Traffic Alert: Mission Gorge Road Lane Closures to be Extended through Intersection of Greenbrier Avenue

LANES CLOSED DUE TO CONSTRUCTION ACTIVITY

San Diego – The City is closing turn lanes at the intersection of Greenbrier Avenue and Mission Gorge Road beginning Thursday, September 1. The closures will impact the following turns:

- Northbound Mission Gorge Road to Greenbrier Avenue will remain open.
- Southbound Mission Gorge Road to Greenbrier Avenue will be closed.
- Greenbrier to northbound Mission Gorge Road will remain open.
- Greenbrier to southbound Mission Gorge Road will be closed.
- U-Turns on Mission Gorge at Greenbrier Avenue will not be allowed.

The turn limitations are due to an expansion of the work area associated with the Mission Gorge Road Settlement Emergency Repair Project. These additional limitations are expected to remain in place for approximately a month. After the work is complete in the intersection of Greenbrier Avenue and Mission Gorge Road, the traffic control measures at this intersection will be removed and the remaining traffic control measure at the construction site will remain in place.

Traffic will be controlled and limited by the barriers blocking access to the impacted lanes until construction is complete. The public is advised to travel cautiously near the work area and to observe the lane closures and signage. Including additional time to daily commutes and using alternate routes is recommended. Construction hours and days will be between 7 a.m. and 7 p.m. on Mondays through Sundays.
