Project Information (see attached postcard as well):

Construction is starting on a Whole Site Modernization and Joint-Use Field project that will bring a new upper-grade classroom facility, a new student services facility, a new Universal Transitional Kindergarten (UTK) classroom building, two kindergarten classrooms, and a grass playfield.

Additional improvements include the modernization of three classroom buildings, expansion of the food services kitchen, conversion of the existing student services facility into an educational space, removal of all portable classrooms, creation of a new parking lot with a student drop-off and pick-up area, and enhancements to safety, security, and exterior hard court areas.
