Subject: **Phase I Environmental Site Assessment (Assessment)**

Site: **Assessor's Parcel Numbers (APNs) 319-020-04**
11495 Cypress Canyon Road
San Diego, CA 92131

Dear Mr. Dias:

SCS Engineers (SCS) is pleased to present this report (Report) of the Assessment of the above-described Site. This Report summarizes the results of the Assessment that was conducted in order to evaluate the Site's current environmental conditions. The work described in this Report was performed by SCS in general accordance with Exhibit 06 to the Consulting Agreement between SCS and The Phair Company (Contract). Exhibit 06 was fully executed on February 26, 2019. The Contract was fully executed on August 20, 2014.

Because your full understanding of the Assessment is important to us, SCS recommends that you read the Report in its entirety. However, if time does not allow you a complete reading, summaries may be found in text boxes at the end of each section (pages 7, 11, and 13), and our conclusions and recommendations may be found on page 13. A glossary of terms commonly used in environmental assessments is also provided in the Appendices to this Report.

SCS enjoyed working with you on this project. Providing economical environmental solutions to meet your needs is more than our goal—it is our mission and the measure of our success. If we may assist you in any way, now or in the future, please call our office at (858) 571-5500.

Sincerely,

Ian Jimeno

1 BACKGROUND

Based on our conversations with The Phair Company (Client) and a review of our in-house databases, SCS understands that the Site consists of one parcel of land comprising approximately 40.76 acres of land located at 11495 Cypress Canyon Road in San Diego, California (Site) (Figure 1). Based on a job walk conducted with the Client and Client-provided information, the Site is currently developed with a single-family residence, several garage structures, and also contains approximately 300,000 cubic yards of undocumented fill soil and debris reportedly from former construction activities that occurred in the Site vicinity. Client provided documents that discuss the undocumented fill at the Site are the following:

- C.W. La Monte Company Inc, *Report of Limited Geotechnical Investigation*, dated February 16, 2005
- Essentia, *Limited Phase II Environmental Site Assessment Report*, dated April 2005

A review of SCS's in-house ParcelQuest database of information from the County of San Diego Assessor's Office indicated the following in connection with the Site:

APN	Address	Area	Description
319-020-04	11495 Cypress Canyon Road	40.76 acres	Single-family residential

2 STANDARDS BACKGROUND

This Assessment was conducted in general accordance with the following:

- Environmental Protection Agency (EPA), 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule (AAI)
- ASTM International Standard Practice for Phase I Environmental Site Assessment Process E1527-05
- The scope, conditions, and limitations of Exhibit 06

The Client understands that the above-referenced EPA and ASTM standards were not developed to identify all environmental risk to property. The standards were developed to allow a user (Client) to qualify for the innocent purchaser defense, bona fide prospective purchaser defense, and contiguous property owner defense to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, a.k.a Superfund) liability. This Assessment is intended to constitute an appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice, as part of the due diligence process required by CERCLA, the Superfund Amendments and Reauthorization Act of 1986 (SARA), and the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (Acts).

Please note that this Assessment may initially qualify the Client for a CERCLA defense; however, after purchase, there may be "continuing obligations" that must be implemented to preserve this defense through the term of property ownership. There may be additional requirements under state law that also apply. The Client should contact qualified legal counsel regarding matters of liability, interpretation of the Acts, and potential continuing obligations. While such matters are outside the scope of this Assessment, SCS would be pleased to work with your legal counsel to develop and implement a strategy to preserve your CERCLA liability defenses through the term of your ownership.

This Assessment focused on potential sources of hazardous substances and petroleum products that could be considered a recognized environmental condition (REC) and liability due to their presence in significant concentrations (e.g., above acceptable limits set by the federal, state, or local government) or due to the potential for exposure and risk due to contaminant migration and complete exposure pathways (e.g., soil vapor inhalation or groundwater ingestion). Materials that contain substances that are not currently deemed hazardous by the United States EPA or the California EPA (Cal-EPA) were not considered as part of this Assessment.

Unless specifically included in SCS's scope of services, building materials such as asbestos, lead-based paint, lead in drinking water, urea formaldehyde, and pressure-treated lumber are not considered in this Report; nor are building issues such as fire safety, indoor air quality (with the possible exception of vapor intrusion), mold, or similar matters. SCS did not evaluate the Site for compliance with land use, zoning, wetlands, or similar laws. This Assessment also excludes regulatory compliance, cultural and historic resources, industrial hygiene, health

and safety, ecological resources, endangered species, indoor air quality, and high-voltage power lines. This Report is not intended to be an environmental compliance audit.

Hazardous substances occurring naturally in plants, soils, and rocks (e.g., heavy metals, naturally occurring asbestos, or radon) are not typically considered in these investigations. Similarly, construction debris (e.g., discarded concrete or asphalt) is not considered, unless obvious indications suggest that hazardous substances are likely to be present in significant concentrations or likely to migrate.

An evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that included herein.

3 OBJECTIVE

The objective of the scope of services was to assess the likelihood that recognized environmental conditions are present at the Site as a result of the current or historical Site land use or from a known and reported off-Site source.

4 SCOPE OF SERVICES

The scope of services designed and conducted to meet the objective was as follows:

- Site Reconnaissance, Site Research, Interviews, and User Requirements
- Topography, Geology, Hydrogeology, and Water Quality Survey
- Site Vicinity Reconnaissance and Off-Site Source Survey
- Historical Site and Site Vicinity Land Use Review
- Identification of Data Gaps
- Data Evaluation, Figure Preparation, and Assessment Report Preparation

5 GENERAL SITE SETTING

5.1 SITE RECONNAISSANCE

On March 1, 2019, SCS personnel conducted a Site reconnaissance to observe and document existing Site conditions [1]. The general Site location is shown in Figure 1, and a Site and Site Vicinity Plan is shown in Figure 2. Selected color photographs of the Site are presented as Figures 3a through 3k.

The interiors of the Site garages, storage sheds, and the single family residence on Site were observed, and the Site grounds and Site perimeters were systematically traversed on foot during the Site reconnaissance. Mr. Tom Renzulli (property owner) accompanied SCS personnel, provided access to the observed features, and answered questions posed by SCS personnel.

5.1.1 General Information

The following table summarizes general information in connection with the Site:

APN	319-020-04
Address	11495 Cypress Canyon Road
Area	40.76 acres
Site Land Use	Single-family residential
Occupant	Residential - owner occupied
Figure Reference	Figure 3a and 3b

5.1.2 Site Buildings

The following table summarizes information in connection with the Site buildings:

Number of Buildings	6
Interpreted Construction Date	SFR - 1930s (Figure 3b-1) Older storage shed (with "Retail Store" sign) - Circa 1949 (Figure 3h-1) Courtyard of SFR - circa 1985 (Figure 3b-2) Northern maintenance garage - circa 1985 (Figure 3h-2) Maintenance garage near SFR - circa 2005 (Figure 3e-2) Storage sheds - 2015 (Figure 3d-2)
Number of Stories	SFR - 2 Garages and sheds - 1
Construction Type	SFR - Wood frame, stucco-covered exterior walls, concrete slab-on-grade foundations Maintenance garage near SFR - slab-on-grade concrete, masonry Northern maintenance garage and storage sheds - Metal exterior with bay door(s). Metal support rafters were observed in the northern maintenance garage
Figure Reference	3b-1, 3b-2, 3d-2, 3e-2, 3h-1, 3h-2

Based on observations of the Site aerial photos, the single-family residence (SFR) was first developed in the 1930s (Figure 3b-1). According to the property owner Mr. Tom Renzulli, the SFR has several bedrooms and living quarters, and was developed with an attached courtyard circa 1985. The perimeter of the courtyard is represented with masonry tile roof as indicated on the aerial photos and the Site photo (Figure 3b-2) was observed to house parked model cars. Surficial staining with automotive lubricants of the concrete slab within the courtyard was observed underneath several of the model cars, and is considered *de minimis* in nature. No hazardous materials or hazardous wastes were observed within the building.

An auxiliary storage shed labeled as "Retail Store" (Figure 3h-1) was observed during the Site reconnaissance. The shed is located adjacent to the west of the SFR, and it is constructed with a wooden frame, slab-on-grade concrete, and roofing tiles. Hardware, tools, automotive parts, and scrap metal was observed inside this storage shed. No hazardous materials or hazardous wastes were observed within the building.

The northern maintenance garage was observed during the Site reconnaissance (Figure 3h-2). Based on several a review of historical aerial photographs, the northern maintenance garage was constructed on Site circa 1985. Several decommissioned vehicles were observed within the northern maintenance garage. An above-ground lift and small retail quantities of automotive paint, gasoline, polish, roof coating, antifreeze, gloss enamel, and three 5-liter air compressors were observed within the maintenance garage (Figure 3i-1 and 3i-2). Some oil staining was observed underneath certain vehicles onto concrete within the maintenance garage, which is considered *de minimis* in extent. No inground lifts were observed at the Site. All quantities of hazardous materials were observed to be contained in their original containers.

A maintenance garage was observed adjacent to the SFR (with a "Tom's Shop" sign) (Figure 3e-2). Based on aerial photos, Tom's Shop was constructed on Site circa 2005. According to Tom Renzulli, the property owner, automobiles were repaired and detailed in Tom's Shop. The building is constructed with masonry walls and roofing. Several air compressors were observed inside Tom's Shop. With the exception of small retail quantities (SRQs) of paint, no hazardous materials or hazardous wastes were observed within Tom's Shop during the Site reconnaissance.

The two storage sheds east of the SFR on Site (Figure 3d-2) were observed during the Site reconnaissance. Based on several aerial photos and talks with Mr. Renzulli, the two storage sheds were constructed on Site circa 2015. Tom stated that the storage sheds were used to store automotive parts, tools, and vehicles. No obvious indications of the storage or use of hazardous materials or hazardous wastes were observed within the storage sheds.

5.1.3 Site Grounds

A large portion (approximately 36 acres) of the Site is undeveloped with vegetation (Figure 3c-2). Several trails were observed leading to various areas of the Site (Figure 3a-2). The Site slopes down to the north (Figure 3j-2)

and south (Figure 3c-1). Cypress Canyon Road is the only entrance into the Site at the southeastern corner (Figure 2).

A large relatively flat crushed asphalt and gravel lot is present in the central/eastern portion of the Site, with moderate to steep naturally vegetated slopes present along the northern portion of this lot (Figures 3a-1 and 3g-2). The lot and northern slopes are reportedly composed primarily of approximately 300,000 cubic yards of undocumented fill, as further discussed in the 'Review of Client-Provided Documents' section below, and with the approximate lateral extent depicted on Figure 2. With the exception of large boulders present along the lower ends of the northern slopes and the crushed asphalt and gravel surfacing, no obvious indications of debris (i.e. concrete, metal, wood, trash, etc.) were observed within the reported undocumented fill areas; however, as indicated above, the slopes are covered with natural vegetation.

An outside overhang was observed in the northwestern portion of the Site (Figure 3f-2). The overhang was previously used as stables to house horses and other farm animals. Currently, the overhang houses decommissioned vehicles and to store auto parts. Empty 5-gallon gasoline containers were observed within the overhang. No obvious indications of spills, staining, or releases were observed.

An approximately 500-gallon above-ground storage tank (AST) was observed approximately 40 feet west of the SFR (Figure 3j-1). The AST was used as a butane storage tank to store fuel to operate the water heater and furnace. No obvious indications of spills or leaks onto the ground were observed. The date of installation of the aboveground lift was observed to be 2015 (Figure 3i-2).

Additionally, the Site is not connected to the sewer system. A 2,000-gallon septic tank is adjacent to the south of the house. No evidence of any spills or leaks were observed or reported during the Site reconnaissance.

5.1.4 Hazardous Materials / Petroleum Products

Hazardous materials and petroleum products observed to be used or stored at the Site are summarized in the table below.

Hazardous Materials/Petroleum Products	Storage Location	Approximate Amount
Gasoline containers	Northern maintenance garage	Small Retail Quantities (SRQs)
1-gallon paint cans	Northern maintenance garage	Small Retail Quantities (SRQs)
Roof coating	Northern maintenance garage	Small Retail Quantities (SRQs)
55-gallon drum of antifreeze	Northern maintenance garage	Small Retail Quantities (SRQs)
Gloss enamel	Northern maintenance garage	Small Retail Quantities (SRQs)

Based on the quantities of hazardous materials on Site (SRQs) and the lack of hazardous materials or hazardous wastes generated on Site, there is a low likelihood that a recognized environmental condition exists at the Site.

5.1.5 Hazardous Wastes

No obvious indications of the generation of hazardous wastes were observed at the Site during the Site reconnaissance.

5.1.6 Indications of Releases of Hazardous Materials/Wastes or Petroleum Products

With the exception of minor surficial staining (interpreted to be from automotive lubricants) observed at various locations on the asphalt-paved parking area, and with the possible exception of a large volume of undocumented fill (discussed in the "Review of Client-Provided Reports" section below), no obvious indications were observed that a release of hazardous materials/wastes or petroleum products had occurred at the Site. The minor surficial releases identified above on paved surfaces are considered likely to be de minimis as defined by ASTM.

5.1.7 On-Site Utilities

Gas and Electricity	Reported to be San Diego Gas and Electric (SDG&E)
High Power Transmission Lines	None observed at or adjacent to the Site
Storm Drains	Two storm drains were observed within the courtyard of the SFR.
Source of Heating and Cooling	Reported to be SDG&E

Potable Water Source	Reported to be supplied by the City of San Diego Public Utilities, Water Department
Wastewater Conveyance	Reported to be operated by the City of San Diego Public Utilities, Wastewater Department

With the exception of an empty AST approximately 40 feet west of the SFR (formerly containing butane) , and the reported presence of a septic system on-Site, no obvious indications of wells, cisterns, pits, sumps, dry wells, or bulk storage tanks were observed at the Site.

5.2 SITE RESEARCH

5.2.1 DEH File Review

A review of the September 2010 DEH HMMD HE-17 database of facilities storing hazardous materials, generating hazardous wastes, and discharging unauthorized releases indicated that there is no regulatory file associated with the Site [2]. In addition, the DEH was contacted and indicated that there are no files associated with the Site.

5.2.2 Fire Department Records Review

The City of San Diego Fire Department (SDFD) was contacted regarding hazardous materials/waste or UST records for the Site [3]. Ms. Debbie Ahern of the SDFD reported that no fire inspection reports were found for the Site. A copy of the response is included in the Appendices.

5.2.3 Building Department Records Review

SCS attempted to review San Diego Building Department (SDBD) records for the Site [4]. According to SDBD, no SDBD records are held for the Site.

5.2.4 Industrial Wastewater Department (IWD) Records Review

Brian Taylor of the Industrial Wastewater Department (IWD) was contacted in regards to the Site [6]. Mr. Taylor stated that no permit was held on file for the Site. A copy of the correspondence with Brian Taylor is included in the Appendices.

5.2.5 San Diego Air Pollution Control District (APCD) Records Review

Ms. Cynthia Gould of the APCD was contacted in regards to the Site [5]. Ms. Gould stated that no records were held on file for the Site. A copy of the correspondence is located in the appendices.

5.2.6 Review of Client-Provided Documents

The Client provided a report entitled *Limited Phase II Environmental Site Assessment Report*, prepared by Essentia dated April 2005 (2005 Phase II ESA). The following summary from this report is provided below.

The provided 2005 Phase II ESA report did not contain figures, tables, or appendices; however, the text of the report was provided. The 2005 Phase II ESA reported that the Site contains approximately 300,000 cubic yards of undocumented fill soil from former construction activities that occurred in the Site vicinity. A Phase II subsurface investigation was conducted in coordination with a geotechnical investigation by C.W. La Monte Company, Inc, which included the excavation of four trenches and the advancement of 3 soil borings, and the collection of 27 soil samples. Essentia reported that the undocumented fill contains a large amount of buried debris/material (e.g., cobbles, boulders, organic debris, construction materials, asphalt, etc). These fills were reportedly placed with end-dump trucks intermittently over a three to five year period in the mid-1980s and included miscellaneous export material from nearby grading sites in the Scripps Ranch areas.

Based on the unknown origin of the fill and the reported presence of CoCs, the undocumented fill is considered a recognized environmental condition. SCS recommends additional soil sampling to attempt to further assess, at least on a gross level, the presence of CoCs in the fill material located at the Site. Additionally, SCS recommends soil vapor sampling for VOCs and methane, and conduct a limited Human Health Risk Assessment, as well as conduct possible groundwater sampling for the Site. It is our understanding that this Site was an undocumented fill Site, and the proper regulatory approvals would be required to properly redevelop the Site.

These recommendations are based on the fact that the Site is proposed to be redeveloped for residential use and, as a precautionary measure, to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of hazardous materials/wastes. In addition, if certain portions of the fill material are required to be removed or exported from the Site for geotechnical and/or environmental purposes, if the fill material contains CoCs, it may be classified as a waste or hazardous waste for off-Site disposal purposes.

5.3 INTERVIEWS

The previously referenced EPA and ASTM standards require that attempts be made to conduct interviews with past and present owners and occupants of the Site to obtain information indicating recognized environmental conditions in connection with the Site. As part of this Assessment, the following contacts were either interviewed or attempts were made to conduct interviews.

Contact	Affiliation to Site	Description
Tom Renzulli	Property Owner	Discussed Below - Interviewed March 1, 2019

Mr. Tom Renzulli, the current property owner, stated that, to his knowledge, and with the exception of small retail quantities of gasoline and paint, hazardous materials and petroleum products were not used or stored at the Site and that hazardous wastes were not generated at the Site. Also, to his knowledge, there have been no releases of hazardous materials, petroleum products, and/or hazardous waste at the Site. Although the maintenance garages and storage sheds were reported to house automobiles and various maintenance parts, the majority of the automobile repairs were done off Site and then the automobiles are transported/driven on Site.

Additionally, Mr. Renzulli stated that he was not aware of environmental cleanup liens or activity and use limitations (e.g., engineering controls, deed restrictions) that have been recorded for the Site. He was not aware of pending or threatened litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site. He was not aware of notices from governmental entities regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site.

5.4 USER REQUIREMENTS

In order to qualify for one of the landowner liability protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (discussed in the "Background" section), 40 CFR 312 requires that the user (Client) provide the following information to the environmental professional. Mr. Jeff Phair completed the User Questionnaire on February 26, 2019. The following table summarizes the responses by the Client

Question	Response
Have environmental cleanup liens been filed or recorded against the Site?	No
Are activity or land use limitations in place at the Site, or have they been filed or recorded in the registry?	No
Does the user have specialized knowledge or experience in connection with the Site?	No
Does the purchase price being paid for the Site reasonably reflect the fair market value of the Site?	Not answered
Is the Client aware of commonly known or reasonably ascertainable information about the Site that would indicate releases or threatened releases?	No
Are there obvious indications that point to the presence of contamination at the Site?	No

Mr. Jeff Phair of The Phair Company did not answer the question inquiring "Does the purchase price being paid for this property reasonably reflect the fair market value of the property?"; however, he did answer the following question inquiring, "If the purchase price is lower than fair market value, do you conclude that is because contamination is known or believed to be present at the property?". Mr. Phair answered "No".

