censed Contractor's Declaration I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7
sion 3 of the Business and Professions Code, and my license is in full force and effect.

ignature Title AGENT Date 5/22/0

Workers' Compensation Declaration: I hereby affirm under penalty of perjury one of the following declarations

⌟ a. I have and will maintain a certificate of consent to self-insure for workers' compensation as provided by Section 3700 of the Labor Code, for the performance of the work for which th
issued.

☒ b. I have and will maintain workers' compensation, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compen
ance carrier and policy number are
Insurance Company STATE FUND Policy No. 47 1554977-00 Expiration Date 4/1/02

This section need not be completed if the permit is for one hundred dollars ($100) or less.

⌟ c. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Law
wa, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Signature Date 5/22/01

Warning: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars ($100,000), i
the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees.

Owner-Builder Declaration: I hereby affirm that I am exempt from the Contractor's License Law for the following reason [Sec. 7031.5, Business a
Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant
to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9, commencing with Section 7000, of D
Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applica
subjects the applicant to a civil penalty of not more than five hundred dollars ($500)]:

⌟ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Profe
Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such imp
and the structure is not intended or offered for sale. However, if the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or impro
for sale.)

⌟ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law do
owner of property who builds or improves thereon, and contracts for such projects with contractor(s) licensed pursuant to the Contractor's License Law.)

⌟ I am exempt under Section B & P C for this reason

LICENSED CONTRACTORS DECLARATION I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Contractor's Signature

OWNER-BUILDER DECLARATION I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. B.&P.C. for this reason

Owner's Signature

WORKER'S COMPENSATION DECLARATION I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation insurance, or a certified copy thereof (Sec. 3800, Lab. C.), filed with the Building Inspection Department.

Executive Summary

Harris & Associates (Harris) has prepared this Cultural Resources Technical Report in support of the Subsequent Environmental Impact Report (SEIR) for the proposed Midway Rising Project (Project) in the City of San Diego (City), California. This report is intended to provide the results of the desktop cultural survey and provide a Project-level analysis of the potential impacts that could occur to cultural resources as a result of Project implementation. The Project site includes 3220, 3240, 3250, 3350, and 3500 Sports Arena Boulevard and 3467, 3487, and 3495 Kurtz Street.

When fully developed, the Project would consist of approximately 4,627 residential units, including affordable units, public parks and open space, a multi-purpose entertainment center, and commercial uses. The Project would also include infrastructure improvements on and off site, including extensions and/or upgrades of existing water, sewer, storm drain, drainage, roadways, bike paths, transit, mobility, and pedestrian facilities.

An evaluation of cultural resources was conducted through review of background data from the California Historical Resources Information System (CHRIS), the Native American Heritage Commission (NAHC), Tribal outreach, and data collected during the Phase II Environmental Assessment (SCS Engineers 2023a). A portion of one known historic resource (CA-SDI-10530H/P-37-010530) is within the southwestern portion of the Project site and off-site improvements areas. Based on the desktop survey, this portion of CA-SDI-10530H/P-37-010530 was determined not to be potentially significant pursuant to the California Environmental Quality Act (CEQA). A copy of this Cultural Resources Technical Report will be submitted to the South Coastal Information Center (SCIC) upon approval from the lead agency. No further work is recommended.

The Project is required to comply with all federal, state, and local regulations applicable to cultural resources.

This page intentionally left blank.

Section 1 Introduction

Harris & Associates (Harris) was contracted by Midway Rising, LLC (Project applicant), to conduct a desktop literature review and evaluate artifacts identified during the Phase II Environmental Site Assessment (SCS Engineers 2023a) in support of the Subsequent Environmental Impact Report (SEIR) for the proposed Midway Rising Project (Project) in the City of San Diego (City), California.

1.1 Purpose of the Report

The purpose of this Cultural Resources Technical Report is to document the cultural resources that are present on the Project site; identify potential impacts to cultural resources associated with implementation of the Project; and identify avoidance, minimization, and/or mitigation measures consistent with federal, state, and local rules and regulations, including the San Diego Municipal Code (SDMC) Historical Resources Guidelines (City of San Diego 2022), City's Historical Resource Technical Report Guidelines and Requirements (City of San Diego 2012), and City's California Environmental Quality Act (CEQA) Significance Determination Thresholds (City of San Diego 2016). This report includes an introduction; a discussion of environmental setting; Project description; a summary of the federal, state, and local regulations applicable to cultural resources; methods for the desktop literature review and artifact evaluation conducted for the Project and limitations; results reflecting artifacts collected during the Phase II Environmental Site Assessment, a description and analysis of existing cultural resources; and an analysis of potential Project impacts, including mitigation required to reduce potential impacts from Project implementation to below a level of significance.

The term "historical resources" refers to buildings, structures, signs, features, place names, objects, archaeological sites, districts, landscapes possessing physical evidence of human activities that are typically over 45 years old, and Traditional Cultural Properties and/or Resources. The term "Traditional Cultural Property" refers to property that is eligible for inclusion in the National Register of Historic Places (NRHP) because of its association with cultural practices or beliefs of a living community that (1) are rooted in that community's history and (2) are important in maintaining the continuing cultural identity of the community.

The cultural investigation described in this report was implemented to support the City's responsibilities under CEQA and the SDMC to reduce or eliminate impacts to cultural resources resulting from implementation of the Project.

This page intentionally left blank.

Section 2 Project Setting

2.1 Project Description

The Project, which would redevelop the existing San Diego Sports Arena (currently named Pechanga Arena)-related land owned by the City and privately owned parcels around the arena, would consist of a mix of uses including entertainment, retail, restaurants, residential, recreational, public, and park uses. The Project would include the approval and implementation of the Midway Rising Specific Plan (Specific Plan), which provides guidance and direction on land use, development standards, site planning, building design, and landscape design and centers on five key elements including housing, entertainment, retail, open space, and mobility.

The Project would provide up to 4,627 housing units, including affordable units, to provide a variety of multi-family housing opportunities throughout the Specific Plan Area. A central organizing element of the Specific Plan would be a network of public spaces consisting of approximately 8.2 acres of public parks and 6.9 acres of open space in a network of plazas, promenades, paseo greens, and streetscapes. The Project would provide an interconnected mix of active and public spaces and parks with varying sizes, activities, designs, and landscapes. In addition, the Project would include a maximum of 140,000 square feet of commercial retail space and an entertainment center that would replace the San Diego Sports Arena. The Project would also include infrastructure improvements on and off site primarily within existing rights-of-way, including extensions and/or upgrades of existing water, sewer, storm drain, drainage, roadways, bike paths, transit, mobility, and pedestrian facilities.

The cultural resources study consists of a desktop literature review of the Project site and evaluation of resources. Harris senior archaeologist Donna Beddow, RPA, who served as the principal investigator, meets the Secretary of the Interior's Professional Standards for Archaeology (Appendix A, Resumes).

2.2 Project Location

The Project is in the northernmost section of the Midway-Pacific Highway Community of the City of San Diego, California (Appendix B, Figures; Figure 1, Regional Location). The Project site is south of Mission Bay; west of Mission Valley, Old Town, and Mission Hills; north of Liberty Station and the San Diego International Airport; and east of Ocean Beach and Point Loma. It encompasses approximately 52.07 acres of developed land and is generally bounded by Kurtz Street to the north, Sports Arena Boulevard to the south, Hancock Street at the northwestern corner, and commercial properties to the west and east, approximately aligned east of Greenwood Street (Appendix B, Figure 2, Project Location). The Project site includes the City-owned Sports Arena site (APN 441-590-04) and three privately owned parcels along Kurtz Street (APNs 441-330-01, 441-330-11, and 441-330-12). Street addresses on the Project site include 3220, 3240, 3250, 3350, and 3500 Sports Arena Boulevard and 3467, 3487, and 3495 Kurtz Street. Regional transit corridors include Interstate 8 to the north, Interstate 5 to the east,

and the Old Town Transit Center, offering bus and rail service (COASTER, Amtrak, and San Diego Metropolitan Transit System trolley) approximately 0.4 mile to the northeast of the Project. The Project is in Section 29 of Township 16 South, Range 03 West (Appendix B, Figure 3, USGS Topographic Map). Photographs of existing conditions are provided in Appendix C, Photographs.

2.3 Environmental Setting

2.3.1 Natural Environment

The Project site is surrounded by urban development, including community commercial services (such as grocery stores, drugstores, hardware, and auto-related services), regional commercial (such as big box retailers and hotels), and community-serving uses (such as medical facilities and City services). Adjoining uses include commercial and office uses to the west, light industrial and office space to the north along Kurtz Street, and a parking structure and the Rosecrans Plaza Shopping Center to the east. The Sports Arena Shopping Center is directly south of Sports Arena Boulevard. Multi-family residential uses of varying scales and densities are farther west and south of the Project site.

Historically, the Project site was an area of tidal marshes and flats where the San Diego River flowed alternately into San Diego Bay and Mission Bay. Early attempts at developing the Project site were impeded by these swamp-like conditions. Eventually, the San Diego River mouth was channelized to flow into the Pacific Ocean between the two bays. Development of the area was based largely around regional transportation improvements including railways and highways, military development, and aviation.

The Project site is developed with a variety of commercial, industrial, and entertainment uses. Specifically, the western area of the site includes the San Diego Sports Arena (currently named Pechanga Arena), a gas station, a car wash, fast food and sit-down restaurants, and paved surface parking areas. The eastern area of the site primarily includes commercial uses including but not limited to a lumber and home center, a thrift store, a homeless shelter, an indoor music venue, a martial arts institute, a fitness center, an art institute, a freight forwarding service, office buildings, and associated surface parking. The entire Project site is primarily developed with impermeable areas.

The roadways along the Project frontage include Sports Arena Boulevard to the south and Kurtz Street to the north. Roadways near the Project site include Hancock Street, Kemper Street, Camino Del Rio West, Rosecrans Street, East Drive, West Drive, West Point Loma Boulevard, and Midway Drive. The Project site is accessible via 20 driveways, including four signalized driveways along Sports Arena Boulevard that provide access to the Project site at Kemper Street, West Drive, and East Drive (two driveways), respectively. Unsignalized driveways also provide site access from Kurtz Street and Sports Arena Boulevard to various portions of the site.

The Project site is underlain by artificial fill, paralic estuarine deposits, and old paralic deposits all primarily associated with the San Diego River delta. The Project site generally consists of flat land

with little to no topographic contours. The on-site elevation ranges from approximately 10 to 15 feet above mean sea level. The highest elevations surround the existing Pechanga Arena, while the lowest elevations are in the northwestern area of the Project site.

2.3.1.1 Climate

On a regional level, the County of San Diego (County) has a Mediterranean climate, which is characterized by wet winters and dry summers. This is largely because of a semi-permanent high-pressure zone that sits over the Pacific Ocean during much of the year and forms a fog belt (marine layer). The survey area is generally west of the Peninsular Ranges of Southern California. The generalized climate in the region is dry, subhumid mesothermal, which pushes the growing season to the wet months of the year (late winter to early spring). The rainy season in the County typically lasts from October through March. Summer months include June, July, August, and September. Native vegetation often goes dormant during the later summer months until the wet season rains start in the fall.

Average temperatures for this area range from 56 to 70 degrees Fahrenheit (°F). Typically, August is the warmest month, June is the driest month, February is the wettest month, and January is the coldest month of the year. Average precipitation in the rainy season ranges between 0.67 inch and 1.76 inches per month (October to March). The average annual precipitation for the survey area between 2000 and 2023 was approximately 9 inches. In 2023, the total annual rainfall was 12.94 inches, approximately 7.55 inches more than the previous year and 3.79 inches higher than the average annual precipitation between 2000 and 2023 (NRCS 2024).

2.3.1.2 Flora and Fauna

Harris biologists conducted a biological survey of the Project site in 2023. One land cover type, urban/developed land, was documented in the survey area. Nearly all plant species identified in the survey area are ornamental plants for aesthetic (landscaping) purposes or non-native invasive weed species that typically occupy severely disturbed areas. No native vegetation communities or habitat types were identified (Harris 2024).

A total of seven wildlife species, all native, were observed on the Project site. In total, two mammals, one reptile, and four birds were observed in the survey area. Common bird species observed in the survey area include western gull (Larus occidentalis), American crow (Corvus brachyrhynchos), and rock pigeon (Columba livia). No sensitive wildlife species were observed in the survey area during the 2023 biological survey (Harris 2024).

2.4 Cultural Setting

2.4.1 Prehistoric

Cultural resources found throughout the City are reminders of the City's historical record. Cultural resources are the tangible or intangible remains or traces left by prehistoric or historical people who inhabited the San Diego region. They encompass both the built (post-1769) and the archaeological environments, as well as Traditional Cultural Properties; are typically in protected areas near water sources and multiple ecoregions; and can include Traditional Cultural Places, such as gathering areas, landmarks, and ethnographic locations.

The following provides a brief cultural background for the City.

2.4.1.1 Paleoindian Period (Pre-5500 BC)

Several terms are used for the early occupation of the San Diego region and include Paleoindian period, Early Archaic period, Initial period, and Scraper Maker period (Moratto 1984). The Paleoindian period dates from 9000 to 5500 BC (Chartkoff and Chartkoff 1984; Moratto 1984; Rogers 1966; Taylor and Meighan 1978; Warren and True 1961). Early humans have been characterized as an early nomadic, hunting culture whose settlements were located on mesas and ridge tops and in deserts (Erlandson and Colton 1991; Rogers 1966; Wallace 1978; Warren et al. 1961). During this period, inhabitants relied on large game for subsistence (Rogers 1966; Warren et al. 1961) and produced "finely worked blades, spear points, choppers, and scrapers out of fine-grained volcanics" (Carrico 1977). In addition, leaf-shaped knives, foliate to ovoid bifaces, foliate to short-bladed shoulder points, crescents, engraving tools, core hammers, pebble hammers, and cores were part of the tool assemblage (Moratto 1984; Wahoff and Dolan 2000). Pottery and milling stones were missing from the assemblage, confirming the assumption that hunting was an economic focus for the culture (Moriarty 1967; Warren and True 1961). Because the tool assemblage was similar to desert cultures of the Mojave Desert, it is believed that this culture migrated west from the desert into California (Gallegos 1995; Rogers 1939). However, no single hypothesis is universally accepted. Other hypotheses identify the movement of people into California from the south and north down the coast (Taylor and Meighan 1978; Chartkoff and Chartkoff 1984).

2.4.1.2 Archaic (8000 BC–AD 500)

According to Hale et al. (2018), "the more than 1500-year overlap between the presumed age of Paleoindian occupations and the Archaic period highlights the difficulty in defining a cultural chronology in the San Diego region." The Archaic period is also known as La Jollan, Millingstone Horizon, and Encinitas Tradition. This period is characterized by the presence of dart points, milling, equipment, scattered hearths, shell middens, and flexed burials (Carrico 1977). Subsistence strategies placed an emphasis on gathering, possibly as a result of environmental change (Wahoff and Dolan 2000; Wallace 1978). The assemblage was composed of milling implements and

cobble/core-based tools. The flaked tools do not appear to be as refined as those of the Paleoindian period. Mortuary goods included shell beads and ornaments, projectile points, and milling implements. Wallace (1978) interpreted archaeological sites of this period as an indication of an increase in population and permanence. Site types included coastal shell habitation bases, quarries, resource exploitation, and milling (Gallegos 1995). The sites are typified by an abundance of shellfish remains and are situated near sloughs and lagoons and on the open coast (Carrico 1977; Masters and Gallegos 1997; Moratto 1984; Wallace 1978). An inland manifestation identified as the Pauma complex is known to have existed (True 1958). Unlike the coastal people, this complex occupied "transverse valleys and sheltered canyons of inland San Diego county, ha[d] an emphasis on hunting and gathering, had a greater diversity of tool types, and lacked shellfish remains" (Masters and Gallegos 1997:12).

Similar to the Paleoindian period, controversy surrounds the origins of the Archaic culture. Several hypotheses have been postulated. Kaldenberg (1976) and Moriarty (1967) proposed that the transition from the Paleoindian to the Archaic culture was an in-situ adaptation. In contrast, Warren et al. (1961) viewed this transition as a migration from the desert to the coast due to the adverse environmental condition of the Altithermal. Taylor and Meighan (1978:36) did not take a single position regarding the transition to the Archaic culture but, rather, incorporated all of the hypotheses as identified below:

> The artifact inventory and cultural activities argue strongly that this stage began in the desert inland and spread toward the Pacific Coast, reaching it about 8500 years ago. There is no evidence to show whether the Milling Stone Stage involved movement of the people or a conquest of earlier residents; perhaps the early hunters simply adopted this way of life as game animals became scarce.

The population of this period focused on lagoonal resources and moved up and down the river valleys exploiting a variety of inland and coastal resources (Masters and Gallegos 1997).

2.4.1.3 Late Prehistoric (AD 500–1769)

The Late Prehistoric period is an antecedent to Spanish contact (AD 1000–1769). It was a "time of cultural transformations brought about by trait diffusion, immigration, and *in-situ* adaptation to environmental changes" (Moratto 1984:153). Subsistence strategies involved a focus on terrestrial collection and hunting (Christenson 1992); however, shellfish and other maritime resources were also used. Settlement included large villages near permanent water sources, temporary campsites, quarries, and resource exploitation sites. Small triangular points, pottery, and Obsidian Butte obsidian are characteristic of this period (Christenson 1992; Masters and Gallegos 1997; True 1966, 1970). Cremations replaced flexed inhumations, and mortuary goods became more elaborate (Wallace 1955). Cremations are believed to have been introduced into the area during the Late Prehistoric period and are the result of Shoshonean intrusion (1500 BP) from the deserts (True

1966) into northern San Diego County. However, in the southern part of the County, this practice has been attributed to a "Colorado River origin that may have had an influence as far reaching as the Hohokam [current day Pima people and Tohono O'odham Nation] in southwestern Arizona" (True 1970:58). Kaldenberg (1976:67) had a different opinion on the origin and timing of the entrance of cremation practices into the region. He noted that the practice of cremation was introduced at the terminus of the Archaic culture (3000 BP) with the "migration of Yuman people into the San Diego coastal region." By 2000 BP, inhumations were replaced by cremations (Kaldenberg 1976).

Two complexes (San Luis Rey and Cuyamaca) are identified with the Late Prehistoric period. True (1966) believed that the San Luis Rey complex was a precursor to the ethnographic Luiseño. Similarly, he suggested that the Cuyamaca complex was the predecessor to the ethnographic Kumeyaay. Through the examination of both geographic regions, True identified specific characteristics unique to each; however, he noted that, although geographically similar, these two cultures were distinctly different.

2.4.2 Ethnohistoric Period (Post-AD 1769)

The Ethnohistoric period begins with the first permanent European settlements. Early Ethnohistoric accounts and mission documents have been used to reconstruct this period (Hale et al. 2018). Shipek (1993) delineated the boundaries between the Luiseño and the Kumeyaay as follows:

> In 1769, the Kumeyaay national territory started at the coast about 100 miles south of the Mexican border (below Santo Tomas), thence north to the coast at the drainage divide south of the San Luis Rey River including its tributaries. Using the U.S. Geological Survey topographic maps, the boundary with the Luiseño then follows that divide inland. The boundary continues on the divide separating Valley Center from Escondido and then up along Bear Ridge to the 2240 contour line and then north across the divide between Valley Center and Woods Valley up to the 1880-foot peak, then curving around east along the divide above Woods Valley.

The Kumeyaay (also known as Ipai/Tipai, Diegueño, and Kamia) lived in small villages, or rancherias, and would inhabit multiple locations throughout the year. According to Cline (1984), the typical settlement included two or more seasonal villages with temporary camps farther away from the main central villages. Hunting and gathering were the main economic focus, consisting of small game, acorns, grass seeds, and other plant resources. Similar to the Prehistoric period, a wide range of tools (chipped and ground stone) that were made from locally available materials were used. Exotic materials, such as obsidian and chert, were imported from the deserts to the north and east. In addition to lithic tools, the Kumeyaay produced baskets and pottery.

2.4.3 Historical Period (Post-AD 1542)

The Historical period can be divided into three phases (Spanish, Mexican, and American). Each phase is identified with a change in political power. Common goals in each phase included land gain, assimilation of the native population, and the attainment of wealth. However, these periods were dissimilar in the rationale behind these goals. Rationale included defense (Spain), independence and secularization (Mexico), and expansion and economics (United States). Assimilation of Native Californians was a desire of each government that came to power; however, the greatest misfortune of this period was the large decline in Native American populations (Phillips 1981).

2.4.3.1 Spanish Period (AD 1769–1821)

Although the first Spanish contact occurred in 1542, it was not until 1769 that the first permanent settlement was established. The Spanish period was a time of European expansionism and is typically identified with the mission system. In addition, presidios (military defense) and pueblos (city government) played an important role in the structuring of the community (Campbell 1977). The mission system was the institution designated for the assimilation and exploitation of native people (Campbell 1977; Cline 1979; Jackson and Castillo 1995; Phillips 1981). Jackson and Castillo (1995:6) identified this exploitation as an extension of the "sixteenth-century policy of *congregación/reducción*." In contrast, Costo (1987) noted that the transference of the Spanish Inquisition (originally established in 1478) to the New World was the mechanism for this exploitation because the Inquisition contained economic and religious incentives. The Spanish stronghold in California declined with Spain's loss of the Napoleonic Wars (1803–1815), which eliminated funding to the mission.

