultimate responsibility. Please see the video of meeting #2. Things you directed Haystaqdna to do include:

Unite Torrey Hills in District 1

Haystaqdna erroneously left part of Torrey Hills in District 5.

Move Torrey Heights to district 5

In addition to moving Torrey Heights Haystaqdna moved Del Mar Mesa to District 5, a change you did not request.

During meeting #3 you accepted the map with those errors. **Please have them corrected.**

During meeting #3 in the presentation of the changes Haystaqdna told you that the population deviation was 8.1%. The mapping program calculates this for you automatically and you can see it on the bottom right of the map, including in the video where it shows as 4.4%. The 8.1% and 4.4% are calculated using different formulas. **You should make sure that the method used for the deviation calculations is the required method.**

You considered splitting communities apart in pursuit of the mythical 0% deviation. **You should explicitly make protecting communities of interest a higher goal than reducing population deviation. People vote for council members based on shared interests and concerns of their community, not based on their race.**

Regards

Grazyna Krajewska

Torrey Hills