5.5 DATA GAPS IN CONNECTION WITH CURRENT SITE LAND USE

SCS was not granted access to the SFR on Site. With the exception of the SFR, there are no obvious indications of data gaps based on observations and research in connection with the current Site land use. This data gap is not a significant data gap in our opinion based on the availability of other relevant information.

5.6 FINDINGS AND OPINIONS - CURRENT SITE LAND USE

Findings and Opinions - Current Site Land Use
Based on observations and research and with the exceptions below, it is our opinion that there are no recognized environmental conditions at the Site as a result of the current Site land use. The following summary is connected with the Site. The provided 2005 Phase II ESA report did not contain figures, tables, or appendices; however, the text of the report was provided. The 2005 Phase II ESA reported that the Site contains approximately 300,000 cubic yards of undocumented fill soil from former construction activities that occurred in the Site vicinity. A Phase II subsurface investigation was conducted in coordination with a geotechnical investigation by C.W. La Monte Company, Inc, which included the excavation of four trenches and the advancement of 3 soil borings, and the collection of 27 soil samples. Essentia reported that the undocumented fill contains a large amount of buried debris/material (e.g., cobbles, boulders, organic debris, construction materials, asphalt, etc). These fills were reportedly placed with end-dump trucks intermittently over a three to five year period in the mid-1980s and included miscellaneous export material from nearby grading sites in the Scripps Ranch areas. Based on the unknown origin of the fill and the reported presence of CoCs, the undocumented fill is considered a recognized environmental condition. SCS recommends additional soil sampling to attempt to further assess, at least on a gross level, the presence of CoCs in the fill material located at the Site. Additionally, SCS recommends soil vapor sampling for VOCs and methane, and conduct a limited Human Health Risk Assessment, as well as conduct possible groundwater sampling for the Site. It is our understanding that this Site was an undocumented fill Site, and the proper regulatory approvals would be required to properly redevelop the Site. These recommendations are based on the fact that the Site is proposed to be redeveloped for residential use and, as a precautionary measure, to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of hazardous materials/wastes. In addition, if certain portions of the fill material are required to be removed or exported from the Site for geotechnical and/or environmental purposes, if the fill material contains CoCs, it may be classified as a waste or hazardous waste for off-Site disposal purposes.

6 OFF-SITE SOURCE SURVEY

6.1 PHYSICAL SETTING

6.1.1 Topography

A topographic map for the Site vicinity was reviewed and is summarized in the following table:

Reported Elevation	840 to 1040 feet above mean sea level
Reported Slope Direction	To the northwest
Source	United States Geological Survey 7.5 Minute Topographic Map, Poway Quadrangle, California – San Diego County, 1967, photo-revised 1975

6.1.2 Geology

A geological map for the Site vicinity was reviewed and is summarized in the following table.

Note that approximately 300,000 cubic yards of undocumented fill are present at the Site, as depicted on Figure 2 and discussed above in the "Review of Client-Provided Documents" section

Reported Formation	Torrey Sandstone
Reported Description	White to light-brown, medium- to coarse-grained, moderately well indurated, massive, and broadly cross-bedded, arkosic sandstone
Source	Kennedy, Michael P., and Siang S. Tan, Geologic Map of the San Diego 30' × 60' Quadrangle, California, California Geological Survey, 2008

6.1.3 Hydrogeology

Data regarding depth to groundwater and flow direction for the Site were not readily available. In the absence of Site-specific data, depth to groundwater and flow direction information was reviewed for properties within the Site vicinity using the State Water Resources Control Board GeoTracker database. The following table summarizes the results of this review.

Property Location	1.0 miles north-northeast from the Site
Reported Depth	11.67 to 6.17 feet in depth below ground surface
Reported Flow Direction	Northwest
Source	Case Closure Summary H39626-001 Big Stone Lodge, Leaking Underground Fuel Storage Tank Program prepared by the San Diego Department of Environmental Health dated October 2, 2006

Please note that many variables influence groundwater depth and flow direction, and the actual depth and flow direction at the Site may be different than presented in this section.

The referenced property had an intermittent stream on Site or in close proximity, which likely resulted in shallow groundwater measurements. The nearest intermittent stream or open water body to the Site is Beeler Creek, situated approximately 0.8 miles to the east of the Site at an elevation of approximately 600 feet above mean sea level.

6.1.4 Water Quality Survey

The following table summarizes the reported water quality in the Site vicinity:

Reported Hydrologic Subarea	NA
Reported Hydrologic Area	Poway (906.20)
Reported Hydrologic Unit	Penasquitos Hydrologic Unit (906.00)
Reported Beneficial Use	Municipal and agricultural (potential industrial)
Source	California RWQCB, San Diego Region, Water Quality Control Plan for the San Diego Basin, September 8, 1994, with amendments effective prior to April 25, 2007.

6.2 SITE VICINITY RECONNAISSANCE AND OFF-SITE SOURCE SURVEY

6.2.1 Current Site Vicinity Conditions

The following table summarizes land uses and observations in the immediate Site vicinity made during the site vicinity reconnaissance on March 1, 2019. For the purpose of this Report, the immediate Site vicinity includes those properties judged to be adjacent to the Site.

Direction	Land Use	Comments
North	12155-12283 Libelle Court (Single-Family Residences)	No obvious indications of the use, storage, or generation of hazardous materials/wastes or petroleum products were observed.
East	11446-11460 Cypress Terrace Place (Single-Family Residences) and Cypress Canyon Park	No obvious indications of the use, storage, or generation of hazardous materials/wastes or petroleum products were observed.
South	Vacant Land (APN 319-020-17)	No obvious indications of the use, storage, or generation of hazardous materials/wastes or petroleum products were observed.

West	11990 and 11995 Cypress Valley Road (Single-Family Residences) and 11982 and 11989 Zirbel Court (Single-Family Residences)	No obvious indications of the use, storage, or generation of hazardous materials/wastes or petroleum products were observed.

6.3 ENVIRONMENTAL SITE ASSESSMENT REPORT

An environmental regulatory database report (Radius Map™ report) was prepared by EDR for the Site. Local, state, and federal regulatory databases were reviewed for the Site and for those facilities within up to 1 mile of the Site. The Radius Map™ report was reported to have been prepared in general accordance with the ASTM standard for the regulatory database review for Phase I Environmental Site Assessments. The locations of the referenced facilities relative to the Site are shown on the overview maps, included in the Radius Map™ report. A description of the various databases, as well as the date each database was most recently updated, is included in the Radius Map™ report. The Radius Map™ report is included in the Appendices to this Report.
Based on a review of the Radius Map™ report, the following table summarizes the facilities within the selected search radii and whether the Site or a facility that was interpreted to be adjacent to the Site was listed on each database.

Federal or State Government Database	Search Radius (Miles)	Number of Reported Facilities	On Site	Adjacent to the Site
National Priority List (NPL)	1	0	No	No
Proposed National Priority List Sites (Proposed NPL)	1	0	No	No

Calsites Database (CA HIST CAL-SITES)	1	0	No	No
Solid Waste Facilities (CA SAN DIEGO CO. LF)	0.5	0	No	No

The Site was listed on the EnviroStor Database (CA ENVIROSTOR) database likely for the DTSC records in regards to the previous Phase I. According to the EDR summary of the Site in regards to the DTSC listing, the Site was under a Site Cleanup Program for the potential constituent of concern (CoC) lead. No confirmed lead was reported for the Site.
Regulatory agency files (DTSC) reviewed for the Site are discussed in the Site Research section above.

Off-site facilities listed in the database report were evaluated as to their potential to impact the Site. The databases included in the EDR report can be grouped into two general categories: databases reporting unauthorized releases of hazardous substances or petroleum products (e.g., Leaking Underground Storage Tanks, RCRA Corrective Action facilities, National Priorities List [a.k.a. Superfund] sites), and databases reporting permitted hazardous materials users and hazardous waste generators, for which a release has not been reported to, and recorded by, the regulatory agency.

SCS evaluated each of the off-Site facilities listed in the database report as to their potential to impact the Site, based on the following factors:

- Reported distance of the facility from the Site
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed UST test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, "no further action")
- Location of the facility with respect to the reported groundwater flow direction and depth to groundwater (discussed in the "Hydrogeology" section of this Report)

Based on one or more of the factors listed above, there is a low likelihood that the off-Site facilities listed in the Radius Map™ report the database report represent a recognized environmental condition in connection with the Site.

EDR listed one facility as being an "orphan," which are facilities for which EDR does not have sufficient information to accurately locate them on a map. Based on a review of the orphans, it is interpreted that the facility is within the requisite search radii for its reported database listings.

6.4 ADDITIONAL SCS RESEARCH

DEH File Review

No additional DEH Files were found for the Site or adjacent properties.

California Division of Oil and Gas

SCS personnel reviewed the California Division of Oil and Gas (DOG) Map regarding oil and gas well locations within one mile of the Site. There were no wells interpreted to be located within a one-mile radius of the Site.

6.5 DATA GAPS IN CONNECTION WITH OFF-SITE SOURCES

Based on the Site vicinity reconnaissance and off-Site source survey, there are no obvious indications of data gaps in connection with off-Site sources.

6.6 FINDINGS AND OPINIONS - OFF-SITE SOURCE SURVEY

Findings and Opinions - Off-Site Source Survey
Based on the off-Site source survey, no facilities in the Site vicinity were reported to have had releases of hazardous materials/waste or petroleum products. It is our opinion that there are no recognized environmental conditions at the Site as a result of known and reported releases of hazardous materials/wastes or petroleum products from an off-Site source. This opinion is based on one or more of the following: reported regulatory status (e.g., case closed), media affected (e.g., soil contamination only), distance from the Site, direction from the Site with respect to reported groundwater flow direction, and information obtained through a review of County of San Diego Department of Environmental Health files.

7 HISTORICAL LAND USE REVIEW

In accordance with the ASTM Standard and AAI rule, numerous reasonably ascertainable standard historical information sources were reviewed, and an attempt was made to interpret the historical Site and Site vicinity land use back to the obvious first-developed use of the Site. The following table summarizes the historical resources reviewed as part of this Assessment:

Resource	Location	Years Available
City Directories	EDR	1903

Previous Environmental Reports	URS and Essentia	2001, 2005 (respectively)

7.1 HISTORICAL SITE LAND USE

The following table provides a chronology of the apparent historical Site land uses, as interpreted from a review of information from the sources referenced:

Years	Interpreted Site Tenants	Interpreted Site Use
1903 - 1935	Unknown/Vacant	None/rational
1940 - 2019	Single Family Residence	Residential

Because many of the dates listed above are based on a limited selection of historical resources, they are considered to be approximations only; the actual beginning/ending dates for many of the Site uses listed above may have been earlier or later than indicated.

According to previous reports conducted at the Site, there were reported dumping activities between 1979 and 1989. Information regarding the dumping activities is further discussed in the "Review of Client-Provided Documents" section above.

No obvious historical facilities, features of concern, or land uses indicative of the use, storage, or generation of hazardous materials/wastes or petroleum products were found in the historical resources reviewed.

7.2 HISTORICAL SITE VICINITY LAND USE

The following table provides a chronology of the apparent historical Site vicinity land uses as interpreted from a review of information from the sources referenced:

Direction From Site	Years	Interpreted Site Vicinity Tenants	Interpreted Site Vicinity Use
North	1903 - 1996	Vacant	None, recreational
North	2000 - 2019	Single-Family Residences	Residential
East	1903 - 1996	Vacant	None, recreational
East	2000 - 2019	Single-Family Residences and Park	Residential and recreational (community park)
South	1903 - 2019	Vacant	None, recreational
West	1903 - 1996	Vacant	None, recreational
West	2000 - 2019	Single-Family Residences	Residential

Because many of the dates listed above are based on a limited selection of historical resources, they are considered to be approximations only; the actual beginning/ending dates for many of the Site vicinity uses/development described above may have been earlier or later than indicated.
No obvious historical facilities, features of concern, or land uses indicative of the use, storage, or generation of hazardous materials/wastes or petroleum products were found in the historical resources reviewed.

7.3 DATA GAPS IN CONNECTION WITH THE HISTORICAL SITE LAND USE

Readily available historical information was limited, and information was not available that would provide 5-year data intervals between the following years: 1907 and 1921. Based on the corroborating data from the historical information reviewed (i.e., the Site was interpreted to have been vacant, undeveloped land in each of these years), SCS judged it likely that the historical Site land use during this time period was not significantly different from the interpretation presented in the table above.

Historical information prior to 1903 was not readily available. Thus, SCS is unable to determine the Site usage from the date of first development as recommended by ASTM. Based on SCS' experience and available historical information, the Site was interpreted to have been vacant.

7.4 FINDINGS AND OPINIONS - HISTORICAL SITE AND SITE VICINITY LAND USE

Findings and Opinions -- Historical Site and Site Vicinity Land Use
Based on a review of historical resources and with the exception of the undocumented fill discussed above, it is our opinion that there are no recognized environmental conditions at the Site as a result of a release of hazardous materials/wastes or petroleum products from a known or interpreted historical Site or Site vicinity land use.

8 CONCLUSIONS AND RECOMMENDATIONS

SCS has performed an Assessment of 11495 Cypress Canyon Road, San Diego, California (Site), in general conformance with the ASTM Standard Practice for Phase I Environmental Site Assessment Process E 1527-13 and the EPA, 40 CFR 312, Standards and Practices for All Appropriate Inquiries, Final Rule (AAI). Any exceptions to, or deletions from, the ASTM and AAI Scope of Work were previously described in this Report where applicable.

The provided 2005 Phase II ESA report did not contain figures, tables, or appendices; however, the text of the report was provided. The 2005 Phase II ESA reported that the Site contains approximately 300,000 cubic yards of undocumented fill soil from former construction activities that occurred in the Site vicinity. A Phase II subsurface investigation was conducted in coordination with a geotechnical investigation by C.W. La Monte Company, Inc, which included the excavation of four trenches and the advancement of 3 soil borings, and the collection of 27 soil samples. Essentia reported that the undocumented fill contains a large amount of buried debris/material (e.g., cobbles, boulders, etc.). These fills were reportedly placed with end-dump trucks intermittently over a three to five year period in the mid-1980s and included miscellaneous export material from nearby grading sites in the Scripps Ranch areas.

Based on the unknown origin of the fill and the reported presence of CoCs, the undocumented fill is considered a recognized environmental condition. SCS recommends additional soil sampling to attempt to further assess, at least on a gross level, the presence of CoCs in the fill material located at the Site. Additionally, SCS recommends soil vapor sampling for VOCs and methane, and conduct a limited Human Health Risk Assessment, as well as conduct possible groundwater sampling for the Site. It is our understanding that this Site was an undocumented fill Site, and the proper regulatory approvals would be required to properly redevelop the Site.

These recommendations are based on the fact that the Site is proposed to be redeveloped for residential use and, as a precautionary measure, to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of hazardous materials/wastes. In addition, if certain portions of the fill material are required to be removed or exported from the Site for geotechnical and/or environmental purposes, if the fill material contains CoCs, it may be classified as a waste or hazardous waste for off-Site disposal purposes.

This Assessment has been conducted by an environmental professional whose qualifications were made known to the Client. The conclusion presented above are based on the review of readily available data obtained as part of this Assessment, current regulatory guidelines, the Site and Site vicinity reconnaissance, and SCS' experience.

9 REPORT USAGE AND FUTURE SITE CONDITIONS

This Report is intended for the sole usage of the Client and other parties designated by SCS. The methodology used during this Assessment was in general conformance with the requirements of the Client and the specifications and limitations presented in the Agreement between the Client and SCS. This Report contains information from a variety of public and other sources, and SCS makes no representation or warranty about the accuracy, reliability, suitability, or completeness of the information. Any use of this Report, whether by the Client or by a third party, shall be subject to the provisions of the Agreement between the Client and SCS. Any misuse of or reliance upon the Report shall be without risk or liability to SCS.

Assessments are qualitative, not comprehensive, in nature and may not identify all environmental problems or eliminate all risk. For every property, especially for properties in older downtown or urban areas, it is possible for there to be unknown, unreported RECs, underground storage tanks, or other features of concern that might become apparent through demolition, construction, or excavation activities, etc. In addition, the scope of services for this project was limited to those items specifically named in the scope of services for this Report. Environmental issues not specifically addressed in the scope of services for this project are not included in this Report.

Land use, condition of the properties within the Site, and other factors may change over time. The information and conclusions of this Report are judged to be relevant at the time the work described in this Report was conducted. This Report should not be relied upon to represent future Site conditions unless a qualified consultant familiar with the practice of Phase I Environmental Site Assessments in San Diego County is consulted to assess the necessity of updating this Report.

The property owners at the Site are solely responsible for notifying all governmental agencies and the public of the existence, release, or disposal of any hazardous materials/wastes or petroleum products at the Site, whether before, during, or after the performance of SCS services. SCS assumes no responsibility or liability for any claim, loss of property value, damage, or injury that results from hazardous materials/wastes or petroleum products being present or encountered within the Site.

Although this Assessment has attempted to assess the likelihood that the Site has been impacted by a hazardous material/waste release, potential sources of impact may have escaped detection for reasons that include, but are not limited to: 1) our reliance on inadequate or inaccurate information rightfully provided to us by third parties, such as public agencies and other outside sources; 2) the limited scope of this Assessment; and 3) the presence of undetected, unknown, or unreported environmental releases.

10 LIKELIHOOD STATEMENTS

Statements of "likelihood" have been made in this report. Likelihood statements are based on professional judgments of SCS. The term "likelihood," as used herein, pertains to the probability of a match between the prediction for an event and its actual occurrence. The likelihood statement assigns a measure for a "degree of belief" for the match between the prediction for the event and the actual occurrence of the event.

The likelihood statements in this Report are made qualitatively (expressed in words). The qualitative terms can be approximately related to quantitative percentages. The term "low likelihood" is used by SCS to approximate a percentage range of 10 to 20 percent; the term "moderate likelihood" refers to an approximate percentage range of 40 to 60 percent; and the term "high likelihood" refers to an approximate percentage range of 80 to 90 percent.