2.4.3.2 Mexican Period (AD 1821–1859)

Mexican independence from Spain occurred in 1821, and in 1833, Mexico secularized the missions. After secularization, large tracts of land were granted to private citizens. "The secularization of the missions during the Mexican period is usually regarded as a watershed in California history because it resulted in the replacement of one Hispanic institution by another – the rancho for the mission" (Phillips 1981:33). Like the mission, the rancho became the institution of native exploitation. This period experienced an increase in cattle ranching and the hide and tallow trade (Gallegos 1995; Wahoff and Dolan 2000). The passage of the Treaty of Guadalupe Hidalgo that ended the Mexican–American War in 1848 was the final event that culminated the Mexican period in California.

2.4.3.3 American Period (Post-AD 1850)

The concept of a two-ocean economy and the California Gold Rush were the impetus that brought about the annexation of California (1850) to the United States. A large number of immigrants entered California with the discovery of gold and the availability of free land with the passage of the Homestead Act (1863). This population increase caused the displacement of Native Californians and

brought about a deterioration in their rituals and traditions (Carrico 1986; Gallegos 1995). During this period, the ranchos experienced a decline primarily in response to their inability to validate land ownership as a result of the California Land Claims Act of 1851. "With the discovery of gold, the building of the transcontinental railroad, and the development of crops and cities, people in massive numbers from all parts of the world began to inhabit the region" (Phillips 1981: editors' introduction).

2.4.3.4 Project Site

The following information was taken from the historical background research contained in the Wade (1986), VanWormer (1991), Carrico (1993), Kyle et al. (1998), and ASM Affiliates (2024) studies and documentation.

The southwestern portion of the Project site is historically associated with the West Point Loma Dump or Pueblo Lands Dump (City Dump). The earliest documented use of the Project site is the City Dump, which was in operation between 1899 and 1908, and possibly longer. The City Dump was established by City Ordinance 645 that was passed on July 12, 1899. The City Dump was established at its location for two reasons: (1) the ordinance specifically required that the dump be located no less than 3 miles from the center of the City in 1899, and (2) the proposed dump site was located on a remote piece of land that was mainly an unused marshy slough. The City contracted with Jessie Howells to lease his land for the dump. Howells remained in service to the City until the dump closed in 1908 when the Home Avenue Dump was established. Following the abandonment of the City Dump, the area remained undeveloped and minimally used until the outbreak of World War II.

Prior to the development of the San Diego Sports Arena, the area was previously known as the Frontier Housing Project, which comprised 3,500 temporary dwellings constructed in 1944 to house World War II workers. The buildings were only meant to be used for up to 2 years. However, many remained in place for 20 years. As the push for post-World War II development began, the area was cleared of the old housing and transformed into a modern design consisting of commercial and entertainment buildings. The immediate area around the San Diego Sports Arena is still characterized by these commercial and entertainment uses. Many of the surrounding buildings are newer chain restaurants and department stores.

The greatest change to the area in the 1960s was the construction of the San Diego Sports Arena. It was constructed by Trepte Construction Company and designed by Victor Meyer, an architect who was vice president of development and design (Mark Faders, another architect with the Trepte company applied for the building permit). As early as the 1950s, the City was seeking to attract professional sports franchises. Robert Breitbard acquired the Gulls, then a member of the Western Hockey League, and then laid plans for the construction of an indoor arena. The arena opened in November 1966 and was designed for seating 13,500 for hockey and 16,000 for other sporting and public events. Within a year, a professional basketball team, the San Diego Rockets, was added. The

Gulls continued to play in the arena until 1995 when the team moved from the City. They returned in 2015, and the San Diego Sports Arena is their home base.

2.5 Previous Investigations

Record searches were conducted for the Project's area of potential effects (APE), which includes the Project site and a 1-mile buffer around the site. The 1-mile buffer includes all off-site improvements areas. Staff conducted the records search using the California Historical Resources Information System (CHRIS) (Confidential Appendix D, CHRIS Background Data). Three hundred twenty-seven (327) studies have been conducted within a 1.0-mile radius, and fourteen (14) of the studies (Table 1, Previous Studies within the Project Area of Potential Effects) intersect with the APE. Two hundred fifty-six (256) historic addresses are documented, and one address (P-37-035181, 3500 Sports Arena Boulevard) intersects with the APE. Two hundred and five resources have been previously recorded, and two recorded resources (CA-SDI-10530/P-37-010530 and P-37-035181) intersect with the Project's APE (Table 2, Previously Recorded Cultural Resources within the Project Area of Potential Effects). No historic addresses intersect with the off-site improvements areas; however, one resource (CA-SDI-10530/P-37-010530) is present within the off-site improvements area for Sports Arena Boulevard. P-37-035181 is the San Diego Sports Arena and is also identified as a historic address. The San Diego Sports Arena was assessed under a separate cover. Resources in the records search area include prehistoric (artifact and shell scatters, burials, hearths, and isolates), historic (trash scatters, dumps/privies, foundations, cemeteries, structures, monuments, and cisterns), and multi-component sites. The complete listing of reports, resources, and historic addresses for the search area is provided in Confidential Appendix D.

CA-SDI-10530/P-37-010530 is the City Dump. It was originally recorded in 1986 by Sue Wade. According to Wade (1986), the "city dump was located on the south bank of the San Diego River at the present-day intersection of I-8, West Point Loma Boulevard and Sports Arena Boulevard." Portions of the archaeological site outside the Project site were monitored in 1998, 2003, 2015, and 2019. In 2004, Sawyer and Strudwick identified that CA-SDI-10530/P-37-010530 "appears to be a significant resource under the NRHP and the California Register of Historical Resources (CRHR) (Criteria D and 4, respectively) as well as the City of San Diego Historical Resources Guidelines." No documentation agreeing with this recommendation has been identified during the records search; therefore, it is unknown if the State Historic Preservation Officer (SHPO) has concurred with this assessment.

P-37-035181 is the San Diego Sports Arena at 3500 Sports Arena Boulevard. It was originally recorded and assessed in 2013 by Tara Cubie, again in late 2013 by K.A. Crawford, and then in 2016 by Shannon Loftus for the addition of telecommunications facilities to the structure. The California Department of Parks and Recreation (DPR) form that documents the San Diego Sports Arena states that "the results of the Historic Architectural Resources Inventory and Assessment indicates that the host building appears ineligible for the NRHP/CRHR, but appears to be locally significant" (Loftus

2016a, 2016b). The San Diego Sports Arena was evaluated in 2024 by ASM Affiliates as a historical resource for the purposes of CEQA. Details of the assessment are provided in the Historical Resources Technical Report for San Diego International Sports Arena (ASM Affiliates).

2.6 Applicable Regulations

Cultural resource regulations that apply to the Project site include provisions of CEQA, the California Health and Safety Code, and the CRHR. Historical and archaeological districts, sites, buildings, structures, and objects are assigned significance based on their exceptional value or quality in illustrating or interpreting the heritage of the City in history, architecture, archaeology, engineering, and culture. A number of criteria are used in demonstrating resource importance.

2.6.1 Federal Level Regulations

2.6.1.1 National Register of Historic Places

The NRHP is the nation's official list of historic places. The NRHP is overseen by the National Park Service and requires that a property or resource eligible for listing in the NRHP meet one or more of the following four criteria at the national, state, or local level to ensure integrity and obtain official designation:

a. The property is associated with events that have made a significant contribution to the broad patterns of our history.
b. The property is associated with the lives of persons significant to our past. Eligible properties based on this criterion are generally those associated with the productive life of the individual in the field in which the person achieved significance.
c. The property embodies the distinctive characteristics of a type, period, or method of construction, or represents the work of a master, or possesses high artistic value, or represents a significant and distinguishable entity whose components lack individual distinction.
d. The property has yielded, or is likely to yield, information important to prehistory or history.

In addition to meeting at least one of these four criteria, listed properties must also retain sufficient physical integrity of those features necessary to convey historic significance. The register has identified the following seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association.

Properties are nominated to the NRHP by the SHPO of the state where the property is located, by the federal preservation officer for properties under federal ownership or control, or by the Tribal preservation officer if on Tribal lands. Listing in the NRHP provides formal recognition of a property's historic, architectural, or archaeological significance based on national standards. Documentation of a property's historic significance helps provide for the preservation of the resource.

2.6.2 State Level Regulations

2.6.2.1 California Environmental Quality Act

According to CEQA, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing in the CRHR (California Public Resources Code, Section 5024.1; 14 CCR 4852) including the following:

1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
2. Is associated with the lives of persons important in our past;
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
4. Has yielded, or may be likely to yield, information important in prehistory or history.

The fact that a resource is not listed in or determined to be eligible for listing in the CRHR, not included in a local register of historical resources (pursuant to California Public Resources Code, Section 5020.1[k]), or not identified in an historical resources survey (meeting the criteria in Section 5024.1[g] of the CEQA Guidelines) does not preclude a lead agency from determining that the resource may be an historical resource as defined in California Public Resources Code, Section 5020.1(j) or 5024.1.

2.6.2.2 California Register of Historical Resources (California Public Resources Code, Section 5020 et seq.)

In California, the term "historical resource" includes but is not limited to "any object, building, structure, site, area, place, record, or manuscript which is historically or archaeologically significant, or is significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California" (California Public Resources Code, Section 5020.1[j]). In 1992, the California Legislature established the CRHR "to be used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what

properties are to be protected, to the extent prudent and feasible, from substantial adverse change" (California Public Resources Code, Section 5024.1[a]). A resource is eligible for listing in the CRHR if the State Historical Resources Commission determines that it is a significant resource and that it meets any of the following NRHP criteria (California Public Resources Code, Section 5024.1[c]):

1. Associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
2. Associated with the lives of persons important in our past.
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.
4. Has yielded, or may be likely to yield, information important in prehistory or history.

Resources less than 50 years old are not generally considered for listing in the CRHR but may be considered if it can be demonstrated that sufficient time has passed to understand the historical importance of the resources (14 CCR 4852[d][2]).

The CRHR protects cultural resources by requiring evaluations of the significance of prehistoric and historical resources. The criteria for the CRHR are nearly identical to those for the NRHP, and properties listed or formally designated as eligible for listing in the NRHP are automatically listed on the CRHR, as are the state landmarks and points of interest. The CRHR also includes properties designated under local ordinances or identified through local historical resource surveys. The SHPO maintains the CRHR.

2.6.2.3 California Health and Safety Code, Section 7050.5

California law protects Native American burials, skeletal remains, and associated grave goods regardless of their antiquity and provides for the sensitive treatment and disposition of those remains. California Health and Safety Code, Section 7050.5, requires that, if human remains are discovered in any place other than a dedicated cemetery, no further disturbance or excavation of the site or nearby area reasonably suspected to contain human remains shall occur until the County coroner has examined the remains (California Health and Safe Code, Section 7050.5b). If the coroner determines or has reason to believe the remains are those of a Native American, the coroner must contact the NAHC within 24 hours (California Health and Safe Code, Section 7050.5c). The NAHC will notify the most likely descendant (MLD). With the permission of the landowner, the MLD may inspect the site of discovery. The inspection must be completed within 24 hours of notification of the MLD by the NAHC. The MLD may recommend means of treating or disposing of, with appropriate dignity, the human remains and items associated with Native Americans.

2.6.3 City of San Diego

2.6.3.1 2008 City of San Diego General Plan

The Historic Preservation Element of the 2008 City of San Diego General Plan (2008 General Plan) includes the following cultural resources goals:

A. Identification and Preservation of Historical Resources

- Identification of the historical resources of the City.
- Preservation of the City's important historical resources.
- Integration of historic preservation planning in the larger planning process.

Policies of this goal include the following:

- **HP-A.1:** Strengthen historic preservation planning.
- **HP-A.2:** Fully integrate the consideration of historical and cultural resources in the larger land use planning process.
- **HP-A.3:** Foster government-to-government relationships with the Kumeyaay/Diegueño Tribes of San Diego.
- **HP-A.4:** Actively pursue a program to identify, document and evaluate the historical and cultural resources in the City of San Diego.
- **HP-A.5:** Designate and preserve significant historical and cultural resources for current and future generations.

B. Historic Preservation, Education, Benefits, and Incentives

- Public education about the importance of historical resources.
- Provision of incentives supporting historic preservation.
- Cultural heritage tourism promoted to the tourist industry.

Policies of this goal include the following:

- **HP-B.1:** Foster greater public participation and education in historical and cultural resources.
- **HP-B.2:** Promote the maintenance, restoration, and rehabilitation of historical resources through a variety of financial and development incentives. Continue to use existing programs and develop new approaches as needed. Encourage continued private ownership and utilization of historic structures through a variety of incentives.
- **HP-B.3:** Develop a historic preservation sponsorship program.
- **HP-B.4:** Increase opportunities for cultural heritage tourism.

2.6.3.2 City of San Diego Municipal Code Historical Resources Guidelines

The purpose and intent of the SDMC Historical Resources Guidelines (Chapter 14, Division 3, Article 2) are to protect, preserve, and where damaged, restore the historical resources of the City. The regulations apply to all proposed development within the City when historical resources are present on the premises regardless of the requirement to obtain a Neighborhood Development Permit or Site Development Permit. When any portion of a premises contains historical resources, as defined in SDMC Chapter 11, Article 3, Division 1, the regulations apply to the entire premises.

2.6.3.3 Historical Resource Technical Report Guidelines and Requirements

The City's Historical Resource Technical Report Guidelines and Requirements is the guiding document for the management of historical resources within the City. The intent of the guidelines is to ensure consistency in the management of the City's historical resources including identification, evaluation, preservation/mitigation, and development. In addition, the guidelines also provide an overview of the development review process and requirements for the preparation of cultural resources technical studies.

2.6.3.4 CEQA Significance Determination Thresholds for Historical Resources

Historical resources significance determination, pursuant to the City's CEQA Significance Determination Thresholds, consists first of determining the sensitivity or significance of identified historical resources and, second, determining direct and indirect impacts that would result from Project implementation. The City's CEQA Significance Determination Thresholds define a significant historical resource as one that qualifies for the CRHR or is listed in a local historic register or deemed significant in a historical resource survey, as provided under California Public Resources Code, Section 5024.1(g), although even a resource that is not listed in or determined eligible for listing in the CRHR, not included in a local register, or not deemed significant in a historical resource survey may nonetheless be historically significant for the purposes of CEQA. The SDMC Historical Resources Guidelines state that the significance of a resource may be determined based on the potential for the resource to address important research questions as documented in a site-specific technical report prepared as part of the environmental review process.

Based on the City's CEQA Significance Determination Thresholds, a significant impact regarding historical resources could occur if implementation of a project would result in a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5, including the adverse physical or aesthetic effects and/or the destruction of a prehistoric or historic building (including an architecturally significant building), structure, or object or site.

As a baseline, the City has established the following criteria to be used in the determination of significance for an archaeological resource under CEQA:

An archaeological site must consist of at least three associated artifacts/ecofacts (within a 50 square meter area) or a single feature and must be at least 45 years of age. Archaeological sites containing only a surface component are generally considered not significant, unless demonstrated otherwise. Such site types may include isolated finds, bedrock milling stations, sparse lithic scatters, and shellfish processing stations. All other archaeological sites are considered potentially significant. The determination of significance is based on a number of factors specific to a particular site including site size, type, and integrity; presence or absence of a subsurface deposit, soil stratigraphy, features, diagnostics, and datable material; artifact and ecofact density; assemblage complexity; cultural affiliation; association with an important person or event; and ethnic importance.

The determination of significance for historic buildings, structures, objects and landscapes is based on age, location, context, association with an important person or event, uniqueness, and integrity.

A site will be considered to possess ethnic significance if it is associated with a burial or cemetery; religious, social or traditional activities of a discrete ethnic population; an important person or event as defined by a discrete ethnic population; or the mythology of a discrete ethnic population.

Based on the City's CEQA Significance Determination Thresholds (City of San Diego 2016), a significant impact regarding archaeological resources could occur if implementation of a project would result in a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5, or the disturbance of any human remains, including those interred outside formal cemeteries.

2.6.4 Native American Traditional Cultural Properties

2.6.4.1 Native American Graves Protection and Repatriation Act

The Native American Graves Protection and Repatriation Act of 1990 (NAGPRA), provides a process for federal agencies and institutions that receive federal funds (including museums, universities, state agencies, and local governments) to repatriate or transfer from their collections certain Native American cultural items—human remains, funerary objects, sacred objects, and objects of cultural patrimony—to lineal descendants, and to Native American Tribes, Alaska Native corporations, and Native Hawaiian organizations. NAGPRA also provides a process for federal agencies to address new discoveries of Native American human remains, funerary objects, sacred objects, and objects of cultural property intentionally excavated or inadvertently discovered on federal or Tribal lands. Those processes are detailed in Code of Federal Regulations, Title, Section 10.4. "New" discoveries are those events occurring after November 16, 1990, when NAGPRA was enacted. Consultation with Native American Tribes, Alaska Native corporations, and Native Hawaiian organizations is a critical component for addressing identification, treatment, and disposition of Native American cultural items.

2.6.4.2 Native American Heritage Values

Federal and state laws mandate that consideration be given to the concerns of contemporary Native Americans with regard to potentially ancestral human remains, associated funerary objects, and items of cultural patrimony. Consequently, an important element in assessing the significance of the study site has been to evaluate the likelihood that these classes of items are present in areas that would be affected by the Project.

Also, potentially relevant to prehistoric archaeological sites is the category termed "Traditional Cultural Properties" in discussions of cultural resources management performed under federal auspices. According to Parker and King (1998), "traditional" in this context refers to those beliefs, customs, and practices of a living community of people that have been passed down through the generations, usually orally or through practice. The traditional cultural significance of a historic property, then, is significance derived from the role the property plays in a community's historically rooted beliefs, customs, and practices. Examples of properties possessing such significance include the following:

1. A location associated with the traditional beliefs of a Native American group about its origins, its cultural history, or the nature of the world;
2. A rural community whose organization, buildings and structures, or patterns of land use reflect the cultural traditions valued by its long-term residents;
3. An urban neighborhood that is the traditional home of a particular cultural group, and that reflects its beliefs and practices;
4. A location where Native American religious practitioners have historically gone, and are known or thought to go today, to perform ceremonial activities in accordance with traditional cultural rules of practice; and
5. A location where a community has traditionally carried out economic, artistic, or other cultural practices important in maintaining its historic identity.

A Traditional Cultural Property, then, can be defined generally as one that is eligible for inclusion in the NRHP because of its association with cultural practices or beliefs of a living community that (1) are rooted in that community's history and (2) are important in maintaining the continuing cultural identity of the community.

2.6.4.3 California Native American Graves Protection and Repatriation Act

In 2001, the California Legislature passed Assembly Bill (AB) 978, the California Native American Graves Protection and Repatriation Act of 2001, requiring all state agencies and museums that receive state funding and that have possession or control over collections of human remains or cultural items to provide a process for the identification and repatriation of these items to the appropriate Tribes. The bill also created a Repatriation Oversight Commission with oversight authority. The intent of the legislation was to cover gaps in the federal NAGPRA specific to the State

of California. After the Repatriation Oversight Commission remained unfunded for over a decade, the NAHC was granted oversight authority. The NAHC was given more responsibilities in 2018 under AB 2836 and in 2021 under AB 275. AB 2836 requires the NAHC to provide technical assistance to the University of California in adopting policies and procedures adopted to expedite repatriation of remaining items in its possession. AB 275 requires the NAHC to maintain a list of California Native American Tribes and their state aboriginal territories, adopt mediation procedures, and publish notices of completion of preliminary inventories and summaries on the NAHC website. Pursuant to Section 8013(a) of the California Health and Safety Code, the NAHC maintains a list of all California Native American Tribes and their respective state aboriginal territories for the purpose of the repatriation of Native American human remains and cultural items.

2.6.4.4 Native American Historic Resource Protection Act

California Public Resources Code, Sections 5097 et seq., codify the procedures to be followed in the event of the unexpected discovery of human remains on nonfederal public lands. Section 5097.9 states that no public agency or private party on public property shall "interfere with the free expression or exercise of Native American Religion." The code further states that:

> No such agency or party [shall] cause severe or irreparable damage to any Native American sanctified cemetery, place of worship, religious or ceremonial site, or sacred shrine… except on a clear and convincing showing that the public interest and necessity so require. County and city lands are exempt from this provision, expect for parklands larger than 100 acres.

2.6.4.5 City of San Diego CEQA Significance Determination Thresholds for Tribal Cultural Resources

CEQA was amended in 2014 through AB 52, which created a new category of "Tribal Cultural Resources" (TCRs) that must be considered under CEQA and applies to all projects that file a Notice of Preparation or Notice of Intent to Adopt a Negative Declaration or Mitigated Negative Declaration on or after July 1, 2015. AB 52 requires lead agencies to provide notice to and begin consultation with California Native American Tribes that are traditionally and culturally affiliated with the geographic area of a Project if that Tribe has requested, in writing, to be kept informed of projects by the lead agency prior to the determination of whether a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report will be prepared. If a Tribe requests consultation within 30 days upon receipt of the notice, the lead agency must consult with the Tribe. AB 52 also specifies mitigation measures that may be considered to avoid or minimize impacts on TCRs. Specifically, California Public Resources Code, Section 21074, provides the following guidance:

(a) "Tribal Cultural Resources" are either of the following:
    1. Sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American Tribe that are either of the following:

A. Included or determined to be eligible for inclusion in the California Register of Historical Resources.
B. Included in a local register of historical resources as defined in subdivision (k) of Section 5020.1.

2. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1. In applying the criteria set forth in subdivision (c) of Section 5024.1 for the purposes of this paragraph, the lead agency shall consider the significance of the resource to a California Native American Tribe.

