

Planning for the Revitalization of

THE CIVIC CENTER **CORE PROPERTIES**

Civic Center Revitalization Committee

January 2023

Introduction

On September 14, 2022, Mayor Todd Gloria convened a group of civic leaders to gather public input and present a vision for the revitalization of six City-owned blocks in and adjacent to the Civic Center (**Attachments A and B**). The Committee, called the Civic Center Revitalization Committee, was charged with developing and evaluating ideas to identify socioeconomic needs and opportunities for the city, ensure City staff can continue delivering world-class services to the people it serves, and shape the parameters for what will be a transformative catalyst for the civic core in Downtown. Prior to being appointed to the Committee, members had to agree in writing that neither they nor their immediate family members or companies will participate in any future bid seeking the award of the redevelopment rights.

The Committee consists of 22 volunteer experts (**Attachment C**) representing a diverse range of community interests including arts and culture, tourism, housing and land use, mobility and transportation, environmental, labor and employees, and the Downtown community. The Committee chair, Jaymie Bradford, is the Executive Vice President and Chief Operating Officer of the San Diego Regional Chamber of Commerce. The Committee met bi-weekly from September 2022 through January 2023 and will continue to meet as necessary throughout the bidding process as prescribed by the State of California's Surplus Land Act (SLA). All meetings have been opened to the public for participation, compliant with the Ralph M. Brown Act.

In order to provide adequate focus in specific areas of expertise, the Committee established a Working Group composed of Committee members and informal stakeholder roundtables which were open for broader public stakeholder participation. These sub-groups met in addition to regularly scheduled Committee meetings. Each sub-group developed recommendations which were presented to the full Committee for consideration and have been adopted by the full Committee and presented in this final report for consideration.

Since the Committee's first began meeting, they have met eight times, received five comment letters, approximately 30 public comments and 107 people have signed up for email updates. In addition, each Working Group met numerous times as they formulated their visions and guidance that have been incorporated in this Report.

LINCOLN CENTER: ALICE TULLY HALL — New York City, NY

MOMA: COURTYARD — New York City, NY

Recognizing certain limitations created by the State Surplus Land Act, the Civic Center Revitalization Committee developed a broad manifesto/vision for the revitalization of the six City-owned blocks. In part, this vision reads as follows:

“We acknowledge that the City of San Diego sits on the unceded ancestral homeland of the Kumeyaay Nation. We extend our respect and gratitude to the Kumeyaay people who have lived here since time immemorial. We recognize their tremendous contributions to our region and thank them for their stewardship. We aspire to continue the responsibility to be stewards of this one Earth, taking care of the environment all around us.”

Our City is poised to embark on a once-in-a-lifetime transformation of the Downtown civic center – giving us the proud heart and soul that we all deserve – a welcoming place of pride and dignity that will serve our next generations long into the future. A new City Hall will be the cornerstone of a five-block redevelopment for living and working. The time is now to carefully shape our goals and aspirations to create a remarkable place – and it is time to commit to those goals.

Now is the time for huge, audacious thinking, broad outreach, strong partnerships, and thoughtful planning to guarantee success. Now means it is time to remember how greatness is achieved – it is difficult and it is expensive – and it takes commitment from us all. Mayor Gloria has assembled a committee of San Diegans who have dedicated their careers to improve the lives of all who call San Diego home. This group brings together people who can guide the Vision for what this place can be – people who know how to pay for it and people who know how to take care of it forever.

The Vision for the **Heart of San Diego** demands that the City:

Celebrate Democracy

Our new Civic Center **MUST** provide a place for future generations of diverse San Diego citizens to actively engage in and protect our democratic system.

Build Trust

The reimagined Civic Center must nurture and strengthen the trust and partnership between those who govern and those governed, which is critical to a flourishing society. The design/build process must embrace the public first, welcome the diversity of our citizens, nurture healthy public discourse, engender civic pride, and facilitate a shared ownership in the outcome of public decisions.

Honor Public Service

A City Hall represents the noble commitment of thousands of public employees who dedicate their lives to public service. The offices, meeting rooms, break spaces, public spaces, and surrounding areas must dignify and inspire these workers and the members of the public who engage with government. Healthy environments created with appropriate design principles bring out the best in each of our City staff members and honors the public that we serve.

Take risks

Bold Civic leadership is essential to any large-scale development success. Aspirations **MUST** be clearly articulated. Excellence takes time, dedication, and a commitment to bravery.