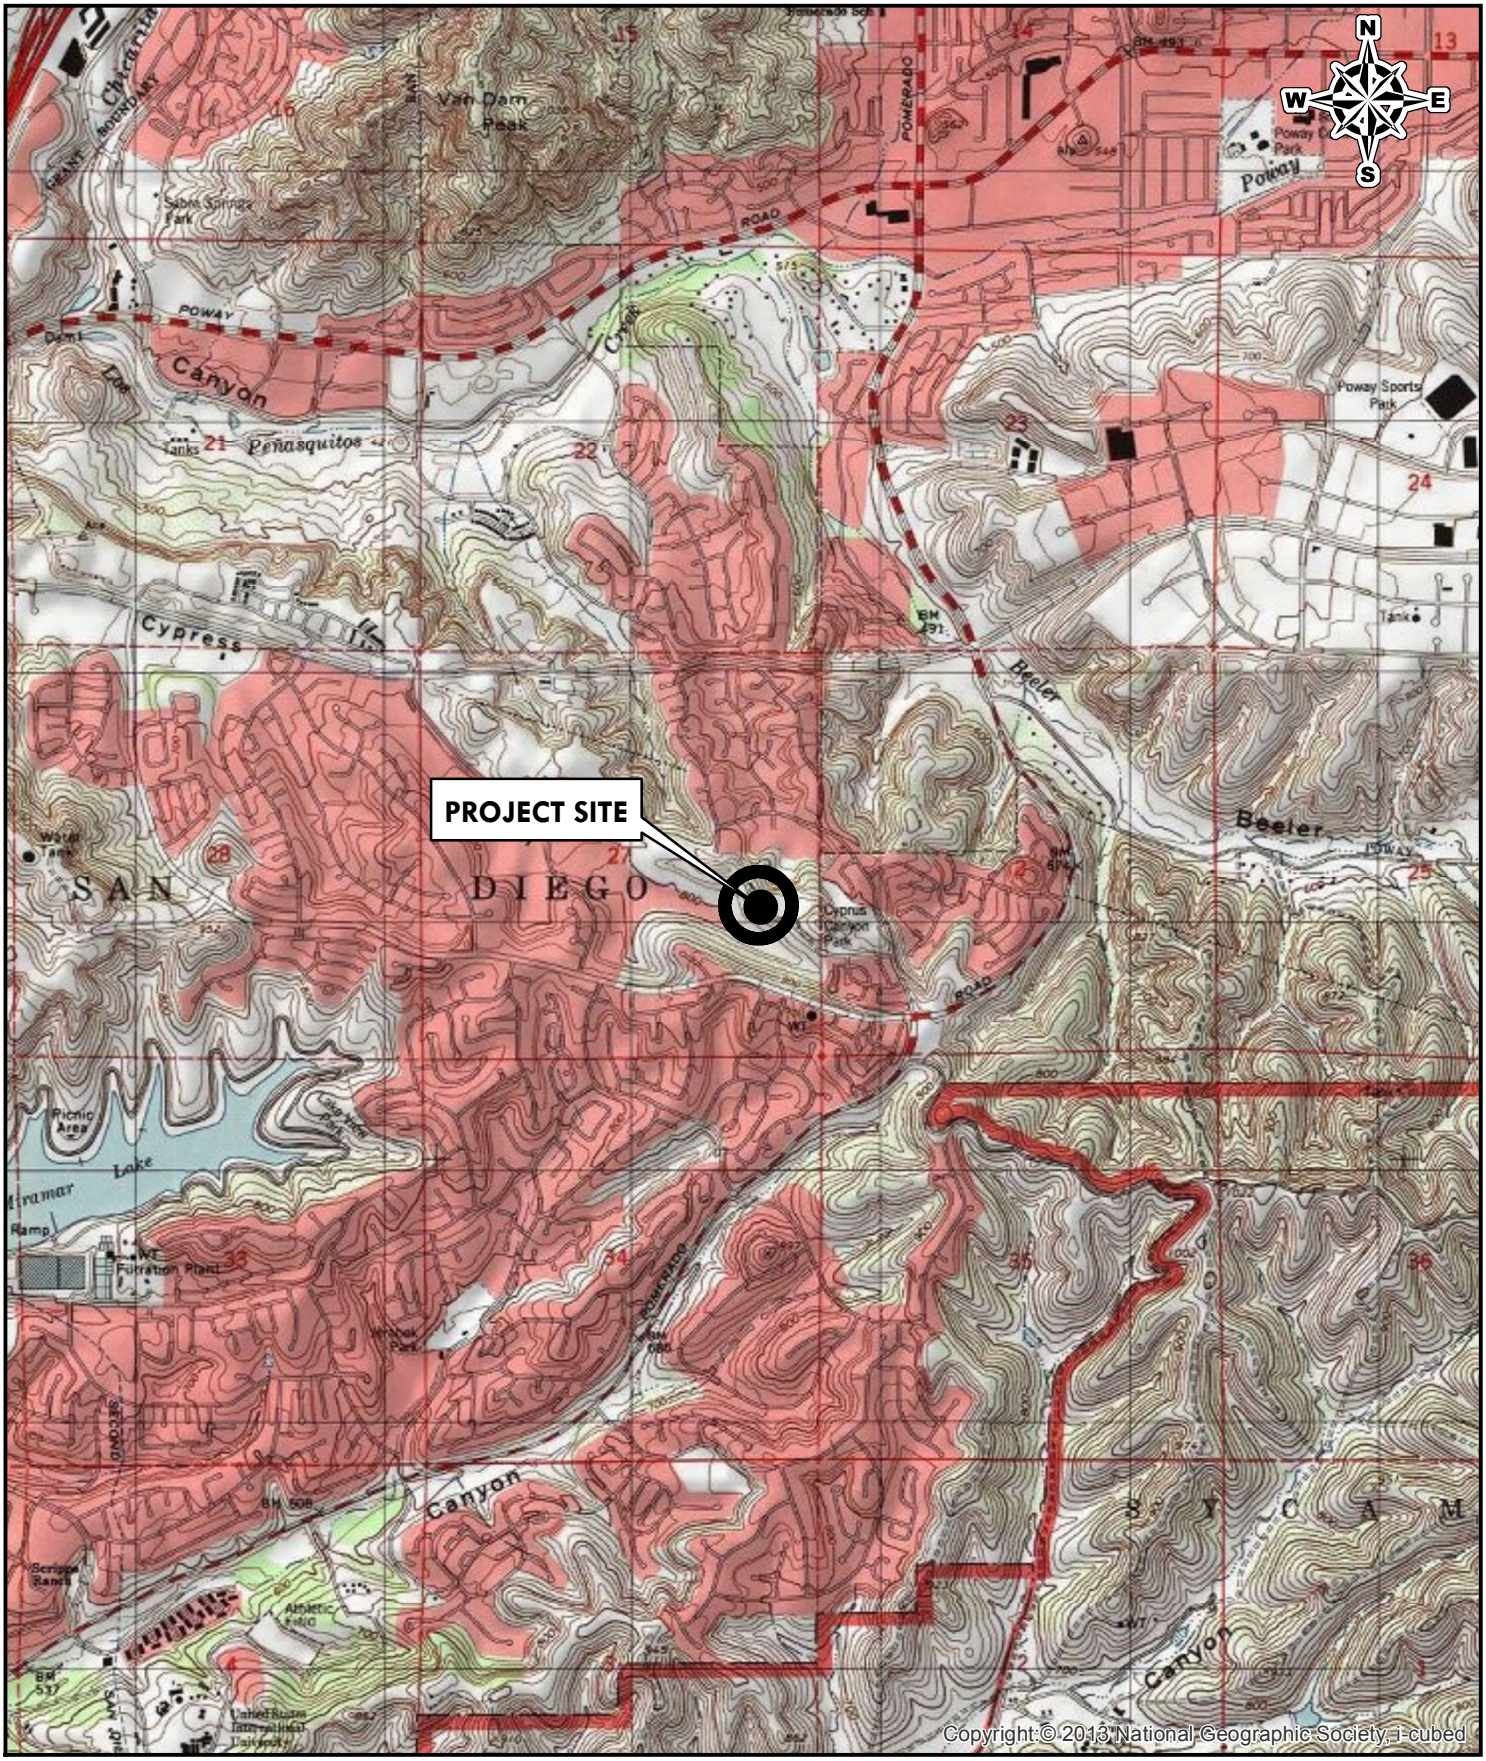

11 SPECIAL CONTRACTUAL CONDITIONS BETWEEN USER AND ENVIRONMENTAL PROFESSIONAL

There were no special contractual conditions between the user of this Assessment, the environmental professional, and SCS.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

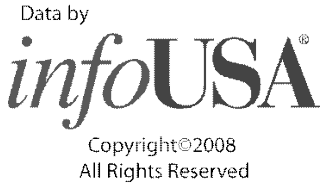

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 8A11-4F76-BFBC

PO # NA

Project 11495 Cypress Canyon Road

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8A11-4F76-BFBC

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

11495 CYPRESS CANYON ROAD
SAN DIEGO, CA 92131

COORDINATES

Latitude (North):	32.9258590 - 32° 55' 33.09''
Longitude (West):	117.0688270 - 117° 4' 7.77''

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 8 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
SCRIPPS RANCH MIDDLE 11495 CYPRESS CANYON SAN DIEGO, CA 92131	ENVIROSTOR Facility Id: 37880005 Status: Inactive - Withdrawn SCH Facility Id: 37880005 Status: Inactive - Withdrawn	N/A

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SDCTY WUD SCRIPPS RA EPA ID:: CA0000371187	SPRING CANYON ROAD N	SE 0 - 1/8 (0.066 mi.)	3	11
MCMILLIN DEVELOPMENT EPA ID:: CAD982403248	***12201 SPRING CANYON***	***S 0 - 1/8 (0.101 mi.)***	***4***	***12***

State and tribal leaking storage tank lists

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that

there is 1 SAN DIEGO CO. SAM site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SYCAMORE CANYON FACI	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A5***	***14***
Case Number: H04517-001				
Facility Status: Preliminary Assessment				

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
RAYTHEON SYSTEMS CO.	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A6***	***17***
Database: CPS-SLIC, Date of Government Version: 12/10/2018				
Facility Status: Completed - Case Closed				
Global Id: T0608125476				

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

LDS: Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LDS list, as provided by EDR, and dated 12/10/2018 has revealed that there is 1 LDS site within approximately 0.001 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WILDFIRES POWAY/SCRI	***WILDFIRE BURN AREAS***	***0 - 1/8 (0.000 mi.)***	***2***	***10***
Global Id: L10007413162				
Status: Completed - Case Closed				

Other Ascertainable Records

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 DOD site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
EL CENTRO NAVAL AIR		SE 1/4 - 1/2 (0.376 mi.)	0	10

EXECUTIVE SUMMARY

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 12/03/2018 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

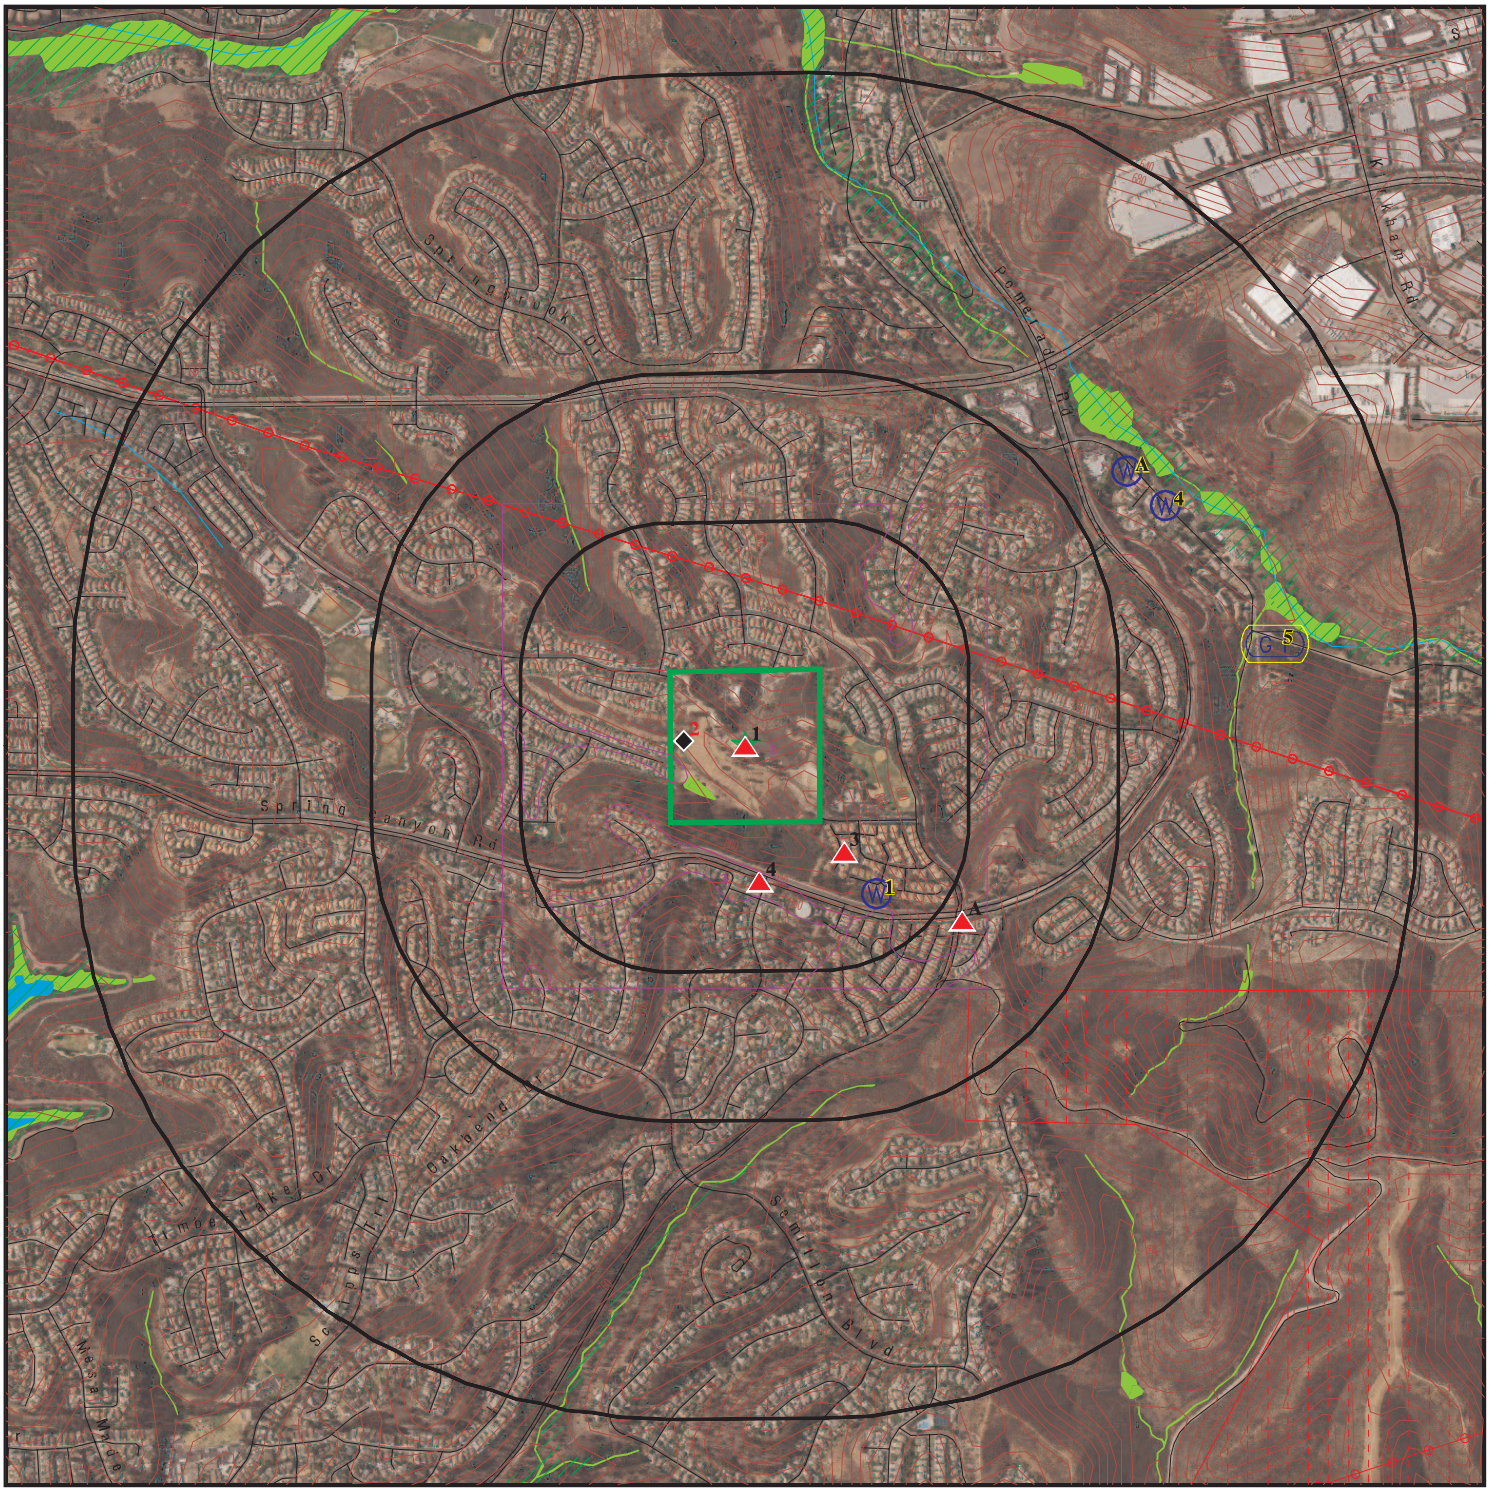

Lower Elevation	Address	Direction / Distance	Map ID	Page
WILDFIRES POWAY/SCRI	***WILDFIRE BURN AREAS***	***0 - 1/8 (0.000 mi.)***	***2***	***10***

Environmental Interest/Information System

MCMILLIN DEVELOPMENT WARRANTY (Continued) **1000254512**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/12/2018
Date Data Arrived at EDR: 12/28/2018
Date Made Active in Reports: 01/11/2019
Number of Days to Update: 14

Source: EPA
Telephone: N/A
Last EDR Contact: 02/15/2019
Next Scheduled EDR Contact: 04/15/2019
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/12/2018
Date Data Arrived at EDR: 12/28/2018
Date Made Active in Reports: 01/11/2019

Next Scheduled EDR Contact: 04/15/2019
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/12/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016
Date Data Arrived at EDR: 01/05/2017
Date Made Active in Reports: 04/07/2017
Number of Days to Update: 92

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/12/2018

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Longitude (West):	117.068827 - 117° 4' 7.78''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	493565.0
UTM Y (Meters):	3642879.0
Elevation:	858 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5622836 POWAY, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

