RE: San Diego Unified Projects at Marvin Elementary

Dear Andy,

San Diego Unified School District will begin the solar installation project at Marvin Elementary on or about April 18, 2025. While this work will not prevent public use or City maintenance of the joint use field, the solar panels will be placed within the joint use parking lot.

Please see the attached plan detailing the temporary fencing layout and the location of the new panels. All areas will be restored to the same or better condition upon project completion, which is expected by October 31, 2025.

Additionally, as part of the Whole Site Modernization project at Marvin Elementary we will be performing underground utility work (shown in green on the attached map) within the joint use area 5/30/25 - 8/8/25. The field will be accessible and we will fence off the construction zone, however major trenching work will be performed with heavy equipment during this time. All sports equipment and storage containers will need to be removed or relocated out of this area for the duration of the project.

Please contact me if you have any questions.

Sincerely,

Gene Fuller
