ATTACHMENT F

IN-USE OFF-ROAD DIESEL FUELED FLEET REGULATION (OFF-ROAD REGULATION) COMPLIANCE

The California Air Resources Board (CARB) approved amendments to the Off-Road Regulations which can be found at 13 California Code of Regulations (CCR) sections 2449, 2449.1, and 2449.2. These amendments apply to any person, business, or government agency who owns or operates within California any vehicles with a diesel-fueled or alternative diesel fueled off-road compression-ignition engine with maximum power (max hp) of 25 horsepower (hp) or greater provided that the vehicle cannot be registered and driven safely on-road or was not designed to be driven on-road, even if it has been modified so that it can be driven safely on-road. See 13 CCR section 2449 (b) for the full list of vehicles covered by these Off-Road Regulations.

Beginning January 1, 2024, Contractor shall be subject to the requirements below. No Contractor or public works awarding body, as applicable, shall enter into a contract with a fleet for which it does not have a valid Certificate of Reported Compliance for the fleet and its listed subcontractors, if applicable, prior to entering into a new or renewed contract with that fleet. Contractor shall comply with the following requirements:

- (1) For a project involving the use of vehicles subject to the Off-Road Regulation, Contractor must obtain copies of the valid Certificates of Reported Compliance, as described in 13 CCR section 2449(n), for the fleet selected for this Contract and their listed subcontractors, if applicable, prior to entering into a new or renewed contract with that fleet and provide copies of such Certificates of Reported Compliance to the City within 10 days of issuance of the Notice of Intent to Award letter. Contractor shall enter into a contract with a fleet for which it does not have a valid Certificates of Reported Compliance for the fleet and its listed subcontractors. City shall not enter into a contract with Contractor until all current Certificates of Reported Compliance for the fleet to be used on this Project are provided by Contractor.
- (2) The Certificates of Reported Compliance received by Contractor for this Project must be retained by Contractor for three years after the Project's completion. Upon request by CARB, these records must be provided to CARB within five business days of the request. Additionally, upon request by City, these records must be produced to City within five business days of the request.
- (3) For emergency contracts that meet the definition of "emergency operations" as defined in 13 CCR section 2449(c)(18), they are exempt from the requirements in 13 CCR section 2449(i)(1)-(3) and sections (1) and (2) above, but must still retain records verifying vehicles subject to the regulation that are operating on the "emergency operations" project are actually being operated on the project for "emergency operations" only. These records, as described in more detail below in section (B) must be retained by Contractor for three years after completion of the Project and upon request from either CARB or the City, Contractor shall provide those records to the requesting party within five business

days. All other emergency contracts that do not meet the definition of “emergency operations” must comply with the requirements above and 13 CCR section 2449(i)(1) – (3).

A. “Emergency Operations” is defined as:

1. Any activity for a project conducted during emergency, life threatening situations, where a sudden, unexpected occurrence that poses a clear and imminent danger, requiring immediate action to prevent or mitigate the loss or impairment of life, health, property, or an essential public service; or in conjunction with any officially declared disaster or state of emergency, as declared by an authorized health officer, agricultural commissioner, fire protection officer, or other authorized health officer;
2. Any activity for a project conducted by essential service utilities to provide electricity, natural gas, telephone, water, or sewer during periods of service outages and emergency; or
3. Operations including repairing or preventing damage to roads, buildings, terrain, and infrastructure as a result of an earthquake, flood, storm, fire, other infrequent act of nature, or terrorism. Routine maintenance or construction to prevent public health risks does not constitute emergency operations under the Off-Road Regulations.

B. The records retained by Contractor for “emergency operations” projects must include:

1. A description of the emergency;
2. The address or a description of the specific location of the emergency;
3. The dates on which the emergency operations were performed; and
4. An attestation by the fleet that the vehicles are operated on the Project for “emergency operations” only.

Beginning January 1, 2024, Contractor is also subject to the requirements described in 13 CCR section 2449(j).