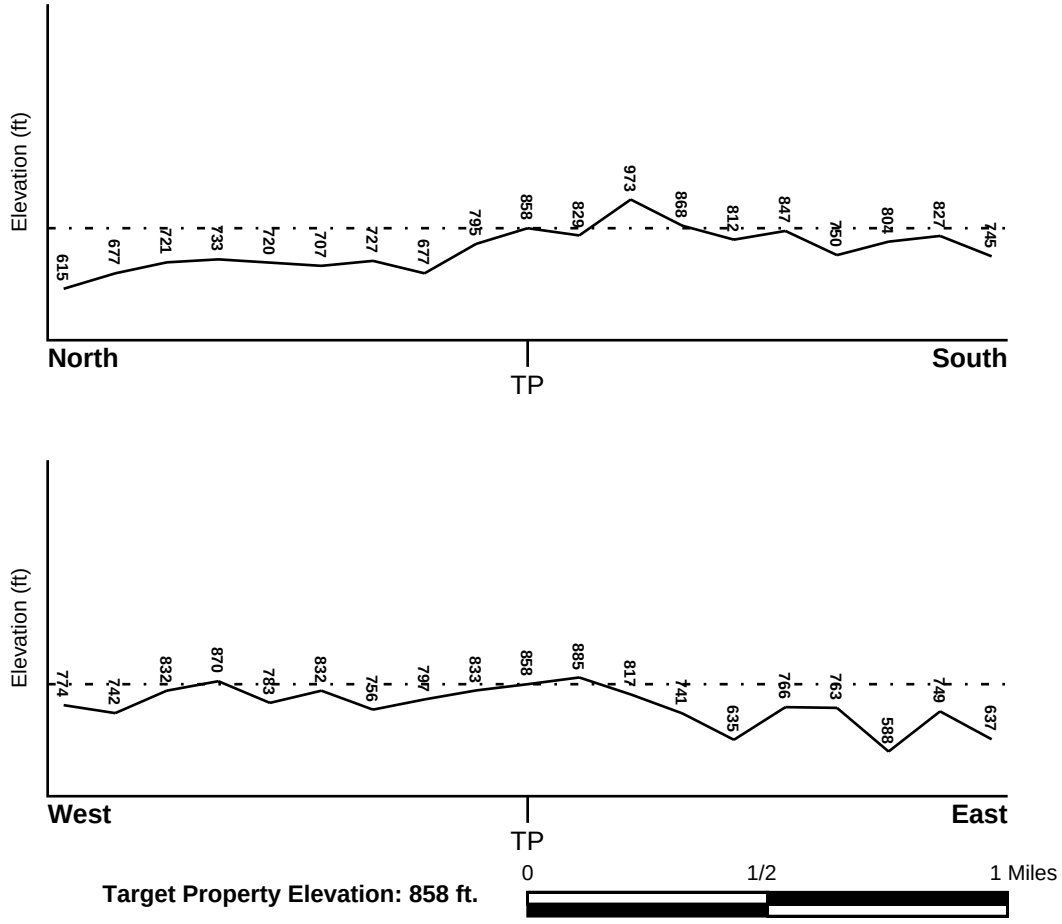

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1362G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C1354G	FEMA FIRM Flood data

06073C1366G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
POWAY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
5	1/2 - 1 Mile East	Not Reported
1G	1/2 - 1 Mile East	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: REDDING

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	9 inches	20 inches	cobbly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
3	20 inches	29 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 3

Soil Component Name: REDDING

Soil Surface Texture: gravelly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 8 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
SCRIPPS RANCH MIDDLE 11495 CYPRESS CANYON SAN DIEGO, CA 92131	ENVIROSTOR Facility Id: 37880005 Status: Inactive - Withdrawn SCH Facility Id: 37880005 Status: Inactive - Withdrawn	N/A

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SDCTY WUD SCRIPPS RA EPA ID:: CA0000371187	SPRING CANYON ROAD N	SE 0 - 1/8 (0.066 mi.)	3	8
MCMILLIN DEVELOPMENT EPA ID:: CAD982403248	***12201 SPRING CANYON***	***S 0 - 1/8 (0.101 mi.)***	***4***	***8***

State and tribal leaking storage tank lists

SAN DIEGO CO. SAM: A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there is 1 SAN DIEGO CO. SAM site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SYCAMORE CANYON FACI	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A5***	***9***
Case Number: H04517-001				
Facility Status: Preliminary Assessment				

CPS-SLIC: A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
RAYTHEON SYSTEMS CO.	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A6***	***9***

11495 CYPRESS CANYON ROAD
11495 CYPRESS CANYON ROAD
SAN DIEGO, CA 92131

TARGET PROPERTY COORDINATES

Latitude (North):	32.925859 - 32° 55' 33.09''
Longitude (West):	117.068827 - 117° 4' 7.78''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	493565.0
UTM Y (Meters):	3642879.0
Elevation:	858 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5622836 POWAY, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

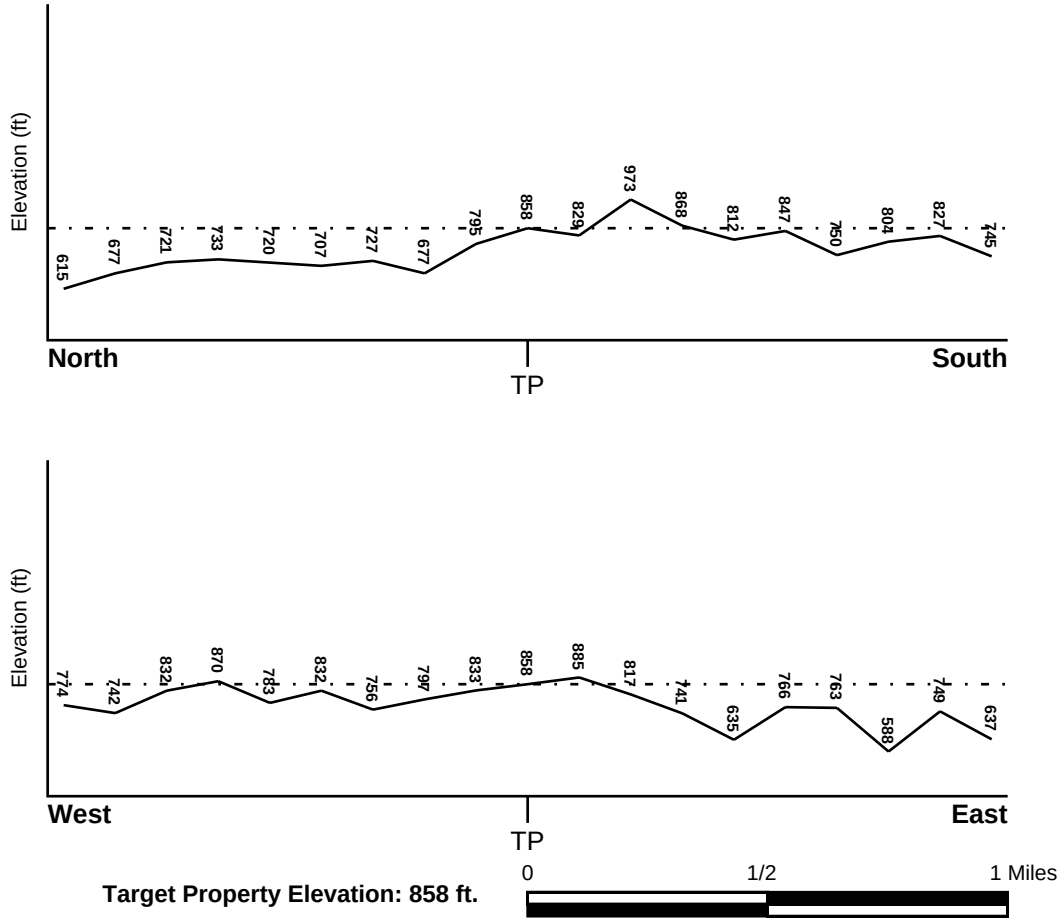

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1362G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C1354G	FEMA FIRM Flood data
06073C1358G	FEMA FIRM Flood data
06073C1366G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
POWAY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
5	1/2 - 1 Mile East	Not Reported
1G	1/2 - 1 Mile East	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: REDDING

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	9 inches	20 inches	cobbly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
3	20 inches	29 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 3

Soil Component Name: REDDING

Soil Surface Texture: gravelly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	14 inches	29 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
3	29 inches	44 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW[R] Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 8 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
SCRIPPS RANCH MIDDLE 11495 CYPRESS CANYON SAN DIEGO, CA 92131	ENVIROSTOR Facility Id: 37880005 Status: Inactive - Withdrawn SCH Facility Id: 37880005 Status: Inactive - Withdrawn	N/A

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SDCTY WUD SCRIPPS RA EPA ID:: CA0000371187	SPRING CANYON ROAD N	SE 0 - 1/8 (0.066 mi.)	3	11
MCMILLIN DEVELOPMENT EPA ID:: CAD982403248	***12201 SPRING CANYON***	***S 0 - 1/8 (0.101 mi.)***	***4***	***12***

State and tribal leaking storage tank lists

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that

there is 1 SAN DIEGO CO. SAM site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SYCAMORE CANYON FACI	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A5***	***14***
Case Number: H04517-001				
Facility Status: Preliminary Assessment				

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
RAYTHEON SYSTEMS CO.	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A6***	***17***
Database: CPS-SLIC, Date of Government Version: 12/10/2018				
Facility Status: Completed - Case Closed				
Global Id: T0608125476				

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

LDS: Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LDS list, as provided by EDR, and dated 12/10/2018 has revealed that there is 1 LDS site within approximately 0.001 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WILDFIRES POWAY/SCRI	***WILDFIRE BURN AREAS***	***0 - 1/8 (0.000 mi.)***	***2***	***10***
Global Id: L10007413162				
Status: Completed - Case Closed				

Other Ascertainable Records

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 12/31/2005 has revealed that there is 1 DOD site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
EL CENTRO NAVAL AIR		SE 1/4 - 1/2 (0.376 mi.)	0	10

EXECUTIVE SUMMARY

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 12/03/2018 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

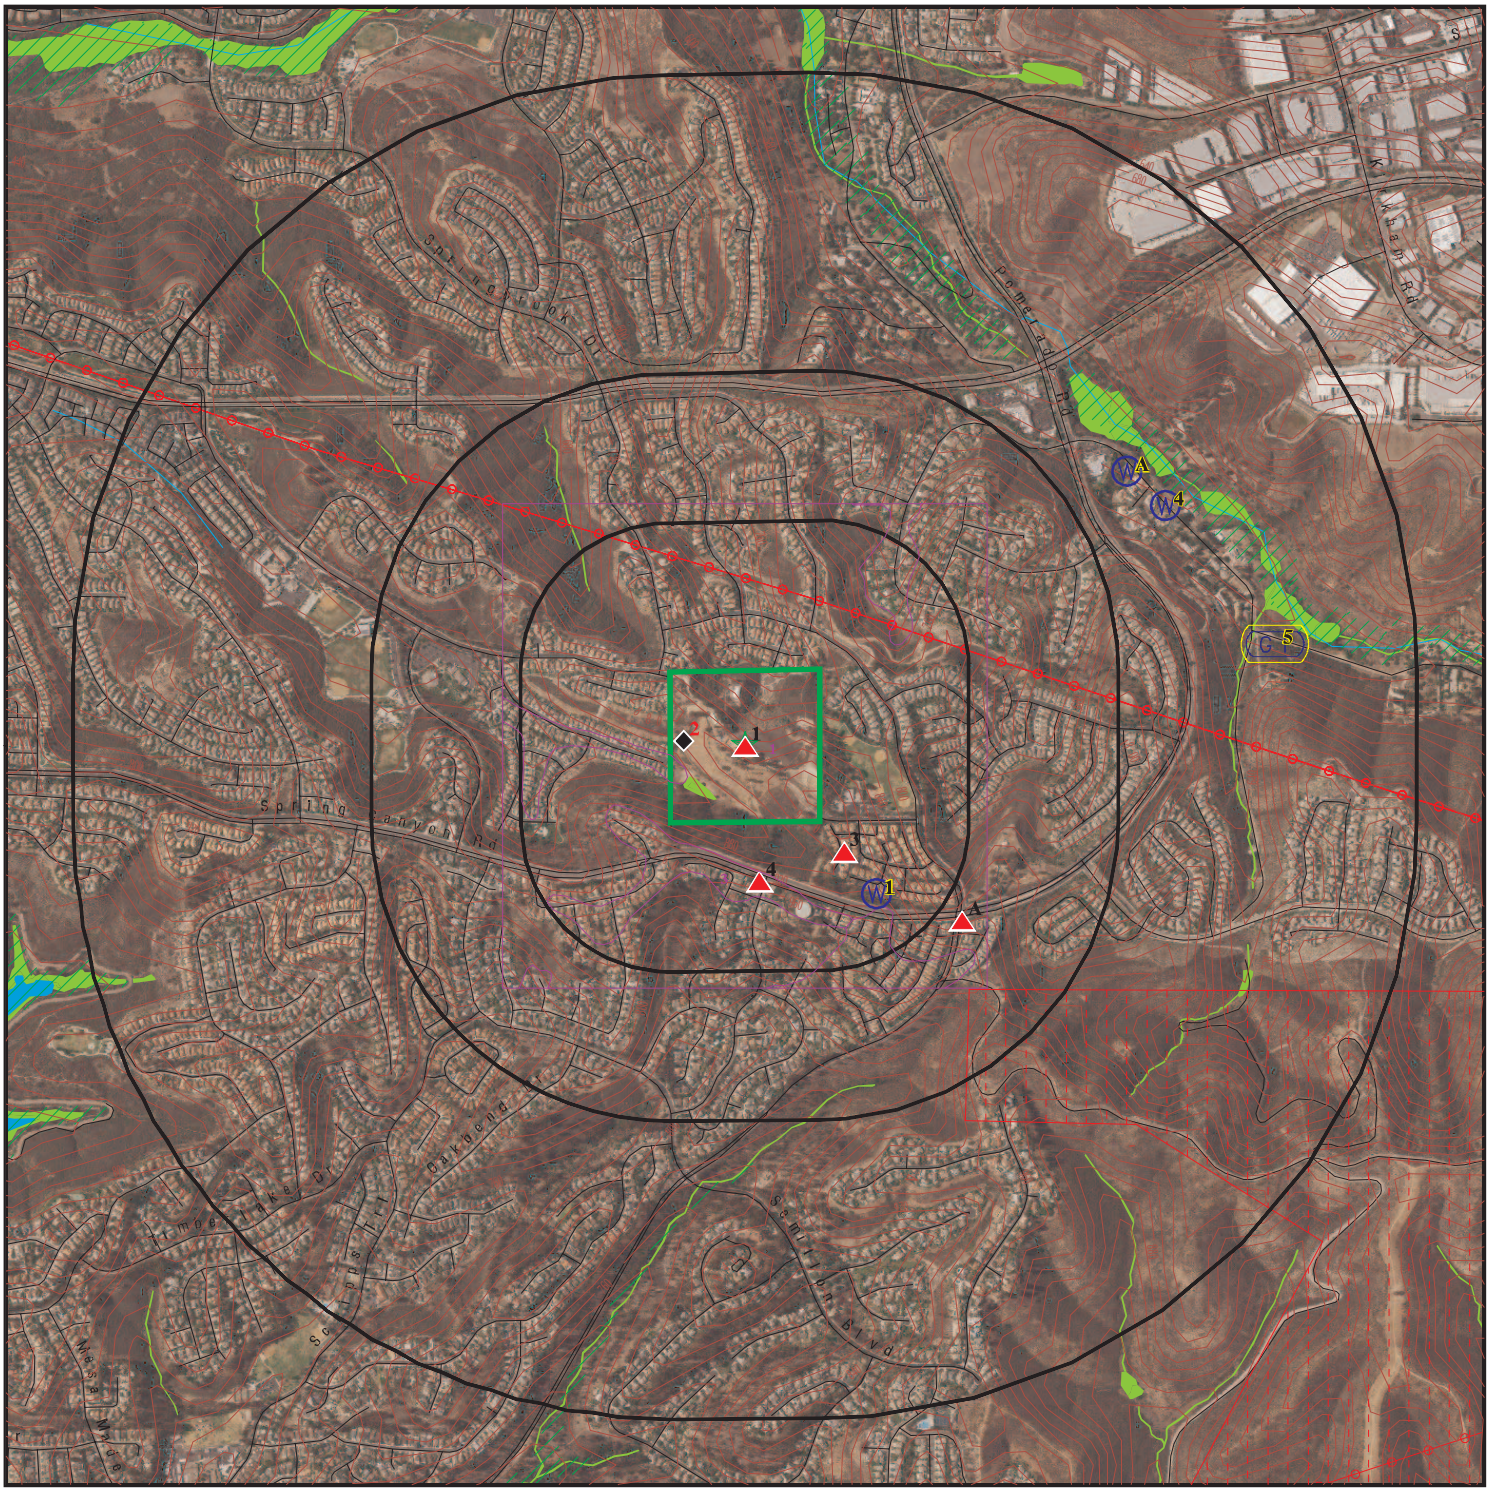

Lower Elevation	Address	Direction / Distance	Map ID	Page
WILDFIRES POWAY/SCRI	***WILDFIRE BURN AREAS***	***0 - 1/8 (0.000 mi.)***	***2***	***10***

Environmental Interest/Information System

MCMILLIN DEVELOPMENT WARRANTY (Continued) **1000254512**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/12/2018
Date Data Arrived at EDR: 12/28/2018
Date Made Active in Reports: 01/11/2019
Number of Days to Update: 14

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/12/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

11495 CYPRESS CANYON ROAD
11495 CYPRESS CANYON ROAD
SAN DIEGO, CA 92131

TARGET PROPERTY COORDINATES

Latitude (North):	32.925859 - 32° 55' 33.09''
Longitude (West):	117.068827 - 117° 4' 7.78''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	493565.0
UTM Y (Meters):	3642879.0
Elevation:	858 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5622836 POWAY, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

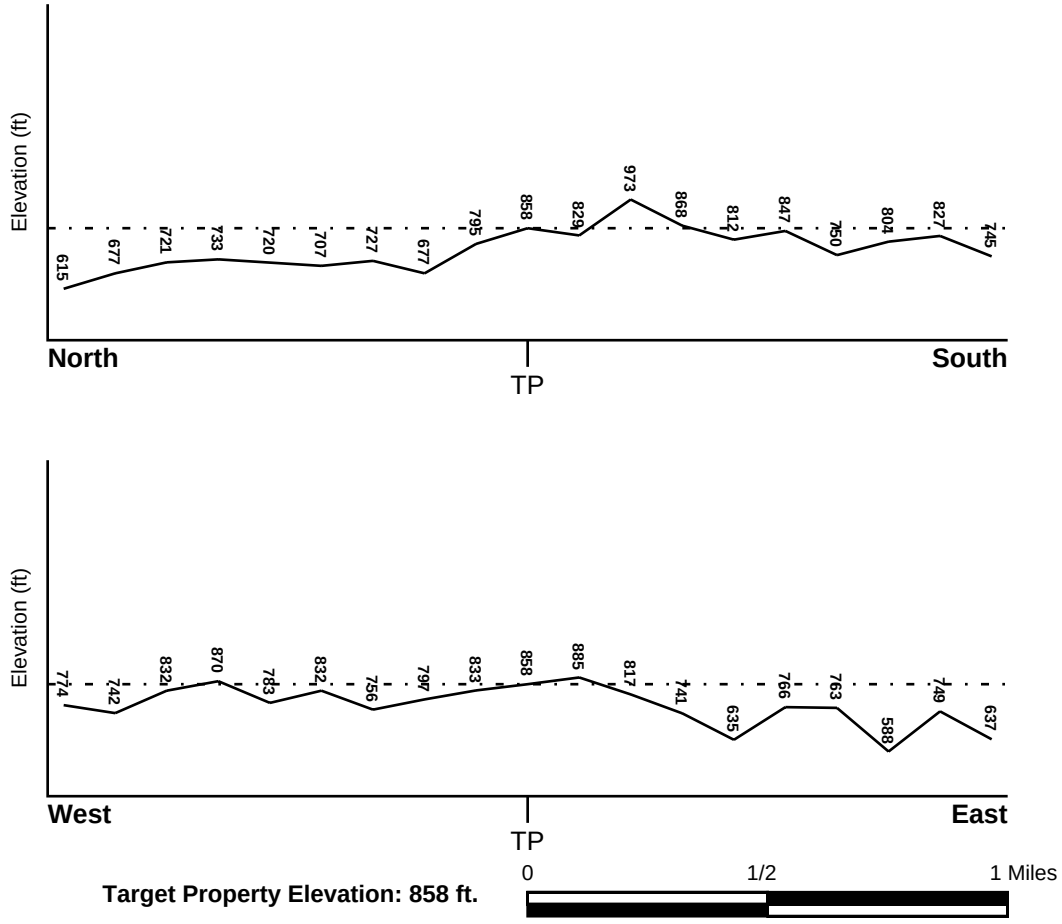

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1362G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C1354G	FEMA FIRM Flood data

