Expressed concern that people appointed have had no prior experience on any subcommittee; also that Callen previously voiced opposition to bicycle infrastructure and suggests having appointees visit other subcommittee for training prior to beginning chairmanship. Discussion followed where Callen stated she has not opposed bikeways. Other board members expressed these appointees are willing to serve and there are no other volunteers. IV. Non-Agenda Public Comment:

- a. **Rob Steppke.** North County Transit District (NCTD) is holding hearings regarding their plan to eliminate Route 395 service that connects Oceanside with San Clemente. This is a vital access point to make other connections to get the rider from San Diego to points in the Los Angeles area (currently having 4 northbound and 5 southbound trips daily). There is no other public transit that connects the two points other than Amtrak and a very limited Metrolink schedule. Public transit is about providing service, not profits. Public comment can be provided at the hearing on Thursday, April 20 at 2p at the NCTD offices, 810 Mission Ave, Oceanside, CA 92054. Opportunity to comment via email at servicechanges@nctd.org.
- b. **Vicki Granowitz.** Recently attended meeting with City staff, NPMS, and The Observatory discussing Mini Park behind theater. Some changes were agreed upon, based on concerns about homelessness and security. Plans for parks like this officially go through the Parks & Recreation Council, so she suggested to those shareholders and to us that NPPC request a joint meeting with the Parks & Rec Council to hear these changes and review final project plans.

V. Announcements & Event Notices:

- a. **MTS Proposed Service Change:** The Transit Optimization Plan (TOP) goal is to evaluate MTS' current network of services to ensure that it is efficient and effective for the region's travel needs. Over the past several months, MTS has been working to analyze the findings in conjunction with system performance data, route segments and ridership patterns. As a result of the findings, MTS has proposed 60+ route/schedule changes. Upcoming MTS Board Hearing: May 11, 2017.

VIII. Information/Discussion Items

- a. **Bikeway Types and California Vehicle Code.** How Community Planning Groups might serve to further the Climate Action Plan and provide for more and safer bicycling. Jim Baross, SD Bicycle Coalition was not present, therefore there was no discussion.
- b. **SANDAG Presentation on the Howard-Orange Bikeway.** Alison Moss, Project Manager (SANDAG Bikeway Program) and Brandy Sweitzer, Senior Public Outreach Officer, Brandy.Sweitzer@sandag.org http://www.keepsandiegomoving.com/Libraries/Bike_Projects/SAN_GBB_MAP_NPMC_Bikeways_wit_h_Header_ENG_062016.sflb.ashx
 - i. Part of Early Action Bike Plan for North Park/Mid-City.
 - ii. Plan from Howard Ave. from Park Blvd. to I-805 is currently at preliminary engineering phase. SANDAG used the Mobility Element of the North Park CPU as a guide; in that document, this section of road was identified as a "bike boulevard". Currently there are two travel lanes and one center turn lane; project intends to remove the center turn lane and implement different traffic calming methods like traffic circles, chokers, curb extensions, humps, reverse angle parking, and a new "bend out treatment". A real-life example of center lane removal can be found on Madison Ave. Landscaping can be done if you have MAD/BIDs that can cover ongoing cost of maintenance.
 - iii. Getting ready for preliminary engineering and environmental clearance, which is the final chance to give input to the transportation committee at a hearing; will send invite when date pinned down; final design slated to be complete between 2017-2019.
 - iv. Board and Audience Q/A:
 - 1. Audience. What is reverse angle parking? Answer: If you want to see reverse angle parking in action, it exists on 25th between B & C; the reception has been good from people after it's implemented.
 - 2. Audience. Concerned there is not enough money for traffic circles to be landscaped. Texas intersection has current construction, have you been coordinating with them at all? Answer: No.
 - 3. Taylor & Hill. Request infrastructure be built in a modular way so there are provisional hookups for landscaping once it is funded.
 - 4. Audience. Why are bike lanes buffered instead of adjacent to sidewalk, with parking protecting them? That is aligned with best practices, but works best in commercial areas; for every instance of a driveway/alley, lots of parking has to be pulled in this scenario, which would quintuple parking loss.
 - 5. Audience. Concerned about unintended consequences: 1) rear angled parking with idling gasses collecting at alcoves. Answer: This is true, which is why this is not usually used in commercial areas; only used in 2 limited areas here. 2) traffic circle concerns, seeing plenty of reasons many of the traffic circles may not work
 - 6. Audience. Traffic diversions/diverters being considered? The purpose of these features is to get volumes low enough for bikes and cars to share traffic circles, and they weren't successful, so traffic is being slowed down through speed tables and other means.
 - 7. Audience. Speed limits lowered? Answer: No, in CA you can only post at less than 25 mph if the street is less than 25 feet wide. Speed studies are done to determine the average speed and creates that as the justified speed by law.
 - 8. Ferrier. Will SANDAG monitor bike ridership? Answer: Will do "before" counts in key locations on all corridors, annual counts for a few years after in same places, and then probably rotating around. Finalizing Monitoring Plan now, and will bring back and present. Counts will include some of these neighborhood streets.