(b) A cultural landscape that meets the criteria of subdivision (a) is a Tribal Cultural Resource to the extent that the landscape is geographically defined in terms of the size and scope of the landscape.

(c) A historical resource described in Section 21084.1, a unique archaeological resource as defined in subdivision (g) of Section 21083.2, or a "nonunique archaeological resource" as defined in subdivision (h) of Section 21083.2 may also be a Tribal Cultural Resource if it conforms with the criteria of subdivision (a).

Section 3 Methods

3.1 Survey Methods

The goal of this survey was to identify known resources, provide an analysis of those resources, and recommend measures to reduce impacts to less than significant. Harris senior archaeologist Donna Beddow conducted the desktop literature review using standard archaeological procedures and techniques. Identification efforts consisted of record searches, literature review, evaluation of artifacts identified during the Phase II Environmental Site Assessment, and correspondence with the NAHC and local Tribes.

A records search was conducted using the CHRIS at San Diego State University. The record search provided a listing of all known resources, historic addresses, and reports within a 1-mile radius. In addition, historic topographic maps from 1872 through 2021, as well as the California Office of Historic Preservation Archaeological Resources Directory and Built Environment Resources Directory, were reviewed. Documentation in the form of reports and site records were reviewed for the APE. In addition, the National, California, and City Historic Registers as well as historic aerials between 1953 and 2020 (NETR Online 2024), were also reviewed. Furthermore, the Geotechnical Investigation Report (Group Delta 2024), Phase I Environmental Site Assessment Report (SCS Engineers 2023b), and Phase II Environmental Site Assessment Report (SCS Engineers 2023a) were reviewed to understand the history of the development of the Project APE.

Artifacts recovered during the Phase II Environmental Site Assessment were reviewed and analyzed. All were bottles and were researched based on makers marks and bottle types. The analysis included identifying the chronological placement, artifact type, material, color, makers mark, and time period. In addition, the artifacts were compared to prior studies to determine if they provide new or additional information about CA-SDI-10530H. Updated DPR forms were completed to address the portion of CA-SDI-10530H that is within the Project APE.

The survey area was photographed (Appendix C) to document the environmental setting. The updated DPR forms and maps (Confidential Appendix E, DPR Forms, and Confidential Appendix F, Confidential Maps) will be submitted to the South Coastal Information Center (SCIC).

The NAHC was contacted for a Sacred Lands File check to determine whether sacred lands are present on the Project site. The NAHC response was positive for sacred lands and recommended that the Viejas Band of Kumeyaay Indians (Viejas Band) be contacted. All Tribal bands, including the Viejas Band, on the list provided by the NAHC were contacted by email and regular mail for any information they may have regarding sacred lands that may be present on the Project site.

To date, four Tribes (Barona Group of the Capitan Grande [Barona Band], Jamul Indian Village [Jamul Band], San Pasqual Band of Diegueño Mission Indians [San Pasqual Band], and Viejas Band) have

responded. The Barona Band identified that the Project site is too disturbed and developed to yield any significant cultural resources or information and that they had no knowledge of the site. The Jamul Band and San Pasqual Band requested to consult on the Project. Harris senior archaeologist Donna Beddow responded to both Tribes requesting information related to Sacred Sites and informed them that the City is conducting AB 52 consultation. The San Pasqual Band identified that the Project is not within the boundaries of their reservation but that it is within the boundaries of the territory the Tribe considers its aboriginal territory. They also requested copies of any cultural reports that have been or will be generated during the environmental review process so that they can contribute most effectively to the consultation process. The San Pasqual Band identified that they could provide cultural monitoring for the Project. The Viejas Band identified that the Project site may contain many Sacred Sites to the Kumeyaay people and requested that Sacred Sites be avoided with adequate buffer zones. In addition, they requested that all NEPA, CEQA, NAGPRA, and California Native American Graves Protection and Repatriation Act laws be followed. The Viejas Band requested that they be contacted on any changes or inadvertent discoveries. Tribal outreach documentation is provided in Confidential Appendix G, Sacred Lands Tribal Outreach.

The City has conducted outreach with local Tribes pursuant to AB 52 and Senate Bill 18. To date, no responses have been received.

Section 4 Report of Findings

Several projects have occurred on properties known to be within the boundary of CA-SDI-10530H (City Dump). The cultural survey was positive for the presence of CA-SDI-10530H. It was evaluated as part of this document and determined to be not significant.

4.1 Prior Evaluations of CA-SDI-10530H/P-37-010530 Outside the Project Site

The City Dump was originally recorded by Sue Wade in 1986. The site was discovered during a historic record search for information on the Home Avenue Dump Site that was required for the Terrace View Villas Project. The original recordation was based on an archival search and did not include any fieldwork.

In 1992, Richard Carrico (1993) conducted archaeological monitoring for CA-SDI-10530H within the Mission Bay Interceptor Project site (Sports Arena Boulevard and Hancock Street). Construction activities were primarily trench excavations. The monitoring effort led to the discovery of an intact portion of the City Dump. Analysis of bottle, ceramics, and other materials from the trench indicated that the deposit represented an important and significant resource. He recommended that data recovery be conducted to mitigate impacts to the resource.

In 1998, Gallegos & Associates (Kyle et al. 1998) conducted a constraints analysis (desktop literature review) for the North Bay Redevelopment Project. Kyle provided an overview of the dump based on work completed by Wade (1986) and Carrico (1993). She identified that because the study area which included the Project site was developed prior to CEQA, few archaeological sites had been recorded and identified that archaeological sites may be present under older buildings, parking lots, or streets. Archaeological monitoring was recommended for any proposed development that may impact/affect subsurface soils, including removal of existing buildings.

In 2003, LSA Associates conducted construction monitoring for the Sports Arena ARCO station. The following results were provided by Sawyer & Strudwick (2004) for the portion of CA-SDI-10530 that they monitored:

> During monitoring, a portion of the dump was found at a depth between 6 and 10 feet. They found that the artifactual deposits were fairly contiguous. The largest collection from the monitoring consisted of glass bottles and jars. All bottles and jars were hand finished. No bottles exhibited any attributes that would identify them as being manufactured in a semiautomatic or automatic bottling machine. The period of deposition for this portion of CA-SDI-10530, corresponds to the time prior to widespread bottle manufacturing by machines, thereby explaining the overall absence of this bottle type in the assemblage. The glass container assemblage represented a typical array of household products found in the

late 19th and early 20th century. Among the types of bottles and jars recovered were soft drinks, alcoholic beverage, patent medicine, pharmacy and food product.

A number of ceramics were present and fully represent those from both domestic and commercial contexts. All types and shapes of ceramic wares were present in the dump. The observed items included cups, saucers, a shaving mug, jars, plates, bowls, fruit dishes, basins, a creamer, platters, a covered dish, nappies, and other forms. The majority of ceramics recovered in the sample from the site was classified as ironstone. Vitreous and semivitreous whiteware ceramics were second in frequency. Some vitreous ceramics associated with commercial establishments such as hotels and restaurants were found in the deposit. Asian ceramics were well represented, and most was Japanese in origin. European porcelain dominated the collection, coming largely from France and Germany.

Other material recovered included a glass marble, ceramic and glass insulators, dry-cell battery cores, construction material, a silver-plated spoon, and fragments of a porcelain doll head. Faunal remains consisted of cow, pig, chicken, and turkey bones.

The historic material recovered from CA-SDI-10530H is typical of refuse deposits found in community dumps originating from both commercial and residential contexts. The layer of historic materials probably varies in thickness and density over the entire Project site. The overburden matrix comprises a sandy soil with cobbles, perhaps imported from local sources. The matrices containing the historic material range from a moist dark sandy soil rich in organic material and infused with metal, glass, and other items. The high level of organic constituents has also imparted an offensive odor to some soils as they have decomposed.

The pattern or method of deposition is unknown but is surmised to be indiscriminate and probably haphazard disposal within certain areas of the dump. As the historic accounts, coupled with information from century-old San Diego City ordinances suggest, it seems that garbage collectors picked up refuse following a specific route that was probably mandated by the City. They probably dumped their various loads of refuse in the same spot or in the general vicinity until full and then moved to a new location.

The West Point Loma Dump appears to be a significant resource under CEQA Criterion D and the City of San Diego Historical Resources Guidelines. Remaining portions of the site probably retain sufficient subsurface integrity that will increase our understanding of historic lifeways in the City of San Diego. Although the refuse cannot be associated with specific households and contexts, it is nevertheless important since it can provide information regarding socioeconomic status, ethnicity, trade networks, market access, and consumer behavior for this area during 1899–1908. Different areas of the dump will exhibit their own unique set of characteristics depending on where the refuse originates. Overall, the dump appears to be a homogeneous blend of refuse from the general population of the City of San Diego.

In 2015, PanGIS monitored the Pacific Beach Pipeline Project and relocated a portion of CA-SDI-10530. A continuation form (DPR523L; no recorder identified) was completed to update the project site. The following results were identified in the site record:

> The historic-era site includes the buried remains of the West Point Loma Dump. It contains a refuse deposit consisting of ceramic, glass bottles and jars, glass marble, ceramic and glass insulators, dry-cell battery cores, construction material, a silver-plated spoon, and fragments of a porcelain doll head. The portions of the site that intersect with the Project APE were inspected and ground surface visibility was low due to the presence of grass covered lawn, landscaping, concrete walkways and buildings or the Project APE being located in areas in active traversed public streets. No prehistoric or historic-period cultural materials were observed on the ground surface.

In 2019, Loveless Linton, Inc. (Booth et al. 2019) conducted construction monitoring for the Pacific Beach Pipeline Project that was located along Midway Drive and encountered additional resources within a portion of CA-SDI-10530. The resources were observed 8 to 36 inches below the surface. The resources were observed in previously existing trenches in disturbed soils that were paved over. A total of 59 artifacts were recovered that included glass (bottles, shards, medicine bottle, and milk glass vessel fragments), ceramics (saucer fragment, tableware, sherds, bowl fragment, Chinese liquor bottle, chamber pot sherds, beer/seltzer sherds, and lid knob), faunal (butchered large animal), and shell (chione and turban fragments). Ceramics consisted of white glazed types with painting, transferware, and designs. No determination as to significance was made.

4.2 Project Site and Off-Site Improvements Areas

Approximately 9 percent of CA-SDI-10530H (Confidential Appendix F; Figure 4, Known Cultural Sites) is located within the Project APE and off-site improvements area for Sports Arena Boulevard. No prior evaluation has been conducted for this portion of the archaeological site. The location of CA-SDI-10530H was determined by Wade (1986) using archival research. The portion of CA-SDI-10530H on the Project site is primarily developed with an asphalt parking lot and driveway entrance to the San Diego Sports Arena facility.

In order to understand the history of the development of the Project site, the Geotechnical Investigation Report prepared by Group Delta (2024), historic topographic maps, and historic aerials were reviewed. The elevation of the Project site has remained essentially the same since 1903, which demonstrates that native soils were removed and fill was placed during site development of the San Diego Sports Arena. Undocumented fill soils were identified in all exploratory borings and ranges in depth from 7 to 13 feet in thickness. The fill soils were observed to consist of clayey sand (Unified Soil Classification System – SC), silty sand (SM), and poorly graded sand (SP). Gravel and cobbles and construction debris were frequently observed in the upper portions of the fill.

In 1953, the Project APE was primarily developed with the Frontier Housing Project (refer to Section 2.4, Cultural Setting, for a historical description). By 1966, the majority of the Frontier Housing Project was removed, and the San Diego Sports Arena was present and in development. In 1972, all of the Frontier Housing Project had been removed, and development of the San Diego Sports Arena, including surrounding parking, was complete. Commercial development on the western portion of the Project APE was present by 1978, and the ARCO station in the southern portion was present in 2003. By 2005, additional commercial development in the southern portion was present, and no further development has occurred to date.

Based on the historic topographic maps and depth of fill soils, the San Diego Sports Arena development including parking areas required excavation that would have impacted and dispersed the City Dump. As such, what remains of the dump is likely out of context. During the Phase II Environmental Site Assessment, five historic bottles were identified that date to the mid-1800s (Appendix H, Artifact Catalog; Confidential Appendix F; Figure 5, Artifact Location). Although the bottles are of an age that is considered historic, they do not add to the body of knowledge already available for this archaeological site from the numerous studies that have already been conducted (refer to Section 4.1, Prior Evaluations of CA-SDI-10530H/P-37-010530 Outside the Project Site).

Section 5 Interpretation of Resource Importance and Impact Identification

5.1 Resource Importance

5.1.1 Archaeological Resources

Although known archaeological site CA-SDI-10530H is within the southwestern portion of the Project APE and the off-site improvements area for Sports Arena Boulevard, it is not a significant resource because it has been disturbed and is likely out of context. What is known about this portion of the site does not provide evidence that the resource is significant under the CEQA criteria.

CA-SDI-10530H is not significant under Criterion A—events that have made a significant contribution to the broad patterns of California's history and cultural heritage. CA-SDI-10530H was the City Dump for less than 10 years (1899–1908). No significant events are associated with the City Dump.

CA-SDI-12530H is not significant under Criterion B—associated with persons important in our past. None of the prior or current evaluations for portions of CA-SDI-12530H have identified any historically significant individual associated with the City Dump.

CA-SDI-12530H is not significant under Criterion C—embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values. None of the prior or current evaluations for portions of CA-SDI-12530H have identified any unique characteristics, or association with a creative individual.

CA-SDI-12530H is not significant under Criterion D—has yielded or may be likely to yield information important in prehistory or history. Some of the prior evaluations have identified portions of the City Dump as yielding or likely to yield information important to the period in which the City Dump was in operation. However, the portion of CA-SDI-10530H within the Project APE and off-site improvements area has been determined not significant because development for the San Diego Sports Arena and associated parking areas, as well as the development of Sports Arena Boulevard, displaced material from CA-SDI-10530, causing it to be relocated into areas that would be considered out of context. The limited resources identified during the Phase II Environmental Site Assessment do not add to the body of knowledge already available. Any artifacts recovered from this portion of the archaeological site would not provide new or additional information that is not already available through archival research.

5.1.2 Historical Resources

One known historical resource, the San Diego Sports Arena (P-37-035181) is present on site. It was evaluated by ASM Affiliates (2024) and the report determined it to be a significant historical resource. For details of the historical analysis, refer to Section 5.3, Historical and Tribal Cultural

Resources, of the SEIR and the Historical Resources Technical Report for San Diego International Sports Arena, San Diego, San Diego County, California (ASM Affiliates 2024) (Appendix X in the SEIR).

5.1.3 Native American Heritage Resources

The NAHC response was positive for the presence of sacred lands; however, no specifics were provided. All Tribal bands on the list provided by the NAHC were contacted, and to date, four Tribes (Barona Band, Jamul Band, San Pasqual Band, and Viejas Band) have responded. Viejas identified that the Project site may contain many Sacred Sites; however, they did not provide any specifics or site locations. Additional outreach with Viejas has been conducted to identify Sacred Sites within the Project APE. To date, there has been no further response. The City also has conducted outreach with local Tribes pursuant to AB 52 and Senate Bill 18, and no responses have been received.

5.2 Impact Identification

A portion of one archaeological site, the City Dump (CA-SDI-10530), is located within the Project APE and the off-site improvements area for Sports Arena Boulevard. Because the site has been disturbed and is out of context, it was determined to not be a significant resource. The portion of the site within the Project APE and off-site improvement area is only approximately 9 percent (5.2 acres) of the overall archaeological site (58.8 acres). Implementation of the Project would directly impact the on-site and off-site portions of the archaeological site; however, the impact would not be significant.

Section 6 Management Considerations – Mitigation Measures and Design Considerations

Implementation of the Project would result in direct impacts to cultural resources; however, the portion of CA-SDI-10530H within the Project APE and off-site improvements area was determined to not be significant. As such, no further work is recommended.

Section 8 List of Preparers and Persons and Organizations Contacted

The following persons participated in the preparation of this report:

Harris & Associates

Donna Beddow	Principal Investigator
Diane Sandman	Vice President, Environmental + Planning Consulting
Kelsey Hawkins	Project Manager

City of San Diego

Ann Jarque	Senior Planner
Jeff Szymanski	Associate Planner

The following agencies and individuals were contacted:

Art Bunce	Barona Group of the Capitan Grande
Ralph Goff	Campo Band of Diegueño Mission Indians
Michael Garcia	Ewiiaapaayp Band of Kumeyaay Indians
Robert Pinto	Ewiiaapaayp Band of Kumeyaay Indians
Clint Linton	Iipay Nation of Santa Ysabel
Rebecca Osuna	Inaja-Cosmit Band of Indians
Erica Pinto	Jamul Indian Village
Lisa Cumper	Jamul Indian Village
Carmen Lucas	Kwaaymii Laguna Band of Mission Indians
Gwendolyn Parada	La Posta Band of Diegueño Mission Indians
Angela Elliott Santos	Manzanita Band of Kumeyaay Nation
Theresa Hernandez	Mesa Grande Band of Diegueño Mission Indians
Michael Linton	Mesa Grande Band of Diegueño Mission Indians
Allen Lawson	San Pasqual Band of Mission Indians
John Flores	San Pasqual Band of Mission Indians
Cody Martinez	Sycuan Band of the Kumeyaay Nation
Bernice Paipa	Sycuan Band of the Kumeyaay Nation
Ernest Pingleton	Viejas Band of Kumeyaay Indians
Ray Teran	Viejas Band of Kumeyaay Indians

Donna Beddow, RPA

SENIOR ARCHAEOLOGIST

Donna Beddow is a Senior Archaeologist with over 20 years of practical experience managing or part of multi-disciplinary teams. She specializes in cultural and tribal cultural resources, and has extensive experience with Native American consultation including AB-52, SB-18, and Sacred Lands. The majority of her career has been for the County of San Diego as a Senior Staff Archaeologist and Environmental Coordinator. She served as the County of San Diego Historic Site Board liaison and managed the County's cultural program. Her Master's thesis was used as the model for the development of the County's Significance Guidelines for Cultural Resources. These guidelines have been used by other lead agencies and environmental organizations, and are still used by the County of San Diego.

Her 20 plus years of experience include the review and preparation of CEQA documents. She has managed highly complex projects involving sensitive or difficult environmental issues; resolved major project issues and public controversies though applicant engagement and coordination with the general public and tribes. Ms. Beddow has reviewed and prepared cultural resource studies and CEQA documents for both private and public development projects.

REGISTRATIONS

Register of Professional Archaeologists

RELEVANT EXPERIENCE

- **City of San Diego,** *Coastal Resiliency Master Plan & PEIR.* Principal Investigator. Harris is assisting the City in the development of the Coastal Resilience Master Plan and PEIR to implement Climate Resilient San Diego. The team will evaluate nine locations for nature-based solutions and will then narrow the scope down to the six most suitable locations. Responsibilities include conducting a background search that relies on the CHRIS system, sacred lands files, inventories, and historic maps. In addition, tribal outreach, site surveys to identify previously recorded and new sites, and preparation of a cultural resources technical report is required. **The Plan and PEIR will implement Climate Resilient San Diego to inform development of nature-based coastal resilience projects to build resilience to the impacts of sea level rise and enhance and protect the biological diversity of the City's coastline.**
- **Port of San Diego,** *Sweetwater Park,* July 2022 to Present. Harris assisted the Port of San Diego with a Section 106 consultation for grant funding to assist with the development of Sweetwater Park. In addition, Harris also provided monitoring services during construction. As Principal Investigator, responsibilities included conducting a background search that relied on the CHRIS system, sacred lands files, inventories, historic maps, and historic registers. In addition, tribal outreach, a site survey to identify previously recorded and new sites, and preparation of a cultural resources technical report and Section 106 documents (Area of Potential Effect, Findings of No Effect) were completed. The evaluation relied in part on the Chula Vista Bayfront Master Plan Final EIR (2010). Furthermore, archaeological and tribal monitoring was provided during construction that included data recovery for identified resources.
- **City of San Diego,** *Grove Avenue Emergency Wall Repair.* Principal Investigator. Harris assisted the Port of San Diego with a Section 106 consultation for grant funding to assist with the development of Sweetwater Park. Responsibilities included conducting a background search that relied on the CHRIS system, sacred lands files, inventories, and historic maps. In addition, tribal outreach, a site survey to identify previously recorded and new sites, and preparation of a cultural resources technical report and Section 106 documents (Area of Potential Effect, Findings of No Effect) were completed.

