

Dear Commissioners,

My name is Archana Gangavati, a 10-year resident of Torrey Hills, on **Corte Luz Del Sol** (one of the impacted streets, residences that were left behind in district 6, despite the approval of moving all Torrey Hills back into district 1).

I am writing you on behalf of ALL my neighbors because the Map 87040 that Haystaq developed and was approved during your previous meeting moving Torrey Hills has incorrect boundaries for 606 Torrey Hills residents that live on the top of hill by East Ocean Air drive, near the canyon, part of the same housing complex, community, neighborhood and HOA, etc. Map 870404 as approved today carves out and excludes via a strange two-horseshoe like pattern right in the middle of the neighborhood moving houses out of district 1 and leaving others more inside the cul-de-sacs of the same housing complex in district 1.

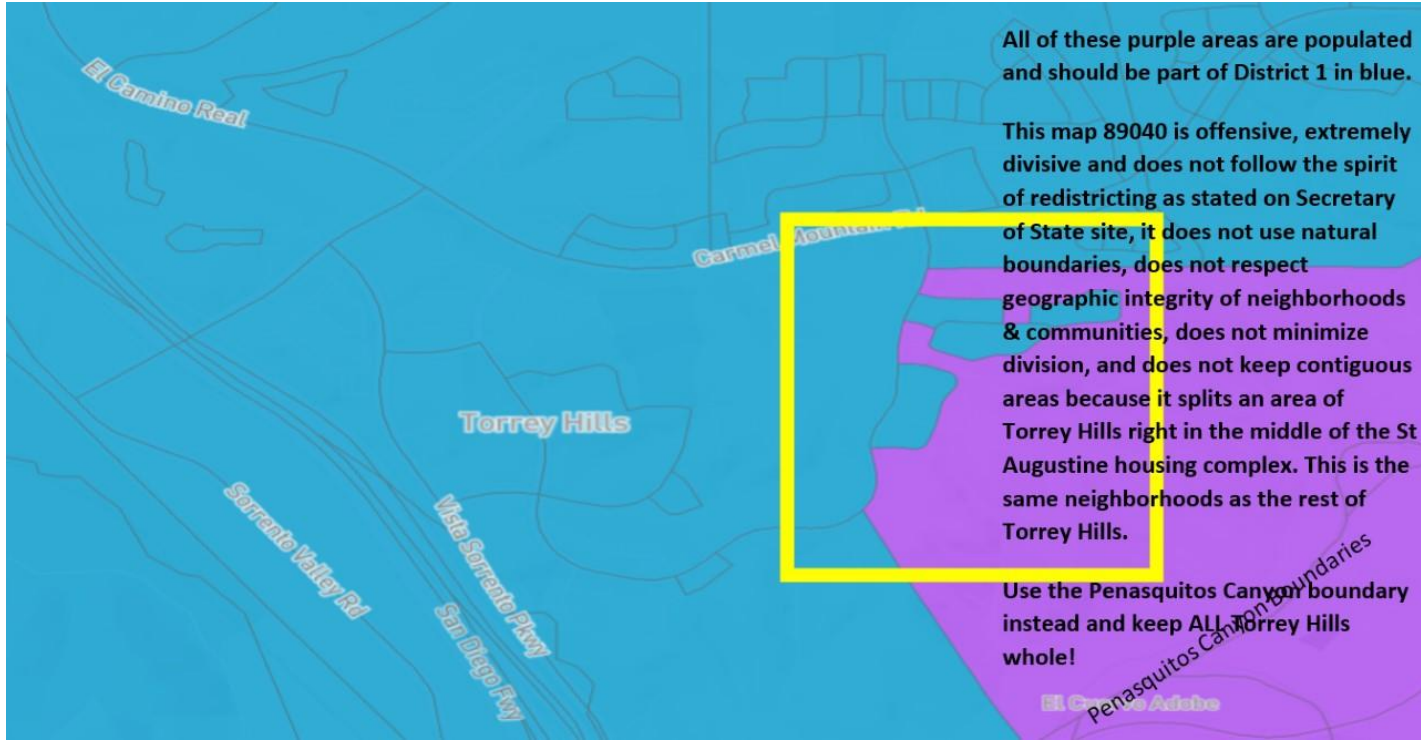

We in Torrey Hills, are ONE community, one zip code and have always been part of Torrey Hills and Carmel Valley since the houses were built in 2000. We saw shopping centers, recreation centers of Ocean Air, Ocean Air elementary, etc. communities being built around us.

**I have to believe that the emission is only an oversight, it is the only plausible explanation for it. If our houses have been deliberately singled out - please provide adequate justification for it while bearing in mind that this will be pushing neighbors away from each other.**

I urge you to consider voting on performing a friendly revision on Map 87040 that would bring the entirety of Torrey Hills residents (ONE community, same zip code, same roads, schools, shopping centers, recreation centers, parks as the rest that got moved back into the Carmel Valley district 1!!) back to district 1.

I look forward to this decision tomorrow.

Best,  
Archana

All of these purple areas are populated and should be part of District 1 in blue.

This map 89040 is offensive, extremely divisive and does not follow the spirit of redistricting as stated on Secretary of State site, it does not use natural boundaries, does not respect geographic integrity of neighborhoods & communities, does not minimize division, and does not keep contiguous areas because it splits an area of Torrey Hills right in the middle of the St Augustine housing complex. This is the same neighborhoods as the rest of Torrey Hills.

Use the Penasquitos Canyon boundary instead and keep ALL Torrey Hills whole!
