ENTITY CONSIDERING PROJECT APPROVAL: City Council

ENVIRONMENTAL DETERMINATION: Categorically exempt from CEQA pursuant to CEQA State Guidelines Section 15332 (In-Fill Development).

ENTITY MAKING ENVIRONMENTAL DETERMINATION: City of San Diego

STATEMENT SUPPORTING REASON FOR ENVIRONMENTAL DETERMINATION: The City of San Diego determined that the project would qualify to be categorically exempt from CEQA pursuant to section 15332, In-Fill Development Projects. The In-Fill Development Projects exemption applies to projects characterized as in-fill that meet the conditions described in sections 15332(a) - (e). Consistent with section 15332(a), the proposed project would be consistent with the applicable general plan designation and policies as well as zoning regulations. The project is consistent with policies and regulations pertaining to the Residential Single Dwelling Unit designation and the zoning code. Consistent with section 15332(b), the project would occur within City limits, the project

site is no more than 5 acres and is substantially surrounded by urban uses. As defined in Public Resources Code section 21072, qualified urban uses mean *any residential, commercial, public institutional, transit or transportation passenger facility, or retail use, or any combination of those uses.* Per Public Resources Code section 21085.2(a)(4), *“substantially surrounded” means at least 75 percent of the perimeter of the project site adjoins or is separated only by an improved public right-of-way from parcels that are developed with qualified urban uses.* In accordance with section 15332(c), the site has no value as a habitat for endangered, rare or threatened species because the site is entirely developed. Approval of the project would not result in significant effects relating to traffic, noise, air quality, or water quality as outlined in section 15332(d). The proposed project would be under the 300 ADT trip generation screening criteria and therefore presumed to be less than significant. The project would comply with SDMC Sections 59.5.401 (Sound Level Limits) and 59.5.0404 (Construction Noise), therefore noise impacts would be less than significant. The project would comply with applicable local, state and federal regulations, thereby also ensuring that significant air quality impacts would be less than significant. The project would adhere to applicable City, state, and federal requirements, thereby ensuring impacts are less than significant. Lastly, consistent with CEQA Guidelines section 15332(e), the project would be adequately served by all required utilities and public services, as the site is located within an urban area where all required utilities and public services exist.

The exceptions outlined in CEQA Guidelines section 15300.2 were reviewed, and it was determined that none apply. Although not applicable to the Class 32 Infill Development exemption, the project is not located in an environmentally sensitive area as defined by CEQA section 15300.2(a) (applicable to exemption Classes 3,4,5,6, and 11 only). The project is expected to have no significant cumulative impact, as identified in CEQA Guidelines section 15300.2(b). No significant effect due to unusual circumstances would result from the project as identified in CEQA Guidelines section 15300.2(c). Considering the nature of the project and its location, no scenic highway impact would occur as identified in CEQA Guidelines section 15300.2(d). The site is not located on a list compiled pursuant to Section 65962.5 of the Government Code as identified in CEQA Guidelines section 15300.2(e). No historic resources exist on the site, and the project would not cause a substantial adverse change in the significance of a historical resource as identified in CEQA Guidelines section 15300.2(f). Therefore, none of the exceptions apply.
