Alvarado 2nd Extension Pipeline Project

Valve Installations - Friars Rd. Between Frazee Rd. and Qualcomm Wy.

Crews on the Project will be working at select locations on Friars Road between Frazee Road and Qualcomm Way to install 48' inch valves along the pipeline alignment during daytime hours. Traffic control will be in place to accommodate excavation and installation of the valves.

This portion of work is expected to last approximately three weeks.

To ensure everyone's safety, all construction activity will be contained within the marked work zone. After the pipeline has been installed, crews will temporarily pave over the trench before moving to the next section. Throughout this work, crews will maintain the cleanliness of the work zone to minimize any dust leaving.

Future updates on the phasing and schedule of work will be provided via email to subscribers, please feel free to forward this email to friends or neighbors and encourage them to join the subscriber list.
