# Coastal Resilience Master Plan

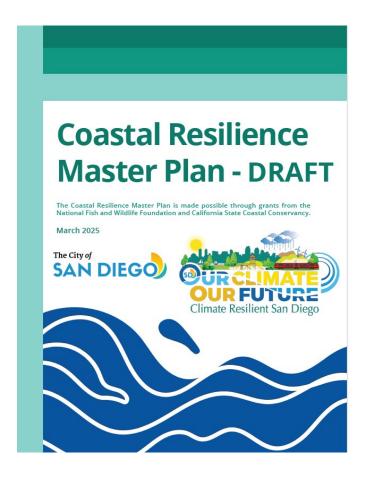

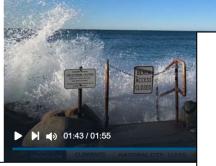

# Coastal Resilience Master Plan

- Identifies potential nature-based solution for locations along San Diego's coast to improve the resilience of our communities to sea level rise while also protecting habitat, and supporting recreation opportunities
- Concept level design for six locations
- California Environmental Quality Act (CEQA) environmental analysis

# Why the Coastal Resilience Master Plan?

## King Tides engulf Mission Bay marsh, flood parts of San Diego

### City crews work to secure area no at Sunset Cliffs

## Flooding rolls in with high winds and surf at La Jolla Shores

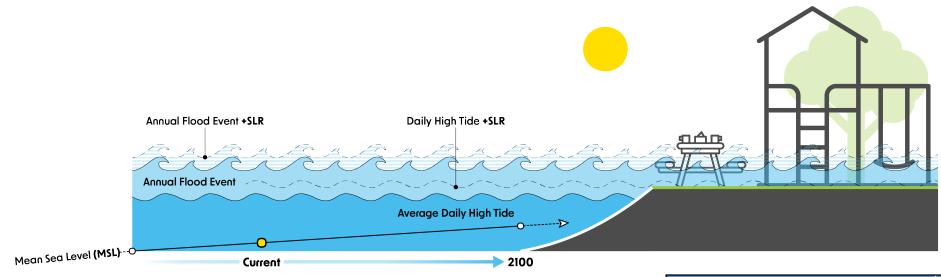

#### **High surf floods Mission Beach** boardwalk

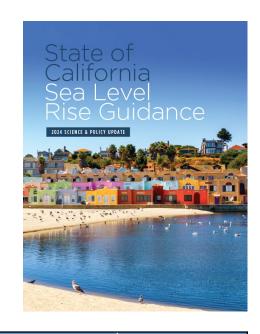

High surf warnings are in effect in San Diego coastal areas until 6 p.m. Friday and a coastal flood advisory

# Sea Level Rise

SLR Scenario	2050 (ft)	2100 (ft)
Intermediate	0.8	3.1
Intermediate-High	1.0	4.9
High	1.2	6.6

# Nature-based Solutions

- Prioritized in Climate Resilient SD and Coastal Resilience Master Plan
- Provide multiple benefits to communities beyond risk reduction, such as water quality improvement, recreation
  opportunities, provision of habitat, and greenhouse gas emissions sequestration
- Preferred approached by community members
- Align with funding opportunities and policy guidance

# Planning Overview

## VULNERABILITY ASSESSMENTS

- State Lands SLR Vulnerability Assessment
- SLR Vulnerability Assessment
- Citywide Climate Change Vulnerability Assessment

CLIMATE RESILIENT SAN DIEGO COASTAL
RESILIENCE
MASTER PLAN

Stakeholder and Community Engagement

# Project Objectives

Resilient Climate Protections

Sea Level Rise Protection

Protect Habitat & Wildlife

Enhance Recreation Opportunities

Protect Historic & Cultural Resources

Increase Coastal Access

# Scope and Funding

#### Phase 1: National Fish & Wildlife Foundation

- ✓ Site Selection
- ✓ Site Feasibility Analysis
- ✓ Nature-based solution concept designs (6)
- ✓ Pilot project 15% design (1)
- ✓ Community engagement
- ✓ Stakeholder Advisory Committee
- ✓ Internal City Working Group
- ✓ Programmatic Environmental Impact Report