06073C1366G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
POWAY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
5	1/2 - 1 Mile East	Not Reported
1G	1/2 - 1 Mile East	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: REDDING

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	9 inches	20 inches	cobbly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
3	20 inches	29 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 3

Soil Component Name: REDDING

Soil Surface Texture: gravelly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 8 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
SCRIPPS RANCH MIDDLE 11495 CYPRESS CANYON SAN DIEGO, CA 92131	ENVIROSTOR Facility Id: 37880005 Status: Inactive - Withdrawn SCH Facility Id: 37880005 Status: Inactive - Withdrawn	N/A

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SDCTY WUD SCRIPPS RA EPA ID:: CA0000371187	SPRING CANYON ROAD N	SE 0 - 1/8 (0.066 mi.)	3	8
MCMILLIN DEVELOPMENT EPA ID:: CAD982403248	***12201 SPRING CANYON***	***S 0 - 1/8 (0.101 mi.)***	***4***	***8***

State and tribal leaking storage tank lists

SAN DIEGO CO. SAM: A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there is 1 SAN DIEGO CO. SAM site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SYCAMORE CANYON FACI	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A5***	***9***
Case Number: H04517-001				
Facility Status: Preliminary Assessment				

CPS-SLIC: A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
RAYTHEON SYSTEMS CO.	***11393 POMERADO RD***	***SE 1/4 - 1/2 (0.291 mi.)***	***A6***	***9***

11495 CYPRESS CANYON ROAD
SAN DIEGO, CA 92131

TARGET PROPERTY COORDINATES

Latitude (North):	32.925859 - 32° 55' 33.09''
Longitude (West):	117.068827 - 117° 4' 7.78''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	493565.0
UTM Y (Meters):	3642879.0
Elevation:	858 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5622836 POWAY, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

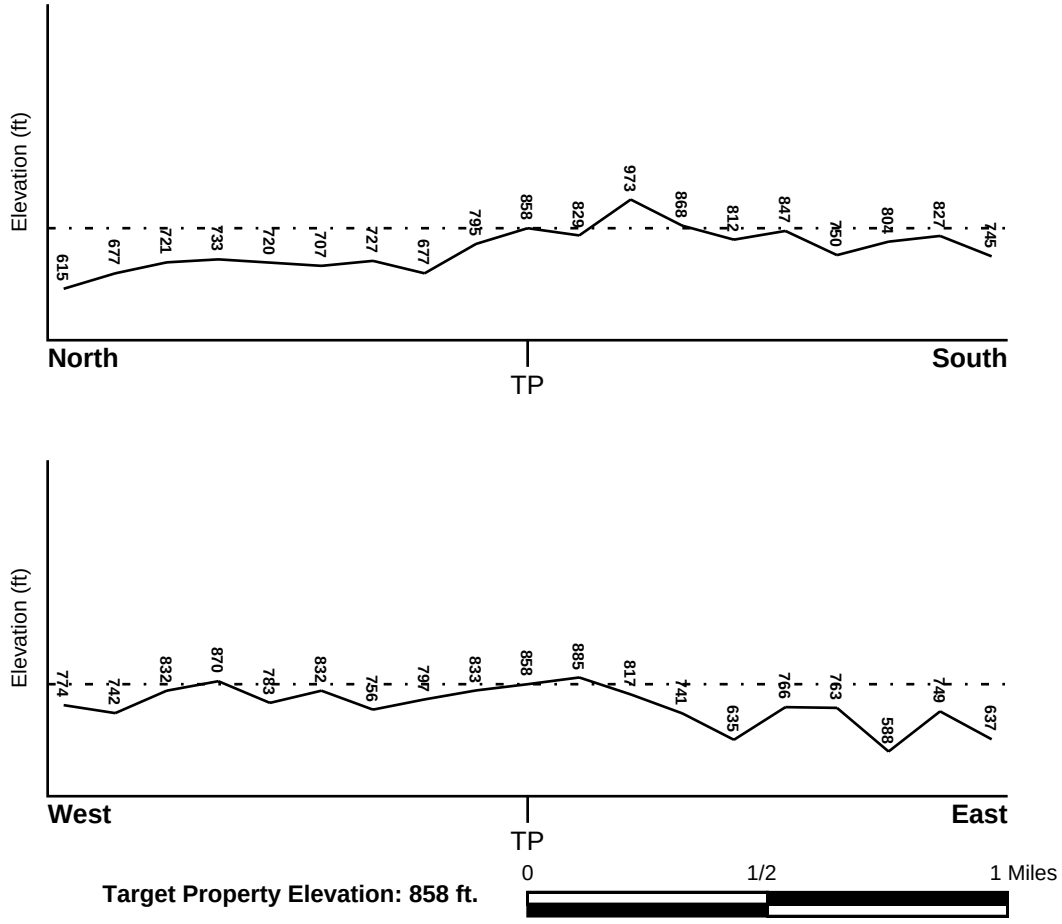

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1362G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C1354G	FEMA FIRM Flood data

06073C1366G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
POWAY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
5	1/2 - 1 Mile East	Not Reported
1G	1/2 - 1 Mile East	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: REDDING

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	9 inches	20 inches	cobbly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
3	20 inches	29 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 3

Soil Component Name: REDDING

Soil Surface Texture: gravelly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	14 inches	29 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
3	29 inches	44 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW[R] Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020

Appendix C Environmental Professional Qualifications

URS Corporation (URS) was retained by San Diego City Schools to perform a Phase I Environmental Site Assessment (ESA) of the proposed Scripps Ranch Middle School Renzulli Site at 11495 Cypress Canyon Road in the city of San Diego, San Diego County, California. Historical research, document review, and site assessment activities were conducted between June and August 2001.

In summary, the following items were noted:

- The proposed Scripps Ranch Middle School Renzulli Site consists of approximately 40 acres of land (Figures 2 and 3). The subject property is owned by one homeowner and residentially developed. The central portion of the subject property is developed with a large residential home, stables, and a large building used as a garage. The site terrain varies from steep to gentle hillsides and consists of overgrown shrub brush, trees, and other vegetation. Commercial or industrial structures were not observed onsite.
- Based on our review of historical sources, the subject property has been residentially developed since at least the 1930s.
- Hazardous substances and wastes were not observed on the subject property during the site reconnaissance. Based on the historical and current residential use of the subject property, it is unlikely that significant amounts of hazardous materials have been used at or stored on the site. However, residential properties generally contain small amounts of household hazardous chemicals that should be disposed of properly before any demolition activities.
- Based on the age of the buildings at the subject property, there is likelihood that asbestos-containing materials and lead-based paint are present. Before demolition activities, an asbestos and lead-based-paint survey should be conducted at the subject property, with appropriate removal of the identified material performed.
- Available annual water-quality reports obtained from the City of San Diego's Water Department indicated that the lead content in the water supplied to the subject property is below the maximum contaminant level for drinking-water standards.
- Records reviewed for this assessment revealed that the subject property has not been identified as a current or former hazardous-waste or solid-waste disposal facility. Therefore, it appears that the subject property is not a "hazardous waste property" as defined by Section 25221 of the California Health and Safety Code.
- The subject property was not identified as a hazardous-substance release site by the Department of Toxic Substances Control as defined by Section 25356 of the Health and Safety Code.
- Based on the U.S. EPA/California State Residential Radon Survey conducted during 1989-1990, the potential for high levels of radon at the subject property appears to be low.
- Evidence of possible sources of methane gas was not observed at the subject property. Our review of the environmental database search indicated that one landfill facility was identified within a one-mile radius of the subject property. The landfill is identified as the North East Miramar San Landfill, one-half mile southeast of Pomerado Road, Section 35. The facility is described as a solid-waste site-Class III Landfill for nonhazardous solid waste. The facility is

listed as a major threat to water quality. URS has contacted the City of San Diego Solid Waste Local Enforcement Agency (LEA). According to Ms. Rebecca LaFreniere of the LEA, they have no record of a landfill in this location. The landfill has a SWIS ID number that was assigned in the 1970s to known or proposed landfills. URS contacted the Regional Water Quality Control Board (RWQCB) for information regarding the landfill, but the RWQCB has no such information.

- Overhead electrical transmission lines were observed at the subject property along the driveway that enters the site from Cypress Canyon Road. URS submitted a request to San Diego Gas & Electric (SDG&E) for information regarding the voltage of the power lines. According to Mr. Jim Turman, Senior EMF Specialist with SDG&E, a 12-kV circuit underground line is located along Cypress Canyon Road, adjacent east of the subject property. At the property boundary, the 12-kV circuit underground line becomes an aboveground, pole-mounted line that continues to the northwest along the main driveway. Mr. Turman stated that there is a 120- and 240-volt secondary line connecting to the residence from the 12-kV circuit line.

  Two parallel aboveground, pole-mounted transmission lines are approximately 600 feet north of the subject property. According to Mr. Turman, the two pole-mounted lines trend northwest-southeast. The southern power line consists of a 138-kV circuit line on twin wood poles. The northern power line consists of 69 and 130 kV circuit lines on steel poles.

- URS submitted a request to the California State Fire Marshall's Office (CSFMO) regarding the presence of petroleum pipelines on or within one mile of the subject property. According to the CSFMO, there are no petroleum pipelines under its jurisdiction that are within one mile of the subject property.

- URS submitted a request to SDG&E for information regarding natural gas pipelines near the site. According to Ms. Teresa McCarron, a field engineering associate with SDG&E, there is no gas service or gas meter at 11495 Cypress Canyon Road. A 3-inch PVC (reported as plastic) gas pipeline with 60 pounds per square inch (psi) of pressure is on Cypress Canyon Road, adjacent to the east. A 2-inch PVC gas pipeline with 60 psi of pressure is on Mondial Street and Libelle Court, adjacent to the north. A 3-inch PVC gas pipeline with 60 psi of pressure is on Angelique Street, and a 4-inch PVC gas pipeline with 60 psi of pressure is on Cypress Canyon Road, adjacent to the northwest. Service laterals extend from the gas pipelines to the individual residences adjacent to the subject property. These pipelines are used to supply natural gas to the neighborhood. In accordance with Section 17213 of the California Education Code, the presence of pipelines used to supply natural gas to the school and neighborhood is acceptable.

- URS contacted the San Diego Air Pollution Control District (APCD) for information regarding facilities within a one-quarter-mile radius of the subject property that might be reasonably anticipated to emit hazardous air emissions or handle hazardous materials, substances, or wastes. According to the APCD, a grid search of the affected area was conducted and revealed that there are no facilities with the potential to emit air contaminants.

- A large, circular, aboveground water reservoir is southeast of the intersection of Spring Canyon Road and Riesling Drive, approximately 600 feet southeast of the subject property. The reservoir is approximately 1,000 feet above mean sea level (MSL), a higher elevation than the subject property (720 to 980 feet MSL). URS contacted the City of San Diego's Water Department for information regarding the reservoir. According to Ms. Lorraine Gain, Senior Water Utility Advisor for the Water Department, the water reservoir and adjacent pump station are called the Scripps Ranch Reservoir and Scripps McMillin Pump Station. The water reservoir consists of a 3,200,000-gallon steel tank installed in 1975. The tank has a 140-foot diameter and is 28 feet tall. Ms. Gain stated that no leaks have been reported for the reservoir. The reservoir has overflow piping that discharges to the storm drain. The overflow piping consists of an 18-inch reinforced concrete pipe. The overflow pipe crosses under Spring Canyon Road and drains into the canyon, north of Spring Canyon Road. This canyon is adjacent to the southeast of the subject property.
- Any facility within 2,000 feet of the subject property and where significant onsite disposal of hazardous waste has occurred is considered a "border zone property" as defined by Section 25221 of the California Health and Safety Code. Based on a review of the VISTA Information Solutions, Inc. (VISTA) Report, a potential border zone property was identified. The Marine Corps Air Station (MCAS) Miramar is identified approximately one-half mile southeast of the subject property on the VISTA Database Report. MCAS Miramar is bisected by Interstate 15 (I-15), bordered on the west by Interstate 805 (I-805), on the south by state Route 52 (SR-52), on the east by the city of Santee and Sycamore Canyon County Open Space Preserve, and on the north by Miramar Road and City of San Diego land to the north. The locations of the numerous listings identified for MCAS Miramar were not detailed on the VISTA Database Report. Based on the nature of the listings, the distance, and the downgradient direction of MCAS Miramar, it is URS' opinion that there is a low likelihood that this facility presents an environmental concern.

  Additionally, URS also reviewed a report titled "Report on Refuse Dumps" prepared by the City Planning Commission for the City Council on the dumping of trash and refuse within the city, dated January 31, 1938. The site is not listed in the report. Former refuse dumps were not identified within an approximate one-half-mile radius of the subject property.
- Our review of the environmental database search indicated that several additional properties within the respective search radii have handled hazardous materials or wastes and/or have been listed as having reported releases of hazardous substances or petroleum products. Based on the distances of these properties from the subject property, the direction of groundwater flow, reported chemical uses, and/or the reported nature and severity of their releases, it is unlikely that these properties have adversely affected the environmental integrity of the subject property.
- We have performed a Phase I ESA in accordance with the scope and limitations of American Society for Testing and Materials (ASTM) Practice E 1527-00 for the proposed Scripps Ranch Middle School Renzulli Site. This assessment has revealed no evidence of recognized environmental conditions in connection with the proposed school site.
- In accordance with Section 17213 of the California Education Code, further investigation of the subject property is not recommended at this time.

URS conducted this Phase I ESA of the proposed Scripps Ranch Middle School Renzulli Site in the city of San Diego, California (hereinafter referred to as "the site" or "subject property") for San Diego City Schools in general accordance with our proposal of June 6, 2001. The following sections identify the purpose, involved parties, scope of work, and limitations and exceptions associated with the ESA.

This assessment was accomplished by and limited to a site reconnaissance, drive-by survey of the site vicinity, and review of pertinent documentation available through standard resources regarding past and current land use for indications of the manufacture, generation, use, storage, and/or disposal of hazardous substances at the site.

1.1 PURPOSE

In accordance with ASTM standards on Environmental Site Assessments for Commercial Real Estate E 1527-00, the objective of the ESA is to identify recognized environmental conditions (RECs), which are defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property." Additionally, this Phase I ESA has been performed in general accordance with Section 17251 of the California Education Code and Title 5, Sections 14010, 14011, and 14012 of the California Code of Regulations.

1.2 INVOLVED PARTIES

Ms. Heather Couper of URS conducted the site reconnaissance on July 12, 2001, performed interviews, and made regulatory inquires. Mr. Daryl Hernandez of URS performed project oversight and quality review.

1.3 SCOPE OF WORK

URS' scope of work for this Phase I ESA included the following:

- Reviewing readily available maps and reports pertaining to the subject property as provided by the client.
- Conducting interviews with site personnel to evaluate the site history, current operations, and maintenance procedures.
- Performing a reconnaissance survey of the subject property to visually identify areas of possible contaminated surficial soils or surface water, improperly stored hazardous materials, possible sources of polychlorinated biphenyls (PCBs), and possible risks of contamination from activities at the subject property and adjacent properties. Photographs taken during the site reconnaissance are provided in Appendix A.
- Commenting on the presence of asbestos-containing materials, lead-based paint, lead in drinking water, and areas of high radon and methane gas.
- Reviewing readily available local regulatory agency files for the subject property.

- Reviewing available regulatory databases for the subject property and for properties within a specified radius of the subject property. The purpose of this review is to evaluate the possible environmental impact to the subject property. The databases list the locations of known hazardous-waste sites, landfills, leaking underground storage tanks (LUSTs), permitted facilities that use underground storage tanks (USTs), and facilities that use, store, or dispose of hazardous materials. The regulatory databases and search radii provided by VISTA are provided in Appendix B.
- Reviewing readily available historical documentation, including aerial photographs (site and site vicinity), Sanborn Maps (site and available adjacent properties), building department records (site only), and city directories (site and available adjacent properties), as necessary.
- Preparing this Phase I ESA report, documenting findings, and providing opinions and conclusions regarding possible environmental impacts to the subject property.

1.4 LIMITATIONS AND EXCEPTIONS

The environmental services described in this report have been conducted in general accordance with the current regulatory guidelines and standard of care exercised by environmental consultants performing similar work in the project area. No other warranty—expressed or implied—is made regarding the professional opinions presented in this report. Please note that URS completed a Geologic Hazards Evaluation under separate cover for the subject property (URS, 2001). Additionally, it should be noted that the scope of this Phase I ESA does not include analysis of wetlands, regulatory compliance, cultural or historic resources, industrial hygiene, health and safety, ecological resources, endangered species, or indoor quality.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. URS should be contacted if the reader requires any additional information or has any questions regarding the content, interpretations presented, or completeness of this document.

Our findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of the site can change with time as a result of natural processes or the activities of man at the subject property or nearby sites. Additionally, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time—in part or in whole—by changes over which URS has no control. URS cannot warrant or guarantee that not finding indicators of a particular hazardous material means that this particular hazardous material, or any other hazardous material, do not exist on the subject property. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty.

1.5 USER RELIANCE

This report may be relied upon and is intended exclusively for the use by the client. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than the client is undertaken at said parties' sole risk.

2.1 LOCATION AND DESCRIPTION

The subject property is bounded by residential properties to the north, Cypress Canyon Park and Cypress Canyon Road to the east, open space and Spring Canyon Road to the south, and residential properties to the west (Figure 1). The site is in the Scripps Ranch area in the city of San Diego, San Diego County, California.

The proposed Scripps Ranch Middle School Renzulli Site consists of approximately 40 acres of land (Figures 2 and 3). The subject property is owned by one homeowner and residentially developed. A legal description of the site was not provided by the client. Table 1 lists the assessor's parcel number (APN) and address for the subject property as determined from our site reconnaissance and review of the County of San Diego Assessor's Parcel Maps.

