Participation is open to eligible federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada. Sourcewell issued a public solicitation for Trailers with Related Equipment, Accessories, and Services from which Supplier was awarded a contract.

Supplier desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires December 20, 2026, unless it is cancelled sooner pursuant to Article 22. This Contract may be extended one additional year upon the request of Sourcewell and written agreement by Supplier.

C. SURVIVAL OF TERMS. Notwithstanding any expiration or termination of this Contract, all payment obligations incurred prior to expiration or termination will survive, as will the following: Articles 11 through 14 survive the expiration or cancellation of this Contract. All other rights will cease upon expiration or termination of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Supplier will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above.

DocuSign Envelope ID: 4B2BDC3B-713F-4FB1-BF52-4A333A8C84A1

Supplier's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

All Equipment and Products provided under this Contract must be new and the current model. Supplier may offer close-out or refurbished Equipment or Products if they are clearly indicated in Supplier's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Supplier warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and are free from defects in design, materials, and workmanship. In addition, Supplier warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Supplier's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that extends beyond the expiration of the Supplier's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution and throughout the Contract term, Supplier must provide to Sourcewell a current means to validate or authenticate Supplier's authorized dealers, distributors, or resellers relative to the Equipment, Products, and Services offered under this Contract, which will be incorporated into this Contract by reference. It is the Supplier's responsibility to ensure Sourcewell receives the most current information.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the price stated in Supplier's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Supplier must permit the Equipment and Products to be

DocuSign Envelope ID: 4B2BDC3B-713F-4FB1-BF52-4A333A8C84A1

returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Supplier as soon as possible and the Supplier will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

Supplier must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Supplier in breach of this Contract if the Supplier intentionally delivers substandard or inferior Equipment or Products.

B. SALES TAX. Each Participating Entity is responsible for supplying the Supplier with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Supplier may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Supplier determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Supplier may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Supplier Development Administrator. This approved form is available from the assigned Sourcewell Supplier Development Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;

DocuSign Envelope ID: 4B2BDC3B-713F-4FB1-BF52-4A333A8C84A1

- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

A fully executed Sourcewell Price and Product Request Form will become an amendment to this Contract and will be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Supplier understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Supplier is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential participating entities to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES. Supplier's employees may be required to perform work at government-owned facilities, including schools. Supplier's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Supplier that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Supplier. Typically, a Participating Entity will issue an order directly to Supplier or its authorized subsidiary, distributor, dealer, or reseller. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell

DocuSign Envelope ID: 4B2BDC3B-713F-4FB1-BF52-4A333A8C84A1

contract number. All Participating Entity orders under this Contract must be issued prior to expiration or cancellation of this Contract; however, Supplier performance, Participating Entity payment obligations, and any applicable warranty periods or other Supplier or Participating Entity obligations may extend beyond the term of this Contract.

Supplier's acceptable forms of payment are included in its attached Proposal. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order, or other required transaction documentation, may be negotiated between a Participating Entity and Supplier, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entities may require the use of a Participating Addendum, the terms of which will be negotiated directly between the Participating Entity and the Supplier or its authorized dealers, distributors, or resellers, as applicable. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements not addressed in this Contract (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements), the Participating Entity and the Supplier may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

D. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, immediately upon notice to Supplier in the event of any of the following events:

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the equipment, products, or services to be purchased; or
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements.

Each calendar quarter, Supplier must provide a contract sales activity report (Report) to the Sourcewell Supplier Development Administrator assigned to this Contract. Payments must be received no later than 45 calendar days after the end of each calendar quarter.

Supplier agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Supplier is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Supplier in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

