

The City of San Diego

M E M O R A N D U M

DATE: July 6, 2026

TO: Recycle Water Customers

FROM: Hudon McLintock, Associate Engineer, Public Utilities Department

SUBJECT: Notification of Recycled Water Shutdown

To support required system work, a planned water service interruption will occur on Sunday July 19. The interruption will affect all customers in the North City Water Reclamation Plant. Customers are encouraged to plan for the temporary unavailability of recycled water during this time.

Based on current assessments, water service is estimated to be restored by Monday, July 27, 2026. This estimate may change depending on site conditions, repair progress, or unforeseen complications. Crews will continue working to restore service as quickly and safely as possible.

After the restoration of recycled water service, customers may notice temporary air in their plumbing lines and fluctuations in water pressure. This is a normal occurrence following system disruptions. We recommend that customers check their recycled water irrigation systems and release any trapped air before resuming normal operation. If issues continue for an extended period, please contact our service support for assistance.

REASON FOR SHUTDOWN/OUTAGE	AREA AFFECTED	START DATE	COMPLETION DATE
Schedule Shut Down Of North City Water Reclamation Plant	City of San Diego	7/19/2026	7/27/2026

Additional information on the Recycled Water Program and other important water infrastructure projects is available online at www.sandiego.gov/water.
