RE: Pendleton Elementary School Solar Panel Installation Project Joint Use Field Impact

Dear Andy,

San Diego Unified School District began a solar panel installation project at Pendleton Elementary School on September 8, 2025. Please accept our apologies for the lack of prior notification.

The solar panels are being installed within the joint use field area, and a portion of the field will be temporarily reduced through January 2026. Maintenance access will remain available through the existing vehicle gates, and pedestrian access will also be maintained during this period.

Attached is the site plan showing:

- The temporary fencing as of September 8
- The relocation of fencing on October 1, which reduces the impacted area
- The location of the new solar panels

All impacted areas will be restored to equal or better condition upon completion of the project.

Please don't hesitate to reach out with any questions.

Best regards,

Gene Fuller