10	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	-Felling Trailers, Inc. History started in a small welding shop in downtown Sauk Centre, MN in 1954 (then known as Sauk Centre Welding & Machine Works, Inc.). In the beginning, Sauk Centre Welding catered to local farmers and businesses doing repairs and small custom welding and fabrication jobs. In 1974, a young employee (now Chairman of the Board Merle J. Felling) purchased the business from the original longtime owner. Seeing a lack of quality workmanship in many of the trailers that were coming through his shop, Merle started making custom trailers for a few of the local farmers. Within a short time, others started noticing his quality craftsmanship and Merle launched the Felling Trailer product line in 1975. Over the years Merle continued to add to the Felling Trailers product line. In 1985, Felling Trailers moved to its present location at the Southeast Comer of Highway 71 and Interstate 94. In the mid 1990s the facility went through a series of expansions to the production, office, and yard areas increasing its footprint to nearly 175,000 sq. ft. In 2012 Felling Trailers opened a second production facility in Litchfield, MN. With the addition of the new location, the overall total of production and office space grew to over 250,000 square feet. Back in Sauk Centre, Felling Trailers acquired neighboring properties to the east and south of the existing facility in 2015 & 2016. This enabled the production areas to expand and give each department room to work at optimal efficiency. As the production space and team were growing, so was the office staff. In 2018 the company broke ground on its corporate headquarters. The new office complex was designed with ample room for existing and new team members. It also provided space for Felling's Parts & Service department to transition the previous office space into a trailer parts retail store. With this addition, the overall footprint of Felling Trailers, Inc. had grown to 349,000 sq. ft. Felling Trailers has grown because of its commitment to quality craftsmanship and customer satisfaction. 41	Describe any technological advances that your proposed products or services offer.	-Air Ramps - The Air Ramps option eliminates the need for operators to lower or raise the ramps on their Felling trailer. The Air Ramp system does all the lifting for you, helping to prevent back injuries and increase workplace safety. The Air Ramp System is available on 20,000 lb. capacity tag trailers to 100,000 lb. hydraulic detach trailers. Operating via an air bag system that works off of the same supply as the air brake system. Thus, any air-brake equipped truck can operate a Felling Trailer equipped with air ramp system without any other external power source (e.g. battery, gas engine or truck powered hydraulic system). Felling Trailers Air Ramp Technology was even selected as one of the 2013 Contractors' Top 50 New Products winner! -Air Tilt - Felling Trailers' Air Tilt Trailers utilize air, powered from the tow vehicle, to tilt the trailer and optional ramps, eliminating the need for hydraulics. The air power from the tow vehicle fills the air bags, which then raise the trailer smoothly; the air bag will then keep the deck in the tilted position to allow for loading/unloading of multiple pieces of equipment. The deck then lowers itself by releasing the air pressure at a controlled rate to prevent the deck from slamming down. With Felling's Air Tilt Trailers, superior towing capability and balance were achieved by placing the axles further back compared to other tilt trailers on the market. The Felling Trailers' Air Tilt Trailer models are also great for transporting low clearance equipment such as pavers, scissor lifts, forklifts and more with its low-clearance loading angle. With the option of ramps, a load angle as low as 7° can be achieved for loading equipment. Felling Trailers uses a High Grade 80 steel for the main structural beams to increase the trailer's strength, yet reducing the total trailer weight. -EZ-Tilt • Felling Trailers' EZ-Tilt model line is equipped with rotating torsion suspension, the EZ-Tilt Trailer Technology allows for a ground-level loading unit that makes the job of loading low clearance; cumbersome equipment like floor sweepers/scrubbers and scissor lifts a simplified task. Great for rental yards offering the versatility to load a variety of equipment quickly, safely and get the customer on their way. The EZ Tilt is a universal trailer, the electric/hydraulic lift system with the power up and down gives the operator the ability to load and deliver two scissor lifts at a time and capacity to load a skid loader. -Air Bi-fold Ramp System -- The Air Bi-Fold ramps system is part of Felling's Controlled Flow Air Ramp series which the company launched over a decade ago, all air-powered, no batteries, no hydraulics. The new Air Bi-Fold system is a revolutionary system that is perfect for the paving and low clearance markets. A key feature of Felling's design is in the operation of the flip ramp. The flip ramp locks out fully when extending, preventing scraping, or marring of the ground, which is undesirable, especially if it's a new surface of any kind. Another key feature is Felling's controlled flow air ramp technology which provides for soft ground contact of the ramp, keeping new surfaces free from being damaged. -Auto-Locking Reel Bar System -Equipped on all "R" Series products starting in 2023. - The locking system provides enhanced safety features and ease of operation. The auto-locking reel bar system eliminates the use of pins and brackets, it now utilizes a non-removable locking plates system. The locking plates automatically open when lowering the reel to the ground for unloading as the reel is loaded and raised; the locking plates automatically close to contain the reel bar. When the reel is raised to the transport position, spring-loaded pins automatically locks the slides into place. When the pins lock, they provide visual validation that the reel is properly locked in for transport. A green marker on the spring-loaded pins is only visible when the reel bar is properly secured. These indicators can be viewed from the rear-view mirrors of the tow vehicle. -Please reference attachments in the "Miscellaneous" upload -"Drop Deck Air Ramp System" attachment -"Green Air Bi-fold Ramp System" attachment