Create dynamic municipal synergies

A Civic Heart, both physical and emotional, is most powerful when it is accessible – connected to urban transportation systems, housing, employment, schools, and cultural institutions – thus facilitating engagement in private/public initiatives. A collaboration with **ALL LEADERSHIP** in these systems must be initiated hand in hand with the Developer RFP's.

Exponentially successful projects like Petco Park speak to the power of such collaboration.

Embrace Arts and Culture

Given its geographical position in the very center of our city, the new Civic Center **MUST** integrate Arts and Culture into its site design. Arts and Culture drive economic development in our largest, most international cities – a crucial element in attracting a dynamic work force, and in generating jobs and revenue. Arts and Culture play a crucial role in advancing social development including a feeling of belonging, fostering full engagement with our communities, and addressing the trauma we have experienced with COVID 19, racial injustice, homelessness, intolerance, and a widening gap of shared understanding.

Shift paradigms

The new Civic Center **MUST** embrace an inclusive, future-forward global view to expand our cultural influence and impact. This shift champions all aspects of revitalization, housing, civic engagement, rebuilding of civic institutions, city hall, working spaces, public gathering and how our leaders inspire regional, bi-national community.

Center the network

Our city's center is growing rapidly and is poised for more phenomenal growth as we build critical urban infrastructure and homes to address our housing crisis. San Diegans have been waiting for convenient, realistic, speedy, and direct public transportation to the City Hall, the Mexico border, the Airport, and to the entirety of San Diego County. Our region needs a sustainable solution to climate change caused by fossil fuel automobile consumption. A world-class, accessible transportation center must be located at the core of the civic center redevelopment to achieve our

housing and climate action goals. A concurrent collaboration with SANDAG would ideally be a part of the City's work to solicit proposals from developers. Successful examples of municipal collaborations: Moynahan Station, Hudson Yard, World Trade and Grand Central Station in New York City.

Listen

Invest in Community Outreach. Effective community engagement leads to positive outcomes for residents, the private sector, and government alike. The City and its Developer/Design team **MUST** engage the people of San Diego through properly-noticed discussions to inform how Civic spaces will benefit community and represent our beliefs and aspirations. **TRUST** all citizens to be articulate and clear. Note the powerful dialogue that resulted in a visionary Ballpark in our East Village neighborhood; one that came to fruition through community engagement (see Appendix 1: Resident Questionnaire).

Build diverse housing

We must positively impact the region's housing shortage crisis through creative thinking and proper design. Housing must be located appropriately to provide for the health and wellness of residents – this project must consider local and regional plans to maximize opportunities for housing in the immediate site and surrounding Downtown area. The Civic Center project must consider multiple housing types in its planning, including Extremely Low Income, Low Income, and Moderate Income/Missing Middle housing. Different typologies should be explored, including co-living, micro units, SROs and family units. No single site can respond to all of the housing needs of our times – creative partnerships must provide a model for how we can think about housing development in our City as a whole.

Commit to climate action

The new Civic Center redevelopment **MUST** implement proven sustainability initiatives.

Our city's future; our children's future; our planet's future depends on this commitment from Civic Leadership.

Ensure safety and inclusiveness

Through public design strategies such as Crime Prevention Through Environmental Design (CPTED) the Civic Center core must create inspiring, well-lighted, visually focused public spaces and places that are safe and welcoming for ALL.

Demand design excellence

The buildings and outdoor spaces of the new Civic Center **MUST** be exceptionally well-designed, emphasizing a new iconic aesthetic that can inspire and influence the surrounding Downtown neighborhood. The selected development team(s) must demonstrate a proven track record for design excellence on this scale – in ideas and delivery beyond construction. To earn an honored place in history, every aspect of design must celebrate our unique San Diego personality and climate. The Civic Center must be an authentic expression of ourselves and our place. Look to successful built projects worldwide for aesthetic aspiration (Appendix 2: Design for Civic-Ness).

In the spirit of great civic endeavors of San Diego's past, we are inspired by the visionary tenacity of Civic Leaders who set aside the land for Balboa Park. Our new Civic Center MUST epitomize San Diego as a city of science, the arts, audacious courage, and bi-national, regional cooperation. Our recommendation is more than what the project looks like, or one that states which buildings to tear down, but an urgent call for holistic design in the broad sense. We have ONE CHANCE to get this right: a legacy project that is an opportunity to level up the city's economic, aesthetic, and societal value. Our leaders must engage the community and think big to develop an innovative Civic Center that will serve our City now and for our future.