- **County of San Diego,** *Live Oak Springs Water System Improvements Project,* April 2021 to Present. Harris assisted the County with the biological and cultural evaluations for improvements to the potable water system on approximately 74 acres in the community of Live Oak Springs. In addition, Harris provided archaeological and tribal monitoring during project construction. As Principal Investigator, responsibilities included conducting a background search that relied on the CHRIS system, sacred lands files, inventories, and historic maps. In addition, tribal outreach, a site survey to identify previously recorded and new sites, preparation of a cultural resources technical report, and coordination with the Native American monitor was completed. Furthermore, archaeological and tribal monitors were provided during construction and data recovery was conducted for identified resources.
- **University of California at San Diego (UCSD)**, *Rancho Bernardo Healthcare Center Medical Office Building*, September 2023 to Present. Harris assisted UCSD with the preparation of a Mitigated Negative Declaration (MND) for the development of a healthcare campus on a 9.81-acre site. As Principal Investigator, responsibilities consisted of a desk top evaluation of the project which included conducting a background search that relied on the CHRIS system, review of historic maps, and historic registers including the National, California, and local registers, a sacred lands file check and tribal outreach, and preparation of the cultural and tribal cultural resources section of the MND. Harris also assisted UCSD with the preparation of AB 52 tribal outreach letters and assisted with consultation tasks such as coordinating meetings and responding to tribes.
- **City of San Marcos,** *CEQA On-Call Consultant Services* (*Woodward 46 Specific Plan, Pico Avenue),* October 2023 to Present. Harris assisted the City of San Marcos with the review of environmental documents and technical studies. In addition, Harris has provided survey and report preparation for various projects. Responsibilities include peer reviewing and revising the cultural and tribal cultural sections of draft environmental documents and cultural studies for adequacy under CEQA and other applicable federal, state, and local requirements, and for consistency and compliance with project plans. In addition, as Principal Investigator, responsibilities include conducting background searches that relied on the CHRIS system, sacred lands file checks and tribal outreach, inventories, historic maps, and historic registers including the National and California Registers. Furthermore, a site survey to identify previously recorded and new sites was conducted, coordination with Native American monitors, and preparation of cultural resources technical reports.
- **City of Pacific Grove,** *Capital Improvement Project for Wastewater Collection System Phase 9,* October 2022 to Present**.** Harris assisted the City of Pacific Grove with the cultural evaluation for improvements to the wastewater collection system. Responsibilities included conducting a background search that relied on the CHRIS system, sacred lands file check and tribal outreach, inventories, historic maps, and historic registers including the National and California Registers. In addition, a site survey to identify previously recorded and new sites was conducted, and preparation of a cultural resources technical report was prepared.
- **City of Escondido,** *Program EIR for Sixth Cycle Housing Element and Land Use/Zoning***.** Harris assisted the City of Escondido with the preparation of the Program EIR for the Sixth Cycle Housing Element. As Principal Investigator, responsibilities included the management of the cultural and tribal cultural resources requirements for the project. Duties included the preparation of the cultural and tribal cultural resources sections of the EIR which required the identification of impacts and appropriate mitigations. In addition, tribal outreach letters pursuant to AB 52 and SB 18 were prepared for the City, and Harris coordinated with the City on deliverables.
- **City of Victorville, *General Plan Update,*** March 2020 – January 2022. Harris assisted the City of Victorville with the preparation of the General Plan Update which included updates to the Housing and Land Use Elements, as well as the Programmatic EIR. Harris assisted the City with the preparation of AB 52 and SB 18 tribal outreach letters and assisted with consultation tasks such as coordinating meetings and responding to tribes.
- **City of Watsonville,** *Climate Action and Adaptation Plan,* September - December 2021. Harris assisted the City of Watsonville with the preparation of the Climate Action and Adaptation Plan including a Negative Declaration. As part of the project, tribal consultation pursuant to SB 18 was required. Harris prepared the SB 18 tribal outreach letters, and assisted with consultation tasks such as coordinating meetings and responding to tribes.
- **County of San Diego,** *HUD Cultural Evaluations,* February 2022 to Present. Harris assisted the County of San Diego with the cultural evaluation of development sites that are applying for federal funding. Development sites include individual mobile homes, park acquisition sites, sidewalk and ADA access improvements, and vacant land. As Principal Investigator, responsibilities included conducting a background search that relies on the CHRIS system, historic maps, and historic registers including the National, California, and County of San Diego Registers. In addition, cultural surveys were conducted and preparation of required documentation for Section 106 consultation.

- **City of San Diego,** *Coastal Resiliency Master Plan & PEIR,* February 2023 to Present. Harris is assisting the City in the development of the Coastal Resilience Master Plan and PEIR to implement Climate Resilient San Diego. The team evaluated nine locations for nature-based solutions and narrowed the scope down to the six most suitable locations. As Principal Investigator, responsibilities include conducting a background search that relies on the CHRIS system, sacred lands file check and tribal outreach, inventories, historic maps, and historic registers including the National, California, and City of San Diego Registers. In addition, site surveys to identify previously recorded and new sites, and preparation of a cultural resources technical report was prepared.
- **County of San Diego Planning & Development Services,** *Project Staff Support Services,* March 2021 to Present**.** Harris' support services cover technical expertise of CEQA resource areas including, but not limited to, CEQA documentation, biological resources, cultural resources, and noise. Services include reviewing EIRs, MNDs, NDs, 15183 checklists, addendums, categorical exemptions, and other CEQA documentation. The Harris team also conducts research and prepares reports and environmental documentation, project mitigation measures, conditions of approval, and project alternatives. As Principal Investigator, responsibilities consist of providing support services for the cultural resources subject area. Duties include cultural resource evaluations, review and preparation of cultural reports, conducting cultural surveys, and engaging in tribal consultations (Sacred Lands, AB-52, and SB-18). In addition, consulting with tribes post- project approval has been conducted to determine appropriate mitigations when projects are not in compliance with permit requirements.
- **County of Santa Cruz,** *Buena Vista Drive Repairs,* August 2023 to Present**.** Harris assisted the County of Santa Cruz with the cultural evaluation for improvements to Buena Vista Drive. Responsibilities include conducting a background search that relied on the CHRIS system, sacred lands file check and tribal outreach, inventories, historic maps, and historic registers including the National and California Registers. In addition, a site survey to identify previously recorded and new sites was conducted, and preparation of a cultural resources technical report was prepared.
- **City of Napa,** *The Grange Campground,* March 2023 to Present**.** Harris assisted the City of Napa with the cultural evaluation for the development of a campground complex. Responsibilities include conducting a background search that relied on the CHRIS system, sacred lands file check and tribal outreach, inventories, historic maps, and historic registers including the National and California Registers. In addition, a site survey to identify previously recorded and new sites was conducted, and preparation of a cultural resources technical report was prepared.
- **City of Gilroy,** *StorQuest,* July 2023 to Present**.** Harris assisted the City of Gilroy with the cultural evaluation for the development of a self-storage facility. Responsibilities include conducting a background search that relied on the CHRIS system, sacred lands file check and tribal outreach, inventories, historic maps, and historic registers including the National and California Registers. In addition, a site survey to identify previously recorded and new sites was conducted, and preparation of a cultural resources technical report was prepared.
- **County of San Diego Department of Public Works,** *Environmental Staff Support Services,* March 2021 to Present**.** Harris assisted the County of San Diego with cultural evaluations for public projects. Responsibilities include conducting a background search that relied on the CHRIS system, sacred lands file check and tribal outreach, inventories, historic maps, and historic registers including the National and California Registers. In addition, a site survey to identify previously recorded and new sites was conducted, and preparation of a cultural resources technical report was prepared.
- **CH Realty,** Perris Valley Industrial Project – City of Perris*,* March 2022 to Present**.** Harris conducted the cultural evaluation for the development of an industrial building. Responsibilities include conducting a background search that relied on the CHRIS system, sacred lands file check and tribal outreach, inventories, historic maps, and historic registers including the National and California Registers. In addition, a site survey to identify previously recorded and new sites was conducted, and preparation of a cultural resources technical report was prepared.

To: O"Neal, Allison
Subject: RE: RWQCB Records Request - Midway Rising Update
Date: Thursday, April 4, 2024 10:22:18 AM

This email originated from outside of SCS Engineers. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Morning,

The San Diego Water Board received your California Public Records Act request. In reviewing your request, I searched the following databases: the Board's Electronic Content Management (ECM) filing system, California Integrated Water Quality System (CIWQS), Stormwater Multiple Application and Report Tracking System (SMARTS), and GeoTracker.

Based on the information you provided, my search did not return any records related to your request. Feel free to email me back if you have any further questions.

Sincerely,
Regina

From: O'Neal, Allison <AONeal@scsengineers.com>
Sent: Wednesday, March 27, 2024 1:13 PM
To: RB9_Records, WB@Waterboards <rb9_records@waterboards.ca.gov>
Subject: RWQCB Records Request - Midway Rising Update

EXTERNAL:

Hello,

Please send all RWQCB records for the Midway Rising project addresses: 3550, 3220,3240, 3250, 3340, 3350, 3360, 3494, 3530, 3550, 3570, 3580, and 3640 Sports Arena Boulevard, San Diego 92110 or let me know if there are no records.

Thank you,

Allison O'Neal

Subject: [External Message Added] City of San Diego public records request #24-2196
Date: Friday, April 19, 2024 1:14:58 PM

This email originated from outside of SCS Engineers. Do not click links or open attachments unless you recognize the sender and know the content is safe.

-- Attach a non-image file and/or reply ABOVE THIS LINE with a message, and it will be sent to staff on this request. --

City of San Diego Public Records

A message was sent to you regarding record request #24-2196:

Greetings Allison,
Re: CPRA Request No. 24-2196
To update you on the status of your CPRA request, City staff continue the review of other potentially responsive records. We expect to provide you with an update on or before May 7, 2024. The City will continue to provide disclosable records on a rolling basis as soon as they become available. We reserve the right to withhold and/or redact any records or information that may be exempt from disclosure under the Public Records Act, and/or other applicable legal privileges including, but not limited to, attorney work product and attorney client privileges.
Kind regards.

Conditions

#	Name	Description
1	C40239	The engine shall be operated exclusively during emergencies as defined in Rule 69.4.1 or Rule 12 or 17CCR93115 as applicable, or for maintenance and testing.
2	C43935	This engine shall not be used as a part of a non-emergency Demand Response Program (DRP). This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115.4(a)(65). (Rule 12, or Rule 69.4.1)
3	C25229	This internal combustion engine shall not exceed 52 hours of operation per calendar year for non-emergency purposes (testing and maintenance).
4	C28587	Gaseous fuel engines shall use only gaseous fuel which contains no more than 10 grains of sulfur compounds, calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquefied petroleum gas (LPG), butane. Gasoline engines shall use only California reformulated gasoline. (Rule 62)
5	C28413	Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6	C28414	The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7	C43430	This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8	C43938	A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information: (a) old meter's hour reading, (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and (c) copy of receipt of new meter or of installation work order. A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)

9	C45281	The owner or operator of this engine shall conduct periodic maintenance of the engine and add-on control equipment, if any, as recommended by the engine and control equipment manufacturers or as specified by the engine servicing company's maintenance procedures. Maintenance shall be conducted at least once each calendar year, and shall include, but is not limited to, the following: 1) Change oil and filter, or test in accordance with the requirements of 40 CFR §63.6625(i) or (j); 2) Inspect and clean air filters, replacing as necessary; 3) Inspect all hoses and belts, replacing as necessary; and 4) Inspect spark plugs, if equipped, replacing as necessary.. Documentation of oil and filter changes or copies of the oil test analysis shall be kept on site and made available upon request. If testing in accordance with 40 CFR §63.6625(i) or (j), the oil analysis program must analyze the Total Base Number, viscosity and percent water content (for compression ignition engines) and the Total Acid Number, viscosity and percent water content (for spark ignited engines). If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 business days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine. (Rule 12, Rule 69.4.1, 40 CFR 63 Subpart ZZZZ).
10	C43937	The owner or operator of the engine shall maintain the manual of recommended maintenance provided by the manufacturer, or other maintenance procedure as approved in writing by the Air Pollution Control Officer on site for at least the same period of time as the engine is located at the site. This manual shall be made available to the Air Pollution Control District upon request. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
11	C45288	The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following: (a) dates and elapsed times of every instance of engine operation based on actual readings of the engine hour meter; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency; (b) for a total external power outage, documentation from the serving utility of an outage in the area where the engine is located; for an internal power outage, a description of what caused the failure and receipts and/or work orders for the necessary repairs; for a partial external power outage, including a low-voltage or electrical transient incident in which the external power voltage is low enough to trigger the operation of an emergency standby engine, a description of the incident; (c) total cumulative hours of operation per calendar year; (d) records of annual engine maintenance shall include the date the maintenance was performed and the nature of the maintenance; and (e) hours of operation for all uses other than those specified above and identification of the nature of that use. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)
12	C43941	All records required by this permit shall be maintained on site and readily available for District inspection for a minimum of 36 months from their date of creation unless otherwise indicated by the conditions of this permit. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ)

Conditions

#	Name	Description
1	C40239	The engine shall be operated exclusively during emergencies as defined in Rule 69.4.1 or Rule 12 or 17CCR93115 as applicable, or for maintenance and testing.
2	C40907	This engine shall not be used as a part of a non-emergency Demand Response Program (DRP). This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115 and operating in accordance with 17 CCR 93115.6(c). (17 CCR 93115)
3	C28691	Engine operation for maintenance and testing purposes shall not exceed 20 hours per calendar year. (17 CCR 93115, Rule 1200, NSR)
4	C28412	This engine shall only use CARB diesel fuel. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII)
5	C28413	Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6	C28414	The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7	C43430	This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8	C28415	This engine shall not operate for non-emergency use during the following periods, as applicable: (a) whenever there is any school sponsored activity, if engine is located on school grounds or (b) between 7:30am and 3:30pm on days when school is in session, if the engine is located within 500 feet of, but not on, school grounds. This condition shall not apply to an engine located at or near any school grounds that also serve as the students' place of residence. (17 CCR 93115)
9	C28560	Engine operation in response to notification of an impending rotating outage shall be subject to all the following restrictions: (a) the utility distribution company has ordered rotating outages in the control area where the engine is located, (b) the engine is operated no more than 30 minutes prior to the time when the utility distribution company officially forecasts a rotating outage in the cited control area, and (c) the engine operation is terminated immediately after the utility distribution company advises that a rotating outage is no longer in effect. This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115 and operating in accordance with 17 CCR 93115.6(c). (17 CCR 93115)

10	C28419	A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information: (a) old meter's hour reading, (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and (c) copy of receipt of new meter or of installation work order. A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)
11	C45251	The owner or operator of this engine shall conduct periodic maintenance of the engine and add-on control equipment, if any, as recommended by the engine and control equipment manufacturers or as specified by the engine servicing company's maintenance procedures. Maintenance shall be conducted at least once each calendar year, and shall include, but is not limited to, the following: 1) Change oil and filter, or test in accordance with the requirements of 40 CFR §63.6625(i) or (j); 2) Inspect and clean air filters, replacing as necessary; and 3) Inspect all hoses and belts, replacing as necessary. Documentation of oil and filter changes or copies of the oil test analysis shall be kept on site and made available upon request. If testing in accordance with 40 CFR §63.6625(i) or (j), the oil analysis program must analyze the Total Base Number, viscosity and percent water content (for compression ignition engines) and the Total Acid Number, viscosity and percent water content (for spark ignited engines). If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 business days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine. (Rule 12, Rule 69.4.1, 40 CFR 63 Subpart ZZZZ)
12	C43078	The owner or operator of the engine shall maintain the following records on site for at least the same period of time as the engine to which the records apply is located at the site: (a) documentation shall be maintained identifying the fuel as CARB diesel, and (b) manual of recommended maintenance provided by the manufacturer, or maintenance procedures specified by the engine servicing company. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 63 Subpart ZZZZ)
13	C45252	The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following: (a) dates and elapsed times of every instance of engine operation based on actual readings of the engine hour meter; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency; (b) if located within 500 feet of a school, the time of day of every instance of engine operation for testing and maintenance, unless the engine emits no more than 0.01 g/bhp-hr of diesel particulate matter or meets the requirements specified in 17CCR, Section 93115.13(f); (c) for a total external power outage, documentation from the serving utility of an outage in the area where the engine is located; for an internal power outage, a description of what caused the failure and receipts and/or work orders for the necessary repairs; for a partial external power outage, including a low-voltage or electrical transient incident in which the external power voltage is low enough to trigger the operation of an emergency standby engine, a description of the incident; (d) total cumulative hours of operation per calendar year; (e) records of annual engine maintenance shall include the date the maintenance was performed and the nature of the maintenance; and (f) hours of operation for all uses other than those specified above and identification of the nature of that use. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)
14	C43432	All records required by this permit shall be maintained on site and readily available for District inspection for a minimum of 36 months from their date of creation unless otherwise indicated by the conditions of this permit. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart IIII)

Permit Description: Gasoline Dispensing Facility (Retail) (BACT):
Twenty four (24) nozzles, as listed in Exhibit 1 of the Phase II Executive Order (E.O.) specified below, with three (3) grades per nozzle;
Phase II VRS: Healy Vacuum Assist per ARB E.O. VR-202;
ISD System: Compliant Veeder-Root Software Version;
Vapor Processor: Arid Permeator AT-150 per ARB E.O. VR-202;
Phase I VRS: Phil-Tile per ARB E.O. VR-101;
Tanks: One (1) 40,000 gallon gasoline, one (1) 20,000 gallon gasoline, and one (1) 22,000 gallon split (12,000 gallon diesel/10,000 gallon gasoline) underground {manifolded underground and aboveground}

Conditions

#	Name	Description
1	C29305	The Phase I and Phase II vapor recovery systems specified in the equipment description of this permit, shall be installed, operated and maintained in accordance with the most recent applicable California Air Resources Board Executive Orders, Installation, Operation and Maintenance Manuals, and District Rules and Regulations. (Rules 61.3.1, 61.4.1, 61.8)
2	C29306	A copy of the California Air Resources Board Executive Orders (EO) specified in the equipment description, including the Installation, Operation and Maintenance (IOM) Manuals, or the most recent version of these EO and IOM Manuals, and this Permit to Operate shall be maintained on site at all times and made available to the District upon request. (Rules 61.3.1 and/or 61.4.1)
3	C26823	Only components certified by the California Air Resources Board (CARB) for use with the particular Phase I or Phase II vapor control system specified in the equipment description shall be installed at this facility. All components certified by CARB and installed at this facility shall be clearly identified by a permanent identification showing the manufacturer's make and model number, unless the component is specifically exempted from this requirement by CARB in writing. (Rules 61.3.1 and 61.4.1)
4	C29211	Any installation, repair, replacement or testing of the Phase I and/or Phase II systems or components specified in the equipment description shall be performed per the applicable California Air Resources Board (CARB) Executive Orders and CARB approved Installation, Operation, and Maintenance Manuals, by a technician certified as specified in Attachment K, "Certification Requirements for Technicians." These certification requirements are also applicable for removal and installation of the Phase I and/or Phase II components in the course of any required performance test. Proof of certification shall be made available to the District upon request. (Rules 61.3.1 and 61.4.1)
5	C27379	All liquid transfer lines, piping, and associated fittings shall be maintained so that there are no fugitive liquid leaks as defined by Rule 61.0(k) or fugitive vapor leaks as defined by Rule 61.0(l). (Rule 21)
6	C28745	The Phase I and Phase II vapor recovery equipment and associated components, except for components with an allowable leak rate as specified by the most recent applicable CARB Executive Order and Certification Procedure, shall be maintained free of liquid leaks and shall be vapor tight. Components with an allowable leak rate shall operate within such rate. (Rules 61.3.1/61.3 and 61.4.1/61.4)

7	C44517	All storage tanks containing gasoline shall be equipped with a permanent submerged fill pipe, which has a discharge opening entirely submerged when the liquid level is six (6) inches above the bottom of the tank.
8	C222	During liquid transfers involving tank trucks and trailers, the vapor return hose and gasoline hose connections shall be made in the following order: 1. Connect the vapor return hose to the fuel delivery truck drybreak, 2. Connect the vapor return hose to facility storage tank drybreak, 3. Connect the gasoline hose to the facility storage tank fill pipe adaptor, and 4. Connect the gasoline hose to the fuel delivery truck product fitting. At the end of the fuel dump, the disconnections shall be made in reverse order of the connections, i.e., (4), (3), (2), and (1), wherein the gasoline transfer hose shall be connected or disconnected only while the vapor return hose is connected and functional.
9	C219	The permittee shall ensure that the Phase I tank truck and trailer vapor recovery system are utilized during each transfer of gasoline and that product and vapor (poppet) caps are securely replaced and remain in place following each such transfer.
10	C45379	The Permeator AT-150 shall constantly log oil level, processor on/off condition, vacuum level and tank pressure. (CARB VR-202 Executive Order and Rule 61.4.1)
11	C45380	The Permeator AT-150 Programmable Logic Controller (PLC, display) shall constantly monitor PLC battery level and circuit continuity. (CARB VR-202 Executive Order and Rule 61.4.1)
13	C20165	No dispensing shall be allowed when the vapor collection pump is disabled for maintenance or for any other reason. Only those nozzles affected by the disabled vapor collection pump are subject to this condition.
14	C30323	Product shall not be dispensed from any fueling point at this facility if a vapor line is disconnected and open to the atmosphere.
15	C28624	The hose assembly shall comply with the hose length specified Phase II Executive Order listed in the equipment description of this permit. (Rule 61.4)
16	C30312	The TLS Console shall be installed in a location that allows the RS232 port to be easily accessible for use at any time. No obstructions shall be placed within a radius of one foot (1') from the TLS Console. A vacant RS232 port shall always be available to electronically download complete and accurate reports. The TLS Console shall also be equipped with an operational printer (including an adequate supply of paper and toner). (Rule 61.4.1)
17	C29163	The TLS Console shall automatically prohibit the dispensing of fuel through shutdown of all the gasoline turbine pumps upon a failure alarm or TLS Console ISD System power loss. (Rule 61.4.1)
18	C30313	The facility attendant shall notify (e.g., direct contact, voice mail, e-mail, fax) the responsible company official or their designee within two (2) hours of any alarm and shall request service as soon as is reasonably possible to correct the problem. Only technicians certified as specified in Attachment K of this Permit to Operate shall perform installations, repairs or replacements of any vapor recovery components. (Rules 61.4.1 and 21)
19	C30314	The permittee and/or designated service technician shall promptly record all information relating to the alarm event including but not limited to reporting timelines, tests conducted and associated repairs on Attachment I "Inspection, Maintenance and Repair Log," or an equivalent form approved by the District. The inspection, maintenance, and repair log shall be kept on site for at least three (3) years and made available to the District upon request. (Rules 61.4.1 and 21)
20	C30315	When an ISD alarm occurs and gasoline dispensing is terminated, the permittee and/or designated agent shall reset the ISD System to allow vehicle fueling to resume only if: (Rules 61.4.1 and 21) a. All required repairs and tests have been successfully conducted, and all information associated with the repairs and tests are recorded in Attachment I the maintenance and repair log, or b. The dispenser(s) associated with the problem that triggered the alarm is isolated and not operated until the required repairs are completed, and all information associated with the repairs is recorded. The time the components are isolated shall be logged immediately.
21	C29318	The audible ISD alarm shall be located such that it can easily be heard by station personnel in the area most likely to be occupied during normal station operation (i.e., at the cash register). (Rule 21)
22	C30316	Only a certified technician as specified in Attachment K of this Permit to Operate shall perform a "clear test after repair" (i.e. clear alarm conditions). The technician shall not perform a "clear test after repair" upon any alarm unless all repairs necessary to correct the alarm condition and/or tests as specified in Attachment A-1 of this Permit to Operate have been successfully performed and recorded in Attachment I, the maintenance and repair log. (Rules 61.4.1 and 21)
23	C29167	The Vapor Recovery ISD System shall be operational for a minimum of ninety-five percent (95%) of the time, based on an annual basis or prorated thereof. The operational percentage time shall be verified through the daily reports. (Rule 61.4.1)
24	C29168	The ISD system shall maintain a complete electronic archive of monthly reports for a period of 12 consecutive months and an archive of daily reports for the last 365 days. (Rule 61.4.1)