42	Describe any "green" initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	-Energy Efficient Lighting Systems-Felling took steps to maximize energy usage by upgrading lighting systems from the use of metal halide bulbs to T8 fluorescent bulbs. "The benefits to the T8 greatly out weight the transition cost from the metal halide," said Paul Radjenovich, Felling's VP of Operations. The T8 fixtures use 1/4 of the electricity of the previous metal halide fixtures, have 30 less light loss, and provide 40 times longer life expectancy. Better lighting, better work environment, the T8 also provides a higher color rendering index (CRI) of 85 compared to the 65-70 that the metal halide bulb provides. The higher the CRI makes objects and surfaces in a room appear more as they would under natural lighting, increasing the eye's ability to see contrast, detail, and reducing eyestrain. This not only creates a positive environmental impact, but also saves the company significantly in operational costs. -Proper Disposal and Recycling of Special Materials- The company implemented a partnership with Stericycle, a waste management solution provider, whose services handle pick-up and proper disposal of liquid paint waste, fluorescent light bulbs, metal halide bulbs, and oil absorbent rags to ensure environmental safeguarding, protection of people, and organizational compliance. In the period of one year, nearly 8,000 gallons of paint waste was reused as fuel in cement kilns, 165 gallons of paint waste was considered waste-to-energy and 500 light bulbs were recycled. -Ventilation Systems for Better Air Quality- Air quality plays a significant part in employee comfort, safety, and performance in a manufacturing environment. Felling recognized this and put into motion their air quality initiative. The company invested in ventilation systems that capture welding fumes and gases at their source and remove them from the worker's breathing zones. The captured air is then filtered through a high-efficiency canister filter with a 99.9% efficiency rate, exceeding OSHA requirements. Felling's blast booth is also equipped with its own air filtration system that not only filters the air but returns it to the welding shop floor helping to maintain the heat of the manufacturing area and better regulate the temperature. Felling Trailers work environment has improved dramatically over the years, not only the air quality but lighting and temperature control as well. The air exchangers allow us to maintain a higher room temperature in the winter by not sucking out a majority of the heat with the dirty air. -Felling also implemented a system that utilizes heat produced from the compressor room that houses four (4) large compressors. The system is configured with two modes: summer and winter. In winter mode, the warm air is pulled, filtered and pushed into the drying room supplementing the heat that would otherwise be produced via radiant gas heat from the ceiling. In the summer mode, the warm air is pulled, filtered and pushed outside. The company also took steps to reduce the amount of hazardous air pollutants by using a new paint vendor that offers paint with only 4% of the pollutants found in their previous paint.	*

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor's objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:
    1. Included on the "Specially Designated Nationals and Blocked Persons" list maintained by the Office of Foreign Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

    2. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://sam.gov/SAM/; or

    3. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated

by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Patrick Jennissen, V.P. Sales/Marketing, Felling Trailers, Inc.

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

City of San Diego

CONTRACTOR STANDARDS

Pledge of Compliance

The City of San Diego has adopted a Contractor Standards Ordinance (CSO) codified in section 22.3004 of the San Diego Municipal Code (SDMC). The City of San Diego uses the criteria set forth in the CSO to determine whether a contractor (bidder or proposer) has the capacity to fully perform the contract requirements and the business integrity to justify the award of public funds. This completed Pledge of Compliance signed under penalty of perjury must be submitted with each bid and proposal. If an informal solicitation process is used, the bidder must submit this completed Pledge of Compliance to the City prior to execution of the contract. All responses must be typewritten or printed in ink. If an explanation is requested or additional space is required, Contractors must provide responses on Attachment A to the Pledge of Compliance and sign each page. Failure to submit a signed and completed Pledge of Compliance may render a bid or proposal non-responsive. In the case of an informal solicitation or cooperative procurement, the contract will not be awarded unless a signed and completed Pledge of Compliance is submitted. A submitted Pledge of Compliance is a public record and information contained within will be available for public review except to the extent that such information is exempt from disclosure pursuant to applicable law.

