Safety Improvements Along Jackson Drive Approved by City Council’s Active Transportation and Infrastructure Committee

SAN DIEGO — Today, San Diego City Councilmember Raul Campillo’s advocacy for increasing safety measures along Jackson Drive paid off as improvements to reduce the speed limit and number of lanes were approved by the City Council’s Active Transportation and Infrastructure (ATI) Committee and forwarded to the full City Council for final approval.

The improvements to Jackson Drive will improve safety along the roadway by reducing the speed limit from 40 to 35 mph between Cowles Mountain and Lake Muray boulevards. Additionally, the number of lanes on Jackson Drive will be reduced from four to two lanes between Lake Shore Drive and Lake Murray Boulevard. Both improvements are expected to significantly slow traffic on the street.

“I’m very proud of the action taken at today’s ATI committee meeting and look forward to gaining full City Council approval so the work can begin as soon as possible,” said Councilmember Raul Campillo. “These are necessary improvements that will make the surrounding community safer for everyone in District 7 and beyond.”

This series of safety improvements follows Councilmember Campillo’s request to install a new all-way stop sign at the intersection of Jackson Drive and Lake Badin Avenue in October 2025.
