

ATTENTION - NEW TRASH CONTAINERS ARE COMING

SD Environmental
Services

***Container deliveries begin October 2025
through late summer 2026.***

Find out when yours will arrive.

The City of San Diego Environmental Services Department is delivering new trash and recycling containers as part of a Citywide rollout. The container colors are changing to gray for trash and lighter blue for recycling.

What should I expect? You'll receive your container automatically. All old City trash containers will be removed. Delivery crews will leave new containers at your normal collection location (curbside or alley) with **written instructions** on the bins.

When will my bins arrive, and why do some properties have a different schedule? Use the "Container Delivery Lookup" below to find your date. Deliveries are based on your **collection route** and **service day**. With more than 225,000 households eligible for City-provided trash service, the delivery process is expected to continue over several months.

What bins will I get? You will receive what you ordered in the Portal. If you did not make service level selections, you will automatically receive only **one 95-gallon trash** and **one 95-gallon recycling** container per lot. If you do not already have one, you will get a **95-gallon green** container. If old containers aren't removed, **request pickup** at sandiego.gov/GID.

I want to receive a different size/quantity, so how do I change my selection? You have **30 days** after trash bin delivery to request an exchange of your new trash container(s) and to update your recycling container selections. Recycling containers will be delivered at a later date and cannot be swapped out later.

FIND OUT WHEN YOURS WILL ARRIVE

Check your delivery date online. Visit the new