25	C30320	Scheduled maintenance, which includes weekly, quarterly and annual inspections and/or tests, shall be performed in accordance with the California Air Resources Board Executive Orders for the vapor recovery systems specified in the equipment description. A certified technician, as specified in Attachment K of this Permit to Operate, shall perform all tests and repairs associated with the scheduled inspections and maintenance. (Rule 61.3.1 and 61.4.1)
26	C28627	A maintenance log for the weekly, quarterly and annual scheduled maintenance, including any repairs performed and drive offs, shall be kept on site for at least three (3) years and made available to the District upon request. The maintenance log shall itemize at a minimum: the date of each inspection and test, any defect, damage, loose connections, or leaks found during the inspections or tests, any test failure, the make and model number of any component that is replaced, maintained or repaired as a result of these inspections or tests, the date of repair/replacement, and the affiliation and name of the person performing the inspections, tests, and repair/replacement. (Rule 61.4.1)
27	C29139	The permittee shall perform a visual weekly inspection of all Phase I vapor recovery components. The components to be inspected for damage, loose connections, or leaks are: the vapor and product dust caps and gaskets, poppeted dry breaks, vapor and product fill adaptors, spillboxes, including the drain valves. In addition, the permittee shall verify that there is no standing gasoline or debris in the spill boxes and that the drain valves are seating properly. (Rule 61.3.1)
28	C44442	The permittee shall perform a visual daily inspection of all Phase II components as specified in Attachment I. Weekends and holidays may be excluded for non-retail gasoline dispensing facilities or gasoline dispensing facilities dispensing less than 750,000 gallons in any calendar year. The permittee shall record all inspections, maintenance, repairs and any associated testing completely and accurately on Attachment I or an equivalent form. (Rule 61.4.1)
29	C29308	An inspection, maintenance and repair log shall be kept on site for at least three (3) years and made available to the District upon request. Attachment I, "Inspection, Maintenance and Repair Log," is attached as an example and can be used for this purpose. The inspection, maintenance and repair log shall record the daily and weekly inspections and itemize at a minimum: the date and time the defect was found or the date and time the component was identified as not being in good condition, the date and time the component was removed from service, the date and time of call for service, the date of repair/replacement, the affiliation and name of the person performing the repair/replacement, the certified technician identification number from the applicable manufacturer, the make and model number of the component, and whether the component was maintained, replaced or repaired. (Rules 61.3.1 and 61.4.1)
30	C28749	Any Phase I and/or Phase II component, device or system identified and recorded by the permittee as not being in good condition, based on testing and/or visual inspections, or not operating properly shall be repaired, replaced, or adjusted within seven (7) calendar days of detection in a manner that will bring the facility into compliance with the applicable District Rules and Regulations and the most recent applicable CARB Executive Orders. Any Phase I and/or Phase II component or affected portion of the system that is determined to have a defect as set forth in the California Code of Regulations, Title 17, Section 94006, shall not be operated and shall be removed from service immediately. The defective component or affected portion of the system shall not be operated until the defect has been repaired or the defective component replaced such that the defect no longer exists. (Rules 61.3.1/61.3 and 61.4.1/61.4)
31	C28752	The dispensing rate of every grade point shall be maintained at all times within the range specified in the applicable Executive Order, as required to conduct the Vapor-to-Liquid Ratio (V/L) Test. The permittee shall verify the maximum handheld dispensing flow rate of every grade point on a monthly basis. Attachment E, "Dispensing Flow Rate," or an equivalent form, shall be used for this purpose. Dispensing flow rates records shall be maintained on site for at least three (3) years and made available to the District upon request. (Rules 61.4.1)
32	C44481	The tests referenced in Attachment A shall be conducted and passed at least once every calendar year within sixty (60) calendar days prior to the permit expiration date. The permittee or their agent shall report all test results completely and accurately to the District Compliance Division within fifteen (15) calendar days of conducting these annual tests in a format approved by the District Compliance Division. (Rules 61.3, 61.3.1, 61.4, 61.4.1)
33	C44446	The permittee or their designated agent shall notify the District's Compliance Division, in writing, at least ten (10) calendar days prior to conducting the required annual tests and shall include the date and the time in a format approved by the District Compliance Division. (Rules 21, 61.3, 61.3.1, 61.4, and 61.4.1)
34	C28877	Copies of all tests shall be maintained on site for three (3) years and made immediately available to the District upon request. (Rules 21, 61.3,61.3.1, 61.4 and 61.4.1)
35	C28129	In the event of any failed test, which does not constitute a defect, the permittee shall make all necessary repairs, reschedule and retest within seven (7) calendar days of the failed test. In the event of any failed test, which does constitute a defect, the permittee shall remove all of the affected components from service until they are successfully retested. Notice of any retest, including the date, time and nature of repairs made, conducted on a subsequent date after the initial test date shall be provided to the District's Compliance Division in writing (e-mail or facsimile are acceptable) as soon as possible and prior to the retest. All retest results shall be reported completely and accurately and submitted to the District Compliance Division within fifteen (15) calendar days of conducting the retest in a format approved by the District Compliance Division. (Rules 61.3, 61.3.1, 61.4 and 61.4.1)

Conditions

#	Name	Description
1	C40239	The engine shall be operated exclusively during emergencies as defined in Rule 69.4.1 or Rule 12 or 17CCR93115 as applicable, or for maintenance and testing.
2	C40907	This engine shall not be used as a part of a non-emergency Demand Response Program (DRP). This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115 and operating in accordance with 17 CCR 93115.6(c). (17 CCR 93115)
3	C28691	Engine operation for maintenance and testing purposes shall not exceed 20 hours per calendar year. (17 CCR 93115, Rule 1200, NSR)
4	C28412	This engine shall only use CARB diesel fuel. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII)
5	C28413	Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6	C28414	The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7	C43430	This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8	C28415	This engine shall not operate for non-emergency use during the following periods, as applicable: (a) whenever there is any school sponsored activity, if engine is located on school grounds or (b) between 7:30am and 3:30pm on days when school is in session, if the engine is located within 500 feet of, but not on, school grounds. This condition shall not apply to an engine located at or near any school grounds that also serve as the students' place of residence. (17 CCR 93115)
9	C28560	Engine operation in response to notification of an impending rotating outage shall be subject to all the following restrictions: (a) the utility distribution company has ordered rotating outages in the control area where the engine is located, (b) the engine is operated no more than 30 minutes prior to the time when the utility distribution company officially forecasts a rotating outage in the cited control area, and (c) the engine operation is terminated immediately after the utility distribution company advises that a rotating outage is no longer in effect. This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115 and operating in accordance with 17 CCR 93115.6(c). (17 CCR 93115)

10 C28419 A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
(a) old meter's hour reading,
(b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and
(c) copy of receipt of new meter or of installation work order.
A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.
(Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)

11 C45251 The owner or operator of this engine shall conduct periodic maintenance of the engine and add-on control equipment, if any, as recommended by the engine and control equipment manufacturers or as specified by the engine servicing company's maintenance procedures. Maintenance shall be conducted at least once each calendar year, and shall include, but is not limited to, the following:
1) Change oil and filter, or test in accordance with the requirements of 40 CFR §63.6625(i) or (j);
2) Inspect and clean air filters, replacing as necessary; and
3) Inspect all hoses and belts, replacing as necessary.
Documentation of oil and filter changes or copies of the oil test analysis shall be kept on site and made available upon request. If testing in accordance with 40 CFR §63.6625(i) or (j), the oil analysis program must analyze the Total Base Number, viscosity and percent water content (for compression ignition engines) and the Total Acid Number, viscosity and percent water content (for spark ignited engines). If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 business days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine.
(Rule 12, Rule 69.4.1, 40 CFR 63 Subpart ZZZZ)

12 C43078 The owner or operator of the engine shall maintain the following records on site for at least the same period of time as the engine to which the records apply is located at the site:
(a) documentation shall be maintained identifying the fuel as CARB diesel, and
(b) manual of recommended maintenance provided by the manufacturer, or maintenance procedures specified by the engine servicing company.
(Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 63 Subpart ZZZZ)

13 C45252 The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following:
(a) dates and elapsed times of every instance of engine operation based on actual readings of the engine hour meter; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency;
(b) if located within 500 feet of a school, the time of day of every instance of engine operation for testing and maintenance, unless the engine emits no more than 0.01 g/bhp-hr of diesel particulate matter or meets the requirements specified in 17CCR, Section 93115.13(f);
(c) for a total external power outage, documentation from the serving utility of an outage in the area where the engine is located; for an internal power outage, a description of what caused the failure and receipts and/or work orders for the necessary repairs; for a partial external power outage, including a low-voltage or electrical transient incident in which the external power voltage is low enough to trigger the operation of an emergency standby engine, a description of the incident;
(d) total cumulative hours of operation per calendar year;
(e) records of annual engine maintenance shall include the date the maintenance was performed and the nature of the maintenance; and
(f) hours of operation for all uses other than those specified above and identification of the nature of that use.
(Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)

14 C43432 All records required by this permit shall be maintained on site and readily available for District inspection for a minimum of 36 months from their date of creation unless otherwise indicated by the conditions of this permit. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart IIII)

#	Name	Description
1	C45640	No person shall operate any existing or relocated unit unless it is initially tuned no later than January 1, 2022, and tuned at least once every calendar year thereafter. No two tuning events shall occur within 90 days of each other. Boiler tuning shall be conducted in accordance with the recommended tuning procedure of the manufacturer or boiler tuning contractor, or the tuning procedure specified in 40 CFR Part 63, Sections 63.7540(a)(10)(i) through (vi). [Rule 69.2.2(d)(3)]
2	C45641	An owner or operator of an existing or relocated unit shall maintain documentation verifying the required annual tune-ups. [Rule 69.2.2(h)(3)]
3	C45642	All records shall be maintained on site for at least three calendar years in electronic and/or hardcopy format and shall be made available to the District upon request. [Rule 12 and/or 69.2.2(h)]
4	C45200	This equipment shall not discharge into the atmosphere from any single source of emissions, any air contaminant for a period or periods aggregating more than three minutes in any one hour which has an opacity such as to obscure an observer's view to a degree equal to or greater than does smoke of a shade designated Ringelmann 1 or equivalent 20 percent opacity. (Rule 12 and/or Rule 50)
5	C45204	Equipment shall not discharge such quantities of air contaminants or other material which cause injury, detriment, nuisance or annoyance to any considerable number of persons or to the public; or which endanger the comfort, repose, health or safety of any such persons or the public; or which cause or have a natural tendency to cause injury or damage to business or property. (Rule 12 and/or Rule 51)
6	C45643	Any person who holds a valid Certificate and who desires to change the location of the registered emission unit shall first apply for and obtain a revised Certificate from the Air Pollution Control Officer. The application shall be accompanied by the applicable application and processing fees specified in Rule 40 – Permit and Other Fees. This provision shall not apply to any change of location within a stationary source or any change of location for a portable emission unit. [Rule 12(f)(3)]

Conditions

#	Name	Description
1	C40239	The engine shall be operated exclusively during emergencies as defined in Rule 69.4.1 or Rule 12 or 17CCR93115 as applicable, or for maintenance and testing.
2	C40907	This engine shall not be used as a part of a non-emergency Demand Response Program (DRP). This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115 and operating in accordance with 17 CCR 93115.6(c). (17 CCR 93115)
3	C28643	Engine operation for maintenance and testing purposes shall not exceed 50 hours per calendar year. (17 CCR 93115, Rule 1200, NSR)
4	C28412	This engine shall only use CARB diesel fuel. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII)
5	C28413	Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6	C28414	The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7	C28415	This engine shall not operate for non-emergency use during the following periods, as applicable: (a) whenever there is any school sponsored activity, if engine is located on school grounds or (b) between 7:30am and 3:30pm on days when school is in session, if the engine is located within 500 feet of, but not on, school grounds. This condition shall not apply to an engine located at or near any school grounds that also serve as the students' place of residence. (17 CCR 93115)
8	C28560	Engine operation in response to notification of an impending rotating outage shall be subject to all the following restrictions: (a) the utility distribution company has ordered rotating outages in the control area where the engine is located, (b) the engine is operated no more than 30 minutes prior to the time when the utility distribution company officially forecasts a rotating outage in the cited control area, and (c) the engine operation is terminated immediately after the utility distribution company advises that a rotating outage is no longer in effect. This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115 and operating in accordance with 17 CCR 93115.6(c). (17 CCR 93115)

9	C28419	A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information: (a) old meter's hour reading, (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and (c) copy of receipt of new meter or of installation work order. A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)
10	C43433	The owner or operator of this engine shall install, configure, operate, and maintain this engine and control device, if any, according to the manufacturer's emission-related written instructions. The owner or operator may change only those emission-related settings that are permitted by the manufacturer. The periodic maintenance shall be conducted at least once each calendar year. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart IIII)
11	C45251	The owner or operator of this engine shall conduct periodic maintenance of the engine and add-on control equipment, if any, as recommended by the engine and control equipment manufacturers or as specified by the engine servicing company's maintenance procedures. Maintenance shall be conducted at least once each calendar year, and shall include, but is not limited to, the following: 1) Change oil and filter, or test in accordance with the requirements of 40 CFR §63.6625(i) or (j); 2) Inspect and clean air filters, replacing as necessary; and 3) Inspect all hoses and belts, replacing as necessary. Documentation of oil and filter changes or copies of the oil test analysis shall be kept on site and made available upon request. If testing in accordance with 40 CFR §63.6625(i) or (j), the oil analysis program must analyze the Total Base Number, viscosity and percent water content (for compression ignition engines) and the Total Acid Number, viscosity and percent water content (for spark ignited engines). If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 business days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine. (Rule 12, Rule 69.4.1, 40 CFR 63 Subpart ZZZZ)
12	C43434	The owner or operator of the engine shall maintain the following records on site for at least the same period of time as the engine to which the records apply is located at the site: (a) documentation shall be maintained identifying the fuel as CARB diesel, and (b) manual of recommended maintenance provided by the manufacturer. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII)
13	C45252	The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following: (a) dates and elapsed times of every instance of engine operation based on actual readings of the engine hour meter; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency; (b) if located within 500 feet of a school, the time of day of every instance of engine operation for testing and maintenance, unless the engine emits no more than 0.01 g/bhp-hr of diesel particulate matter or meets the requirements specified in 17CCR, Section 93115.13(f); (c) for a total external power outage, documentation from the serving utility of an outage in the area where the engine is located; for an internal power outage, a description of what caused the failure and receipts and/or work orders for the necessary repairs; for a partial external power outage, including a low-voltage or electrical transient incident in which the external power voltage is low enough to trigger the operation of an emergency standby engine, a description of the incident; (d) total cumulative hours of operation per calendar year; (e) records of annual engine maintenance shall include the date the maintenance was performed and the nature of the maintenance; and (f) hours of operation for all uses other than those specified above and identification of the nature of that use. (Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)
14	C43432	All records required by this permit shall be maintained on site and readily available for District inspection for a minimum of 36 months from their date of creation unless otherwise indicated by the conditions of this permit. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart IIII)

COMPLIANCE INSPECTION REPORT

BUSINESS NAME USA Petroleum
ADDRESS 3229 Sports Arena
CITY/ZIP San Diego, CA 92110

On the above date an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR) and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

Pg 2 of 2

Office Use Only

Status Verification / No USTs Found! T75 STATUS FEB 24 1998

This site does not have any underground storage tanks

According to the County of San Diego, Dept. of Environmental Health Permits files (Site's file) located at 1255 Imperial Ave, San Diego CA, The UST was removed on or near the date after Feb 3, 1989.

On Feb 3, 1989 The tank owner/Prop owner submitted an UST Removal Permit. to The Dept. of Environmental Health

In addition, the County of San Diego, Dept. of Environmental Health, Site Assessment & Mitigation Division sent the Property owner an official Notice(s) for unauthorized releases related to the USTs.

Attached are photocopies of the UST Removal Permit & Official Notices.

~~P.S.~~ This was a File Review inspection,

Please deactivate this site.

DATE 11/19/97

PAGE 2 OF 2

BUSINESS ADDRESS: 3209 Sports Arena Blvd San Diego CA 92110

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

- [ ] Health Permit not obtained SDCC 68.905 — V0108 W____
- [ ] No EPA Identification Number 66262.12 — V0105 W____
- [ ] Waste Manifests/Receipts not on-site for 3 years 66262.40 — V0118 W____
- [ ] Manifest not properly completed 66262.23 — V0120 W____
- [ ] Manifest copy not sent to DTSC 66262.23 — V0115 W____
- [ ] TSDF signed-manifest not on-site 66262.40 — V0121 W____
- [ ] Biennial report not sent to DTSC 66262.41 — V0122 W____
- [ ] LDR Documentation not available 66268.7 — V0123 W____
- [ ] Exception Rpt. not filed with DTSC 66262.42 — V0116 W____
- [ ] Operating TSDF without authorization 25201 — V0124 W____

STORAGE AND HANDLING

- [ ] Waste stored longer than 90, 180, or 270 days 66262.34 — V0221 W____
- [ ] Failure to clean up hazwaste off of floor surface 66262.10b — V0313 W____
- [ ] Waste container missing/improperly labeled 66262.34 — V0222 W____
- [ ] Haz Materials not properly labeled 25124 — V0223 W____
- [ ] Waste container not kept closed 66265.173 — V0202 W____
- [ ] Waste container in poor condition 66265.171 — V0205 W____
- [ ] Waste container(s) not properly managed 66265.173 — V0210 W____
- [ ] Damaged container not repackaged 66265.171 — V0226 W____
- [ ] Container incompatible with waste 66265.172 — V0207 W____
- [ ] Incompatibles in the same container 66265.177 — V0224 W____
- [ ] Incompatibles not stored separately 66265.177 — V0213 W____
- [ ] Ignitible Waste less than 50 feet 66265.176 — V0214 W____
- [ ] Ignitible Waste not grounded 66265.31 — V0215 W____
- [ ] Storage area not inspected weekly 66265.174 — V0216 W____

DISPOSAL AND TRANSPORTATION

- [ ] Unauth. disposal of waste to _____ 25189.5 — V0313 W____
- [ ] Waste determination not made 66262.11 — V0319 W____
- [ ] Unlawful transport of haz. waste 25163 — V0315 W____
- [ ] Waste transported without manifest 66262.20 — V0316 W____
- [ ] Extremely Haz Waste Permit not obtained 25205.7 — V0317 W____

TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- [ ] Training records unavailable 66265.16 — V0405 W____
- [ ] Training program not adequate 66265.16 — V0406 W____
- [ ] Facility not designed to minimize release 66265.31 — V0501 W____
- [ ] Spill control equip not available 66265.32 — V0508 W____
- [ ] Aisle space is obstructed 66265.35 — V0509 W____
- [ ] Contingency plan not prepared and/or on file 66265.51, 66265.53 — V0609 W____

MISCELLANEOUS

- [ ] Waste oil contaminated 25250.7 — V0225 W____
- [ ] Used oil filters improperly managed 66266.130 — V0701 W____
- [ ] Damaged batteries improperly managed 66266.81 — V0702 W____
- [ ] Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered pemitting) — V0125 W____
- [ ] Onsite treatment of waste without authorization 25201 — V0125 W____

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

- [ ] Health Permit not obtained 68.1005, 25284 — V3002 T____
- [ ] Repair/modify/close permit not obtained 68.1005 — V3007 T____
- [ ] UST Permit Application not submitted 25286(a) — V3010 T____
- [ ] Operating permit conditions violated 2712 — V3011 T____
- [ ] Failed to notify HMMD of changes 25284 — V3012 T____
- [ ] No owner/operator agreement 25284 — V3005 T____
- [ ] No records of financial coverage 25292.2 — V3013 T____
- [ ] No maint/monit/calib records available 2712(b), 2641(j) — V3001 T____
- [ ] Monitoring Equip. not tested annually 2630, 2641 — V3003 T____

MONITORING REQUIREMENTS (SINGLE WALL)

- [ ] Leak Detection Method does not meet performance standards 2643 — V3014 T____
- [ ] Integrity test not conducted 25292 — V3015 T____
- [ ] Copy of tank test not submitted to HMMD within 30 days 2643 — V3016 T____
- [ ] Manual tank gauging (<2000 gal) 2645 not done properly — V3017 T____
- [ ] Reconciliation not done properly 2646 — V3018 T____
- [ ] Reconciliation not approved for facility 2646 — V3019 T____
- [ ] Dispenser meter(s) not calib annually 2646 — V3020 T____
- [ ] Improper liquid measurements 2646 — V3021 T____
- [ ] Stick in poor condition 2646 — V3022 T____
- [ ] Improper monthly reconciliation 2646 — V3023 T____
- [ ] Failed to report excessive variation 2646 — V3024 T____
- [ ] Pressurized Product Piping Leak Device not tested annually 25292 — V3025 T____
- [ ] No written monitoring procedure 2641 — V3027 T____
- [ ] No written emergency response plan 2641 — V3027 T____
- [ ] SIR reporting incorrectly done 2646.1 — V3004 T____

MONITORING REQUIREMENTS (DOUBLE WALL)

- [ ] Monitoring system not functional 2632 — V3026 T____
- [ ] No written monitoring procedure 2632 — V3027 T____
- [ ] Written emergency response plan not available 2632 — V3028 T____
- [ ] Spill/Overfill equip. not maintained or installed 2635 — V3029 T____

RELEASE REPORTING

- [ ] Failure to report an unauthorized release 25295 — V3009 T____
- [ ] Release record log not available 2651, 2650 — V3030 T____
- [ ] No leak report/investigation/action 2652 — V3031 T____

CLOSURE

- [ ] Temporary closure req. not completed 2671 — V3006 T____
- [ ] Unused tank not properly closed 25298 — V3032 T____
- [ ] Permanent closure req. not completed 2672 — V3033 T____
- [ ] Failed to apply for temporary closure 25298 — V3008 T____

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

- [ ] Health Permit not obtained SDCC 68.1105 — V2001 W____
- [ ] Business Plan not established/implemented 25503.5 — V2002 W____
- [ ] Business Plan not submitted to HMMD 25505 — V2007 W____
- [ ] Business Plan not amended 25505 — V2003 W____
- [ ] Personnel Training Records not available 19 CCR 2732 — V2302 W____

RELEASE REPORTING

- [ ] Failure to report a release/threatened release 25507 — V2008 W____

BUSINESS PLAN ELEMENTS

- [ ] Emergency Response Plan inadequate 25504 — V2201 W____
- [ ] Emergency Contacts not provided/current 25509 — V2203 W____
- [ ] Personnel Training Program inadequate 25504 — V2301 W____
- [ ] Inventory is incomplete 25504 — V2005 W____
- [ ] Site Map is not sufficient 25509 — V2202 W____
- [ ] Acutely Haz. Mat. not registered 25533 — V2009 W____

ALL VIOLATIONS MUST BE CORRECTED. PLEASE CALL (619) 338-2222 OR YOUR INSPECTOR IF YOU HAVE ANY QUESTIONS.