Table 1
PARCEL INCLUDED IN THE PHASE I ESA

Assessor's Parcel Number	Street Address
319-020-04	11495 Cypress Canyon Road

2.2 CURRENT TITLE INFORMATION

Title records were requested from the client to identify environmental liens or activity and use limitations, but these records were not provided for review.

2.3 ADJACENT PROPERTIES

The adjacent properties beyond the streets surrounding the site are described below. Single-family residential structures are north and west of the subject property. Cypress Canyon Park and single-family residential structures are east of the subject property. Open space, Spring Canyon Road, and residential properties are south of the subject property.

2.4 SITE DESCRIPTION AND CURRENT SITE USES/OPERATIONS

The following presents a description of the structures at the subject property, the tenants occupying the site, the activities being conducted onsite, the heating and cooling systems used in site buildings, the sewage disposal system, and the potable water provider.

2.4.1 Site Description

The site encompasses 40 acres of land. The Scripps Ranch Middle School Renzulli Site is at 11495 Cypress Canyon Road and consists of one parcel. The central portion of the subject property is developed with a large residential home, stables, and a large building used as a garage. The site terrain varies from steep to gentle hillsides and consists of overgrown shrub brush, trees, and other vegetation. A pond and an animal enclosure are on the southern portion of the site. Overhead lines were observed at the subject property along the driveway that enters the site from Cypress Canyon Road.

2.4.2 Occupants

Based on the site reconnaissance, the subject property is occupied by one residential homeowner. URS interviewed Mr. Jim Renzulli, the property owner since the early 1970s, regarding the site history. According to Mr. Renzulli, the house was originally built in the 1930s. Mr. Renzulli has made improvements to the subject property, including adding additional rooms to the main house, constructing stables, and building a garage building used to store the overflow of antique cars collected by Mr. Renzulli.

Mr. Renzulli stated that the subject property has not been farmed. Horses and buffalo were kept in the main stables adjacent to the northwest of the house and in an enclosure adjacent to the pond.

2.4.3 Heating and Cooling Systems

Heating and cooling for the subject property structures appear to be provided by a combination of natural gas, solar, and electrical systems. Evidence of underground fuel oils tanks for heating systems was not observed.

According to Mr. Renzulli, butane is used onsite to provide power to the water heater, furnace, and range, and to fuel the emergency generator. A 500-gallon butane aboveground storage tank (AST) used to store fuel to operate the water heater, furnace, and range is on the north side of the main house. A 100-gallon butane AST used to store fuel for the emergency generator is in the generator shack, southeast of the main house.

2.4.4 Sewage Disposal/Septic Systems

URS requested sewer maps at the City of San Diego's Building Department for the subject property, but no such maps were available.

According to Mr. Renzulli, the site is not connected to the sewer system. Mr. Renzulli stated that a 2,000-gallon septic tank is adjacent to the south of the house.

2.4.5 Potable Water

Potable water to the subject property is provided by the City of San Diego's Water Department.

URS conducted a historical-records search for both the subject property and surrounding areas. This included a review of one or more of the following sources that were found to be both reasonably ascertainable and useful for the purposes of this Phase I ESA: historical aerial photographs, historical Sanborn Maps, historical city directories, building permits and plans, land title reports, topographic maps, property-tax records, zoning/land-use records, and a review of previous environmental documentation. At the request of the client, individual property owners or tenants on the subject property were not interviewed.

Based on our review of the historical sources, portions of the subject property have been occupied by a residential property as early as the 1930s to the present. Information gaps of more than five years are present in the historical research; however, site use did not appear to change significantly. The following sections summarize information obtained from the historical sources used for this assessment.

3.1 AERIAL PHOTOGRAPHS

URS reviewed aerial photographs for the subject property at the County of San Diego's Cartographic Services for the years 1928, 1953, 1958, 1966, 1968, 1970, 1973, 1976, 1978, 1983, 1989, and 1995. A listing of the photographs reviewed is presented in Table 2, and a description of the notable observations in each photograph is presented in Table 3.

Table 2
AERIAL PHOTOGRAPHS REVIEWED

Date	Photograph Number	Source	Scale
1928	46 A6	San Diego County Cartographic Services	1"-1,000'
04-14-1953	AXN-10M-100	San Diego County Cartographic Services	1"-2,000'
07-06-1958	AS1029 T1SDC 2-80	San Diego County Cartographic Services	1"-1,000'
11-02-1966	21155 1-174 GS-VB01	San Diego County Cartographic Services	1"-2,000'
05-27-1968	AXN-4JJ-178	San Diego County Cartographic Services	1"-2,800'

Table 3
AERIAL PHOTOGRAPH SUMMARY

Year	Subject Property	North	South	West	East
1928	The subject property appeared to be undeveloped. A pond appeared to be present on the southern portion of the subject property. A northwest-southeast trending dirt road appeared to cross through the central portion of the site.	Undeveloped land	Dirt road and undeveloped land.	Undeveloped land	Undeveloped land
1953	The subject property appeared to be developed with two structures located in the central portion of the subject property, south of the dirt road. The majority of the property appeared to be covered with scrub brush and vegetation.	Undeveloped land	Dirt road and undeveloped land.	Undeveloped land	Undeveloped land
1958	Similar to 1953.	Undeveloped land	Dirt road and undeveloped land.	Undeveloped land	Undeveloped land
1966	Similar to 1958.	Undeveloped land	Dirt road and undeveloped land.	Undeveloped land	Undeveloped land
1968	Similar to 1966.	Undeveloped land	Dirt road and undeveloped land.	Undeveloped land	Undeveloped land
1970	Similar to 1968.	Undeveloped land	Dirt road and undeveloped land.	Undeveloped land	Undeveloped land
1973	Similar to 1970.	Undeveloped land	Dirt road and undeveloped land.	Undeveloped land	Undeveloped land
1976	Similar to 1973.	Undeveloped land	Paved road and residential development is being constructed. Circular water tank is present to the south of the paved road.	Undeveloped land	Undeveloped land
1978	Similar to 1976.	Undeveloped land	Spring Canyon Road and residential properties.	Undeveloped land	Undeveloped land

Table 3 (continued)
AERIAL PHOTOGRAPH SUMMARY

Year	Subject Property	North	South	West	East
1983	Similar to 1978. Additional structures including the garage building and stables appear to be present at the subject property. The main house appears to have been expanded.	Undeveloped land	Spring Canyon Road and residential properties	Undeveloped land	Undeveloped land
1989	Similar to 1989.	Undeveloped land	Spring Canyon Road and residential properties.	Residential properties	Undeveloped land
1995	Similar to 1989.	Undeveloped land	Spring Canyon Road and residential properties.	Residential properties	Cypress Canyon Park and residential properties.

3.2 SANBORN MAPS

URS requested Sanborn Maps for the subject property through VISTA. VISTA indicated that there is no coverage for the subject property.

3.3 CITY DIRECTORIES

Representative Polk's and Haines "Criss-Cross" city directories, dating from 1950 to 2000, were reviewed at the City of San Diego's Public Library. No listings for 12270 Spring Canyon Road or 11495 Cypress Canyon Road were found.

3.4 BUILDING DEPARTMENT RECORDS

URS contacted the City of San Diego's Building Department for information regarding the subject property. The Building Department stated that it has records dating back to only 1955. URS reviewed records for the subject property at 11495 Cypress Canyon Road. The following permit was issued for the site.

1993 – Building files at the City of San Diego Department of Building and Safety indicate that an electrical permit was issued to the Renzulli Family Trust to install new electrical service to the subject property.

No other permits were available for the subject property. The file indicated that the previous address listed for the subject property was 12270 Spring Canyon Road.

3.5 LAND TITLE RECORDS

Historical land title records were not provided by the client for review.

3.6 HISTORICAL TOPOGRAPHIC MAPS

URS reviewed a topographic map dated 1953. The subject property is depicted as developed with one structure located in the central portion of the site. Spring Canyon Road is depicted south of the subject property. A road leads from Spring Canyon Road to the structure. A small body of water labeled as a reservoir is on the southern portion of the site. Most of the site is depicted as covered with scrub brush vegetation. Camp Elliott Naval Reservation is one-quarter mile southeast of the subject property. A topographic map is provided as Figure 4.

3.7 PROPERTY TAX RECORDS

Historical property-tax records were not provided by the client for review.

3.8 ZONING/LAND-USE RECORDS

Zoning/land-use records were not provided by the client for review. URS contacted the City of San Diego's Development Services Department for zoning information. The subject property is currently zoned AR 1-1 (agricultural, single dwelling permitted if accessory to agricultural use).

4.1 SITE TOPOGRAPHY

The subject property is in Township 14 South, Range 2 West, Section 27 within the city of San Diego, San Diego County, California. Topographic map coverage of the site vicinity is provided by the U.S. Geologic Survey (USGS), 7.5-minute "Poway, California" quadrangle (1967, photo revised 1975). The subject property varies in elevation from approximately 720 to 980 feet above MSL. The highest peak is in the southeastern portion of the property along a northwest-southeast trending ridge on the north side of Cypress Canyon.

4.2 SITE GEOLOGY

Surficial fill soils, slopewash/alluvium, and Tertiary-age Stadium Conglomerate all underlie the subject property. The Stadium Conglomerate consists of a massive cobble conglomerate with a dark, yellowish-brown, coarse-grained sandstone matrix (CDMG, 1975).

4.3 SURFACE WATER

Based on our site reconnaissance and review of the USGS Poway Quadrangle map, a pond is on the southwestern portion of the subject property. According to Mr. Renzulli, most of the pond had to be drained because people trespassed onto the subject property to use the pond.

4.4 GROUNDWATER

Based on a review of available hydrogeologic documents from the RWQCB, San Diego Region, and the California Department of Water Resources (DWR), the site is in the Poway Hydrologic Area (6.20) within the Penasquitos Hydrologic Unit. Regional surface drainage near the subject property is to the northwest toward Cypress Canyon.

Beneficial or potential uses of groundwater within the Poway Hydrologic Area include municipal, agricultural, and industrial.

Information regarding current depth to groundwater and groundwater flow direction for the subject property was unavailable at the time of this assessment. Based on regional topography, groundwater is anticipated to flow to the northwest.

4.5 RADON

Radon concentrations in the San Diego area were measured in the U.S. EPA/California State Residential Radon Survey conducted during 1989-1990. Data represent charcoal canister measurements over two days from the lowest level of each home tested. A maximum value of 2.4 pico curies per liter (pCi/L) and a mean of 0.6 pCi/L was measured in 39 samples collected in the San Diego area. These concentrations are below the EPA guidance concentration of 4.0 pCi/L for residences (U.S. EPA, 1993). Based on this information, there appears to be low potential for elevated radon concentrations at the site.

5.1 SITE RECONNAISSANCE AND INTERVIEWS

On July 12, 2001, Ms. Heather Couper, a URS representative, conducted a reconnaissance, which consisted of visual observations of the subject property and adjoining properties. Site photographs are provided in Appendix A. The following subsections summarize visual observations that were made during the site reconnaissance.

5.2 PHYSICAL LIMITATIONS

At the time of the site reconnaissance, the weather was sunny, with a temperature of approximately 80 degrees Fahrenheit.

5.3 USE AND STORAGE OF HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

Hazardous substances or petroleum products were not observed during the site reconnaissance.

5.4 STORAGE AND DISPOSAL OF HAZARDOUS WASTES

Hazardous wastes were not observed during the site reconnaissance.

5.5 UNIDENTIFIED SUBSTANCES CONTAINERS

Unidentified substance containers were not observed during the site reconnaissance.

5.6 ABOVEGROUND AND UNDERGROUND STORAGE TANKS

Evidence of onsite USTs (i.e., vent lines, fill or overfill ports, fuel pumps, and emergency power generators) was not observed during the site reconnaissance.

According to Mr. Renzulli, there are three butane ASTs at the subject property. The butane is used onsite to provide power to the water heater, furnace, and range, and to fuel the emergency generator. A 500-gallon butane AST used to store fuel to operate the water heater, furnace, and range is on the north side of the main house. A 100-gallon butane AST used to store fuel for the emergency generator is in the generator shack, southeast of the main house. A 50-gallon butane AST is east of the main house in the guard shack. The 50-gallon butane AST is empty and not in service.

5.7 EVIDENCES OF RELEASES

Evidence of chemical releases on the subject property, (i.e., odors, stressed vegetation, stains, leaks, pools of liquid, and spills) was not observed during the site reconnaissance.

5.8 POLYCHLORINATED BIPHENYLS (PCBs)

Electrical transformers can be a source of PCBs. One pole-mounted transformer was observed on the subject property. The transformer is owned and operated by SDG&E. At the time of the site visit, staining or leakage was not observed adjacent to the transformer. The approximate location of the transformers is depicted in Figure 3.

URS contacted SDG&E for information regarding the PCB content in its electrical transformers. SDG&E stated "that they have never specified PCB transformers for its electrical distribution system. Although only mineral oil transformers were purchased, some older (pre-1980) mineral oil transformers were inadvertently contaminated with PCBs by the manufacturer. Based on SDG&E's statistical sampling and testing program, it is unlikely that the transformers found within this service area are PCB contaminated. The only way to know for certain is to actually obtain and test a sample of the fluid from the specific transformer. EPA regulations do not require the testing of individual mineral oil transformers. Therefore, should a customer desire such a test, there is a charge if the unit is confirmed to be non-PCB, and an electric-service interruption may be necessary."

No other potential PCB-containing equipment was observed onsite.

5.9 WASTEWATER SYSTEMS

Wastewater systems—such as clarifiers, sumps, pits, and grease traps—were not observed on the subject property at the time of the site reconnaissance.

5.10 STORMWATER SYSTEMS

Surface runoff at the subject property appeared to flow via curbs and gutters toward stormwater drains located on the streets adjacent to the site. Significant surface staining or noxious odors were not noted near the storm drains.

5.11 WELLS

Monitoring, water supply, and oil or gas production wells were not observed or reported onsite. Based on the Munger Map Book of California/Alaska Oil and Gas Fields (1997), no oil exploration or production wells were identified on or immediately adjacent to the subject property.

5.12 HIGH-VOLTAGE ELECTRICAL TRANSMISSION LINES

In accordance with Title 5, Section 14010 of the California Code of Regulations (CCR), the property line of the new school site should be at least the following distances from the edge of respective power line easements: (1) 100 feet for a 50 to 133 kV line, (2) 150 feet for a 220 to 230 kV line, and (3) 350 feet for a 500 to 550 kV line.

Overhead electrical transmission lines were observed at the subject property along the driveway that enters the site from Cypress Canyon Road. URS submitted a request to SDG&E for

information regarding the voltage of the power lines. According to Mr. Jim Turman, Senior EMF Specialist with SDG&E, a 12-kV circuit underground line is along Cypress Canyon Road, adjacent to the east of the subject property. At the property boundary, the 12-kV circuit underground line becomes an aboveground, pole-mounted line that continues to the northwest along the main driveway. Mr. Turman indicated that there is a 120- and 240-volt secondary line connecting to the residence from the 12-kV circuit line.

Two parallel, aboveground pole-mounted transmission lines are approximately 600 feet north of the subject property. According to Mr. Turman, the two pole-mounted lines trend northwest-southeast. The southern power line consists of a 138-kV circuit line on twin wood poles. The northern power line consists of 69-kV and 130-kV circuit lines on steel poles.

The locations of the power lines are shown in Figure 3.

5.13 UNDERGROUND PIPELINES

URS made a request to the CSFMO for information regarding the presence of underground petroleum pipelines within a one-mile radius of the subject property. According to the CSFMO, there are no petroleum pipelines under its jurisdiction that are within one mile of the subject property.

URS also requested information from SDG&E regarding high-pressure, natural-gas pipelines at the subject property. According to Ms. Teresa McCarron, a field engineering associate with SDG&E, there is no gas service or gas meter at 11495 Cypress Canyon Road. A 3-inch PVC (reported as plastic) gas pipeline with 60 psi of pressure is on Cypress Canyon Road, adjacent to the east. A 2-inch PVC gas pipeline with 60 psi of pressure is on Mondial Street and Libelle Court, adjacent to the north. A 3-inch PVC gas pipeline with 60 psi of pressure is on Angelique Street, and a 4-inch PVC gas pipeline with 60 psi of pressure is on Cypress Canyon Road, adjacent to the northwest. Service laterals extend from the gas pipelines to the individual residences adjacent to the subject property. These pipelines are used to supply natural gas to the neighborhood. In accordance with Section 17213 of the California Education Code, the presence of pipelines used to supply natural gas to the school and neighborhood is acceptable.

5.14 ASBESTOS AND LEAD-BASED PAINT

URS did not conduct an asbestos or lead-based-paint survey at the subject property. Based on the age of the buildings on the subject property, the potential exists for asbestos-containing material and lead-based paint to be present in onsite buildings. Neither naturally occurring asbestos nor lead-based-paint debris was observed or reported on the subject property.

5.15 LEAD IN DRINKING WATER

URS did not conduct a lead-in-drinking-water survey at the subject property. Drinking water for the subject property is supplied by the City of San Diego Water Department. Available annual water-quality reports indicated that the lead content in the water supplied to the site vicinity is below the maximum contaminant level for drinking-water standards.

5.16 METHANE

Evidence of possible sources of methane gas (i.e., landfills and oil fields) was not observed at the subject property. However, it should be noted that soils are known to have been imported to many urban areas, and the sources of the fill material are unknown.

5.17 PROXIMITY TO AIRPORTS

URS reviewed maps of San Diego to determine if an airport is within two miles of the subject property. No airport is within a two-mile radius of the subject property. The United States Marine Corps Air Station (MCAS) Miramar is within a one-mile radius of the subject property. The MCAS Miramar runways appear to be approximately 3¾ miles southwest of the subject property.

5.18 PROXIMITY TO RAILROADS

URS reviewed maps of San Diego to determine if railroad tracks are near the subject property. Railroad tracks were not observed within 1,500 feet of the subject property.

5.19 PROXIMITY TO PROPANE TANKS

Propane tanks were not observed on or immediately adjacent to the subject property during the site reconnaissance. There are three butane ASTs at the subject property, and these are discussed in Section 5.6.

5.20 HAZARDOUS AIR EMISSIONS AND FACILITIES WITHIN ONE-QUARTER MILE

Pursuant to Assembly Bill 3205 (Waters), which became effective January 1, 1989, the siting of new elementary or secondary schools must meet the requirements of Section 21151.8 of the Public Resources Code. URS contacted the San Diego APCD for information regarding facilities within a one-quarter-mile radius of the subject property that might reasonably be anticipated to emit hazardous air emissions or handle hazardous materials, substances, or wastes. According to the APCD, a grid search of the affected area was conducted and revealed that there are no facilities with the potential to emit air contaminants as outlined in the aforementioned Public Resources Code.

5.21 HIGH-PRESSURE WATER PIPELINES, RESERVOIRS AND WATER STORAGE TANKS

URS contacted the San Diego County Water Authority for information regarding high-pressure water pipeline near the site. Information will be forwarded as it is received.