By signing and submitting this form, the contractor is certifying, to the best of their knowledge, that the contractor and any of its Principals have not within a five (5) year period – preceding this offer, been convicted of or had a civil judgement rendered against them for commission of a fraud or a criminal offense in connection with obtaining, attempting to obtain or performing a public (Federal, State or local) contract or subcontract.

"Principal" means an officer, director, owner, partner or a person having primary management or supervisory responsibilities within the firm. The Contractor shall provide immediate written notice to the Procurement Contracting Officer handling the solicitation, at any time prior to award should they learn that this Representations and Certifications was inaccurate or incomplete.

The City of SAN DIEGO

Work Force Report

HISTORY

The Work Force Report (WFR) is the document that allows the City of San Diego to analyze the work forces of all firms wishing to do business with the City. We are able to compare the firm's work force data to County Labor Force Availability (CLFA) data derived from the United States Census. CLFA data is a compilation of lists of occupations and includes the percentage of each ethnicity we track (American Indian or Alaska Native, Asian, Black or African-American, Native Hawaiian or Pacific Islander, White, and Other) for each occupation. Currently, our CLFA data is taken from the 2010 Census. In order to compare one firm to another, it is important that the data we receive from the consultant firm is accurate and organized in the manner that allows for this fair comparison.

WORK FORCE & BRANCH WORK FORCE REPORTS

When submitting a WFR, especially if the WFR is for a specific project or activity, we would like to have information about the firm's work force that is actually participating in the project or activity. That is, if the project is in San Diego and the work force is from San Diego, we want a San Diego County Work Force Report[1]. By the same token, if the project is in San Diego, but the work force is from another county, such as Orange or Riverside County, we want a Work Force Report from that county[2]. If participation in a San Diego project is by work forces from San Diego County and, for example, from Los Angeles County and from Sacramento County, we ask for separate Work Force Reports representing your firm from each of the three counties.

MANAGING OFFICE WORK FORCE

Equal Opportunity Contracting may occasionally ask for a Managing Office Work Force (MOWF) Report. This may occur in an instance where the firm involved is a large national or international firm but the San Diego or other local work force is very small. In this case, we may ask for both a local and a MOWF Report[1, 3]. In another case, when work is done only by the Managing Office, only the MOWF Report may be necessary.[3]

TYPES OF WORK FORCE REPORTS:

Please note, throughout the preceding text of this page, the superscript numbers one [1], two [2] & three [3]. These numbers coincide with the types of work force report required in the example. See below:

[1] One San Diego County (or Most Local County) Work Force – Mandatory in most cases

[2] Branch Work Force *

[3] Managing Office Work Force

**Submit a separate Work Force Report for all participating branches. Combine WFRs if more than one branch per county.*

Torque Requirements

It is extremely important to apply and maintain proper wheel mounting torque on your trailer axle. Torque is a measure of the amount of tightening applied to a fastener (nut or bolt) and is expressed as length times force. For example, a force of 90 pounds applied at the end of a wrench one foot long will yield 90 lbs./ft of torque. Torque wrenches are the best method to assure the proper amount of torque is being applied to a fastener.

Note: Wheel nuts or bolts must be applied and maintained at the proper torque levels to prevent loose wheels, broken studs, & possible dangerous separation of wheels from your axle.

Be sure to use only the fasteners matched to the cone angle of your wheel (usually 60˚ or 90˚.) The proper procedure for attaching your wheels is as follows:

1. Start all bolts or nuts by hand to prevent cross threading.
2. Tighten bolts or nuts in the following sequence.
3. The tightening of the fasteners should be done in stages. Following the recommended sequence, tighten fasteners per wheel torque requirements diagram:

4. Wheel nuts/bolts should be torqued before first road use and after each wheel removal. Check and re-torque after the first 50 miles and again at 100 miles. Check periodically there after.

PAINT & PREPARATION

Certainly one of the most important qualities of a steel trailer is the preparation it receives before painting and the quality of primer and paint.

All materials used in the production of Felling Trailers, are of the highest quality commercially available. The trailer is assembled, steel grit blasted, two coats of primer, painted with three coats of topcoat with a hardener, and fully cured in a dust free room before exiting the building.

“PPG products” are used exclusively, including the top of the line urethane primer and high solids low V.O.C. compliant urethane top coat on all Felling Trailers.

Preparation and painting processes are monitored daily by in house technicians, “PPG representatives” and Felling Trailers, Inc. in house quality control teams to insure consistency in quality. Felling Trailers come with a 3-year warranty on the paint.