### **Phase 2: State Coastal Conservancy**

- ✓ Draft Coastal Resilience Master Plan
- Tribal coordination
- Technical studies
- 15% design (3 sites)
- Community engagement
- Stakeholder Advisory Committee
- Internal City Working Group
- Supplemental EIR

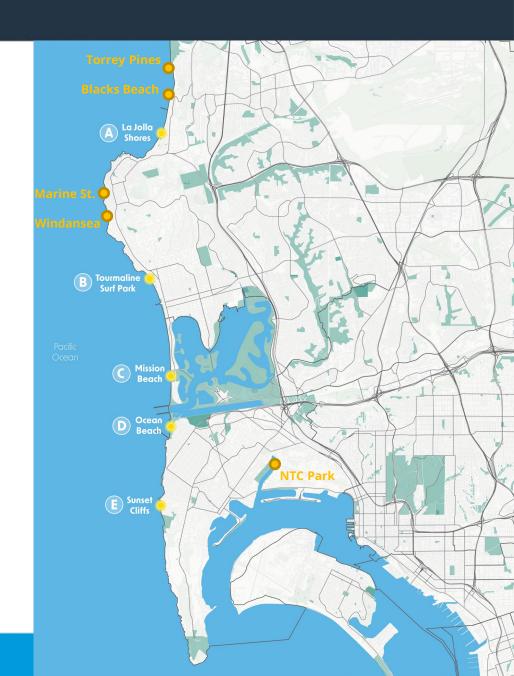

# Site Selection

### Prioritization factors:

- City ownership
- Multi-Habitat Planning Area
- Disadvantaged communities
- Sea level rise vulnerability
- Site feasibility

# Outreach & Engagement

# Community Feedback Themes

- Safety
- Parking
- Coastal Access
- Recreation
- Education & Art
- Native plantings
- Stormwater Improvements
- Continued engagement

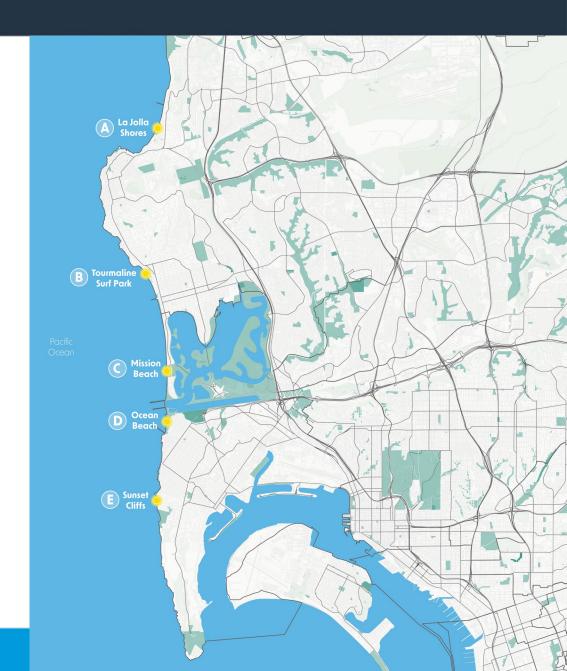

# **Project Concepts**

## Concepts aim to:

- Provide resilience
- Create new habitat space
- Enhance mobility opportunities
- Provide a balanced and integrated approach to managing coastal resources

## La Jolla Shores - Amphitheater

### **Key Features**

- Retains beach space and parking lot configuration
- Seatwall with enhanced seating and viewing amenities
- Earthen dike with usable landscaped features
- Consideration for accessway flood proofing

## La Jolla Shores – Reconfigured Park

### **Key Features**

- Retains beach space
- Continuous grassy recreational area along the entire length of the par
- Earthen dike with usable landscaped features
- Consideration for accessway flood proofing
- Consideration for opportunities to expand recreational areas