NOTICE: You are hereby notified that on 2/7/89, Susan Pease, Hazardous Materials Specialist conducted an inspection for the removal of 3 hazardous substance underground storage tanks. A summary of the conditions found is noted as follows:

tank 2,3 ☒ The site determination is pending receipt of Laboratory Analyses Results for samples taken this date. Have the Laboratory send the results directly to Sue Pease of the HMMD (see address below).

Tank 1 ☒ Contamination of the excavation area has been confirmed by observations made during the tank removal this date. Begin Site Assessment phase (see reverse).

Laboratory results received and reviewed by Sue Pease (of the HMMD) on 2/15/89:

☐ No further action is required.

☒ Begin Site Assessment phase (see attached)

San Diego, CA 92138-5261

EST. # H 15272

Field Observations and Notes:

1. Type of hazardous substance released: Gas-all types
2. Is hazardous substance ponded? Yes- under tank #1 Estimated amount 20 gal
3. Is amount of hazardous substance release known? No Estimated amount
4. Estimated depth to groundwater ~ 14-16' Beneficial use of groundwater? No
5. Soil conditions:
   a. Is backfill discolored? NO Estimated amount
   b. Is backfill saturated? NO Estimated amount
   c. Is native soil discolored? Yes Estimated amount Unk
   d. Is native soil saturated? Yes Estimated amount Unk
   e. Type of native soil (sandy, clay, etc.) Sand / clay
6. Description of odors from excavation Slight / moderate
7. Condition of tank (holes, corrosion, deteriorated wrapping, etc.) Tank #1 - Corroded and pitting on bottom Tank #2+3 - Good condition
8. Pipeline leak evident? Unk
9. Nearby underground vaults or utilities or basements? (Specify) Water dripping in excavation from car wash
10. Nearby water wells or surface waters? No
11. Other comments/observations:

Jack Simons
Sunbelt Investment Holdings
220 Congress Park Dr.
Delray Beach, Florida 33445

RE: UNAUTHORIZED RELEASE AT 1266/H 15272-001
3229 Sports Arena Blvd, San Diego

Dear Mr. Simons :

Information provided to this Department by tank removal observation indicates that the underground hazardous substance storage facility at the location referenced above has experienced an Unauthorized Release (leak).

The conditions created by the Unauthorized Release must be reported and corrected in accordance with Sections 25295 and 25297 of Chapter 6.7 of the California Health and Safety Code (H&SC) and Section 2652, Subchapter 16, Chapter 3, Title 23 of the California Administrative Code (CAC), and Chapter 6.5 of the H&SC and Title 22 of the CAC.

As the owner/operator of the underground storage tank, it is your responsibility to:

1. Take immediate action to prevent further unauthorized release;
2. Determine the extent and impact of the unauthorized release;
3. Submit a written Unauthorized Release Report to this Department within five workdays of receipt of this Notice;
4. Complete and distribute within five workdays the enclosed State Water Resources Control Board's "Underground Storage Tank Unauthorized Release(Leak)/Contamination Site Report";
5. Submit supplemental report as required to update the initial report; and,
6. Complete any site mitigation (cleanup) required.

The Unauthorized Release Report must address all six Elements listed on the reverse side of this Official Notice, to the extent of the best information known at this time. Additional information and responsibilities are also listed. Please note Item G concerning responsibility for payment for staff time expended on the investigation.

Subsequent site characterization and mitigation actions will be determined upon evaluation of the written report and consultation with the Regional Water Quality Control Board and other appropriate regulatory agencies.

Please call me at (619) 236-2222 if you have any questions regarding this Official Notice.

Sincerely,

Susan Rose
Hazardous Materials Specialist

Enclosure

cc: RWQCB

STATE

UNAUTHORIZED RELEASE REPORTING REQUIREMENTS

Each of the following must be addressed in the Unauthorized Release Report (CAC, Title 23, Chapter 3, Subchapter 16, Section 2652):

1. Describe the type, quantity and concentration of the hazardous substance released.

2. Describe the extent of the soil, groundwater, and/or surface water contamination due to the release based on the results of all investigations completed at the time the report is submitted.

3. Describe the method of clean-up implemented to date, proposed clean-up actions, and approximate costs of actions taken to date.

4. Indicate the method and location of disposal of the released hazardous substance and any contaminated soils or groundwater or surface water. (If any contaminated soil or water is removed from the site, include copies of the hazard waste manifests).

5. Describe the proposed method of repair or replacement of the underground tank/piping.

6. Include the tank operator's name and telephone number, the name and telephone number of any consultants retained, and a projection of proposed activity schedule.

NOTE: The completed SWRCB Form (enclosed) with appropriately detailed "comments" will usually suffice as meeting the requirements for the initial Unauthorized Release Report. You must distribute the completed form to all agencies as specified on the back of the form.

ADDITIONAL INFORMATION/RESPONSIBILITIES

A. Notify the local Fire Department immediately whenever a fire hazard or explosion hazard is present.

B. Notify the Regional Water Quality Control Board at (619) 265-5114 within 24 hours regarding this Unauthorized Release.

C. Cease the unauthorized release immediately by removing the hazardous substance from the system's leaking component(s), as necessary. Give careful consideration to proper tank ballast in areas of high groundwater. Ballast should be inert and compatible with tank residues (i.e., water).

D. Maintain the site in a safe and secure manner. The excavation, if any, may be backfilled in the interim for safety until site decontamination activities commence.

E. Obtain necessary permits for repair or removal of the underground tanks/piping from this Department, and other agencies, as appropriate.

F. Issuance of a permit to install new tanks at a site does not imply that any unauthorized release at the site has been mitigated to the satisfaction of this Department or any other regulatory agency.

G. Whereas the Legislature has appropriated funds from the California Hazardous Substance Cleanup Fund to pay the local and state agency administrative and oversight costs associated with the cleanup of releases from underground storage tanks; and Whereas the direct and indirect costs of overseeing removal or remedial action at the above site are funded, in whole or in part, from the Hazardous Substance Cleanup Fund; and Whereas the above individual(s) or entity(ies) have been identified as the party or parties responsible for investigation and cleanup of the above site; YOU ARE HEREBY NOTIFIED that pursuant to Section 25360 of the Health and Safety Code, the above Responsible Party or Parties shall reimburse the State Water Resources Control Board for all direct and indirect costs incurred by any and all state and local agencies while overseeing the cleanup of the above underground storage tank site, and the above Responsible Party or Parties shall make full payment of such costs within 30 days of receipt of a detailed invoice from the State Water Resources Control Board.

COUNTY OF SAN DIEGO

DATE:

MEMORANDUM FOR: California Regional Water Quality Control Board, San Diego Region

FROM: Hazardous Materials Management Unit (HMMU)

SUBJECT: UNAUTHORIZED RELEASE OF HAZARDOUS MATERIAL FROM AN UNDERGROUND STORAGE TANK T# 1260 / H 1572-001

Evidence of an unauthorized release of a hazardous material has been noted by HMMU staff at the site described below:

Site Address: 3229 Sports Arena Blvd (Street) San Diego Co (City) 92110 (Zip Code)

Property Owner: Sunbelt Investment Holdings (Name)
220 Congress Park Dr. (Street) Delray Beach (City) Florida (Zip Code) 33445
Telephone (405) 265-1300

Tank Operator: Tom McDonald (Name) (619) 693-0621 (Telephone)

The following information is provided for your consideration and action in accordance with the authority and responsibilities of the Regional Board.

Suspected Source(s) Gas

Amount Released Unknown (Gallons) Unknown (Time Period)

Release Detected By:

- ___ Routine Tank Testing
- ___ Test of Piping
- ___ Inventory Audit
- ___ Monitoring Device/Well
- ✓ Evidence of Soil Contamination Detected During Tank Removal
- ___ Evidence of Leaky Tank Detected During Tank Removal
- ___ Other

Description of underground tank systems on property (number, type, age, capacity, material stored, evidence of leakage).

Date Release Reported to or Detected by HMMU 2-7-89
Contact With Other Agencies
Additional Comments:

Please call the HMMU at 236-2222 if you have questions or comments regarding the above.

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS:

Submit three (3) copies of this application package, including plan drawings, with the required fee to the Department of Health Services, Hazardous Materials Management Unit, Room 311, 1700 Pacific Highway, San Diego, CA 92101. Checks should be made payable to the County of San Diego.

A permit will be issued by the Department of Health Services (DHS) upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in this application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit has been issued.

Once the permit has been issued, it is the permittee's responsibility to notify the DHS at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III and IV).

F. Indicate the Company/Person you wish to have our plan check comments directed to by circling the appropriate section letter above or if different enter below.

G. PROJECT WORK TO BE COMPLETED: Check Applicable Box	COMPLETE APPLICATION PARTS	FEE CODE (TABLE H.)	CODES FOR OFFICE USE ONLY

UNDERGROUND HAZARDOUS MATERIALS STORAGE TANK FACILITY

PART III

APPLICATION FOR PERMIT TO ABANDON

Complete all sections of Part III. If information is not known or applicable please indicate on application.

A. Total number of tanks to be abandoned 3

B. Tank Information - Complete the following information for each tank to be abandoned. Attach additional sheets as necessary.

Tank Number (Label tanks on plot plan to correspond to application)		1	2	3	4
Tank Capacity (gallons)		10,000	10,000	10,000	
Date Tank Installed		UK	UK	UK	
Tank Composition (Steel, Fiberglass, Fiberglass Coated Steel, Concrete, etc.)		Steel	Steel	Steel	
Tank Manufacturer		UK	UK	UK	
Tank Presently in Use? (Yes-No)		NO	NO	NO	
Materials Stored in Tank	Material: dates:	to	to	to	to
	Material: dates:	Regualr to	Unleaded to	Super U/L to	to
Has Tank System Leaked? (Yes, No, Not Known)	Tank	Not Known	Not Known	Not Known	
	Piping				
Basis of determination (Inventory records, tank system testing/monitoring, environmental monitoring)					
Is any part of the system cathodically protected? (Yes-No-Not Known)					
	Tank				
	Piping Lines				
Piping materials		Fiberglass	Fiberglass	Fiberglass	

C. PREVIOUS OWNERS AND OPERATORS OF THE TANK(S):

Dates	Owner/Operator
	Not Known

D. Approximate depth to groundwater: Not Known

Basis of Determination: _____

E. Proposed method of abandonment: |XX| Removal |___| Destruction in place

NOTE: Removal of the tank(s) is the preferred method of abandonment. Destruction of the tank in place, for example, by filling with an inert substance, will only be considered in special cases upon submittal of additional information to determine the risks and hazards of contamination. Additional information required includes recent tank testing results, soils data, special site characteristics and approval from the local Fire Department.

F. Future use/disposal site of tank: Scrap Metal

G. ATTACH A PLOT PLAN ON 8-1/2" x 11" paper showing the following:

1. Property Lines, Site Address, Scale, North Arrow
2. Location of 100 year flood plain, if applicable
3. Location of all existing and proposed structures
4. Location of all existing and proposed underground storage tank facilities
5. Location of underground tank(s) to be abandoned (number tanks to correspond to application)
6. Location of underground utility lines and vaults

H. REQUIRED INSPECTION - PERMIT TO ABANDON

A representative of the Department of Health Services (DHS) must be on site at the time the tank(s) is removed from the ground to evaluate the condition of the tank and the surrounding soil and/or groundwater. Any evidence of an unauthorized release of a hazardous material from the tank will require the submittal of additional information by the permittee to the DHS.

When a permit has been issued by the DHS to destroy a tank in place, the DHS will inspect to verify that the tank has been properly emptied and purged of all hazardous materials immediately prior to filling with an approved inert substance.

I. I declare that to the best of my knowledge and belief the statements and information provided are correct and true. I understand that information in addition to that provided above may be needed in order to obtain final approval by the Department of Health Services.

I understand that tests and procedures that may be required by other departments and agencies to demonstrate adequate site safety or suitability for future development (e.g., soil compaction testing) are in addition to the requirements of the Department of Health Services.

I will notify the Department of Health Services at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of San Diego.

Delray Beach, Fl 33445

Dear Mr. Simmons:

RE: UNAUTHORIZED RELEASE #T1260/H15272-001
3229 SPORTS ARENA BLVD., SAN DIEGO, CA 92110

The initial Unauthorized Release Report submitted by you dated March 7, 1989, for the site referenced above conforms to the reporting requirements, as prescribed in the California Health and Safety Code, Chapter 6.7 and the California Code of Regulations, Title 23, Chapter 3, Subchapter 16, Article 5, Section 2652.

For the duration of the site mitigation process, you are required to provide periodic written supplemental reports to this Department to update the Unauthorized Release Report pursuant to the California Code of Regulations, Title 23, Chapter 3, Subchapter 16, Article 5, Section 2652.

Please submit a written supplemental report to update the Unauthorized Release every 30 days. The report should include a summary of the investigation and mitigation progress accomplished to date, along with the projected accomplishments for the next reporting period. The update report is due by May 4, 1989.

If during the site mitigation process any significant situation is encountered that was not known nor anticipated at the time of the initial Unauthorized Release Report, please provide a written statement describing the situation in order to amend the Unauthorized Release Report.

John Simmons March 21, 1989

As a reminder, a copy of each manifest for hauling any hazardous waste generated as a result of the site characterization and mitigation procedure must be included with the written supplemental reports.

If you have any questions on this matter please contact me at (619) 236-2222.

Sincerely,

Susan Pease

OFFICIAL NOTICE

July 5, 1989

John Simmons
Sunbelt Management
220 Congress Park Drive
Delray Beach, FL 33445

Dear Mr. Simmons:

RE: UNAUTHORIZED RELEASE #T1260/H15272-001
3229 SPORTS ARENA BOULEVARD, SAN DIEGO, CA 92110

The May 31, 1989 report submitted by Environmental Audit, Inc., for the site referenced above has been reviewed.

The information provided to this Department to date indicates that:

1. Total Petroleum Hydrocarbon levels in soil were detected up to 30,400 mg/kg.

2. Benzene levels in water from monitoring wells were detected up to 5010 µg/l.

Based on this information, further work is needed to define the full extent of contamination.

Subsequent site assessment activities must address the following concerns. Remediation (clean-up) action must be evaluated and subsequently implemented upon completion of the site assessement.

SOIL CONTAMINATION

- Define the vertical and horizontal extent of soil contamination.

GROUNDWATER

- Define the extent of ground water contamination.

The Regional Water Quality Control Board has designated this area as a non-beneficial use area for ground water. However, due to the potential for migration of contaminants to the San Diego River, the Regional Water Quality Control Board has typically designated the following clean-up levels for dissolved constituents in ground water in this area:

Benzene	40 µg/l
Toluene	5.0 mg/l
Xylene	3.77 mg/l
Ethylbenzene	0.43 mg/l
Total Lead	0.01 mg/l

The maximum level of contamination typically allowed for Total Petroleum Hydrocarbons (TPH) in soil is 1000 mg/kg for this area.

The proposed well locations may not adequately define the full extent of dissolved hydrocarbons in water. It appears the area to the south of MW2 and northwest of MW3 are not being addressed.

Enclosed is a copy of a Site Assessment Information Checklist.

Should you have any questions, please contact me at (619) 338-2222.

Sincerely,

Susan Pease

Permit for Underground Storage Tank Construction/Closure

SITE NAME: **Dixieline Lumber Company**
SITE ADDRESS: **3250 Sports Arena Blvd, San Diego, CA 92110**
OWNER NAME: **Dixieline Lumber Company**
OWNER ADDRESS: **3250 Sports Arena Blvd, San Diego, CA 92110**

DESCRIPTION OF PROPOSED WORK: **Remove two (2) underground storage tanks and all associated piping**

In accordance with SDCC Ordinance Title 6, Chapter 10, Section 68.1004 (b), USTs must be removed within 180 days of permit approval. The deadline to remove USTs is February 13, 2004.

PERMIT CONDITIONS: For tank systems that are to be removed, the excavation shall be exposed prior to the scheduled inspection and sampling points identified by the DEH inspector. Sampling is required for both tank(s) and piping. The tank(s) and piping must remain in the excavation until the DEH inspector approves the removal.

1) All piping and underground storage tanks must be removed at the same time. Failure to do so will result in a re-inspection and $350.00 re-inspection fee.

2) A least one sample must be analyzed for MTBE and related oxygenates (DIPE, TAME, ETBE, TBA) using EPA Method 8260B

3) Certificate of Disposal/manifests required for tank

Please be advised:

All underground storage tanks that are to be removed **must be cleaned** and properly inerted prior to the removal

1) The tanks are visually free from all product, sludge, rinsate and debris. Residual staining caused by soil and waste consisting of light shadows, slight streaks, or minor discolorations, and soil and waste in cracks, crevices and pits may be present.

2) Tanks that held a Hazardous material or hazardous waste that had the potential to generate flammable vapors, must be properly inerted. A combustible gas indicator (CGI), which is properly calibrated, shall be used to measure the concentration of flammable vapor at the top, center and bottom of the underground storage tank. The concentration of flammable vapor must be below twenty percent of the Lower Explosive Limit (LEL) for the material that was contained in the tank(s) and the oxygen concentration shall be the same as that of ambient air, approximately 20.8%. The underground storage tank(s) must inerted with dry ice using a minimum of 15 pounds for every 1000 gallons of tank capacity.

3) Failure to have the tank properly cleaned prior to the time of the removal will result in the cancellation of the removal and will require a re-inspection and $350.00 re-inspection fee.

This office must be given at least 48 hours notice for all required Underground Storage Tank Activity.

Please call at (619) 338-2214 to schedule an appointment. For cancellations, please call (619) 237- 8451.

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS

Submit one (1) original and two (2) copies of this application package, including plan drawings with the required fee to the Department of Environmental Health (DEH), Land and Water Quality Division, 1255 Imperial Avenue, San Diego, CA 92101, or mail to P.O. Box 129261, San Diego, CA 92112-9261. **Checks should be made payable to the County of San Diego.**

A permit will be issued by DEH upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in the application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit is issued.

Once the permit has been issued, it is the responsibility of the permittee to notify DEH at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III, IV, & V).

