In addition, the Office of the City Auditor completed work in July 2024 on the IT Risk Assessment Improvement Project, which produced an improved inventory of City IT systems and applications, including how departments use those systems and applications and potential risks

to City data and supported City activities. The refined inventory served as the foundation for the FY2025 IT Risk Assessment, which was completed in August 2024. However, both documents are confidential because they identify potential security risks.