PALEY POCKET PARK — New York City, NY

Guiding Principals

Once again, recognizing the fairly prescriptive process called out in the Surplus Land Act, the Committee has developed a set of broad principals it hopes will guide the City and any potential developers moving forward.

1. Prioritize feasibility of the Civic Center Revitalization project by focusing scope on the six Civic Center blocks., Maximize density by utilizing a diverse housing development portfolio to include affordable and workforce housing, while still allowing for other uses as defined by the State Housing and Community Development Department (HCD). Other complementary uses to explore should include commercial, office and include space for arts and culture.
2. Ensure Downtown remains as the public gathering seat of the Federal, State, County and City government for our region by enhancing customer service and public service by allocating employees in Downtown, including City Council Chamber. The Downtown San Diego Partnership (DSDP) Developer's Roundtable understands not all city employees will be housed at the Civic Center site, and that the site will house a reasonable amount of city employee, and those necessary to ensure transparency and openness in city government to provide excellent customer service to the citizens of San Diego.
3. Create an active urban plaza and a robust vision for the public realm to encourage civic discourse and gathering. This would include a civic theatre. Encourage vibrancy and activation through high quality urban design including uses that attract and retain people in a work and live district through a vibrant performing arts and entertainment district, community serving uses, retail, and housing. This activated focus could include adjacent properties to the identified parcels.
4. Maximizing the connectivity to Downtown and the rest of San Diego via a world class transit facility forming the epicenter for transit in our region is essential. Downtown is a major focal point for all modes of transportation including the headquarters for the San Diego Metropolitan Transit System, major links to the state and interstate system, a major

link to the regional bike network, and major arterials leading into and from Downtown. In addition, the proximity of the San Diego International Airport to Downtown, and the waterfront, are regional assets and attribute to our tourism industry, Convention Center and the business community.

5. Create a site plan diagram for the proposed city blocks to ensure developers meet public interests while identifying the connectivity to adjacent properties.

The Committee further adopted a slightly more specific set of principals based upon input from businesses across the tourism industry sector including lodging properties, restaurants, attractions, arts, and tour operators to provide insights into future development of the civic center core. All businesses have current operations in the Downtown San Diego area and extensive experience across other communities outside of San Diego. The following is a summary of the key takeaways:

1. **Space should be Mixed Use.** Serve the needs of residents, workers, and visitors to ensure the area is active and vibrant. Create an experience through programming, green space, arts, and amenities to attract visitors, too. Hudson Yards and Highline Park in New York were mentioned. The space should be holistic and cohesive with streets, landscaping, amenities, office space and residential mixed into a pleasing multi-purpose urban core.
2. **Be Aspirational with Architecture and Planning that Embraces San Diego.** Buildings and overall design should be aesthetically pleasing and reflect the San Diego Brand. (Examples include the Downtown San Diego Library, The Rady Shell, Museum of Contemporary Art La Jolla and PETCO Park.) This is an opportunity to create the heart of Downtown and to link together neighborhoods.
3. **Think Iconic.** There is no icon for Downtown San Diego like there is in Chicago with Millennium Park or London with the London Eye. There should be a major draw to the area that adds excitement and creates a sense of place.
4. **Vibrancy is Key and the Arts Should Play a Major Role.** There is a need to ensure that this is a place that is active and safe. Art should be a key programming factor, whether it's through a new Arts District, renovated Civic Theater, new museums, galleries, public art, etc. It is also important that there be attractions that draw people throughout the day and into the evening to again give energy and life to the area. This will attract restaurants, services, retailers, workers, residents, and visitors.
5. **Build Outward Versus Inward.** The past model was to build in-ward, this project should build outward to create inviting, light, vibrant spaces.
6. **Future Workspace Needs and Service Levels.** Align amount of office space to future state. How many workers need to be accommodated Downtown? Is it best to consolidate government services or spread services around the city to best serve citizen needs?
7. **Housing.** Workforce Housing and not just luxury high-rises and affordable housing should be considered within the mix.
8. **Other Cities Have Attractive Transportation Solutions Built Into Their Urban Core.** The city should look holistically at the overall experience and bring together the Climate Action Plan, SANDAG Transportation Solutions and Green Space into one overall solution.

