

The new approved map 89040 does not meet the intent of the re-districting vision as stated on the secretary of state website where we are trying to (1) geographically keep contiguous districts, (2) keep and respect the geographic integrity of local neighborhoods or communities in a manner that minimizes its division, (3) respect the geographic integrity of a city to minimize its division, (4) easily identifiable boundaries that follow natural or artificial barriers, which is the penasquitos canyon separating us from sorrento valley and mira mesa, and (5) lines shall be drawn to encourage geographic compactness. With this new map, residents of Torrey Hills have been cut from their immediate neighborhood. It does not make sense that our immediate neighbors who share the same streets, shopping, and geographical neighborhood should be separated into separate districts. Please revise Map 89040 to move ALL of Torrey Hills within District 1 based on Penasquitos Canyon boundaries, not an arbitrary division line cutting through our streets. This would show all of Torrey Hills under district 1 and keep Carmel Valley as ONE community, which would make it more in line with this redistricting project's vision and spirit.

Thanks
Elton Wang
