

MULTIPLE SPECIES CONSERVATION PROGRAM WORKSHOP

The Multiple Species Conservation Program was created to protect San Diego's unique habitats while allowing thoughtful growth in our communities.

This workshop will highlight the 2024 accomplishments of local, State, and Federal partners, including habitat acquisitions, management, and monitoring. It also provides an opportunity for the public and interested stakeholders to learn more about our shared landscapes and the partnerships that support conservation, development, and community access to nature.

Date

Friday, November 7, 2025