SAN JOSE CIVIC CENTER — San Jose, CA

Maximize the Success for Strong Economic Development of the Six Blocks

The Economic Development Working Group took all of this into consideration while developing an approach that focuses on an approach that should ensure the construction of a new City Hall, as well as the development of desperately needed housing and prepared the following recommendations that have been adopted by the Committee.

1. Goals of the task force
 - a. Primary goal should be building a new City Administration Building (CAB).
 - b. Secondary goal is Housing: affordable and workforce.
2. Given the current Downtown workforce and the potential for future growth, the new City Administration Building should be between approximately 500,000 and 600,000 square feet.
3. The new CAB should be paid for through a combination of revenues generated by the results of the SLA process, existing City revenues and the redeployment of savings realized by the consolidation of the City's Downtown workforce into a new City Hall.
4. A singular Notice of Availability should be used for five of the six blocks, excluding one block for the new CAB.
5. The new CAB should be built in conjunction with a fee developer on the existing site that currently houses the City Operations Building. Thus, no NOA would be necessary for this project as it would be retained for governmental use and not subject to the Surplus Land Act.
6. Outside consultant should be hired by City to advise and recommend development and disposition to Mayor and Council for the NOA. They would work on financing options for their response including public-private partnerships, and other possible structures including sale and lease options.

7. Work to maintain a theatre presence within the Civic Core as a desired development outcome of the NOA. Any theatre development should be in collaboration with San Diego Theatres and philanthropists, not primarily funded by the developer or the City.
8. The JLL contract approved by Council should look at public facing services and what services are appropriate Downtown. The timeliness of the JLL findings and report is important.
9. The Committee received a presentation from State representatives regarding the Surplus Land Act. The State made it clear that affordable housing is the primary goal of the Act, but emphasized that “additional local requirements” are also relevant and appropriate. According to the State, “deference will be given to a local agency determination” to select a bidder that does not provide the highest raw number of units affordable at 80% AMI. Other considerations could include:
 - a. Provision of workforce housing at 80–120% AMI
 - b. Provision of other types of affordable housing (e.g., replacement of “SRO” units at various AMI levels)
 - c. Type of financing for affordable units (units funded by the developer from for-profit aspects of project are preferred over units funded by vouchers and tax credits because that actually creates more affordable housing units rather than just proscribing where those units will be located)

The Committee recommends that the City include this type of direction in the NOA and include these considerations in the ultimate selection.

LINCOLN CENTER FOR THE PERFORMING ARTS: PLAZA — New York City, NY

PARK AND MARKET — San Diego, CA

NORFOLK SOUTHERN HEADQUARTERS — Atlanta, GA

Conclusion

The City of San Diego is presented with a once in a generation opportunity to redefine and redevelop a significant area of its Downtown. An opportunity to replace a City Hall that is outdated and inefficient, along with the redevelopment of another five blocks to include the build of much needed affordable housing and to take down other City buildings that are perhaps in even worse condition. The existing buildings cost the City millions of dollars annually to operate and maintain and buildings that have well over several hundred million dollars in deferred maintenance needs. It is also an opportunity to consolidate Downtown operations into a single building saving on outside rent expenses, as well as improving operational efficiencies and providing a safer work environment for perhaps the City's most valuable assets, its employees. Through these efficiencies, the public should receive much improved services without having to go from building to building or from place to place throughout the City. It is an opportunity to build a City Hall that is energy efficient and meets or exceeds the goals in the City's Climate Action Plan. It should be a City Hall and City Council Chambers that is more accessible and one that is representative of the eighth largest city in the Country.

And to compliment a new, more efficient City Hall, is the opportunity to build much needed housing. Housing that is both affordable and provides easy access to public transportation. Under the Surplus Land Act, at least 25% of the housing will need to be 80% of AMI or below. Beyond that, the City can require a certain percentage of the housing to be what is referred to as workforce housing which is defined as 80% to 120% of AMI.

Finally, beyond a new City Hall and desperately needed housing, through the Notice of Availability process called for under the Surplus Land Act, potential developers will have an opportunity to reimagine the area to include a revitalized theatre and entertainment venue, restaurants, open space and much more.

The Committee thanks the Mayor for the opportunity to be part of this process, especially at the beginning stages and looks forward to working with the Mayor and City Council to provide input as appropriate, along the way.
