

Attention Golfers: Important Information

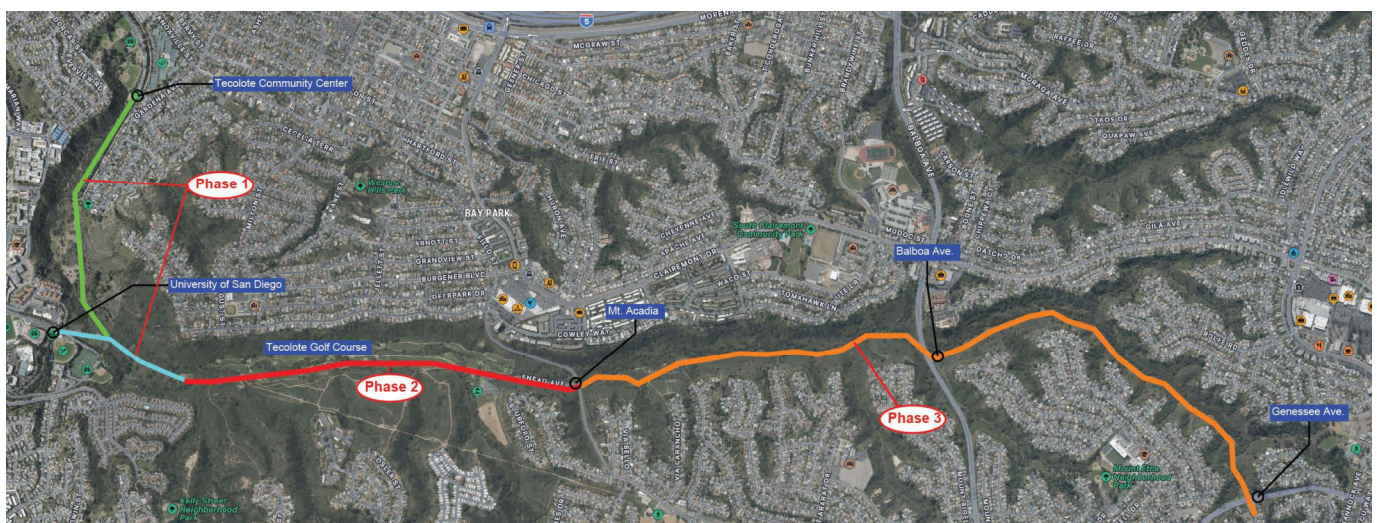

Tecolote Canyon Trunk Sewer Improvements & Water Connection

The City of San Diego is rehabilitating and replacing 4.7 miles of trunk sewer pipe and installing a water main. These repairs and upgrades will:

- Help prevent line ruptures and improve service
- Provide additional capacity for the sewer system

What to Expect at Tecolote Canyon Golf Course: While construction is occurring on the course, golfers can expect to see heavy equipment, open trenches, safety fencing and typical underground construction operations. Noise and dust will be mitigated.

The golf course will make any hole closures known when booking tee times. Closures will only occur when necessary to ensure safety during construction. The City of San Diego project team is working closely with the Tecolote Canyon Golf Course and American Golf to keep as much of the course open as possible during the project. **Work within the Tecolote Canyon Golf Course is expected to last from August 2025 to Spring 2026, during Phase 2 of the project.**

All timeframes are estimates and subject to change.
