Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Site History:	In June 1984, four underground storage tanks were removed from the property (two 4,000-gallon and two 2,000-gallon USTs). During removal evidence of a gasoline leak from the tanks was visible. Excavation was conducted during tank removal. Further assisement in 1993 included installing groundwater monitoring wells. Free product was present in three of the five wells at the site. Free product removal began in 1996.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The Used Oil Recycling System (UORS) is managed by the California Integrated Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California

CAUSWAY CLEANERS & LAUNDRY, INC (Continued) **1000390453**

Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Used Oil Recycling System (UORS) is managed by the California Integrated Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Site History:	This Voluntary Assistance Program (VAP) case was opened to evaluate a property based on Phase II results that indicated petroleum and chlorinated hydrocarbons in soil gas. The 1.5-acre Site is identified by County of San Diego Assessor s Parcel Number (APN) 450-802-01-00 and consists of two buildings utilized by several commercial operations. Two dry cleaners and a gasoline service station operated at this Site from approximately 1944 through 1986, at which time the Underground Storage Tanks (USTs) were removed under permit concurrent with the demolition and reconstruction of all on-Site buildings. Based on soil vapor probe (SVP) sampling data from a 2016 Phase II, two areas-of-concern (AOCs) were identified. The first AOC was the former gas station area, located on the western portion of the present parking lot, which exceeded screening levels for petroleum volatile organic compounds (VOCs). The second AOC was the former Frontier Dry Cleaners located in the center of the outdoor parking lot, which exceeded screening levels for chlorinated VOCs (CVOCs) such as PCE and TCE. In September 2021, additional SVPs were advanced by Waterstone Environmental (Waterstone) resulting in a total of 27 SVPs. Twelve Exterior SVPs (SG1 to SG5, SG7 to SG9, SG16 and SG20 to SG22) were installed in the parking lot area to evaluate the quantity and distribution of residual contaminants-of-concern (COCs) from the two AOCs, and the remaining 15 Indoor SVPs (SG6, SG10-SG15, SG17-SG19, SG23-SG27) were installed around the perimeter of the on-Site buildings to evaluate potential indoor vapor intrusion. Soil vapor analysis from several Exterior SVPs located at the former gas station area exceeded screening levels petroleum VOCs. In addition, CVOCs exceeded screening levels both in the area of the former Frontier Dry Cleaners and the existing structure to the south. Because of SV exceedances near the structure, Waterstone conducted two indoor air (IA) sampling events, a 24-hour event on December 16, 2020, and an 8-hour event on January 5, 2021, both including outdoor air (OA) sample points. Sample analysis from both events was provided in a February 2022 Results of Indoor Air Sampling Report (RAI) which indicated that all PCE and TCE concentrations were below their commercial screening levels (SLs) of 2.0 ug/m3 and 3.0 ug/m3, respectively. Nonetheless, IA concentrations from other VOCs compounds did exceed SLs. The CoCs are discussed below including lines of evidence indicating that the source of said CoCs is not from the subsurface. Benzene Although it was noted above its respective SLs in several IA samples, benzene concentrations, albeit lower, were also detected in OA samples suggesting an outdoor source. Moreover, subsurface benzene soil gas concentrations taken from the Building SVPs were all trace or ND indicating a lack of benzene at the subsurface of the building. As such the IA benzene could not be emanating from the subsurface. Although the exact source is unknown, suggestions for its source include indoor materials such as paints, adhesives, detergents, incense, etc., and outside sources such as car exhaust. Carbon Tetrachloride (CT) Although it exceeded SLs in all IA samples, respective OA samples had similar concentrations, strongly

MISSION GARDEN (Continued) **S124384747**

suggesting it was coming from the outside. Furthermore, no levels of CT were noted in any SVP, soil, or groundwater samples, providing additional lines of evidence that, although the source of the CT was unknown, it was clearly not originating from the subsurface. Chloroform Chloroform exceeded SLs in various IA samples but not in any OA samples. However, chloroform was ND or below SLs in all on-Site SV samples, indicating that the chloroform was not originating from the subsurface. Indoor sources would very likely be from water features as chloroform is well known to be a by-product of treated municipal water. Naphthalene Similar to chloroform, naphthalene exceeded SLs in IA samples but was not detected in OA samples. Likewise, it was not noted in SV samples, thus eliminating a subsurface source and suggesting an indoor source, possibly air fresheners or paint. In addition, Waterstone also observed use of incense, a naphthalene source, at the on-Site restaurants. Acrolein - Similar to chloroform and naphthalene, Acrolein exceeded SLs in IA samples, not OA samples, and also was not detected in SV samples, suggesting an indoor source such as smoking, gas stoves, wood-burning fireplaces, or cooking with oils, many of which would be consistent with restaurants located on site. Moreover, observations of incense, another likely source, were also noted. Based on this information, the RAI concludes that the results of IA sample analysis indicate that there are no subsurface vapor intrusion health risks from the dry-cleaning operations or from the former gas station. In 2021, grab groundwater samples were taken from four borings with respective results of up to 11 ug/l, 26 ug/l and 0.7 ug/l for TCE, cis-1,2 DCE, and vinyl chloride, slightly exceeding their respective maximum contaminant levels (MCLs) of 5 ug/l, 6 ug/l and 0.5 ug/l. All other VOCs were below MCLs. In addition, analysis from the on‐Site monitoring well MW‐16, associated with the nearby leaking underground storage tank (LUST) facility, Parsley-Kennedy (H21162-002), has shown trace or non-detect concentrations for petroleum VOCs since 2008. Furthermore, as groundwater is located within a basin designated as having no beneficial uses, there are no threats to beneficial groundwater uses resulting from on-Site CoCs. Waterstone concludes that are no health risks from vapor intrusion from the subsurface, and no risks to the environment including beneficial uses of groundwater. DEHQ concurs with these conclusions. Based on these conclusions, Waterstone recommends no further action. However, if Site use changes in the future, additional sampling and/or evaluation may be necessary, and agency notification may be required. DEHQ also concurs with these recommendations. A 30-day public notification was completed on March 30, 2022, and no comments were received.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
