

Attachment 1: General Plan Public Facilities, Services and Safety Element Text Edits

- New Policy PF-D.23 (Page PF-40): Review development applications for compliance with all applicable state and local requirements for fire safety including but not limited to fire apparatus road access, water supply, defensible space, and brush management.
- New discussion around evacuation centers (Page PF-30):
 - **Evacuation/ Shelter Locations:** The City maintains a list of available shelter locations within the San Diego Operational Area in coordination with the San Diego County Chapter of the American Red Cross (ARC). The selection of specific shelter sites for any incident will depend upon the specific circumstances of the incident, and generally cannot be determined prior to the emergency or disaster. The agency that will lead the management, organization and operation of the shelter will select the shelter location, in coordination with the Incident Commander as addressed in the City Emergency Operations Plan.