## Tourmaline Beach

- Vegetated dune leveraging existing material
- Enhance existing seating, access and aesthetics
- Retain ramp and public access
- Access improvements on north end of ramp
- Potential stormwater and public space improvements

## Mission Beach - Dunes

### **Key Features:**

- Vegetated dune with native planting
- Maintain accessways with consideration for accessway flood proofing
- Maintain Ocean Front Walk configuration

## Mission Beach – Perched Beach

### **Key Features**

- Vegetated dune with native planting
- Perched beach for additional beach recreation space
- Maintain accessways with consideration for accessway flood proofing
- Realigned seawall and Ocean Front Walk inland

## Ocean Beach – Dog Beach - Dunes

### **Key Features:**

- Vegetated dune along beachfront
- Multi-use path to connect San Diego River Trail, Dog Beach and Ocean Beach Pier
- Dune restoration near Smiley Lagoon
- Beach accessways through the dune at key points
- No changes to parking

## Ocean Beach – Dog Beach – Resilient Relocation

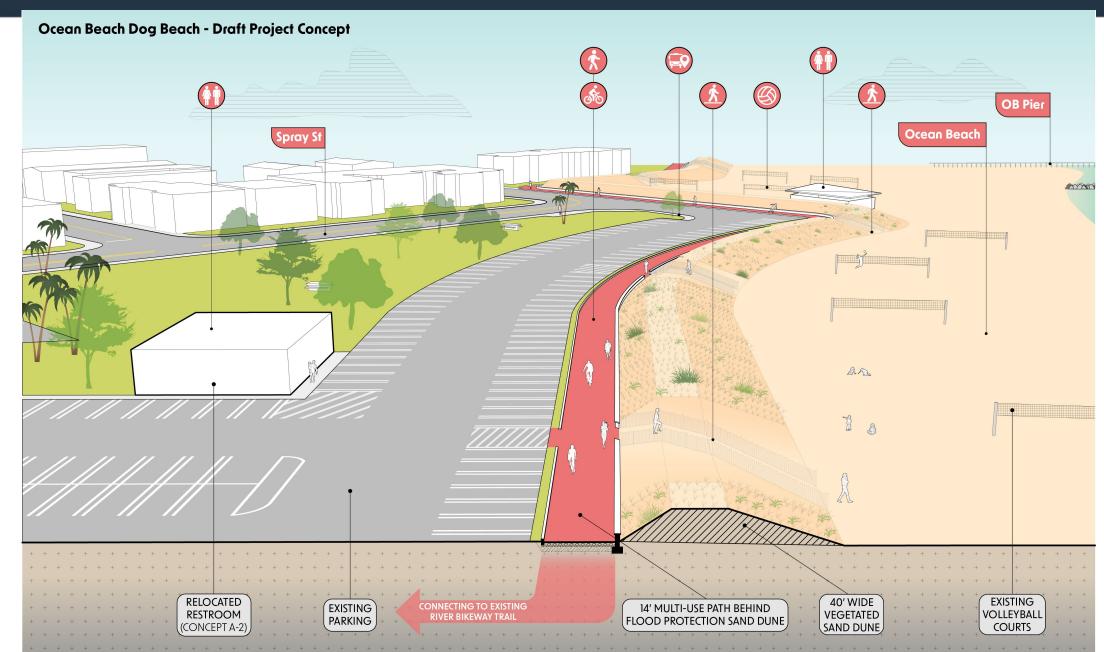

#### **Key Features:**

- Vegetated dune along beachfront
- Multi-use path to connect San Diego River Trail, Dog Beach and Ocean Beach Pier
- Dune restoration near Smiley Lagoon
- Beach accessways through the dune at key points
- Bathroom relocation to a centralized inland location
- Potential Public Transit Stop

# Ocean Beach – Dog Beach

## Ocean Beach - Beachfront

### **Key Features**

- Vegetated dune with native plantings
- Multi-use path to connect San Diego River Trail, Dog Beach and Ocean Beach Pier
- Beach accessways through the dune at key points
- No change to parking

