

THE CITY OF SAN DIEGO

University Avenue Pipeline Replacement Project

TRAFFIC AND PARKING ADVISORY

Monday, June 29 through mid-July 2015

The City of San Diego is replacing 4.33 miles (22,722 feet) of water mains that have reached the end of their service life within the University Heights, Hillcrest and North Park communities. Prior to major construction activities taking place on University Avenue, crews will inspect and pothole the street.

This work is necessary to verify the existing location of the below ground water and sewer mains and is conducted to minimize impacts to the community. To facilitate the potholing work, intermittent lane closures are required.

Please use caution when traveling through the construction zone. Follow temporary detours and no parking signs, which will be enforced. Electronic message boards will provide updates as you approach the impacted areas. Make sure to allow for additional time during your daily commute.

This advisory provides a summary of the anticipated impacts by this work. Updates for any additional anticipated impacts will be provided as work progresses.

Mondays through Fridays (8 a.m. to 4 p.m.):

A. East-bound University Avenue (Between Park Boulevard and Florida Street)

- Intermittent Lane Closures
- Traffic control measures will begin to be placed on Centre Street to merge traffic into a single lane.

B. Westbound University Avenue (Between Florida Street and Park Boulevard)

- Intermittent Lane Closures
- Traffic control measures will begin to be placed on Alabma Street to merge traffic into a single lane.

Thank you for your patience and understanding while work progresses on these important infrastructure projects. Every provision will be taken to quickly and efficiently complete the work.