9. Callen. How do you persuade people to move from cars to bikes? Does it depend on how close from home to job, and how fit they are? How are you trying to market this?
Answer: There is a transportation demand management program at SANDAG that provides service info to employers on how to encourage employees. Tying that effort closer to these projects will be useful in harnessing that energy. SANDAG has a lot of data and employer data that shows what type of trips people are making. We need more data to make the case really strong. This bikeway may not be about commuting as much as it is about traveling around the neighborhood to destinations.
 10. Carlson. Excited by pop-outs (we call them “bike permeable curb extensions”). Please send comments to Allison not only about bike infrastructure and bike experience but also pedestrian experience. NPPC has provided plenty of input about art and landscaping, and appreciate the zero-maintenance modular scheme to give us flexibility.
- c. **Review Council Policy 600-24, Administrative Guidelines and the NPPC Bylaws.** Chair gave an overview of the NPPC Bylaws and highlighted some Sections and paragraphs. Will revisit bylaws in future to change inconsistencies, and update standing rules.
- i. Granowitz: Reminded board that they are not allowed to do serial meetings, i.e. can’t talk to each other in a chain, even on social media, board members have to do peoples’ business in the public eye. 600-24 is more stringent on that than the Brown Act is. The only person that speaks for the Board is the Chair, but any member must state that they are not speaking on behalf of the Planning Committee unless the Board/Chair has appointed you to do so.

IX. Action Items:

- a. North Park Maintenance Assessment District (MAD): Becoming a Subcommittee of the NPPC. Peter Hill, MAD representative. Gave brief introduction.
- b. Board comment:
 1. Gebreselassie. Has issue with bylaws not permitting tenants to be part of the Board. Per Vidales, a tenant can be on the subcommittee if they are designated to represent an organization (NPMS, NPHS, NPCA, etc.). Per Hill, we get into an issue with the legal definition of the MAD, which assesses a fee to a property owner; the City has ruled that this means property owners paying these fees, thus property owners must make up the MAD.
 2. Carlson. Does the current MAD support these motions? Per Steppke, yes.
 3. Taylor. What was the MAD vote? Per Peter it was 4-1-1. The El Cajon Boulevard Business Association (ECBBA) representative abstained because was waiting for full ECB Board to vote, as their executive committee voted unanimously to support, and has passed that on to their board of directors. Peter will attend the ECBBA full board meeting on Wednesday to see it through because he wants buy-in.
 4. Velasquez. Any issue with the MAD resident representative seat being filled by someone on the NPPC board? Per Hill, conceivably yes, but if elected to the MAD, the resident representative wouldn’t be acting on behalf of the Planning Group.
- c. NPMAD April 10, 2017 MOTION: *“For the NPMAD to join the NPPC, incorporating the bylaw revisions approved by NPMAD board at its March 13, 2017 meeting to be a NPPC Subcommittee.”*
MOTION: The NPPC supports & approves the North Park MAD’s request to become a subcommittee of the NPPC. Carlson/Callen 15-0-0

MOTION: The NPPC supports and approves the NPMAD’s Draft Bylaws recommendation to be incorporated into the NPPC Bylaws. Carlson/Campbell 14-1-0 (Gebreselassie)

- 1. These draft bylaws have been reviewed and tentatively approved by city staff, but have not received final approval. Changes can still be proposed if deemed necessary by City Staff and would come back to the NPMAD and the NPPC for final approval.
- e. Additional language to insert into the NPPC Bylaws.

MOTION: To add the following language to the NPPC Bylaws, Article VI, Section 2 (b) (i), Standing Subcommittees: *"and NPPC North Park Maintenance District (NPMAD) Subcommittees operate consistent with the following procedures:"*. Carlson/Campbell 15-0-0