## Sunset Cliffs

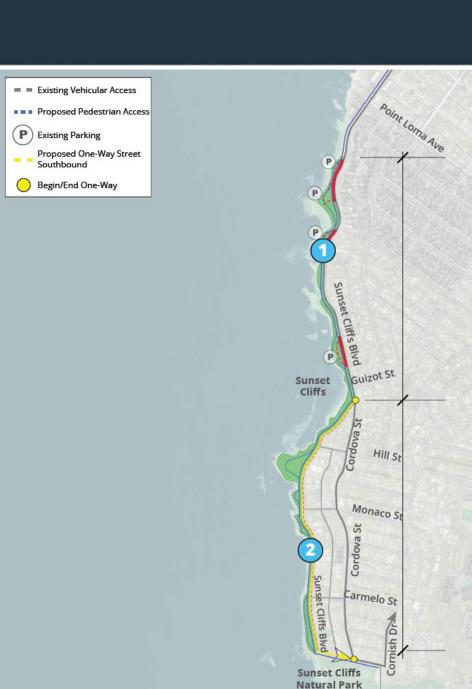

FIGURE 25 - Computer Simulation of Potential Improvements: Parking redesigned, coastal trail created and park revegetated.

### **Key Features**

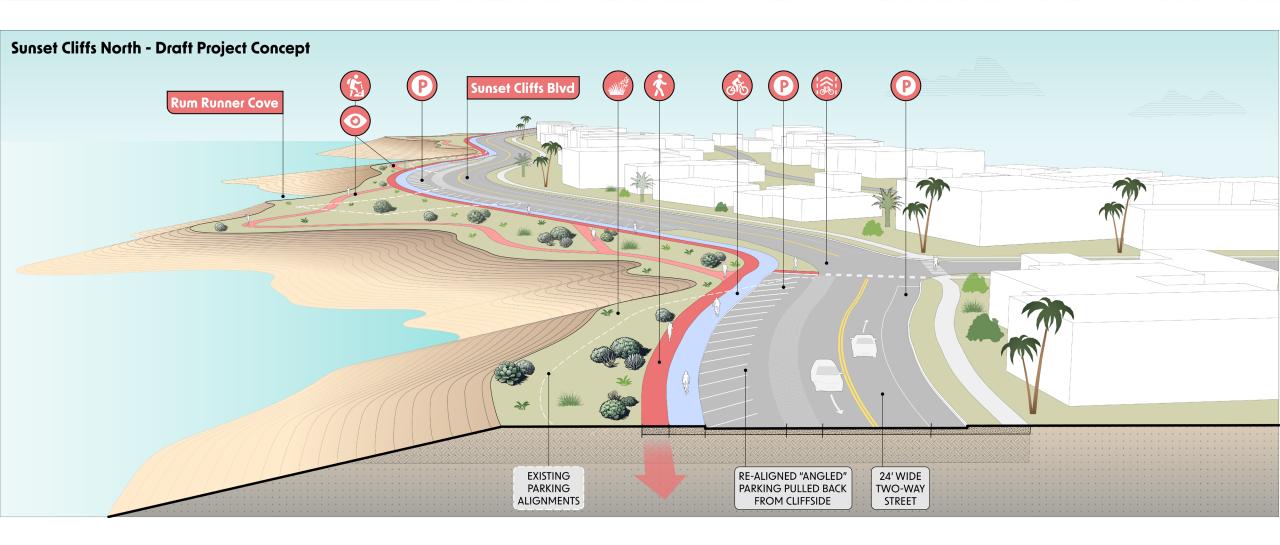

- Parking lot realignment
- Trail realignment and/or enhancements
- New multi-use path with reconfigured roadway
- Native plantings