(1) Between March 1 and June 1 of each year, Contractor must collect new valid Certificates of Reported Compliance for the current compliance year, as defined in 13 CCR section 2449(n), from all fleets that have an ongoing contract with Contractor as of March 1 of that year. Contractors shall not write contracts to evade this requirement.

(2) Contractor shall only allow fleets with valid Certificates of Reported Compliance on the Contractor's job sites.

(3) If Contractor discovers that any fleet intending to operate vehicles subject to this regulation for Contractor does not have a valid Certificate of Reported Compliance, as defined in 13 CCR section 2449(n), or if Contractor observes any noncompliant vehicles

subject to the regulation on Contractor's job site, then Contractor must report the that to CARB at <https://calepacomplaints.secure.force.com/complaints/Complaint>, or email dieselcomplaints@arb.ca.gov, for each fleet without a valid Certificate of Reported Compliance or each noncompliant vehicle, as applicable, within five business days of such discovery. See 13 CCR 2449(n) for the information required to be disclosed to CARB when reporting non-compliance.

(4) Upon request by CARB, Contractor must immediately disclose to CARB the name and contact information of each responsible party for all vehicles subject to this regulation operating at the job site or for Contractor.

(5) Contractor shall prominently display signage for any project where vehicles subject to this Off-Road Regulation will operate for 8 calendar days or more. The signage must be posted by the eighth calendar day from which the first vehicle operates. The signage will be in lettering larger than size 14-point type and displayed in a conspicuous place where notices to employees are customarily posted at the job site or where there is employee foot traffic. If one of the above locations is also viewable by the public, it should be posted at that location. An exemption to this posting requirement is permitted if the operational time of a project is 7 calendar days or less. The signage must include the following language, verbatim:

(A) "Who does the In-Use Off-Road Regulation Apply to?

The In-Use Off-Road Diesel-Fueled Fleets Regulation (Off-Road Regulation) applies to all self-propelled off-road diesel vehicles 25 horsepower or greater and most two-engine vehicles (except on-road two-engine sweepers) owned or operated in California. This includes vehicles that are rented or leased (rental or leased fleets)."

(B) "In-Use Off-Road Regulation Requirements

Idling Limit: Vehicles cannot idle longer than five minutes. There are exceptions for vehicles that need to idle to perform work.

Labeling: Vehicles must be labeled with a CARB assigned equipment identification number (EIN). The EIN shall be white on a red background, unless the vehicle is part of a captive attainment area fleet, in which case the EIN shall be white on a green background.

The EIN shall be located in clear view on both sides of the outside of the vehicle."

SYSTEM SUPPORT

System Support is FORTÉ’s fully entitled service and support package that focuses on keeping your Unified Collaboration (UC), Digital Media (DM) and Audiovisual (AV) systems working at their peak performance. Because FORTÉ focuses on the human impact of these systems, we not only support the equipment, but also the end users of your systems.

Customer Care is the most comprehensive and flexible of all our managed service packages. We can apply our expertise and our proven support processes to support your UC, DM, and AV ecosystems. FORTÉ will deliver our offered entitlements in a tiered workflow model that provides support cases at an entry level for initiated incidents. From there, FORTÉ will follow an ITIL based model for remote remediation and on-site dispatch, as necessary. Specific resolver groups and subject matter experts (SMEs) will be alerted for any issue that cannot be easily remedied with Tier 1 or Tier 2 support staff.

FORTÉ has a standard three level severity protocol and a single level for requests. Our severity levels are Critical (P1), Standard (P3), and Request (P4). Service Levels and response targets are based on Priority. Any needed information, feature enhancements, administrative inquiries are all classified as a request. The following is a severity summary and standard target percentages are listed in the table below.