F. PROJECT WORK TO BE COMPLETED: Check Applicable Box	COMPLETE APPLICATION PARTS	FEE CODE TABLE G
☐ Installation/Construction of new tank(s) systems only (without closing any existing tanks)	I & II	1
☐ Closure of existing tank(s) systems with installation of new tanks (tank replacement)	I, II & III	1 & 2
☒ Closure of existing tank(s) systems with no new tank installation	I & III	2
☐ Interior coating/repair of an existing underground storage tank	I & IV	1
☐ Repipe/pipe-repair piping upgrade of an existing underground storage tank facility	I & V	3
☐ Installation/Construction of vaulted tanks	VI	4

G. **FEES:** The fees shown below cover plan review and the required field inspections. Use the appropriate Fee Code as determined in Section F above

FEE CODE		
	Installation fee for first tanks $890 00 **(fee will apply to all tank installations, tank repairs, interior lining and bladder installations)**	Fee: $
1	Installation fee for each additional tank No. _____ X $90.00	Fee: $
	Establishment Base Fee $180.00 (Applies to establishments not currently under permit with DEH)	Fee: $
	Operating Permit Fee per tank No. _____ X $270.00 (Does not apply to replacement tanks if the existing tank to be replaced has paid current operating permit fees)	Fee: $
2	Closure fee for first tank ~~$535 00~~ 595,00	Fee: $ 595,00
	Closure fee for each additional tank No. 2 X ~~$90 00~~ 100,00	Fee. $ 200,00
3	**NOTE: Upgrades / Repair shall include but not limited to pipe repairs, repipes, and new monitoring system installations**	
	Upgrade /Repair – 2 inspections (including soil sampling) $755.00	Fee: $
	Upgrade /Repair – 1 inspection and no soil sampling $535.00	Fee: $
4	Consultation fee (e.g. vaulted tank. minimum 2 hours) _____ Hours X $90 00	Fee: $
5	Re-inspection fee $300 00	Fee: $
	Plan Re-Review $200.00	Fee: $
		TOTAL FEE: $ 695,00

H PERMITS REQUIRED BY OTHER AGENCIES:

FIRE DEPARTMENT ✓ APCD — BUILDING DEPARTMENT — OTHER —

Provide copies of approved applications from these departments and others if needed.

PERMIT APPLICATION
PART III
APPLICATION FOR PERMIT TO CLOSE UNDERGROUND STORAGE TANK SYSTEM

A. TOTAL NUMBER OF TANK SYSTEMS TO BE CLOSED
NOTE: UST SYSTEMS INCLUDE TANK AND ALL ASSOCIATED PIPING.

B. DESCRIPTION OF TANKS TO BE CLOSED:

TANK NO.	CAPACITY	DATE INSTALLED	TANK COMPOSITION	TANK PRESENTLY IN USE?	MATERIALS STORED IN TANK
1	1000	N/A	GLAS Steel	YES	DIESEL
2	675	N/A	GLS steel	YES	GASOLINE

C. HAS THE TANK SYSTEM EVER FAILED OR LEAKED? YES ☐ NO ☐ UNKNOWN ☒

D. REASON FOR TANKS TO BE CLOSED:

DEH USE ONLY:
Project Manager: _____
Type: _____
Status: _____

☒ Meet current state/federal requirements

☐ Replacement of existing tanks

☐ Tank system failure, briefly describe _____

☐ Other, briefly describe _____

E. PREVIOUS OWNERS AND OPERATORS OF THE TANKS:

Dates	Owner/Operator

F. PROPOSED METHOD OF CLOSURE: ☒ REMOVAL ☐ CLOSURE IN PLACE

SAMPLING PROTOCOL Tank owner/authorized representative responsible for all sampling analyses and associated costs.

- For tank systems that are to be removed. The excavation shall be exposed prior to the scheduled inspection and sampling points identified by the Department of Environmental Health (DEH) inspector. Sampling is required for both tank and piping. **The tank and piping must remain in the excavation until the SAM inspector approves the removal.**
- Tank systems to be closed in place. Submit an alternate plan which must include soil sampling, reason for closing the tank system in place and type of material to be used to fill the tank. Soil sampling and/or hydrostatic testing is also required for piping closures. Tank system closure in place will only be considered after evaluating the risks and hazards if the tank

G. DISPOSAL SITE OF TANK: SCRAP - PACIFIC COAST RECYCLING - 3055 COMMERCIAL ST SD CA 92113

Note: You must inform DEH of the address of where the tank and piping is to be disposed. Plans will be disapproved without this information.

H. ATTACH THREE COPIES OF PLANS SHOWING THE FOLLOWING:

1. Property lines, site address, scale, north arrow.
2. Location of all existing structures.
3. Location of all existing underground storage tank facilities.
4. Location of underground storage tanks and piping to be closed.
5. Location of underground utility lines and vaults.

I. REQUIRED INSPECTION-PERMIT TO CLOSE

A representative from DEH must be on site at the time the tank(s) are closed.

1. TANK SYSTEM CLOSURE BY REMOVAL:

- The excavation shall be exposed prior to the scheduled inspection. The tank owner/authorized representative on site must submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. A combustible gas instrument and soil sampling equipment must be on site. The DEH inspector will identify sampling points. The tank and piping must remain in the excavation until DEH approves the removal.

2. TANK SYSTEM CLOSURE IN PLACE:

- Soil sampling for tank(s) and piping.
- After approval of the alternate plan, the tank owner/authorized representative on site shall submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. The DEH inspector shall verify that the tank system has been properly emptied and will witness the filling with an approved inert substance. Piping must be closed at the same time as the tank.

J. DECLARATION

I declare that to the best of my knowledge and belief, the statements and information provided are correct and true. I understand that information in addition to that provided above may be needed in order to obtain final approval by the Department of Environmental Health (DEH).

I understand that tests and procedures that may be required by other departments and agencies to demonstrate adequate site safety or suitability for further development (e.g. soil compaction testing) are in addition to the requirements of the Department of Environmental Health (DEH).

I will notify the Department of Environmental Health (DEH) at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared or assumed by the County of San Diego.

WORKPLAN
FOR
UNDERGROUND STORAGE TANK CLOSURE

1. Site Name DIXIELINE LUMBER CO

2. Site Address 3250 SPORTS ARENA BLVD
SAN DIEGO

3. Describe the existing land use in the surrounding area (residential, commercial, schools). Describe the locations of nearest receptors and the prevailing wind.

COMMERCIAL

4. Explain how the excavation will be secured. Describe fencing/site security and other methods that ensure public safety.

CAUTION TAPE WITH BARRICADDES WILL SECURE EXCAVATION DURING TANK REMOVAL. SITE HAS LOCKED FENCE TO ENSURE PUBLIC SAFETY.

5. If soil is to be stockpiled, describe thelocation on the Plan Check map. Describe method of soil containment (berming/covers, run-off control).

UPON COMPLETED ANALYTICAL RESULTS FROM SOIL SAMPLES, STOCKPILE WILL BE PLACED BACK INTO EXCAVATION.

6. Do you plan to conduct site assessment or remedial work beyond what is necessary to remove the underground storage tank(s) and perform the mandory soil sampling required by the Site Assessment and Mitigation Division (SAM) of the Department of Environmental Health?

☐ Yes ☒ No

If Yes, a Workplan for Post-Tank Removal Investigation must be completed under the direction of a registered professional.

Monitoring System Certification

D. Results of Testing/Servicing

Software Version Installed: 323.03

Complete the following checklist:

☒ Yes	❑No*	Is the audible alarm operational?
☒ Yes	❑No*	Is the visual alarm operational?
☒ Yes	❑No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	❑No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
❑ Yes	❑No* ☒N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☒ Yes	❑No* ❑N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ❑ No.
☒ Yes	❑No* ❑N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? 90%
❑Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
❑ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ❑ Product; ❑ Water. If yes, describe causes in Section E, below.
☒ Yes	❑No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	❑No*	Is all monitoring equipment operational per manufacturer's specifications?

* In Section E below, describe how and when these deficiencies were or will be corrected.

E.Comments:

F. In-Tank Gauging / SIR Equipment:

☒ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐No*	Was accuracy of system product level readings tested?
☐ Yes	☐No*	Was accuracy of system water level readings tested?
☐ Yes	☐No*	Were all probes reinstalled properly?
☐ Yes	☐No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐No* ☐N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h; ☐ 0.1 g.p.h; ☐ 0.2 g.p.h.
☒ Yes	☐No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐No*	Was the testing apparatus properly calibrated?
☒ Yes	☐No* ☐N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

SPECIALIST Richard Hansen

INSPECTION CONTACT/TITLE Pat, mgr.

PHONE: (619) 221-0139.

BUSINESS NAME Sports Arena Arco Am/pm.

ADDRESS 3500 Sports Arena Bl.

CITY/ZIP San Diego CA. 92110.

On the above date, an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (HSC) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

Y	N/A		Y	N/A	
☐	☐	Unified Program Facility Permit current and available			Permit Expires on: 3/31/06
☑	☐	Hazardous Materials Business Plan available	☐	☐	Contingency Plan available
☐	☐	Employee Training is adequate	☑	☐	Employee Training records available
☑	☐	Waste disposal records available for review	☑	☐	Waste containers kept closed
☑	☐	Emergency contacts current ☑ Updated today	☑	☐	Waste containers kept labeled
☐	☐	Chemical inventory current ☐ Updated today	☑	☐	Waste containers in good condition

☐ All violations noted on this compliance inspection report were corrected during this inspection.

Pacific Systems Electric, Eric, on-site for man. expt. cert, CAL APP-CA000267 810, Annual Compliance Inspection Vaughn Perry 715 350.

Today: JUN 15 2005

Equipment on-sit:

- 3 - DW USTs and DW flex piping (2-87, 1-91)
- all 8 MPDs have CRC equipped with sensors,
- PLLDs on turbines,
- high level ~~alarm + ball floats~~ = overfill protection,

— (all below grade components OK) —

Also Reviewed: (Paperwork)

- D.O. (designated operator) inspection reports (Jan Feb + Mar),
- Forms: inventory, Owner ID form
- Repair invoices since start-up,
- Business Plan items – emerg. site map, empl. training plan, + emerg. response plan,
- Financial Responsibility letter,

☒ This is an annual certification that the Hazardous Materials Business Plan (inventory, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored.

Violations noted today:

Paper work items not located. (not picked up yet to date)

OK (1.) Haz Waste Manifest receipts for any waste disposed of since stations opening.

OK (2.) Copy of the stations ~~FOUND~~ CAL EPA ID #. (30 days).

(3.) Forms A & B. (The blank ones are in your compliance book). (30 days).

(4.) Copy of the tank secondary containment test report (initial) and the 6-month follow-up test. (30 days).

(5.) Spill bucket ~~test~~ results (initial and every 12 months thereafter). (30 days).
Monitoring equip. cert report, certified line test report, and tank mfrs. checklist form (all of these from the tank start-up last year).

(6.) Employee training records in Health & Safety ~~Cal/OSHA~~ Provide copies for inspector (30 days).

RE: Underground Tank Facility
3500 SPORTS ARENA BL, SAN DIEGO, 92110

The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) in the County of San Diego. The HMD, as the CUPA, regulates the construction, installation, operation, repair and removal of underground storage tank (UST) systems. Recent changes in state regulations require owners and operators of UST systems to submit the new Unified Program Consolidated Forms developed by the State Water Resources Control Board. Completed forms must be submitted to the CUPA at the address above by August 31, 2008.

The changes to the UST regulations which went into effect on January 17, 2008, require UST owners and operators to use the new standardized forms to submit all required (current and new) registration information. All UST owners and operators must provide the CUPA with tank and facility information (including Monitoring Plan, Emergency Plan and Plot Plan*) on the new forms. The forms (listed below) are available in interactive format at www.sdcounty.ca.gov/hazmat/hmd_forms.html. Failure to submit these new forms will result in non-renewal of the UST Operating Permit. To prevent any delay to the renewal of your UST Operating Permit, submit these forms immediately. Copies of the completed forms must be maintained at the UST facility. If you manage more than one facility, a complete set of forms is required for each facility.

The new standardized forms will promote consistency in record keeping which will benefit HMD and UST owners and operators. If you have recently submitted the information on the new forms, please disregard this advisory.

If you have any questions about the information contained in this bulletin, please contact the Hazardous Materials Division Duty Specialist at (619) 338-2231.

Sincerely,

J. M. VIZZIER, Chief
Hazardous Materials Division

PATRICK SULLIVAN		(858) 735-4044	

The following questions represent the facility's activities, NOT the specific project description.

PART I: FIRE DEPARTMENT – HAZARDOUS MATERIALS DIVISION: OCCUPANCY CLASSIFICATION: Indicate by circling the item, whether your business will use, process, or store any of the following hazardous materials. If any of the items are circled, applicant must contact the Fire Protection Agency with jurisdiction prior to plan submittal.

1. Explosive or Blasting Agents
2. Compressed Gases
3. Flammable/Combustible Liquids
4. Flammable Solids
5. Organic Peroxides
6. Oxidizers
7. Pyrophorics
8. Unstable Reactives
9. Water Reactives
10. Cryogenics
11. Highly Toxic or Toxic Materials
12. Radioactives
13. Corrosives
14. Other Health Hazards
15. None of These.

PART II: SAN DIEGO COUNTY DEPARTMENT OF ENVIRONMENTAL HEALTH – HAZARDOUS MATERIALS DIVISIONS (HMD): If the answer to any of the questions is yes, applicant must contact the County of San Diego Hazardous Materials Division, 1255 Imperial Avenue, 3rd floor, San Diego, CA 92101. Call (619) 338-2222 prior to the issuance of a building permit.

FEES ARE REQUIRED.

Expected Date of Occupancy: ____

	YES	NO		
1.	☑	☐	Is your business listed on the reverse side of this form? (check all that apply).	
2.	☐	☑	Will your business dispose of Hazardous Substances or Medical Waste in any amount?	
3.	☑	☐	Will your business store or handle Hazardous Substances in quantities equal to or greater than 55 gallons, 500 pounds, 200 cubic feet, or carcinogens/reproductive toxins in any quantity?	
4.	☑	☐	Will your business use an existing or install an underground storage tank?	
5.	☐	☑	Will your business store or handle Regulated Substances (CalARP)?	
6.	☐	☑	Will your business use or install a Hazardous Waste Tank System (Title 22, Article 10)?

PART III: SAN DIEGO COUNTY AIR POLLUTION CONTROL DISTRICT: If the answer to any of the questions below is yes, applicant must contact the Air Pollution Control District (APCD), 10124 Old Grove Road, San Diego, CA 92131-1649, telephone (858) 586-2600 prior to the issuance of a building or demolition permit. Note: If the answer to questions 3 or 4 is yes, applicant must also submit an asbestos notification form to the APCD at least 10 working days prior to commencing demolition or renovation, except demolition or renovation of residential structures of four units or less. Contact the APCD for more information.

	YES	NO	
1.	☑	☐	Will the subject facility or construction activities include operations or equipment that emit or are capable of emitting an air contaminant? (See the APCD factsheet at http://www.sdapcd.org/info/facts/permits.pdf, and the list of typical equipment requiring an APCD permit on the reverse side of this from. Contact APCD if you have any questions).
2.	☐	☑	(ANSWER ONLY IF QUESTION 1 IS YES) Will the subject facility be located within 1,000 feet of the outer boundary of a school (K through 12)? (Public and private schools may be found after search of the California School Directory at http://www.cde.ca.gov/re/sd/; or contact the appropriate school district).
3.	☐	☑	Will there be renovation that involves handling of any friable asbestos materials, or disturbing any material that contains non-friable asbestos?
4.	☐	☑	Will there be demolition involving the removal of a load supporting structural member?

Briefly describe business activities:	Briefly describe proposed project:

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan.

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within 24 hours of discovery. Recovered hazardous materials, unless suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: (Complete only if applicable)

RESPONSE PLAN – PAGE 2

(One form per facility)

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

IV. TANK MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S):

☒ 1. **CONTINUOUS ELECTRONIC TANK MONITORING OF ANNULAR (INTERSTITIAL) SPACE(S) OR SECONDARY CONTAINMENT VAULT(S) WITH AUDIBLE AND VISUAL ALARMS (23 CCR §2632, 2634)** 490-5
SECONDARY CONTAINMENT IS: ☐ a. DRY ☒ b. LIQUID FILLED ☐ c. PRESSURIZED ☐ d. UNDER VACUUM 490-6

PANEL MANUFACTURER: **VEEDER ROOT** 490-7	MODEL #: **TLS350** 490-8
LEAK SENSOR MANUFACTURER: **VEEDER ROOT** 490-9	MODEL #(S): **301** 490-10

☐ 2. **AUTOMATIC TANK GAUGING (ATG) SYSTEM USED TO MONITOR <u>SINGLE WALL TANK(S)</u> (23 CCR §2643)** 490-11

PANEL MANUFACTURER: 490-12	MODEL #: 490-13
IN-TANK PROBE MANUFACTURER: 490-14	MODEL #(S): 490-15

LEAK TEST FREQUENCY: ☐ a. CONTINUOUS ☐ b. DAILY/NIGHTLY ☐ c. WEEKLY 490-16
☐ d. MONTHLY ☐ e. OTHER (Specify): 490-17

PROGRAMMED TESTS: ☐ a. 0.1 g.p.h. ☐ b. 0.2 g.p.h. ☐ c. OTHER (Specify): 490-18 490-19

☐ 3. **MONTHLY STATISTICAL INVENTORY RECONCILIATION (23 CCR §2646.1)** 490-20

☐ 4. **WEEKLY MANUAL TANK GAUGING (MTG) (23 CCR §2645):** TESTING PERIOD: ☐ a. 36 HOURS ☐ b. 60 HOURS 490-21 490-22

☐ 5. **TANK INTEGRITY TESTING (23 CCR §2643.1):** 490-23
TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. BIENNIALLY ☐ c. OTHER (Specify): 490-24, 490-25

☐ 99. **OTHER** (Specify): 490-26, 490-27

V. PIPE MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply)

☒ 1. **CONTINUOUS MONITORING OF PIPE/ PIPING SUMP(S) AND OTHER SECONDARY CONTAINMENT WITH AUDIBLE AND VISUAL ALARMS (23 CCR §2636)** 490-28
SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. PRESSURIZED ☐ d. UNDER VACUUM 490-29

PANEL MANUFACTURER: **VEEDER ROOT** 490-30	MODEL #: **TLS350** 490-31
LEAK SENSOR MANUFACTURER: **VEEDER ROOT** 490-32	MODEL #(S): **208** 490-33

PIPING LEAK ALARM TRIGGERS AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN. ☒ a. YES ☐ b. NO 490-34
FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN. ☒ a. YES ☐ b. NO 490-35

☐ 2. **MECHANICAL LINE LEAK DETECTOR (MLLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS AND RESTRICTS OR SHUTS OFF PRODUCT FLOW WHEN A LEAK IS DETECTED (23 CCR §2636)** 490-36

MLLD MANUFACTURER(S): 490-37	MODEL #(S): 490-38

☒ 3. **ELECTRONIC LINE LEAK DETECTOR (ELLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS (23 CCR §2636)** 490-39

ELLD MANUFACTURER(S): **VEEDER ROOT** 490-40	MODEL #(S): **VR8484** 490-41

PROGRAMMED IN LINE LEAK TEST: ☐ 1. MINIMUM MONTHLY 0.2 g.p.h. ☐ 2. MINIMUM ANNUAL 0.1 g.p.h. 490-42
ELLD DETECTION OF A PIPING LEAK TRIGGERS AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN. ☒ a. YES ☐ b. NO 490-43
ELLD FAILURE/DISCONNECTION TRIGGERS AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN. ☒ a. YES ☐ b. NO 490-44

☐ 4. **PIPE INTEGRITY TESTING:** TEST FREQUENCY ☐ a. ANNUALLY ☐ b. EVERY 3 YEARS ☐ c. OTHER (Specify): 490-46, 490-47

☐ 5. **VISUAL PIPE MONITORING:** FREQUENCY ☐ a. DAILY ☐ b. WEEKLY ☐ c. MIN. MONTHLY & EACH TIME SYSTEM OPERATED* 490-48, 490-49
* Allowed for monitoring of unburied emergency generator fuel piping only per HSC §25281.5(b)(3)

☐ 6. **SUCTION PIPING MEETS EXEMPTION CRITERIA [23 CCR §2636(a)(3)]** 490-50

☐ 7. **NO REGULATED PIPING PER HEALTH AND SAFETY CODE, DIVISION 20, CHAPTER 6.7 IS CONNECTED TO THE TANK SYSTEM** 490-51

☐ 99. **OTHER** (Specify): 490-52, 490-53

UNDERGROUND STORAGE TANK
MONITORING PLAN (Page 2 of 2)

This plan has been reviewed and is:
☒ Approved ☐ Approved with conditions*
Date: 06/24/09
Specialist: ZHerman
(Local Agency Signature) *conditions on back

VI. UNDER DISPENSER CONTAINMENT (UDC) MONITORING

1. UDC MONITORING IS PERFORMED USING THE FOLLOWING METHOD: 490-54a 490-54b
☒ 1. CONTINUOUS ELECTRONIC MONITORING ☐ 2. FLOAT AND CHAIN ASSEMBLY ☐ 3. ELECTRONIC STAND-ALONE
☐ 4. NO DISPENSERS ☐ 99. OTHER (Specify):

PANEL MANUFACTURER: **VEEDER ROOT**	490-55	MODEL #: **TLS350**	490-56
LEAK SENSOR MANUFACTURER:**VEEDER ROOT**	490-57	MODEL #(S): **208**	490-58

DETECTION OF A LEAK INTO THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS	☒ a. YES	☐ b. NO	490-59
UDC LEAK ALARM TRIGGERS AUTOMATIC PUMP SHUTDOWN	☒ a. YES	☐ b. NO	490-60
FAILURE / DISCONNECTION OF UDC MONITORING SYSTEM TRIGGERS AUTOMATIC PUMP SHUTDOWN	☒ a. YES	☐ b. NO	490-61
UDC MONITORING STOPS THE FLOW OF PRODUCT AT THE DISPENSER	☒ a. YES	☐ b. NO	490-62