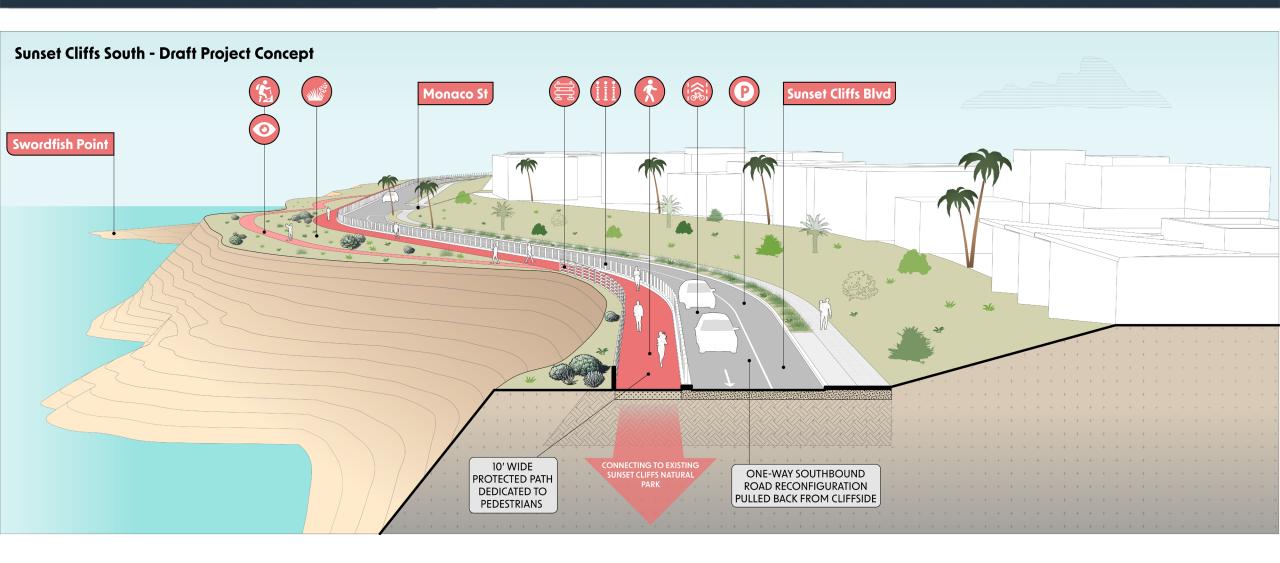

## Sunset Cliffs North

## Sunset Cliffs South

# Key Updates: Public Review Drafts

#### Plan

- Additional explanation regarding proposed project concepts for La Jolla Shores and future considerations for project concept development, including trade offs with seawall.
- Added text regarding expanded design options for Pacific Beach Tourmaline Surf Park.
- Additional clarification regarding next steps and necessary technical studies as project concepts are further developed.
- Clarification regarding sand fencing.
- Clarification around stormwater analysis as project concepts are further developed.
- Clarification of ADA access points.

#### **PEIR**

- Additional clarification regarding 100' wetland buffer.
- Revised mitigation measure MM BIO-2 Section D: Structure Clearance.
- Additional clarification regarding Pacific Beach Tourmaline Surf Park restroom.

# Coastal Resilience Master Plan: next steps

### **Winter 2025**

- Draft Plan & PEIR
   Public Review
- Staff updates Draft Plan and PEIR

## **Spring 2025**

- Public Hearings:
  - Resiliency Advisory Board
  - Environment Committee
  - Council
- Phase 1 work completed.

#### **Summer 2025 +**

- Phase 2 work of Coastal Resilience Master Plan
  - Initiate CIP
  - Technical studies
  - Community Engagement
  - Tribal coordination

# Coastal Resilience Master Plan: next steps

### **Summer 2025 +**

- Phase 2 work of Coastal Resilience Master Plan
  - Initiate CIP
    - Ocean Beach Dog Beach and Ocean Beach Pier
    - Sunset Cliffs
    - Mission Beach
  - Technical studies
  - Community Engagement
  - Tribal coordination

# Thank you!

This project is made possible through grants from the National Fish and Wildlife Foundation and California State Coastal Conservancy.