Target Percentage for Standard Level Agreements (SLA)

Priority	Details	Incident Management Response	Remote Support Response	Onsite Dispatch (if included)	Target (%)
Critical (P1)	Multiple devices are down, unable to serve data, in a state of frequent or repeating "panic" or "hang," or is in a state of degraded performance sufficient to prevent normal business operations. At this severity, both FORTÉ and client must commit the appropriate personnel to restore the system to a functional state or until a mutually agreeable workaround is provided. SYSTEM SUPPORT WORKFLOW

FORTÉ follows an Information Technology Infrastructure Library (ITIL) framework with our approach to technology services. Generally, our tiered workflow approach will follow this structure:

1. Incident is reported via monitoring (when purchased), phone, email, or portal (when available)
2. Incident is logged in ServiceNow and triaged (Tier 1)
3. UC / AV / DM Troubleshooting and Remote Resolution (Tier 2)
 - a. Tier 2 remediation (and SLA) begins after Tier 1 triage has been completed.
4. Dispatch Escalation and Resolution (Tier 3)
 - a. Tier 3 Escalation (and SLA) begins after Tier 2 remediation has been attempted.

SERVICE COVERAGE TIME & TIER LEVELS DESCRIPTION

Coverage hours for the ProSupport department are defined as:

8 x 5	FORTÉ will provide 8 x 5 coverage across the time zone locations of the systems under coverage (North America only)
-------	---

FORTÉ ProSupport department is the initial contact point for any incoming incident. Upon identification of an issue, the ProSupport team will attempt to restore the technology service back to normal operations. Remediation activities will take place at different tiers of service, but all following a specific workflow. A general description of what happens at each tier level is as follows:

TIER 1 SERVICES:

Tier 1 services are the initial point of contact for any issue and are primarily made up of Incident Management responsibilities. Typical responsibilities for Tier 1 include:

- Taking ownership of incidents in our ServiceNow ITSM system for all issues reported or alerted on. Each incident request will have a unique reference number which is used to allow the support staff to quickly locate, add to or communicate the status of the user's issue or request.
- Assign a severity or update the severity of each incident (Critical, Standard, or Request)

- Provide electronic receipt notification for each incident.
- Provide rapid response and initial triage and technical support.
- Perform remote trouble isolation, resolution, or escalation to a Tier 2 Technician if needed.
- Ongoing status updates and case management through incident resolution.

TIER 2 SERVICES:

Tier 2 services are made up of various remote resolver groups. Escalations will take place at this level. FORTÉ will engage with a remote resolver that specializes in the incident in question. Typical responsibilities for Tier 2 include:

- Specific fault isolation down to the component level.
- Perform specific hardware configuration changes.
- Perform overall system configuration changes.
- In-depth analysis, log analysis, fault tracking and tracing.
- In-depth understanding of the core technologies utilized for corrective action.
- Promote the incident to Tier 3 escalation as needed.

TIER 3 SERVICES (available as SSA master number - if included):

Tier 3 services are made up of onsite resources that are available for dispatch. The ProSupport team will take the learnings from Tier 1 and Tier 2 teams and dispatch a site technician with the correct repair or replacement technology to fully resolve the incident. Typical responsibilities for Tier 3 include:

- Room repair and configuration changes.
- Control and audio system programming.
- Hardware swaps of on-hand critical components.
- Coordination of replacement parts.
- RMA or equipment returns to the manufacturer.
- Advanced diagnostic troubleshooting of cable paths and component level devices.
- Software and firmware updates, as well as identification of incompatible revisions.
- Acceptance testing of the resolved system.
- System health checks (preventative maintenance).
- System reimaging to correct OS/BIOS failures or to generally reconstruct a system back to functionality.

PROBLEM MANAGEMENT:

FORTÉ has a proven problem management process aimed to resolve the root causes of any Tier 3 incidents that are unresolved. Unfortunately, there are occasions where multiple issues happen across multiple platforms. These issues are escalated into an ITIL Problem. A problem in this context is the unknown underlying cause of one or more incidents, and a known error is a problem that is successfully diagnosed and for which either a work-around or a permanent resolution has been identified. Problems can also be identified from a single significant incident, indicative of a single error, for which the cause is unknown, but for which the impact is significant.

A known error is a condition identified by successful diagnosis of the root cause of a problem, and the subsequent development of a work-around. Problem management differs from incident management in that Problem Management aims primarily to find and resolve the root cause of a problem and thus prevent further incidents while the purpose of Incident Management is to return the service to normal level as soon as possible, with the shortest possible business impact.