2. UDC CONSTRUCTION IS ☒ 1. SINGLE-WALLED ☐ 2. DOUBLE-WALLED 490-63

IF DOUBLE WALLED: 490-64a
UDC INTERSTITIAL SPACE IS MONITORED BY: ☐ 1. LIQUID ☐ 2. PRESSURE ☐ 3. VACUUM
A LEAK WITHIN THE SECONDARY CONTAINMENT OF THE UDC TRIGGERS AUDIBLE AND VISUAL ALARMS ☐ a. YES ☐ b. NO 490-64b

VII. PERIODIC SYSTEM TESTING

☐ 1. **ELD TESTING**: THIS FACILITY HAS BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT ENHANCED LEAK DETECTION (ELD) MUST BE PERFORMED. PERIODIC ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED. (23 CCR §2644.1) 490-65

☒ 2. **SECONDARY CONTAINMENT COMPONENTS ARE TESTED EVERY 36 MONTHS.** 490-66

☒ 3. **SPILL BUCKETS ARE TESTED ANNUALLY.** 490-67

VIII. RECORDKEEPING

The following monitoring/maintenance records are kept for this facility:

☒ Alarm logs	490-68a	☐ Visual Inspection Records	490-68b
☐ Tank integrity testing results	490-68c	☐ SIR testing results (and supporting documentation records)	490-68d
☐ Tank gauging results (and supporting documentation records)	490-68e	☐ ATG Testing results (and supporting documentation records)	490-68f
☐ Corrosion Protection 60-day logs	490-68g	☒ Equipment maintenance and calibration records	490-68h

IX. TRAINING

☒ Personnel with UST monitoring responsibilities are familiar with all of the following documents relevant to their job duties. 490-69a

REFERENCE DOCUMENTS MAINTAINED AT FACILITY (Check all that apply)

☒ THIS UNDERGROUND STORAGE TANK MONITORING PLAN (Required) 490-69b
☒ OPERATING MANUALS FOR ELECTRONIC MONITORING EQUIPMENT (Required) 490-69c
☐ CALIFORNIA UNDERGROUND STORAGE TANK REGULATIONS 490-69d
☐ CALIFORNIA UNDERGROUND STORAGE TANK LAW 490-69e
☐ STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION: "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION" 490-69f
☐ SWRCB PUBLICATION: "UNDERSTANDING AUTOMATIC TANK GAUGING SYSTEMS" 490-69g
☐ OTHER (Specify): 490-69h, 490-69i

☒ This facility has a "Designated UST Operator" who has passed the California UST System Operator Exam administered by the International Code Council (ICC). The "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems annually, and within 30 days of hire. This training will include, but is not limited to, the following: 490-70

- Operation of the UST systems in a manner consistent with the facility's best management practices
- The facility employee's role with regard to the monitoring equipment as specified in this UST Monitoring Plan
- The facility employee's role with regard to spills and overfills as specified in the UST Response Plan
- Names of contact person(s) for emergencies and monitoring alarms

X. COMMENTS/ADDITIONAL INFORMATION

Provide additional comments here or indicate how many pages with additional information on specific monitoring procedures are attached to this plan. 490-71
ANNUAL CERT

XI. PERSONNEL RESPONSIBILITIES

The UST Owner/Operator is responsible for ensuring that: 1) the daily/routine UST monitoring activities and maintenance of UST leak detection equipment covered by this plan occurs, 2) all conditions that indicate a possible release are investigated, and 3) all monitoring records are maintained properly.
The following person(s) are responsible for performing the monitoring and equipment maintenance:

NAME PAT SULLIVAN	490-72	TITLE OWNER	490-73
NAME KEVIN SULLIVAN	490-74	TITLE OWNER	490-75

The Designated Operator shall perform a monthly visual inspection of the facility, provide a report to the owner/operator, and inform the owner/operator of any conditions that need follow-up action.

XII. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

APPLICANT SIGNATURE REPRESENTING: ☒ 1. Tank Owner/Operator ☐ 2. Facility Owner/Operator ☐ 3. Authorized Representative of Owner	490-76	DATE: 4/9/2009	490-77
APPLICANT NAME (print): PAT SULLIVAN	490-78	APPLICANT TITLE: OWNER	490-79

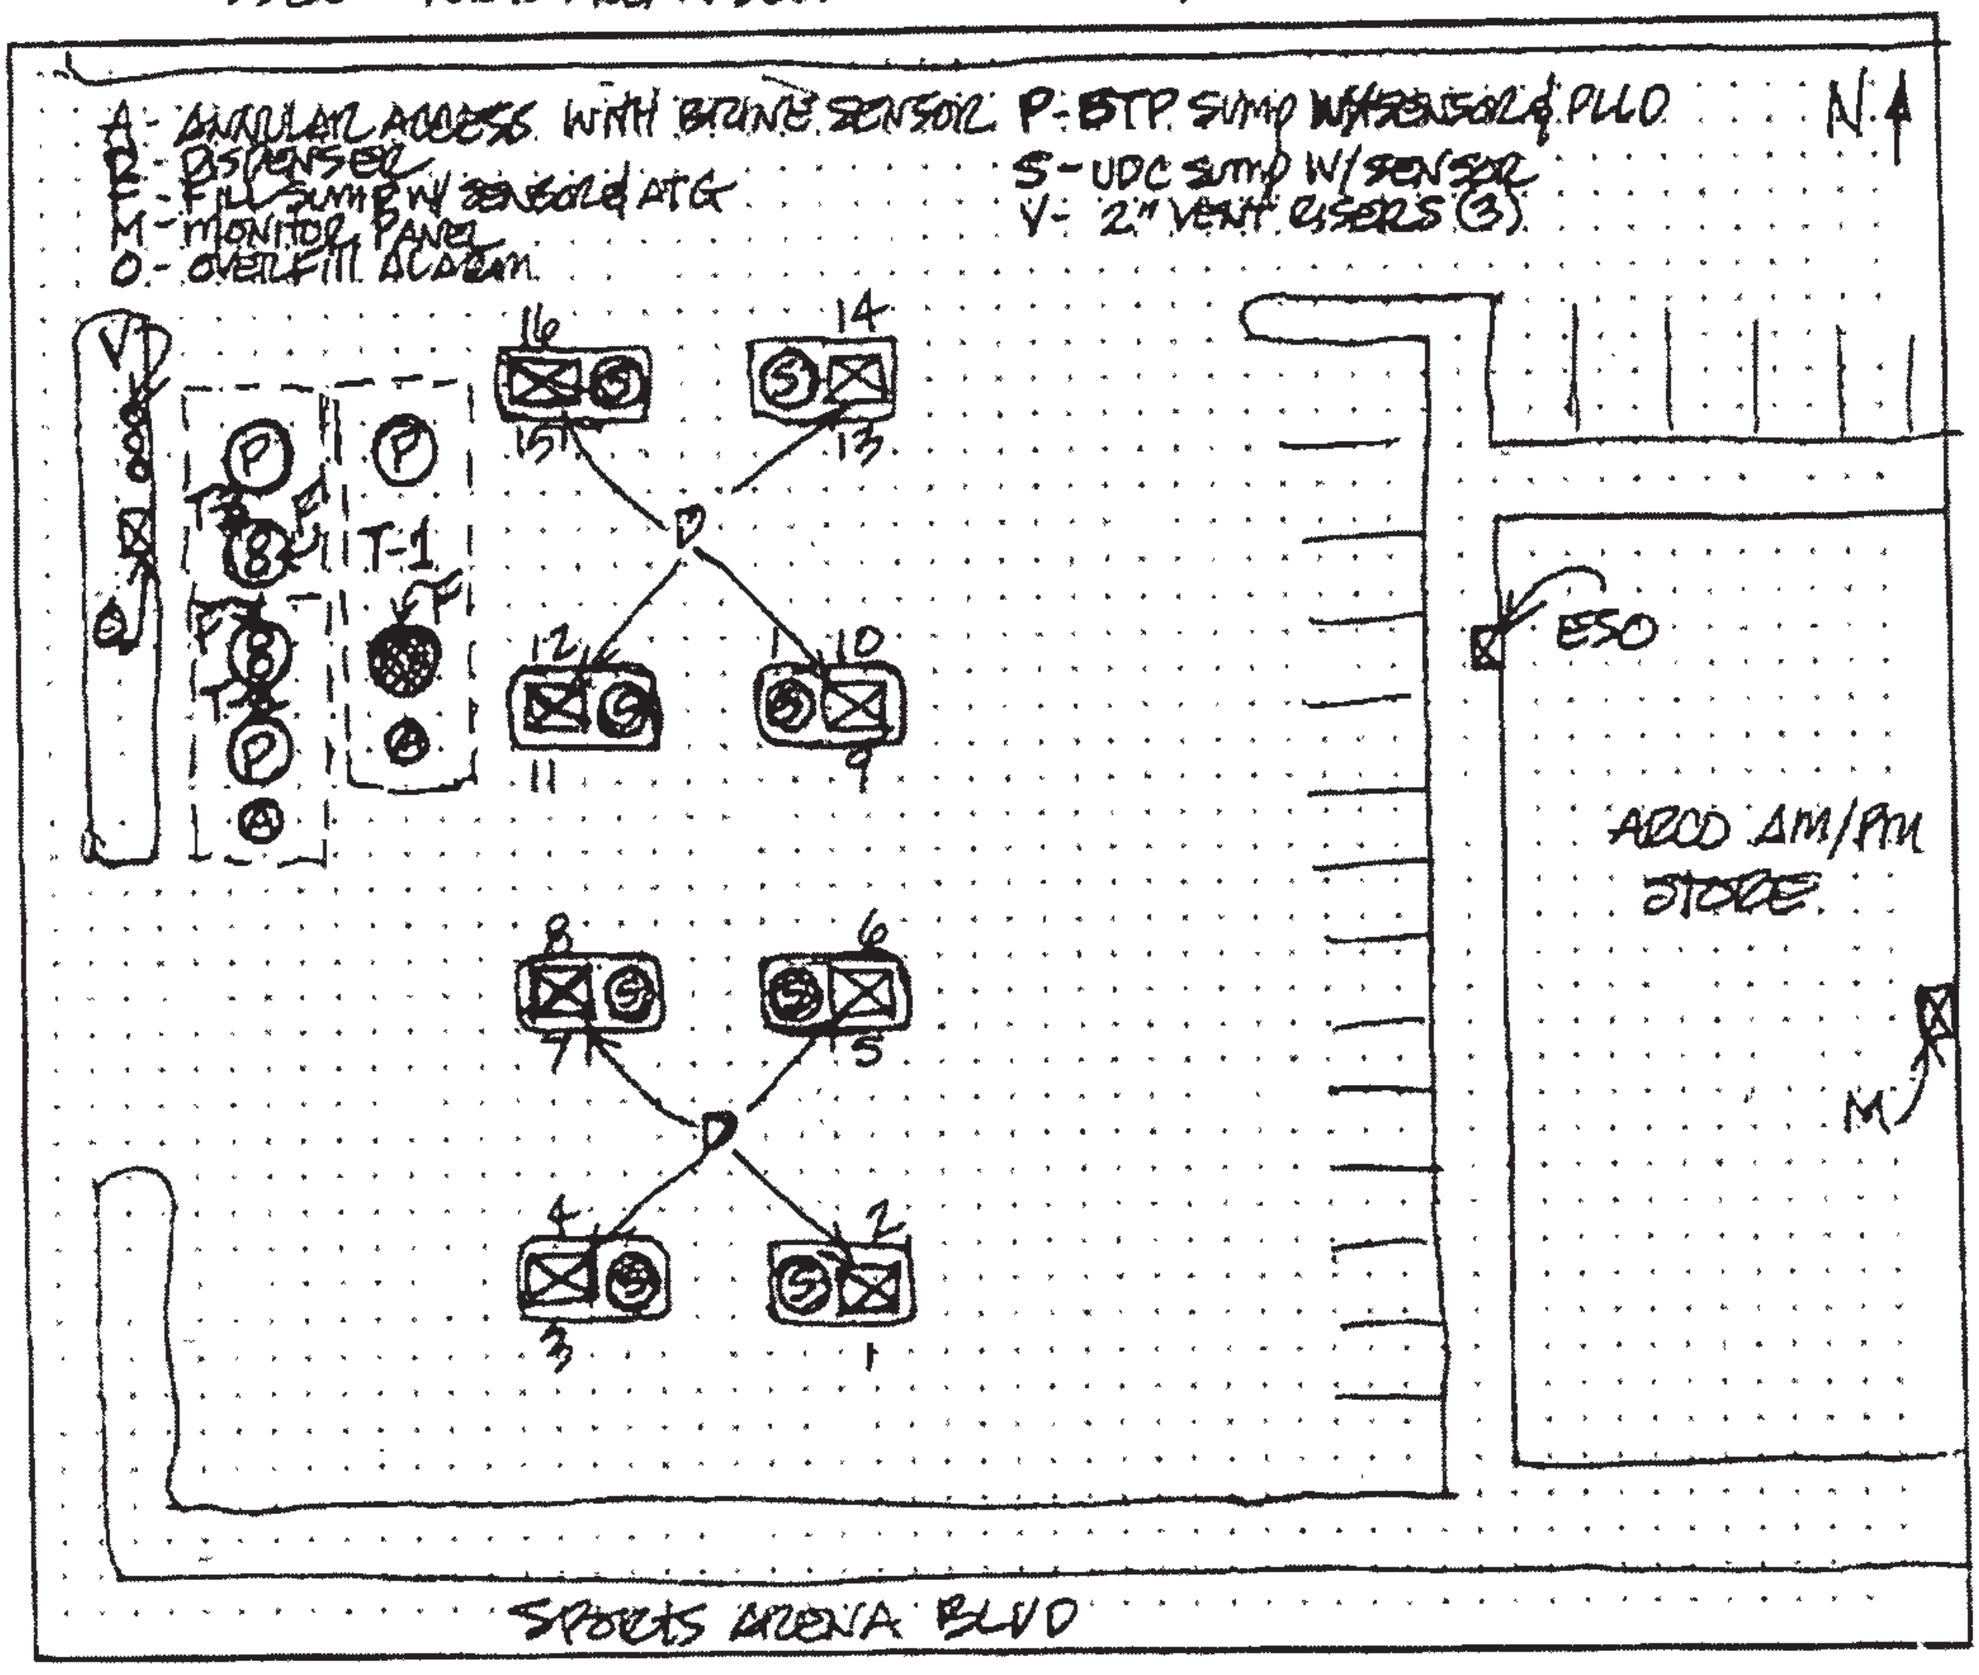
UNDERGROUND STORAGE TANK MONITORING SYSTEM CERTIFICATION

Permit Number:

UST Monitoring Site Plan

Site Address: 3580 SPORTS ARENA BLVD. SAN DIEGO, CA 92110



Date map was drawn:

Instructions

If you already have a diagram that shows all required information, you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

UNDERGROUND STORAGE TANK SECONDARY CONTAINMENT & SPILL CONTAINMENT TESTING REPORT FORM

This form is intended for use by contractors performing initial & periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), must be provided to the facility owner/operator for submittal to the County of San Diego Department of Environmental Health Hazardous Materials Division UST Group.

Permit Number: **Plan Check Number:**

1. FACILITY INFORMATION

Facility Name: SPORTS ARENA ARCO Date of Testing: 2009-07-01	
Facility Address: 3580 SPORTS ARENA BLV, SAN DIEGO, CA 92110	Test Type:
Facility Contact: PAT SULLIVAN Phone: 619-270-9465	☐ Initial ☐ Repair Test
Date Local Agency Was Notified of Testing: 2009-06-25	☐ 6 month ☐ Other:

UST Operating Permit Application – Facility Information Page 1 Instructions

(Formerly SWRCB UST Permit Application Form A)

Complete this form for all new permits, permit changes, or facility information changes. This form must be submitted within 30 days of permit or facility information changes, unless your local agency requires approval prior to making the changes. For changes, submit only that form that contains the change

Submit one UST Operating Permit Application – Facility Information form per facility, regardless of the number of USTs located at the facility. If not already on file with the local agency, the tank owner must submit with this form, a current UST Operating Permit Application – Tank Information form for each UST; a UST Monitoring Plan and a UST Response Plan pursuant to 23 CCR 2632, 2634 and 2641; and, for USTs containing petroleum, a certification of financial responsibility pursuant to 23 CCR 2807.

The following documents, at a minimum, are also required, if applicable (check with your local agency to see if they require submittal or if there are other forms/information needed):

- ☐ Written agreement between UST Owner and UST Operator per Health and Safety Code §25284(a)(3);
- ☐ Letter from the Chief Financial Officer (if using State Cleanup Fund, financial test of self-insurance, guarantee, local government financial test, or Local Government Fund as a financial responsibility mechanism)

Please number all pages of your submittal (Note: Numbering of these instructions matches the data element numbers on the form.)

400. TYPE OF ACTION – Check the reason this form is being submitted. CHECK ONE ITEM ONLY
404. TOTAL NUMBER OF USTs AT SITE – Indicate the number of tanks that will remain on the site after the requested action.
1. FACILITY ID NUMBER – This space is for agency use only.
3. BUSINESS NAME – Enter the complete Business Name. (Same as FACILITY NAME or DBA (Doing Business As)).
103. BUSINESS SITE ADDRESS – Enter the street address of the facility, including building number, if applicable. This address must be the physical location of the facility. Post office box numbers are not acceptable
104. CITY – Enter the city or unincorporated area in which the facility is located
105. ZIP CODE – Enter the zip code of business site The zip + 4 may also be added.
403. FACILITY TYPE – Indicate the type of facility
405. INDIAN RESERVATION OR TRUST LANDS – Check whether the facility is located on an Indian reservation or other trust lands.
407. PROPERTY OWNER NAME –
408. PROPERTY OWNER PHONE –
409. PROPERTY OWNER MAILING ADDRESS –
410. PROPERTY OWNER CITY –
411. PROPERTY OWNER STATE –
412. PROPERTY OWNER ZIP CODE –

} Complete items 407 - 412 for the property owner. Include the area code and any extension number.

428-1. TANK OPERATOR NAME –
428-2. TANK OPERATOR PHONE –
428-3. TANK OPERATOR MAILING ADDRESS –
428-4. TANK OPERATOR CITY –
428-5. TANK OPERATOR STATE –
428-6. TANK OPERATOR ZIP CODE –

} Complete items 428-1 to 428-6 for the UST operator. Include the area code and any extension number. Enter information regarding the Operator of the UST systems. Do not enter designated UST operator information here.

414. TANK OWNER NAME –
415. TANK OWNER PHONE –
416. TANK OWNER MAILING ADDRESS –
417. TANK OWNER CITY –
418. TANK OWNER STATE –
419. TANK OWNER ZIP CODE –

} Complete items 414 - 419 for the UST owner. Include the area code and any extension number.

420. TANK OWNER TYPE – Check the type of tank ownership.
421. BOE NUMBER – Enter your State Board of Equalization (BOE) UST storage fee account number. This fee applies to regulated USTs storing petroleum products and is required before your permit application will be processed. If you do not have an account number with the BOE, or if you have any questions regarding the fee or exemptions, contact the BOE at (916) 322-9669 or by mail at: Board of Equalization, Fuel Taxes Division, PO Box 942879, Sacramento, CA 94279-0030.
423. PERMIT HOLDER INFORMATION – Indicate the party to whom the UST operating permit is to be issued and legal notifications and mailings should be sent. Application for a permit to operate an underground storage tank with the CUPA shall be made by the owner or operator of the Unified Program facility on which the tank is located. Regardless of the box checked, all mailings will be sent to the BUSINESS MAILING ADDRESS (108a-108d) on the BUSINESS OWNER/OPERATOR IDENTIFICATION form HM-9702
406. SUPERVISOR OF DIVISION SECTION OR OFFICE SUPERVISOR – If the facility owner is a public agency, enter the name of the supervisor of the division section or office that operates the UST. This person must have access to the UST records.

APPLICANT SIGNATURE – The application form must be signed, in the space provided, by:

- The UST owner or operator, facility owner or operator, or a duly authorized representative of the owner; or
- If the UST(s) is/are owned by a corporation, partnership, or public agency:
  1.) A principal executive officer at the level of vice-president or by an authorized representative responsible for the overall operation of the facility where the UST(s) is/are located; or
  2.) A general partner or proprietor; or
  3.) A principal executive officer, ranking elected official, or authorized representative of a public agency.

424. DATE – Enter the date the form was signed.
425. PHONE – Enter the phone number of the applicant (i.e., person signing the form). Include the area code and any extension number.
426. APPLICANT NAME – Print or type the full name of the person signing the form.
427. APPLICANT TITLE – Enter the title of the person signing the form.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/29/2024 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 31 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there are 22 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within

approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 41 SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 22 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 10 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 28 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CERS TANKS: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

A review of the CERS TANKS list, as provided by EDR, and dated 10/16/2023 has revealed that there are 10 CERS TANKS sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 134 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 06/07/2021 has revealed that there are 2 DOD sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MCRD SAN DIEGO		SSE 1/2 - 1 (0.669 mi.)	0	108
OLD TOWN SITE 1		ESE 1/4 - 1/2 (0.396 mi.)	0	109

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/28/2023 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 6 DRYCLEANERS sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are

EXECUTIVE SUMMARY

5 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 29 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 18 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