A large, circular, aboveground water reservoir is southeast of the intersection of Spring Canyon Road and Riesling Drive, approximately 600 feet southeast of the subject property. The reservoir is approximately 1,000 feet above MSL, a higher elevation than the subject property (720 to 980 feet MSL). URS contacted the City of San Diego Water Department for information

regarding the reservoir. According to Ms. Lorraine Gain, Senior Water Utility Advisor for the City of San Diego Water Department, the water reservoir and adjacent pump station are called the Scripps Ranch Reservoir and Scripps McMillin Pump Station. The water reservoir consists of a 3,200,000-gallon steel tank, which was installed in 1975. The tank has a 140-foot diameter and is 28 feet tall. Ms. Gain stated that no leaks have been reported for the reservoir. The reservoir has overflow piping that discharges to the storm drain. The overflow piping consists of an 18-inch reinforced concrete pipe. The overflow pipe crosses under Spring Canyon Road and drains into the canyon, north of Spring Canyon Road. This canyon is adjacent to the southeast of the subject property.

5.22 OTHER CONCERNS

Other environmental concerns were not noted during the site reconnaissance.

6.1 STANDARD ENVIRONMENTAL RECORD SOURCES

On July 19, 2001, URS contracted VISTA to perform a computerized database search of the publicly available federal, state, and local databases. The review was conducted to evaluate whether the subject property or properties near the site have been identified as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

The VISTA Database Report, along with descriptions of each federal, state, and local list, is included as Appendix B. The number in parentheses in the following paragraphs refers to the map identification number on the VISTA maps and in the report. URS extended the radius of the database search by one-quarter mile due to the size of the subject property. Refer to scale on the database maps for the appropriate search distance for the database listings.

6.1.1 Site

The subject property is not identified on the VISTA Report.

Section 25221 of the California Health and Safety Code was also addressed by this review. The subject property was not identified as having had onsite disposal of hazardous waste. Therefore, it appears that the subject property is not a "hazardous waste property."

6.1.2 Offsite

The following paragraphs describe the databases that contain noted properties of environmental concern and include a discussion of the regulatory status of the facilities and potential impact to the subject property.

In accordance with Section 17213 of the California Education Code, properties within one-quarter mile of the subject property that handle hazardous materials, substances, or wastes should be identified. These properties can be inferred from the HE17 and RCRA Small Quantity and Large Quantity Generators lists based on reported inventories and wastes. Please refer to Appendix B for a list of these properties.

The groundwater gradient information provided indicates whether the individual facility is upgradient of, downgradient from, or crossgradient to the subject property in terms of groundwater flow. In the absence of specific information regarding the direction of groundwater flow in the subject area, groundwater flow direction is assumed based on the local topographic information (groundwater flow often follows the topographic gradient). Based on regional topography, groundwater is anticipated to flow toward the west.

United States Environmental Protection Agency, CERCLIS-NFRAP List

This list identifies CERCLIS sites that have been designated "No Further Remedial Action Planned" (NFRAP) and removed from the CERCLIS list. NFRAP sites may include sites where—following an initial investigation—no contamination was found, contamination was removed quickly without the need for the site to be placed on the National Priority List (NPL), or the contamination was not serious enough to require Federal Superfund Action or NPL consideration.

The site was not listed. However, the following two properties are reported as being within a one-half-mile radius of the subject property.

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments
Cleveland National Fore :t Service Center 12500 Pomerado Road	4B	0.37 miles	E	Downgradient	No	The site is listed as a federally owned facility. The site is not listed on the NPL list. Based on the location and downgradient direction from the subject property, there is a low likelihood that this business presents an environmental concern.
MCAS Miramar	5	0.34 miles	SE	Downgradient	No	The site is listed as a federally owned facility. The site is not listed on the NPL list. Based on the location and downgradient direction from the subject property, there is a low likelihood that this business presents an environmental concern.

California Intergrated Waste Management Board, Solid Waste Information System (SWIS), Active, Inactive, and Closed Landfills

As legislated under the Solid Waste Management and Resource Recovery Act of 1972, the California Intergrated Waste Management Board's Solid Waste Information System (SWIS) database and the State Water Resource Control Board's Waste Management Unit Data System (WMUDS) lists solid-waste facilities or landfills (e.g., active solid-waste disposal sites, inactive or closed solid-waste disposal sites, and transfer stations).

The site was not listed. However, the following four properties, reportedly located within a one-half-mile radius, were listed.

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments
North East Miramar San Landfill 0.5 mile Southeast of Pomerado Road, Section 35	2	0.08 mile	SE	Downgradient	No	According to the VISTA Report, the facility is listed as a Solid Waste Site Class III Landfills for non-hazardous solid waste. The facility is listed as a major threat to water quality. URS contacted the City of San Diego Solid Waste Local Enforcement Agency (LEA). According to Ms. Rebecca LaFreniere of the LEA, they have no record of a landfill in this location. The landfill has a SWIS ID number that was assigned in the 1970's to known or proposed landfills. URS contacted the Regional Water Quality Control Board (RWQCB) for information regarding the landfill. The RWQCB does not have any information regarding the landfill

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments
Rose Canyon/Camp Kearny Mesa MCAS Miramar	5	0.34 mile	SE	Downgradient	No	According to the VISTA Report, the facility is listed as closed solid waste disposal site. The operator is listed as U.S. Department of Navy, China Lake. Based on the location and downgradient direction from the subject property, there is a low likelihood that this business presents an environmental concern.
MCAS Miramar Site #1 IAS, Site #2 IAS, Site #3 IAS and Site #4 IAS	5	0.34 mile	SE	Downgradient	No	According to the VISTA Report, the facility is listed as "not reported." No further information was listed on the database. Based on the location and downgradient direction from the subject property, there is a low likelihood that this business presents an environmental concern.

Multiple Agency, Leaking Underground Storage Tank List

The Leaking Underground Storage Tank Information System is maintained by the State Water Resources Control Board, pursuant to Section 25295 of the Health and Safety Code.

The site was not listed. Six LUST sites are reportedly within a one-half-mile radius of the subject property. The LUST sites are discussed below.

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments
MCAS Miramar Building 483	5	0.34 mile	SE	Downgradient	No	A gasoline released occurred on June 15, 1998 affecting the soil and groundwater. The status is listed as "Preliminary Site Assessment Work Plan has been required." Based on the location and downgradient direction, there is a low likelihood that this business presents an environmental concern.
MCAS Miramar Building 498	5	0.34 mile	SE	Downgradient	No	A gasoline released occurred on December 2, 1997 affecting the groundwater The status is listed as "Preliminary Site Assessment Work Plan has been required " Based on the location and downgradient direction, there is a low likelihood that this business presents an environmental concern
Win-Time Ltd Partnership Kearny Mesa Road	5	0.34 mile	SE	Downgradient	No	A released occurred on July 25, 1988l. The status is listed as "Case Closed." Based on the location and regulatory status, there is a low likelihood that this business presents an environmental concern.

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments
MCAS Miramar Building 545	5	0.34 mile	SE	Downgradient	No	A jet fuel released occurred on July 27, 1998 affecting the soil. The status is listed as "Preliminary Site Assessment Work Plan has been required." Based on the location and downgradient direction, there is a low likelihood that this business presents an environmental concern.
MCAS Miramar Miramar Mills Park	5	0.34 mile	SE	Downgradient	No	A diesel released occurred on April 3, 1995 affecting the groundwater. The status is listed as "Case Closed." Based on the location and regulatory status, there is a low likelihood that this business presents an environmental concern.
MCAS Miramar Green Tank Farms #2 and #3	5	0.34 mile	SE	Downgradient	No	A boiler fuel released occurred on August 19, 1998 affecting the groundwater. The status is listed as "Case Closed." Based on the location and regulatory status, there is a low likelihood that this business presents an environmental concern.

Multiple Agency, Underground Storage Tank List

Information regarding USTs registered with the State Water Resources Control Board is provided on the agency's UST list.

The site was not listed. Five UST sites were reportedly within a 0.25-mile radius of the subject property. The UST sites are discussed below.

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments
Cleveland National Forest Service Center 12500 Pomerado Road	4B	0.37 mile	E			The facility is permitted to operate one UST. The UST is listed as "closed/ removed."
MCAS Miramar Building M260/Electra Road	5	0.34 mile	SE			The facility is permitted to operate one UST The UST is listed as "closed/ removed."
Win-Time Ltd Partnership Kearny Mesa Road	5	0 34 mile	SE	Downgradient	No	The facility is permitted to operate three USTs The USTs are listed as "closed/ removed."
MCAS Miramar	5	0 34 miles	SE	Downgradient	No	The facility is permitted to numerous USTs
MCAS Miramar Building 7498, Station Annex	5	0 34 mile	SE	Downgradient	No	The facility is permitted to operate six USTs Three USTs are listed as "closed/ removed "

United States Environmental Protection Agency, Emergency Response Notification System of Spills (ERNS)

The ERNS database reports information on the sudden and/or accidental release of hazardous substances into the environment.

The site was not listed. One ERNS site is reportedly within a one-quarter-mile radius of the subject property. The ERNS site is discussed below.

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments
USN- Naval Station 32nd Street	5	0.34 miles	SE	Downgradient	No	Spills occurred on July 10, 1997, November 8, 1998, February 27, 1992, January 11, 1993, November 21, 1996, February 26, 1997, February 24, 1998, April 22, 1998, March 8, 1999, April 9, 1992, December 31, 1992, January 11, 1993, and October 15, 1993 at the facility. Based on the nature of the listing, there is a low likelihood that this business presents an environmental concern.

United States Environmental Protection Agency, RCRA Generator

This list identifies USEPA-listed facilities that report the generation of reportable quantities of hazardous waste under the RCRA program for the identification and tracking of hazardous waste. The list consists of properties that generate hazardous wastes and is not necessarily indicative of sites where a release of hazardous substances has occurred.

The site was not listed. Four RCRA Generators were reported to be within one-quarter mile of the subject property.

SFPP LP Miramar NAS MCAS Miramar	5	0.34 miles	SE	Downgradient	No	The facility is listed as a RCRA Small Quantity Generator. The owner/operator is listed as Southern Pacific Pipeline. The owner/operator type is listed as private. No violations are listed for the site.

County of San Diego Department of Environmental Health, Hazardous Materials Establishment (HE17)

This list identifies businesses that use hazardous materials or generate hazardous-material waste at quantities that require regulation by the DEH. These businesses report quantities of hazardous materials used, generated, or stored onsite that are subject to inspection by the DEH.

The site was not listed. Nine HE17 sites are reportedly within one-quarter mile of the subject property. The HE17 sites are discussed below.

Address	VISTA Map ID	Distance from Site	Direction from Site	Groundwater Direction	Environmental Concern (Yes/No)	Comments

MCAS Miramar Building 7498, Station Annex	5	0.34 mile	SE	Downgradient	No	No violations are listed.

Based on the regulatory status, there is a low likelihood that the above listings currently present an environmental threat to the subject property.

Other facilities listed on the VISTA report are not expected to have impacted the subject property due to their distance from the subject property, crossgradient to downgradient location, and/or case-closed status. Additionally, none of the sites identified from the VISTA database as "unmapped sites" appear to have the potential to impact the subject site with hazardous materials due to their distance and/or downgradient locations from the subject property. Detailed information for "unmapped sites" are included in the VISTA report in Appendix B.

6.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

In addition to the database list search, URS contacted state and local regulatory agencies to obtain information regarding the environmental condition of the subject property. The following information was received from these agencies:

- California Environmental Protection Agency, Department of Toxic Substances Control, (DTSC) does not have files for the subject property.
- California RWQCB has not responded to our request regarding the subject property.
- APCD does not have files for the subject property.
- County of San Diego, Department of Environmental Health (SDDEH), Hazardous Materials Division, has not responded to our request regarding the subject property.

6.3 OFF-SITE PROPERTIES OF ENVIRONMENTAL CONCERN

URS reviewed a report titled "Report on Refuse Dumps" prepared by the City Planning Commission for the City Council on the dumping of trash and refuse within the city, dated January 31, 1938. The site is not listed in the report. Former refuse dumps were not identified within an approximate one-half-mile radius of the subject property.

Based upon the results of this Phase I ESA, the following findings, opinions, and conclusions are provided.

7.1 FINDINGS

The following presents a summary of the findings and opinions associated with the ESA performed for the existing school site and proposed addition, including known or suspected RECs, historical RECs, and *de minimus* environmental conditions (i.e., conditions that generally do not present a material risk of harm to the public or environment).

- The proposed Scripps Ranch Middle School Renzulli Site consists of approximately 40 acres of land (Figures 2 and 3). The subject property is owned by one homeowner and residentially developed. The central portion of the subject property is developed with a large residential home, stables, and a large building used as a garage. The site terrain varies from steep to gentle hillsides and consists of overgrown shrub brush, trees, and other vegetation. Commercial or industrial structures were not observed on the site.
- Based on our review of historical sources, the subject property has been residentially developed since at least the 1930s.
- Hazardous substances and wastes were not observed on the subject property during the site reconnaissance. Based on the historical and current residential use of the subject property, it is unlikely that significant amounts of hazardous materials have been used at or stored onsite. However, residential properties generally contain small amounts of household hazardous chemicals that should be disposed of properly before any demolition activities.
- Based on the age of the buildings at the subject property, there is a likelihood that asbestos-containing materials and lead-based paint are present. Before demolition activities, an asbestos and lead-based-paint survey should be conducted at the subject property, with appropriate removal of the identified material performed.
- Available annual water-quality reports obtained from the City of San Diego Water Department indicated that the lead content in the water supplied to the subject property is below the maximum contaminant level for drinking-water standards.
- Records reviewed for this assessment revealed that the subject property has not been identified as a current or former hazardous-waste or solid-waste disposal facility. Therefore, it appears that the subject property is not a "hazardous waste property" as defined by Section 25221 of the California Health and Safety Code.
- The subject property was not identified as a hazardous-substance release site by the DTSC as defined by Section 25356 of the Health and Safety Code.
- Based on the U.S. EPA/California State Residential Radon Survey conducted during 1989-1990, the potential for high levels of radon at the subject property appears to be low.
- Evidence of possible sources of methane gas was not observed at the subject property. Our review of the environmental database search indicated that one landfill facility was identified within a one-mile radius of the subject property. The landfill is identified as the North East Miramar San Landfill, 0.5 mile southeast of Pomerado Road, Section 35. The facility is

described as a solid-waste site-Class III Landfill for nonhazardous solid waste. The facility is listed as a major threat to water quality. According to Ms. Rebecca LaFreniere of the LEA, they have no record of a landfill in this location. The landfill has a SWIS ID number that was assigned in the 1970s to known or proposed landfills. URS contacted the RWQCB for information regarding the landfill, but it has no such information.

- Overhead electrical transmission lines were observed at the subject property along the driveway that enters the site from Cypress Canyon Road. URS submitted a request to SDG&E for information regarding the voltage of the power lines. According to Mr. Jim Turman, Senior EMF Specialist with SDG&E, a 12-kV circuit underground line is along Cypress Canyon Road, adjacent to the east of the subject property. At the property boundary, the 12-kV circuit underground line becomes an aboveground, pole-mounted line that continues to the northwest along the main driveway. Mr. Turman indicated that there is a 120- and 240-volt secondary line connecting to the residence from the 12-kV circuit line.

  Two parallel, aboveground pole-mounted transmission lines are approximately 600 feet north of the subject property. According to Mr. Turman, the two pole-mounted lines trend northwest-southeast. The southern power line consists of a 138-kV circuit line on twin wood poles, and the northern power line consists of 69-kV and 130-kV circuit lines on steel poles.

- URS submitted a request to the CSFMO regarding the presence of petroleum pipelines on or within one mile of the subject property. According to the CSFMO, there are no petroleum pipelines under its jurisdiction that are within one mile of the subject property.

- URS submitted a request to SDG&E for information regarding natural gas pipelines near the site. According to Ms. Teresa McCarron, a field engineering associate with SDG&E, there is no gas service or gas meter at 11495 Cypress Canyon Road. A 3-inch PVC (reported as plastic) gas pipeline with 60 pounds psi of pressure is on Cypress Canyon Road, adjacent to the east. A 2-inch PVC gas pipeline with 60 psi of pressure is on Mondial Street and Libelle Court, adjacent to the north. A 3-inch PVC gas pipeline with 60 psi of pressure is on Angelique Street, and a 4-inch PVC gas pipeline with 60 psi of pressure is on Cypress Canyon Road, adjacent to the northwest. Service laterals extend from the gas pipelines to the individual residences adjacent to the subject property. These pipelines are used to supply natural gas to the neighborhood. In accordance with Section 17213 of the California Education Code, the presence of pipelines used to supply natural gas to the school and neighborhood is acceptable.

- URS contacted the San Diego APCD for information regarding facilities within a one-quarter-mile radius of the subject property that might be reasonably anticipated to emit hazardous air emissions or handle hazardous materials, substances, or wastes. According to the APCD, a grid search of the affected area was conducted and revealed that there are no facilities with the potential to emit air contaminants.

- A large, circular, aboveground water reservoir is southeast of the intersection of Spring Canyon Road and Riesling Drive, approximately 600 feet southeast of the subject property. The reservoir is approximately 1,000 feet above MSL, a higher elevation than the subject property (720 to 980 feet MSL). URS contacted the City of San Diego Water Department for information regarding the reservoir. According to Ms. Lorraine Gain, Senior

Water Utility Advisor for the City of San Diego Water Department, the water reservoir and adjacent pump station are called the Scripps Ranch Reservoir and Scripps McMillin Pump Station. The water reservoir consists of a 3,200,000-gallon steel tank, which was installed in 1975. The tank has a 140-foot diameter and is 28 feet tall. Ms. Gain stated that no leaks have been reported for the reservoir. The reservoir has overflow piping that discharges to the storm drain. The overflow piping consists of an 18-inch reinforced concrete pipe. The overflow pipe crosses under Spring Canyon Road and drains into the canyon, north of Spring Canyon Road. This canyon is adjacent to the southeast of the subject property.

- Facilities within 2,000 feet of the subject property and where significant onsite disposal of hazardous waste has occurred are considered a "border zone property" as defined by Section 25221 of the California Health and Safety Code. Based on a review of the VISTA Report, a potential border zone property was identified. MCAS Miramar is identified approximately one-half mile southeast of the subject property on the VISTA Database Report. MCAS Miramar is bisected by I-15, bordered on the west by I-805 on the west, on the south by SR-52, on the east by the City of Santee and Sycamore Canyon County Open Space Preserve, and on the north by Miramar Road and City of San Diego land. The locations of the numerous listings identified for MCAS Miramar was not detailed on the VISTA Database Report. Based on the nature of the listings, the distance and the downgradient direction of the MCAS Miramar, it is URS' opinion that there is a low likelihood that this facility presents an environmental concern.

  Additionally, URS also reviewed a report titled "Report on Refuse Dumps" prepared by the City Planning Commission for the City Council on the dumping of trash and refuse within the city, dated January 31, 1938. The site is not listed in the report. Former refuse dumps were not identified within an approximate one-half-mile radius of the subject property.

