

# College Area Community Planning Board (CACPB)

## Community Plan Update Committee

### *Mobility: Existing Conditions*

**Wednesday | February 24, 2021**

#### **Key Takeaways – Mobility Existing Conditions**

- Traffic calming along Montezuma Road and ECB while maintaining balance in the community and supporting all modes of travel.
- Support the business district along ECB (encourage people to make College Area a destination), consider traffic calming and creating an improved pedestrian experience. Support pedestrians crossing ECB.
- Bus bike corridor from Park Blvd as an example of a treatment to implement.
- Make roads available for all modes of travel (favoring pedestrians and cyclists) and consider mobility, land use, and urban design together.
- Look into a shuttle system that could travel in a triangle pattern along the three major roadways. Issues/considerations include cost, maintenance, on-going service.
- Improved pedestrian safety/traffic calming (i.e. pedestrian scramble, roundabouts) along intersections near SDSU.
- Consider the cyclical nature of traffic in College Area associated with SDSU being in session.
- Chat comments will be addressed and sent to the committee.
