

CPUS 03/12/2019

Public comment

- Andy Wuest -- has exhibits of MCAS air corridor SEAWOLF & other.
Wants Marines to observe the departure zones.
- Andy Guerney - Adds that Marines should use realistic data in their
route profiles. Realistic airspeeds, etc.
- Barry -- Supports the plan update process. Wants a one page
survey sent out to every homeowner, business owner
early in the process. Needs to be supported via the
City.
- Carol - what is the university city evacuation plan?
- Beth? - convert open space to parks.
- Ruth DeSantis Echo Barry's comments. Other ideas: renovate library
on Governor, Stanley Park, Marcy Park (ADA accommodations),
improve medians. Canyon overlook parks, a pedestrian
bridge.
- Pete Heckman - All about the bridge. Older EIRs required the bridge.
A violation of just about everything. Marines are OK,
CASA comments.
- Harry Masius Fire safety dictates that the cobblestone bridge be built.
- Diane Ahern Recommend noise monitoring; also UCSD. Update the data.
Write open letter to MCAS to follow procedures.
- Will Moore Introduces himself.

=====

Item 1 6:30: Intro.

Item 2 6:31: Recap.
Visioning and Guiding Principle exercise. 20-30 year outlook.

Issue Prioritization Discussion:

Andie: Not as much recreational activities for people in their 20s. More bars,
night life. Nothing to do surrounding UCSD.

Laurie: Area is attractive to high tech talent. Emphasize.

Dan McCurdey: Commented that near mass transit you want to go taller.

Katie: Safety, transit.

Deanna: Spoke on behalf of two kids. Support open space and environment.

Dinesh: Surprised by the support for bike infrastructure. Need for a
productive
can be. dialog vis. a vis. Miramar. Need policy guidance on Miramar so we

Jason: Arts district -- we don't have anything in the tech industry if
we're not creative, so push the arts.

Melanie Cohn: I don't see diversity. We have pretty much built out what land
here so there has to be a match between height/density and business
opportunities.

Debby: High density, ick. If increased density there needs to be
amenities that go along with it. We need to grow our public spaces, and not
substitute commercial spaces for them.

Anu: As part of LRDP the goal is 65% of total students to be housed on
campus. Mixed use near transit stops.

Veronica: Walkability and entertainment.

Rebecca: Glad to hear interest in sustainable housing. 5-10 minute commutes
ideal. transit, last mile transit.

Roger: Community participaton is important. More young people involved.

JoAnn: Heard a lot about disperity between N & S UC. Maybe more holistic
would be better. Control increase in density. Don't know how. Need to
look at density and parking due to lack of transit.

Jon Bassler Transit.

? Improving infrastructure to improve bike safety.

Andy: Recording so we have this documented. Hope there is some consensus
that we we can get a plan going.

Tait:
that

Can realease the Online Engagement Tool in advance to the CPUS so
wording can be tweaked before going wide.