- Our review of the environmental database search indicated that several additional properties within the respective search radii have handled hazardous materials or wastes and/or have been listed as having reported releases of hazardous substances or petroleum products. Based on the distances of these properties from the subject property, the direction of groundwater flow, reported chemical uses, and/or the reported nature and severity of their releases, it is unlikely that these properties have adversely affected the environmental integrity of the subject property.

7.2 CONCLUSIONS

Based on the results of this Phase I Environmental Site Assessment, the following conclusions are provided.

- We have performed a Phase I ESA in accordance with the scope and limitations of the ASTM Practice E 1527-00 for the proposed Scripps Ranch Middle School Renzulli Site. This assessment has revealed no evidence of recognized environmental conditions in connection with the proposed school site.
- In accordance with Section 17213 of the California Education Code, further investigation of the subject property is not recommended at this time.

(EXTENDED BY 1/4 MILE)

DESCRIPTION OF DATABASES SEARCHED

A) DATABASES SEARCHED TO 1 1/4 MILES

NPL
SRC#: 19

VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for National Priorities List was March, 2001.

The NPL Report is the US EPA's registry of the nation's worst uncontrolled or abandoned hazardous waste sites. NPL sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980.

SPL
SRC#: 113

VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for CalSites Database was October, 2000.

This database is provided by the Cal. Environmental Protection Agency, Dept. of Toxic Substances Control. The agency may be contacted at: 916-323-3400.

CORRACTS
SRC#: 14

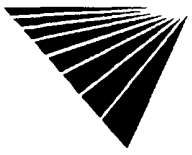

VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for RCRIS Corrective Action Sites was June, 2000.

The CORRACTS database contains information concerning RCRA facilities that have conducted, or are currently conducting a corrective action. A Corrective Action Order is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may also be imposed as a requirement of receiving and maintaining a TSDF permit.

RCRIS-TSDC
SRC#: 556

VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for RCRIS TSDs Subject to Corrective Action was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDCs are treatment, storage and/or disposal facilities that are subject to corrective action under RCRA.

B) DATABASES SEARCHED TO 3/4 MILE

CERCLIS
SRC#: 17

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Comprehensive Environmental Response, Compensation and Liability Information Sys was March, 2001.

The CERCLIS database is a comprehensive listing of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation by the U.S. EPA for the release, or threatened release of hazardous substances. Once a site is placed in CERCLIS, it may be subjected to several levels of review and evaluation, and ultimately placed on the National Priorities List (NPL).

NFRAP
SRC#: 18

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for No Further Remedial Action Planned was March, 2001.

The No Further Remedial Action Planned Report (NFRAP), also known as the CERCLIS Archive, contains information pertaining to sites which have been removed from the U.S. EPA's CERCLIS database. NFRAP sites may be sites where, following an initial investigation, either no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require federal Superfund action or NPL consideration.

SCL
SRC#: 112

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for CalSites Database was October, 2000.

This database is provided by the Department of Toxic Substances Control. Two- thirds of these sites have been classified, based on available information, as needing "No Further Action" (NFA) by the Department of Toxic Substances Control. The remaining sites are in various stages of review and remediation to determine if a problem exists at the site. Several hundred sites have been remediated and are considered certified. Some of these sites may be in long term operation and maintenance.

RCRIS-TSD
SRC#: 12

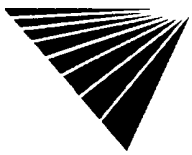

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for RCRIS Treatment, Storage and Disposal Facilities was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDs are facilities which treat, store and/or dispose of hazardous waste.

SWLF
SRC#: 23

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for USGS Solid Waste Landfills was December, 1991.

This database is provided by the United States Geological Survey. The agency may be contacted at: 703-648-5613.

SWLF-CO
SRC#: 70

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for City of Los Angeles Landfills Transfer Stations was April, 1999.

This database is provided by the City of Los Angeles, Environmental Affais Department. The agency may be contacted at: 213-580-1070.

SWLF
SRC#: 163

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Solid Waste Inventory System was January, 2001.

This database is provided by the Integrated Waste Management Board. The agency may be contacted at: 916-255-4021.

WMUDS
SRC#: 68

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Waste Management Unit Data System was February, 1999.

This database is provided by the State Water Resources Control Board. The agency may be contacted at: 530-892-0323. This is used for program tracking and inventory of waste management units. This system contains information from: Facility, Waste Management Unit, SWAT Program and Report Summary Information, Chapter 15 (formerly Subchapter 15), TPCA and RCRA Program Information, Closure Information; also some information from the WDS (Waste Discharge System).

LUST-REG
SRC#: 108

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Region 6 Leaking Underground Storage Tanks was February, 2000.

This database is provided by the Lahontan Region Six South Lake Tahoe. The agency may be contacted at: 530-542-5400.

LUST-REG
SRC#: 109

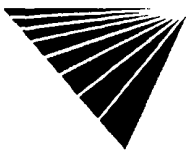

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Region 7 Leaking Underground Storage Tanks was November, 1999.

This database is provided by the Regional Water Quality Control Board, Region #7. The agency may be contacted at: 760-346-7491.

LUST-REG
SRC#: 120

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Region 9 Leaking Underground Storage Tanks was March, 2001.

This database is provided by the Regional Water Quality Control Board, Region #9. The agency may be contacted at: 619-467-2980.

LUST-CO-SD
SRC#: 134

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for San Diego County Environmental Health Services Database was February, 2001.

This database is provided by the San Diego County Dept. of Health Services. It contains information concerning any sites which fall under the jurisdiction of this agency. Cases classified as Releases appear under "County Lust" in this report regardless of the "Cause" or "Case Type". Sites classified as USTs appear under "County UST", and Solid Waste facilities appear under "County SWLF". Sites with violation and/or disclosure information are reported under "SDC Site" in this VISTA report.

LUST
SRC#: 164

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Leaking Underground Storage Tank Information System was March, 2001.

This database is provided by the California Environmental Protection Agency. The agency may be contacted at: 916-341-5740.

CORTESE
SRC#: 53

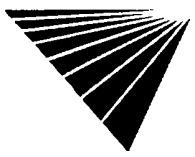

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Cortese List - Hazardous Waste Substance Site List was April, 1998.

This database is provided by the Office of Environmental Protection, Office of Hazardous Materials. The agency may be contacted at: 916-445-6532. The California Governor's Office of Planning and Research annually publishes a listing of potential and confirmed hazardous waste sites throughout the State of California under Government Code Section 65962.5. This database (CORTESE) is based on input from the following: (1)CALSITES-Department of Toxic Substances Control, Abandoned Sites Program Information Systems; (2)SARA Title III Section III Toxic Chemicals Release Inventory for 1987, 1988, 1989, and 1990; (3)FINDS; (4)HWIS-Department of Toxic Substances Control, Hazardous Waste Information System. Vista has not included one time generator facilities from Cortese in our database.; (5)SWRCB-State Water Resources Control Board; (6)SWIS-Integrated Waste Management Control Board (solid waste facilities); (7)AGT25-Air Resources Board, dischargers of greater than 25 tons of criteria pollutants to the air; (8)A1025-Air Resources Board, dischargers of greater than 10 and less than 25 tons of criteria pollutants to the air; (9)LTANK-SWRCB Leaking Underground Storage Tanks; (10)UTANK-SWRCB Underground tanks reported to the SWEEPS systems; (11)IUR-Inventory Update Rule (Chemical Manufacturers); (12)WB-LF- Waste Board - Leaking Facility, site has known migration; (13)WDSE-Waste Discharge System - Enforcement Action; (14)DTSCD-Department of Toxic Substance Control Docket.

BORDER-ZON
SRC#: 46

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Deed Restriction Properties Report was April, 2001.

The Deeds Restrictions list, also known as the Border Zone Property List, contains information concerning voluntary deed restriction. These agreements are made with owners of property who propose building residences, schools, hospitals, or day care centers on property that is on or within 2,000 feet of potentially hazardous waste site.

TOXICPITS
SRC#: 49

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for Toxic Pits was February, 1995.

This database is provided by the Water Quality Control Board, Division of Loans Grants. The agency may be contacted at: 916-227-4396.

USGS-WELLS
SRC#: 3

VISTA conducts a database search to identify all sites within 3/4 mile of your property.
The agency release date for USGS Water Wells was March, 1998.

The Ground Water Site Inventory (GWSI) database was provided by the United States Geological Survey (USGS). The database contains information for over 1,000,000 wells and other sources of groundwater which the USGS has studied, used or documented during research.

C) DATABASES SEARCHED TO 1/2 MILE

RCRIS-VIOL
SRC#: 11

VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for RCRIS Facilities with Violations was June, 2000.

The Resource Conservation and Recovery Act Information System (RCRIS) identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRIS Violations report contains information concerning facilities that have been cited for violations of RCRA, as well as any enforcement actions taken against the facility.

UST
SRC#: 45

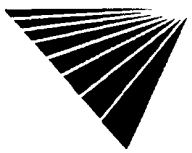

VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Underground Storage Tanks was January, 1994.

This historical database is provided by the State Water Resources Control Board, Office of Underground Storage Tanks. Please refer to the local level UST list for more current information. Be advised that some states do not require registration of heating oil tanks, especially those used for residential purposes.

UST-CO-SD
SRC#: 133

VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for San Diego County Environmental Health Services Database was December, 1999.

This database is provided by the San Diego County Dept.of Health Services. It contains information concerning any sites which fall under the jurisdiction of this agency. Cases classified as Releases appear under "County Lust" in this report regardless of the "Cause" or "Case Type". Sites classified as USTs appear under "County UST", and Solid Waste facilities appear under "County SWLF". Sites with violation and/or disclosure information are reported under "SDC Site" in this VISTA report.

UST-CO-SD
SRC#: 136

VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for San Diego County Environmental Health Services Database was February, 2001.

This database is provided by the San Diego County Department of Health Services. The agency may be contacted at: 619-338-2268. Be advised: Many states do not require registration of heating oil tanks, especially those used for residential purposes.

AST
SRC#: 60

VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Aboveground Storage Tanks was January, 2001.

This database is provided by the State Water Resources Control Board. The agency may be contacted at: 916-227-4364.

TRIS
SRC#: 2

VISTA conducts a database search to identify all sites within 1/2 mile of your property.
The agency release date for Toxic Release Inventory System was January, 1998.

All facilities that manufacture, process, or import toxic chemicals in quantities in excess of 25,000 pounds per year are required to register with the EPA under Section 313 of the Superfund Amendments and Reauthorization Act (SARA Title III) of 1986. Data contained in the TRIS system covers approximately 20,000 sites and 75,000 chemical releases.

D) DATABASES SEARCHED TO 3/8 MILE

ERNS
SRC#: 8

VISTA conducts a database search to identify all sites within .375 mile of your property.
The agency release date for Emergency Response Notification System was December, 2000.

ERNS is a national computer database system that is used to store information on the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. The ERNS reporting system contains preliminary information on specific releases, including the spill location, the substance released, and the responsible party.

RCRA-LQG
SRC#: 16

VISTA conducts a database search to identify all sites within .375 mile of your property.
The agency release date for RCRIS Large Quantity Generators was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Large Generators are facilities which generate at least 1000 kg./month of non-acutely hazardous waste (or 1 kg./month of acutely hazardous waste).

RCRIS-SQG
SRC#: 15

VISTA conducts a database search to identify all sites within .375 mile of your property.
The agency release date for RCRIS Small Quantity Generators was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Small Quantity Generators are facilities which generate less than 1000 kg./month of non-acutely hazardous waste.

RCRIS-NOTI
SRC#: 1298

VISTA conducts a database search to identify all sites within .375 mile of your property.
The agency release date for RCRIS Notifiers was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal.The RCRIS Notifiers contains information on formerly regulated RCRA sites with more complete historical information.

SPILLS
SRC#: 69

VISTA conducts a database search to identify all sites within .375 mile of your property.
The agency release date for Region 9 SLIC Listing was March, 1994.

This database is provided by the Regional Water Quality Control Board, Region #9. The agency may be contacted at: 619-467-2980.

HE17
SRC#: 132

VISTA conducts a database search to identify all sites within .375 mile of your property.
The agency release date for San Diego County Environmental Health Services Database was February, 2001.

The HE-17 database contains information concerning any site regulated by the San Diego County Department of Health Services. Cases classified as releases appear under "County LUST" in this report regardless of the cause or case type. Sites classified as UST's appear under "County UST", and solid waste facilities appear under "County SWLF".

End of Report

Appendix D:

Qualifications

AREAS OF EXPERTISE

- Program Management
- Preliminary Endangerment Assessments
- Removal Actions
- Remedial Investigations
- Feasibility Studies
- Remedial Action Plans
- Site Investigation and Site Assessment
- RCRA Facility Assessments

EDUCATION

California State University, Fullerton: B.S., Civil Engineering, 1990

REGISTRATION

Registered Environmental Assessor II (Pending)

Registered Civil Engineer: California, No. C57326

PROFESSIONAL HISTORY

URS
Senior Project Engineer, 1995-date

REPRESENTATIVE EXPERIENCE

Mr. Hernandez has provided engineering services for numerous large and complex projects with extensive regulatory agency, community, contractor, and tenant interface. He has also managed projects that involved for site assessments, soil and groundwater investigations, facility audits, soil remediation projects, waste minimization projects, and environmental due diligence services. Responsibilities included agency negotiations with DTSC, preparing work plans, evaluating analytical data, developing cost estimates, managing field efforts, client coordination, and cost and schedule controls. Mr. Hernandez has been responsible for obtaining site closure and delisting from DTSC CalSites database for two properties located in the Los Angeles area. His project experience includes:

- **Los Angeles Unified School District, Los Angeles, California**. Mr. Hernandez is a Project Manager responsible for conducting more than 12 Preliminary Endangerment Assessments for proposed school sites within the Los Angeles Unified School District jurisdiction. As Project Manager, Mr. Hernandez is responsible for developing PEA Work Plans, negotiating site assessment strategies with the Department of Toxic Substances Control, implementing PEA Work Plans, conducting human health risk assessments, and preparing PEA reports. Mr. Hernandez has successfully achieved recommendations of "No Further Action" from DTSC within a 5-month time period.
- **California Environmental Protection Agency, Department of Toxic Substance Control**. Mr. Hernandez recently served as Program Manager for a task order based environmental investigation and remediation contract with DTSC's Region 3 Site Mitigation Branch. As program manager, Mr. Hernandez has managed multiple PEA and RI/FS investigations at various facilities throughout Southern California and has performed a Hazard Ranking Analysis for manufacturing facilities located in San Fernando, California. Mr. Hernandez recently obtained site closure and delisted a former metal plating facility located in Santa Ana, California from DTSC's CalSites database. As a result of this project, Mr. Hernandez has developed an outstanding working relationship with DTSC's Region 3, Site

Mitigation Branch.

- **Environmental Services Contract, Port of Los Angeles (POLA), California**. As Deputy Program Manager, Mr. Hernandez was responsible for maintaining overall cost and schedule control for the contract agreement between POLA and URSGWC. Additionally, Mr. Hernandez was responsible for coordinating subcontractors on the URSGWC project team, preparing and submitting monthly project reports and ensuring that task orders are conducted in accordance with the contract agreement. As the Site Investigation Task Manager, Mr. Hernandez was responsible for managing multiple Phase I and II Site Investigations at properties located within the Harry Bridges Boulevard realignment area. This project required that Mr. Hernandez coordinate field investigation activities with the Port's Environmental, Real Estate, and Engineering Departments as well as the various property owners and their tenants. Mr. Hernandez also served as the Project Manager for the remediation of a former TSDF facility that resulted in a site closure letter from DTSC. Mr. Hernandez was responsible for revising a Remedial Action Work Plan that resulted in a saving of more than $250,000 for the Port of Los Angeles.

- **Site Characterization, Hazardous Materials Site Assessment Services Contract, Port of Long Beach (POLB), California.** For this project, Mr. Hernandez served as the Deputy Program Manager and Task Manager responsible for coordinating all site characterization task orders assigned to URSGWC. His responsibilities included developing cost proposals, preparing and implementing work plans, evaluating analytical data, preparing and submitting site investigation reports, identifying remedial action alternatives and developing cost estimates for implementing recommended remedial action alternatives. During the performance of this contract, Mr. Hernandez has managed multiple site investigations for properties located within the Anaheim Boulevard realignment project area. Additionally, Mr. Hernandez conducted a groundwater investigation for the Ocean Boulevard Storm Drain expansion project

- **Navy CLEAN Contract, MCAS El Toro, California.** Lead Project Engineer and Field Manager for a $5,000,000 RCRA Facility Assessment (RFA) conducted

at MCAS El Toro. Mr. Hernandez was responsible for developing a visual site inspection strategy for more than 300 solid waste management units located throughout the Installation. He also served as the field manager for the field sampling effort, which involved drilling and sampling more than 600 exploratory soil borings and collecting over 1,500 soil samples over a 3-month period. Because of pending fines, the investigation work was conducted under an expedited schedule and finished 1 month ahead of schedule. As field manager, responsibilities included coordinating with the Navy, Station personnel, over 30 field personnel, regulatory agencies, local community members, and scheduling field activities such that sensitive habitats and/or endangered species were not impacted.

- **Navy CLEAN Contract, MCAS El Toro, California.** Field Manager for base closure environmental planning projects for MCAS El Toro. Project responsibilities included maintaining overall cost and schedule controls, reviewing regulatory agency and activity records and environmental reports prepared for the Station. Performed a detailed evaluation of historic aerial photographs to identify areas of potential environmental concern on-Station. Developed and implemented a complex confirmation sampling program at agricultural areas on-Station to verify that residual pesticide/herbicide levels were below regulatory criteria. The successful completion of this project required extensive coordination with the Station's tenants, military personnel, regulatory agency personnel, and members of the local community.

- **California Department of General Services.** Operations Project Manager for eight underground storage tank installation, removal, and upgrade projects through California. As the Project Manager, Mr. Hernandez is responsible for negotiating with the regulatory agencies to obtain site closure where UST were removed and/or remediation activities were necessary. Mr. Hernandez was also responsible for coordinating and managing construction activities to ensure that new tanks were installed in accordance with client specifications and UST regulations.

may be disturbed during upcoming seismic retrofit activities. The majority of the areas affected by the seismic retrofit activities consisted of hospital lobbies and corridors, electrical, telecommunication, and mechanical rooms.

- **County of San Diego, Department of Public Works, San Diego, California.** Conducted Phase II Site Characterization for soil and groundwater contamination in the area of removed underground storage tanks and fuel dispensing islands at Department of Public Works Road Stations. The scope of work included soil sampling, installation of groundwater monitoring wells, quarterly groundwater sampling, and preparation of quarterly monitoring reports.
- **Various clients and locations, Arizona, Hawaii, Washington, and California.** Managed and conducted numerous Phase I Environmental Site Assessments for lending institutions, developers, and commercial and industrial clients. Sites have included auto repair, industrial and manufacturing facilities.
